I had my Yeasu FT 50r stolen in 1998 and police brought it back aug 3,
2007.
I have its original battery charger (yaesu) still in working condition
but the radio is completely
dead.
Anyone have an idea on what to check first !!!

William,

There are two factors at work here:

1. IC technology has improved to the point where it is possible to throw together a converter with cheap parts that will behave itself well enough for a manufacturer to eschew an FM RF stage.

2. What we're talking about here is NOT a quality radio. Such an arrangement (FM with no RF stage) will only appear to work well in an big-city urban environment with a whole bunch of 100 KW monster FM stations close by. In the USA, that means places like NYC, Chicago, LA San Francisco, and the like. These radios are sold in grey-market shops, flea markets, and other bazaar-like places in urban centers to unsophisticated and undiscriminating consumers. Take them out of that environment and their shortcomings quickly become apparent. No name-brand manufacturer such as Sony or GE would ever stoop so low on the cheapness scale as this-it is strictly a domain for the no-name brands from China.

BTW, I would say that the Sams book you got underrepresents the number of 1960s transistor sets with AM RF stages. There was a real competition among manufacturers back in those days, and sensitivity was a major selling point. I'd say about 75% of the 1960-1965 era transistor sets I own (most of which are larger than pocket size) have an AM RF stage, and a lot of those are amazingly hot on the AM BC bands-as hot as my better 1930s tube radios in many cases. If you take stock of those that also have shortwave bands, the percentage with AM RF stages jumps to almost 100%

Later on in the decade, the desire for sensitivity seemed to wane in comparison to the desire to market and sell a radio at a low price. For most radios thereafter, that meant bye-bye to an RF stage-which is exactly why the Superradio and CC radios have their market niche now.

Thanks for the additional info and clarification. As long as we're talking about dirt-cheap FM radios aimed at urban listeners, I'm not upset.

The Sony EFM-117 in this manual -- which I have several non-working samples of, and owned as a teenager -- has a long ferrite rod, but no AM RF amp.

1314. FT480R repair

Newsgroup: rec.radio.amateur.equipment
Date: 2007-08-08 15:50:20 UTC
From: Anonymous <me@privacy.net>
Message-ID: <f9contgon1@aioe.org>

I need to replace the T/R relay on an FT480R.
(Intermittent Rx, curable by a quick blip on TX)

I don't have an exact replacement, so I'll use a
Varley 12V relay, with suitable mods to the driving cct,
and dangle the relay in the space behind the front panel.

Is there a knack to removing the main board without first
unsoldering the numerous connections? (i.e., can it just
be a tedious job, or must it be downright finicky?)

There is a second pair of change-over contacts on the
relay, but with both outputs wired together...this would seem
to suggest some form of muting effect that deals only with
the T/R or R/T changeover period. Any ideas?

From the circuit diagram:

The relay switches two things:

Antenna (Rx/Tx)

13.8V to the Tone unit.

One side of the relay coil is to the 13.8V internal rail, other side is to the Main Unit and, unless it is very convoluted, isn't connected to either set of relay contacts nor do the two sets of contacts seen to be connected to each other.

I've done one of these before and, as I recall, "pin for pin" relays were available- I think Farnell.

I imagine the design as a whole would be a bit different from the usual
concepts, as I seem to remember it uses one or more tunnel-diodes.

The same cct is used for both RX AGC and TX ALC and
it looks as thought the change-over time between sets of contacts
is used to discharge the cct in preparation for the other mode.

Anyway, anybody done maintenance and know the answer to
lifting out the main board? (The Maintenance Service Manual
offers no help in this regard)

I had to replace a crystal on the PLL board in my FT480R, it wasn't all that difficult to remove and that might get you access to what you need on the Main board.

Have you tried getting a replacement relay from Yaesu? They had my FT480 crystal and a crystal I needed for an FT290 and they weren't as expensive as I thought they'd be... " For customer service, technical support or parts, please call 714-827-7600."

An interesting suggestion, thanks....should certainly get me to the
underside
of the main board.

I've a junk box going back 40 years with some relays....."the most expensive
component already in the junk box is cheaper than the cheapest one you can
buy".....a much more interesting exercise to modify the cct to accomodate
what I have to hand....a 27-year-old rig has no resale value anyway.

No reason the PLL frequency should change between TX and RX
as I'm only using it on FM simplex.

Another symptom is that the RX comes back on but
the squelch gradually becomes ineffective until you're listening to a
low-level noise and the squelch control is inoperative to cut it out.

The AF amp appears to be permanently powered at 13.8V so
my presumption is that I'm listening to an amp with no input.

Not really. You'd think the tunnel diode would have been used for the LO,
but it's the mixer! Perhaps the tunnel diode was significantly less noisy,
but the EFM-117 is not an exceptionally sensitive radio -- merely good.

Which bits of it do you say that I don't understand?

Loop stability in control systems, perhaps? Lead/Lag
compensation? Triple loop PLLs to give 10Hz steps but
without the final loop stepping in 10Hz?

What exactly?

Tunnel diodes were supposed to be excellent mixers, with low noise
and good IMD characteristics. In fact, the IEEE proposed a sat TV
service in the late '60s, using 30 foot sat dishes, and a tunnel diode
mixer front end. I was so expensive that it was never built.

Repairing old gear can be fun - and lets face it - most "hams" or "Cber's"
for that matter don't have the "equipment" to repair the newer stuff with

SMD devices. Parts are still fairly easy to get - with the Internet. Usually you can find it with some luck.
Though I do newer equipment repairs - my eyes prefer the older stuff - much more. I have some older tube gear that I've had for projects for quite some time now - been too busy to do them. Am awaiting the day I can start on them and see the warm glow and listen to the audio coming forth.

Hopefully someone who reads this group will be familiar with these radios, Motorola T7400 FRS/GMRS. The alt.radio.family newsgroup has degenerated to an unintellible level.

My friend and I have a set of these, which work extremely well as general-purpose handhelds (much better range than our IC-Q7s, and only cost $20 a pair after rebate). We'd like to use the T7400s for bike-to-bike communications on motorcycle trips. Our plan is to mount small speakers inside the helmets, and a microphone element in the lower face guard, to reduce wind noise. There would be a PTT switch, most likely mounted near one of the handgrips.

What we can't seem to find are the required tech specs on the speaker and microphone elements, or a wiring diagram for the single plug that connects everything to the radio. I'm aware that some radios short the mic element with a resistor to actuate PTT, but need a lot more specifics for this model.

thanks and regards,

Martin

So you come here to help kill this newsgroup?

When people can't be bothered to stick to the topic of a newsgroup,
that's what kills it.

You don't see any irony in bothering this newsgroup with an off-topic
matter because some other newsgroup has been destroyed by off-topic
matter?

It is the part where the PLL Frequency doesn't change because you
at using FM Simplex. There are many reasons for the PLL to change
between Tx and Rx, even with the radio in FM Simplex mode.

1. The receiver may have an IF Frequency of 10.7 Mhz which would
require the PLL to be offset from the Receive Frequncy by the
IF Frequency,
2. The Transmitter exciter may use a different Offset Frequency
than the Receiver IF Frequency, and most Transmitters don't
modulate the Tx Output Frequency directly, but modulate an
IF Frequency that is, either "mixed" to the Tx Frequency, or
"multiplied" to the Tx Frequency.

Just to name a few. Now Sir please, expound your brilliance on why
you made such a Stupid Comment in the Original Post, as sited
above..........

That's nice, but it's merely a Superadio III... I believe they're discussing the
Superadio+, (model 7-2882_).

Wrong model. It's not a 288*7*, but a much older *GE* 288_2_ and the 2882 was not an analog tuning radio, it was direct entry frequency synthesis.

For One and All,
.
Which Are The "Actual" GE Superadios ?
- - - - -and- - - - -
Which Are The 'So-Called' GE Superadios ?
.
OK - Here are the actual GE Superadio Model Numbers :
.
1 - GE {Superadio I} Model # 7-2880
"The Original" GE SUPERADIO I = "Super Radio"
-but- It did not have The Words "Superadio" on the Radio [.]
General Electric Model # 7-2880
Speaker: Single/One 5".
Single Band Width.
Knobs: Black Body with Chrome Base Ring.
Size: 13"W - 9"H - 3.25"D
Badging 'General (GE) Electric' on the speaker grill.
Printed on the Tuning Band Scale: "Long Range" & "High Selectivity"
Made in HONG KONG and other locations
.
2 - GE Superadio I I Model # 7-2885
The GE SR II = GE SUPERADIO II = "Super Radio"
General Electric Model # 7-2885
Speakers: Dual 5" and 1".
Single Band Width.
Knobs: Chrome (color) Body including the bases.
Size 13"W - 9"H - 3.25"D.
Badging: General (GE) Electric "SUPERADIO II" on the speaker grill.
Printed on the Tuning Band Scale: "Long Range" & "High Selectivity"
Made in MALAYSIA and other locations from 1987 until 1994.
.
3 - GE Superadio I I I Model # 7-2887
The GE SR III = GE SUPERADIO III = "Super Radio"
General Electric Model # 7-2887
Speakers: Dual 6" & 1.5".
Dual Band Widths: Wide & Normal.
Knobs: Black Body with Chrome Base Ring.
Size: 13.5"W - 9"H - 3.75"D.
Badging: "GE" Square on the speaker grill.
Printed on the Tuning Band Scale: "Long Range" & "High Selectivity"
Made In CHINA ?
.

Here are some 'so-called' GE "Superadio" Model Numbers
they are either Digital / Cassette / Boom Boxes /Radios :
Series - 3-6015 / 3-6025 / 3-6045
Series - 3-5266 / 3-5268 / 3-5280
.
Model # 3-5280 is the so-called GE {Superadio} Cassette
.
Model # 7-2882 is the so-called GE Digital {Superadio} Plus
.
Then there is the 'so-called' GE "Superadio" CUB
Model Number 7-2881 that was 'smaller' than the
GE Superadios and used "C" Batteries
.
NOTE - The Radio Shack Optimus Models #s 12-603
and/ 12-903 may be 'look-a-likes' on the outside
-but- They do not have the GE Superadios Circuity
on the inside [.]

This is classic radio design, the vast majority of crystal controlled VHF rigs from the seventies and eighties had a separete crystal for TX and RX because of the IF stage in the receiver. Not true of all rigs though. The FDK Multi 2000 as well as a PLL VFO has a number of crystal memories and has a single crystal for each memory, but it's more the exception than the rule - probably done to reduce cost of two crystals rather than one for each channel.

The "OT" designation (which I applied myself) was merely a courtesy by
way of introduction. I don't really consider it to be off-topic.

Most Hams, myself included, tend to be electronics/communications
experimenters, and highly interested in hardware such as I described.
A few may be clueless beyond whatever it took to pass their written,
but they can play netcop.

Hi Joe,

As far as I know, the 7400 radios do not have any frequency-offset capablity, but I suppose it's possible that there are undocumented features. For example, if you engage the "QT" function from the menu, it layers a tone squelch over the standard CTCSS (actually uses the tone to precede the first transmission), which virtually guarantees that no other extraneous sources will activate the receiver.

I bought them at Fry's Electronics in Dallas, TX. They were $20 per pair, after a $10 rebate. The maker claims 8 miles optimum range, but we tested them and got 10 miles. Here is a link to my review, which also gives the locations and terrain details:
http://groups.google.com/group/alt.radio.family/browse_thread/thread/1a874145cfa4b4e2/dbd2bbab8ffcd1fd?lnk=gst&q=funkychateauspam&rnum=2#dbd2bbab8ffcd1fd

These are the only blister-pack radios I have ever tested that beat the manufacturer's range claims. And they did so using rechargeable NiMH batteries, which have a slightly-lower terminal voltage than the alkalines often used to generate the claims. Part of the performance is no doubt due to physical reasons - the chassis is probably twice the size of most FRS radios, and it uses four AA batteries instead of the now-typical AAAs. I'd say these radios are far more likely than most to actually deliver their rated output power. And perhaps they have a good receiver section as well, plus enough chassis mass for the antenna to work properly. For whatever reason, the peformance was outstanding for something that retailed for $10 per unit.

best regards,

Martin

Hi Joe,

As far as I know, the 7400 radios do not have any frequency-offset capablity, but I suppose it's possible that there are undocumented features. For example, if you engage the "QT" function from the menu, it layers a tone squelch over the standard CTCSS (actually uses the tone to precede the first transmission), which virtually guarantees that no other extraneous sources will activate the receiver.

I bought them at Fry's Electronics in Dallas, TX. They were $20 per pair, after a $10 rebate. The maker claims 8 miles optimum range, but we tested them and got 10 miles. Here is a link to my review, which also gives the locations and terrain details:
http://groups.google.com/group/alt.radio.family/browse_thread/thread/1a874145cfa4b4e2/dbd2bbab8ffcd1fd?lnk=gst&q=funkychateauspam&rnum=2#dbd2bbab8ffcd1fd

These are the only blister-pack radios I have ever tested that beat the manufacturer's range claims. And they did so using rechargeable NiMH batteries, which have a slightly-lower terminal voltage than the alkalines often used to generate the claims. Part of the performance is no doubt due to physical reasons - the chassis is probably twice the size of most FRS radios, and it uses four AA batteries instead of the now-typical AAAs. I'd say these radios are far more likely than most to actually deliver their rated output power. And perhaps they have a good receiver section as well, plus enough chassis mass for the antenna to work properly. For whatever reason, the peformance was outstanding for something that retailed for $10 per unit.

best regards,

Martin

I bought a couple sets of FRS/GMRS radios and have yet to see them perform to what "I" feel is their capacity. They claim upwards of 8 or so miles - yet I lost contact with someone a hair short of a mile away on flat terrain - and a virtual clear shot. At 3/4 mile, had crystal clear Comms - but past that - nothing.

I don't place any faith in those things - as to range. I bought them to try to stay off of "2 meters" with mundane things and to also use for Emergency Comms with my assistants who aren't licensed and not "authorized" to be on a Public Service band radio - I'll stick with the 2meters. I can do simplex or repeat and not have to worry about losing contact - over the FRS radios. That mile "and more" is very easily covered.

I never got around to it, but I'm going to check mine on my service monitor - to see what they're doing - using AA Alkalines, NiMH and external power source. I know many hunters who use FRS radios (only when hunting) - of different brands, models, Rf power out and range quotes - and they always complain of distance. They're not radio enthusiasts - of any sort. Listening to their reports - quizzing them on their terrain and so on - I can understand their issue. IMHO - I think those radios (at least most) are over rated - a "gadget" item.

L.

In my opinion the Radio Shack 12-903 is similar in design, with very similar performance, but in a package that is far more solidly built. Its audio sounds at least as good and is powerful. Battery life is the same (250 hours). Provision for external antenna. Controls don't wobble around and the platic case is more substantial than the GE which feels 'cheap' in comparison.

I have both the Radio Shack and the GE. The GE is vastly better in terms
of sensitivity and sound quality. I listen to a remote AM station during
the day and the GE is vastly better.

Rick-

If you have a signal generator, you can use it as a local oscillator for a Ham panadapter. The Heath SB-620 HamScan can be set up that way. I used one many years ago to troubleshoot a Regency HR-6 and BTL-301 spur problem.

I also had the TS-120S which had spurs. I took it back to the dealer, who had a good technician at the time. Apparently incorporating all the Kenwood tech bulletins will solve the problem unless you have a defective component. Mine was clean as a whistle when I sold it.

I used just that technique to marry my SB620 'Scanalyzer' to my TS-120S and TS-130S xcvrs (with buffer amplifiers inside the xcvrs). The 620's input amplifier has an RFC to ground from the cathode. A capacitor is switched from bypass of the RFC, to coupling from an RCA jack on the rear apron. That turns the input amplifer into a mixer. My '620 came to me setup for Heathkit's 3.395 MHz IF. I made a dead-bug oscillator using a ~ 12 MHz xtal that was intended for a rock-bound 2m xcvr. A slight tweak of the '620's sweep oscillator, and I was in business.

Another potentially inexpensive spectrum analyzer scheme is based on a varactor-tuned frontend from a cable box (it utilizes your generic oscilloscope for display). You can build a basic unit, or add modules for more function. Take a look at http://www.science-workshop.com/, home of the "Poor Man's Spectrum Analyzer".

A few years ago I picked up an HP 8557 analyzer plugin, in a 181T (I think) display mainframe, at a local hamfest. It's simple, and its bandwidth range isn't super-wide by today's standards (it's rated for .01 MHz to 350 MHz), and it isn't the most precisely tuneable or rock-stable analyzer around, but it has been extremely useful over the past few years. It's plenty good enough to look at the HF spectrum and at the basic performance of a 2-meter radio (although it won't tune up far enough to see the third harmonic of 2-meters or to be directly useful on 440).

The tuning dial is analog, and tends to require a tweak to the calibration-zero when you move more than a few MHz away from your previous location. Having a decent crystal calibrator or comb generator isn't a bad idea (I built one using a 10 MHz oscillator can, a 10:1 decade divider, and a MMIC amplifier chain deliberately driven into saturation... works great).

The newer 8557A has a digital frequency display - I don't know whether it's fundamentally any more stable or precise than the analog tuning and indicator dial on the older 8557.

I've used the 8557 to help identify some local QRM problems. Hooked to a directional 2-meter antenna it let us track down the source of a drifty "buzz on the squelch-tail" signal which had been plaguing several local repeaters (turned out to be a bad Ethernet switch, "singing" loudly enough to be heard for miles!).

More expensive, wide-bandwidth spectrum analyzers might not work as well, in your application. A lot of the wideband ones don't work at all below 10 MHz (one of their IF frequencies, I suspect).

My repeater group was recently gifted with a used Tek 491... a wide-band model. It turns out to have a very interesting and significant quirk - the 10-to-200-MHz band uses a non-balanced mixer, and input signals can "blow through" right into the 150-to-250-MHz first IF. This creates some *huge* non-tunable spurs in the display. As a result, I *dis*recommend this model if you have any thought of hooking it up to an antenna and looking at your ambient RF environment... pager and public-safety-band transmissions will show up as non-tunable spurs which can exceed the signal you're looking for!

How does the Radio Shack DX-390 compare to these two for AM and FM performance?

Superadio is rated at 400 - 500 hours. Not the same at all.

Repairing old gear can be fun - and lets face it - most "hams" or "Cber's" for that matter don't have the "equipment" to repair the newer stuff with SMD devices. Parts are still fairly easy to get - with the Internet. Usually
you can find it with some luck.
Though I do newer equipment repairs - my eyes prefer the older stuff - much more. I have some older tube gear that I've had for projects for quite some time now - been too busy to do them. Am awaiting the day I can start on them
and see the warm glow and listen to the audio coming forth - along with the sparks and smoke!

About a month ago I posted an article about my "modified sine wave" inverter and how to get rid of the strong noise it generates across the HF bands.

I got several helpful responses and I thought you might be interested in the results.

I ordered a Sprague 20JX5306A line filter from HSC Electronic Supply (www.halted.com), cut a three-wire extension cord about four inches from the plug end, and inserted the filter.

It works quite well. There is still some noise, around S2 or S3 as contrasted with S8 to S9+ that it was before. There are some other things I can do such as enclosing the inverter and filter in a grounded metal box. But, all in all it works acceptably as is.

For the most part, my experience with FRS radios has been the same as yours - slightly more than toys. I tend to use 2M for short-range communications with other Hams, but it's always handy to have some FRS units on hand to toss to a non-licensed person in a caravan or recreational group. Around here, the FRS band is mostly unused except on Christmas morning and maybe for a week afterwards :)

The Motorola T7400s, though, shocked me with their real-world performance. Especially considering their on-sale price of $20 per PAIR. They met their range claims with margin. Of course, being in a UHF band, they perform no better than you should expect with houses and trees between rubber-duck antennas.

For the most part, my experience with FRS radios has been the same as yours - slightly more than toys. I tend to use 2M for short-range communications with other Hams, but it's always handy to have some FRS units on hand to toss to a non-licensed person in a caravan or recreational group. Around here, the FRS band is mostly unused except on Christmas morning and maybe for a week afterwards :)

The Motorola T7400s, though, shocked me with their real-world performance. Especially considering their on-sale price of $20 per PAIR. They met their range claims with margin. Of course, being in a UHF band, they perform no better than you should expect with houses and trees between rubber-duck antennas.

Martin

Surprisingly - aside from "Hunters" in the woods near my house and across the river - I can usually pick up people on the radios - talking of different subjects - keeping track of kids, wives telling the ole man - dinner is ready, kids talking back and forth, etc. Then going to the local mall - there are folks using them and as well as at the "Flea Market". So - at least around here - "dead" they are not.

I don't usually think to look for any other FRS radios now - but should I bump into a pair of the 7400s - maybe I'll give them a spin.

Point-of-Fact the Circuits may be simular
BUT they are NOT the same [.]

Some have 'claimed' the the RadioShack Radios are
GE Suoeradio IIIs packaged in a RadioShack Shell :
This is NOT the Case [.]

For the time period that their were make the RadioShack
Radios were most likely made by Sangean and are a
Sangean design to 'approximate' a GE Superadio III at
a much lower cost.

As not so 'super' as the GE Superadio III is : It "IS"
better then the Radioshack 'want-to-bees' ~ RHF

I looking to buy a used all mode base rig for two metres at the end of year and am leaning towards an Icom IC820H. I have looked at the comments on eHam and it looks as if this rig is a favourite. I wonder if anyone has/had one and if they have any comments to make on the rig.

TIA,

Charlie.

PS:I realise that a real radio amateur would buy a tin of biscuits, eat the biscuits and then build his own rig in the tin from a bag of components bought at his club's junk sale but I don't eat biscuits.

Yeah.. Nice receiver, beautiful to look at, but the price is kinda of steep.
I suppose for those that have the extra $$$$ it might be okay. But, I think
the market has spoken and 8G's is the limit right now. I was surprised
at the high reserve, which hasn't been revealed!

I've owned most of the popular V/UHF all mode radios including; Icom IC820, IC821, IC910, IC290D, IC271E, IC271H, IC275E, IC275H, IC251, IC746, IC7400, IC706 Mk1, IC706 Mk2, IC706 Mk2G, Kenwood TS780, TR751E, TM255E, TR9000, TR9130, TS711E, TS790E, TS2000E, Yaesu FT736R, FT726R, FT221R, FT225R, FT847, FT290R, FT290R2, and an FDK Multi 750X.

The Icom 820H is a nice looking radio with a good receiver, but IMO, without using a decent transverter, you'll probably not beat an Icom IC275 in terms of receiver performance. I've had 3 x IC275H's (100w output, ideal for GS35B linears), and I've yet to find anything better. Icom IC275's also appear to have much better transmitted audio quality than other Icom rigs of the same era.

For sale: JRC NRD-515 shortwave receiver. This radio has original
optional 455KHZ IF filter board with the 0.6KHz CW filter. Receiver
works very well on all bands. Very clean front panel and all knobs.
Tuning knob is silky smooth. No modifications.
The top cover of the radio had holes for the internal speaker, which
was done by previous owner. Those holes were professionally patched
and small aluminum plate was placed and secured on the internal side
of the cover. The top cover was repainted. Pictures available on
request.
$650 shipped CONUS.
Thanks for your interest. Please reply directly:

Dear "RHF,"

There were two variants of the original GE Superadio Model 7-2880: the first one without a strap to hold the batteries in place (they fall out if the battery cover is even loose) and no antenna screw terminals, and the second one with both of those improvements. Otherwise, the two variants are identical and carry the same model number.

Best,

Joe

If you're looking for used, give preference to radio's which have a Mutek front-end build in.

I prefer the Yaesu FT736-R (with Mutek) over many other radio's, however this is personal. Guess the fact that you don't often see them used is a sign?
If you want the very best look for something like a TS850+transverter (SSB Electronics LT2+ or DB6NT) but that will cost you.

To get into the VHF scene in Europe check into the ON4KST site at www.on4kst.com/chat Lots of info can be gotten there as well as real-time propagation and activity info.

Source record: 4604

Good afternoon, all...

Have any of you seen any magazine articles or web sites that discuss adding IF DSP filtering to any off-the-shelf commercial radios?

I have an Icom IC-735 and Yaesu FT-1000 that could benefit from that treatment (even though I gotta say the noise blanker in the IC-735 is amazing for 25+ year old technology).

Conceptually it doesn't seem like it should be too difficult... tap in to the IF stream somewhere, direct it out to an external DSP box (or perhaps even a small internal DSP board if there is room... I think the 735 has enough internal room for that) and then the output of the DSP board goes back into the IF stream.

I have 30+ years' experience in software development, mostly real time systems, but none at all in DSPs so I thought this might be a good DSP project for me to learn on.

But, I'd like to read up on whatever results others might have had in doing similar efforts.

Any thoughts on that would be appreciated...

Message-ID: <pan.2007.08.12.16.13.26.156257@from.qrz.com>
Source record: 4605

I'd like to design and build a CW keyer board to install in my IC-735 ... last one I saw on ebay went for like $160 and I don't think I'm going to pay that... :-)

Anybody know where I can get enough information on the interface to the radio to do that, along with perhaps the right connectors to mate with whatever the connections are in the radio?

Or, does anyone know of an aftermarket keyer board that's available for something a bit more reasonable than $160?

Thanks...

Andrio - Your situation is axactly like mine. G5RV, 2nd floor etc. The only difference is that there is so much rock all around my property hat in most cases I cannnot get an 18" ground rod down either After much experimentaton, here's what I settled on:

Antennas:
I use an 80 m dipole with 'big ugly balun' and its coax shield is bonded to a 40' large diameter aluminium cable buried in a 18" ditch.
I use a 20 m dipole with 'big ugly balun' and its coax shield is bonded to ther 40' aluminium cable buried in the ditch.
I use an old 5-band cushcraft vertical with 15 radial wires laid out in a hub-and-spoke pattern - and the coax shield of the vertical is bonded to the same ground as all the other antennas before entering the house.

I had been using a G5RV but could never get a good VSWR and typically had RFI around the house.

These antennas are ~40' from the shack and work as well as, or better than the G5RV. Also, the G5RV tended to have more noise on receive (probably as a result of it being closer to the house). The RFI in the house problem has diminished. The G5RV was supposed to have the twin-lead portion laid out directly under the antenna (vertical) and I never could accomodate that very well given that the antenna was 28' up and the twin-lead was longer.

Grounding: Grounded the radio on the AC ground inside the shack Rig has auto antenna tuner so that's the best I can do. I use a PC in the shack and it is well bonded to the same copper connection plate as the radios - and a single line from that plate to the ground pin on the nearest AC receptacle. I get no interference into the HF radio from PC or vice-versa.

I've experimented with a MFJ RF isolator and not seen any improvement. Keep us informed on whjat you decide to do - maybe some suggestions you get could help me optimize this shack as well.

Time was the ICOM 751 (with Mutek) was the only VHR multiband to have.

My 736 is deaf as a post on 70cm, BTW. Good job it has a mast head pre-amp
switch (and power thru the antenna socket) on the front panel - it certainly
needs it. Not so on 2 or 6m though.

Rick,
It really depends on what you want to do.
If you just want to add it for receiving it is not hard to add except
that the AGC in most receivers is not set up to limit the voltage applied
to the first analog to digital converter. This needs to be done badly.
Filtering, amplification, detection, and audio processing can be done

straightforwardly. However, you will have to add or subtract Hz from
or add them to your frequency display yourself! Further because of
the filters that come before your ADC, you probably will not have as
good a control over the phase of the pass band as you could with a
different design. Probably simplest to just buy a T-T Jupiter and
use its general coverage characteristics right after the first IF of your
rig.
Now if you also want to add the DSP to the transmitting part, it gets even
more
complicated.

Full integration achieves much, much more than an IF strip DSP add-on,
as my Orion 565 has shown me. Take a look at its architecture or the
Flexradio 1000/5000
or the Omni VII or the Elecraft K3 for examples of what you get. If you
want
to program, you might want to get a Flexradio SDR 1000 which has an open
source code version.

The FT480-R was a good radio but the push switches on the front panel
are worked by conductive 'rubber' which , now , are starting to fall
appart .allong with other funny faults occuring . nice set for your
qrz.com blag photo , bet there's not many who have the 480/780 and
the combined stand/power supply unit , would polish up a treat :-)

You would also need a much fatter wallet.

But for 1/3 or less the price you can't put this in a box and add a
couple of relays?

I'm only interested in a good condition (preferably as new), complete
and un-modified LT2S or DB6NT TR144. I will pay accordingly.

1407. Which band?

Newsgroup: rec.radio.amateur.equipment
Date: 2007-08-14 00:33:36 UTC
From: Al Lorona <al_lorona@agilent.com>
Message-ID: <xL6wi.3649$i85.811@nlpi061.nbdc.sbc.com>
Source record: 4627

An amateur has the opportunity to purchase or build equipment to operate SSB on one of the following bands:

2 m
1 1/4 m
70 cm

You may assume that the amateur will have access to a horizontally-polarized antenna with 15 dBi of gain.

Which band will provide the most operating fun? (I will leave the reader to his own devices in defining what 'fun' means. Please explain your definition in any replies.)

2 meters will usually provide the most contacts in many areas. It is possiable to get some eskip for contacts halfway across the country.

1 1/4 meters has very little activity on it as almost no comercial gear is on that band in the US.

70 cm has more activity than 1 1/4 meters but long distance contacts are much harder to come by than 2 meters.

It is no fun to just call cq and not have any contacts.

1411. TS 870 PA problem ?

Newsgroup: rec.radio.amateur.equipment
Date: 2007-08-14 15:53:13 UTC
From: Mark <dragothic@hotmail.co.uk>
Message-ID: <U92dnaZiwJtmQFzbRVnyhwA@eclipse.net.uk>
Source record: 4631

Hi ..
Over the last two or three weeks i have noticed my TS 870 is taking
less current than usual.. maybe 13 amps, maybe 14 as far as i can tell ,
but never more .. .. so i and another local amateur tested the RF output
with a nice power meter / dummy load
The results were even across the board, 160 right up to 10m (my usual
haunt) any mode, except for AM of course, -
about 65w - 70w. everywhere.

I was doing research before i bought an '870 and a couple of people
mentioned the 870's generally dont give 100w,
but ck, its less than 3dB difference, but we tested the 870 2 years ago
when i bought it, and it was giving more RF out then,
it was drawing nearly 18A, and correspondingly more RF too, except that
it seems the PA is getting weaker.

My main use for the radio is local chatting on 10m FM 90% of the time at
lowest power, strangely when on full power i got occasional fuse blows..
though i know not to waffle on 100w FM, though the 870 spec and users
report its ok to do so for about a hour.
i cont fancy trying that.
I phoned Kenwood UK shortly after i bought the set asking why they don't
give 100w, he said it depends on the load, of course, so no problem

Question, does anyone thing my PA is dying on the 870 ?
- it looks bad... although the thing works perfectly otherwise.

Mark.

Hi Gwatts.. thanks for the quick post :)

No, i have'nt tchecked the PA bias or any pots for that matter- i shall have a check around later.. i have the service manual and will study it later on tonight .. the idea of twiddling pots worries me, i will check all the connectors and stuff and get the magnifying glass / voltmeter out later if the service manual makes sense to me
Thanks..
- Mark -

Have you tried resetting all the PA bias levels on the pots inside? You might have an oxidized connection somewhere, possibly inside a pot, on a connector pin or a crimp, even a cracked solder joint that causes the lower levels and the occasional burst of full power. I've seen similar symptoms in other radios that went away after exercising (turn all the way one direction, then all the way the other direction a few times with the power off) related adjustment pots or finding a bad crimp or cracked solder joint.

Hi.
I have a old Murphy radio, type 154 and I found the diagram showing
that its valves, are.
6F15, 6C9 , 6LD20, 6P25, UU6.
I wrote to a specialized store and was given a list of these valves,
as equivalents.
10F1 , 10F9 , 10LD11 , 10P14 , U404.
Do you know, if it so?
Regards,
Theodore.

Hi, Mark,

gwatts gave a very good suggestion. Several months back my 870 was doing the same thing and it turned out to be that the negative lead of the power supply cable was so badly oxidized that is was essentially an open circuit and the rig was getting its negative connection to the power supply through the ground on the back panel.

You need to check that power supply cable and the voltage drop across it and see if it is in a similar condition. If that cable was ever used to connect to a battery it may have turned black already and any splices, joints, or connectors on it could be corroded and high resistance.

Regards,

Al W6LX

RM Italy has a Ham range designated by the H in HLA300, The amplifier has
both ptt switching and carrier operated relay. These amplifiers have auto
band selection and manual band selection options. The selection system
inserts the appropriate LPF to keep the amp clean. The power claim is 300W
CW and 500W PEP. My experience is that although my Daiwa cross needle meter
only ever showed around the low side of 300W on the PEP selection of the
meter, the amplifier has a significant presence when in use. Working JA
stations form South Africa on 40m with a rotatable dipole proved to be quite

comfortable and signal reports were similar to what I get from my ACOM 1000 running at 400W.

Hi Al.. and Thanks for the reply...
interesting answers coming my way.. what a great radio it is, but i
read 'all' the postings on this NG last night,
and it was interesting.

The supply cable is in very good condition, far as i can tell, but i
will peel back the black PVC bit on the radio end tonight,
and also check inside. the crappy CB quality fuse holders were hot
last time i attempted 100w FM,
they were glowing once on my old FT 890 AT radio - the PSU seemed to
cope with that set.
there are 3 or 4 clip-on ferrite's on the 870's DC cable already - which
is nice.

i don't have a ground here, i am on the 3rd storey, so a non-inductive
ground would be pretty tricky to organize.
and 99% of my QSO's are local rag chews on 10m anyway. but i will bond
to the cold water system this evening, but i know that may be next to
useless here.
The voltage drop at the PSU terminals is, of course 0.2 of a volt or so,
not really worth mentioning - but if i take the lid off the 870
later i guess i should be able to check for any drop inside the TRX. i
may also just 'build up' around the fuse holders with solder too,
this may help. seems the PSU lead is clean, the guy i bought the 870 off
of was using a PSU too. its a 2001/2002 serial 870 too.
i did fit another 4ft of red/black 25A DC cable via HD connectors
earlier this year, but didn't keep them on long, though it seemed ok.
i guess i need to test the cable under load.
last night on 10m FM i got the PSU supplying 15A - 16A which i guess is
on for 10m, but depending on the ATU / load it usually
draws approx 10A no matter what. strange. 14A - 70w ish on a dummy load
seems a little low, i guess i should use a amp..
but on 10m :) i will keep doing tests, my next test may be to take the
set to a friends QTH and use his PSU / ant..

Thanks Al. and Gwatts -
i shall do more digging :)

I must have missed something? The seller never posted this auction
on the newsgroups. It started
as a discussion about the receiver, not as an auction teaser.

And once again, rec.radio.amateur.equipment is not a buy and sell
newsgroup. It's for the discussion of amateur radio equipment.

Hence ebay posts don't belong there, along with all the other ads
that get posted there.

That's the problem with the previous replyer, he still doesn't use
that leverage to get rid of the ebay poster. He somehow thinks
ebay is somehow worse than buy and sell ads.

It would be nice to say that the ad doesn't belong in .boatanchors
but the people who created it circa 1995 or 96 decided that
buying and selling was too important a part of the hobby, so they
let ads in, though in the charter it's way down on the list of
things to post about. So instead, we get all kinds of ads there,
things that weren't even born when the last boatanchors were made,

and those ads for guns and those ads for computers, and so it goes.
Once you let ads in, the junk follows.

It wasn't about ebay - it was about a *VERY* rare (I don't normally use that word, but here it truly applies) radio - a boatanchor at that - that just happened to be on ebay. Fowler R390As are rare - there were only five built, and s/n 2 is in (reportedly) the best condition of the known survivors...

I didn't start this thread - as I assumed it would find it's way to r.r.a.b on it's own (it did - and no it wasn't posted by the seller, nor on his behalf).

I did start a similar thread on rec.antiques.radio+phono as a discussion about how it might compare in value to some of the *rare* sets from the 30's (Zenith Strat, Sparton Nocturne, Crosley WLW - etc.). As it turns out - not even close.

The seller didn't need to "hawk his wares" here or anywhere else for that matter - the radio's provenance yelled loud enough on it's own.

best regards...

Mark-

Assuming you have solid state finals, your power supply voltage may have fallen off slightly. I've found that a slight change in DC voltage produces a large change in power output and power supply current. Be sure your supply voltage is a solid 13.8 volts under load.

If you have the ability to measure the voltage inside the radio under load, you can tell if there is a problem between the radio and the power supply.

: >The (remote) possibility remains that 'Mike Corley' is either
: >not schizophrenic (but is 'pretending' to be so) or 'he' is
: >a product of a number of persons (?psychology students).

: Given other ways in which I have seen people exploit some of The Internet's
: capabilities to disrupt or indulge in sophistry, or to exploit a medium
: that resembles speech without the non-verbal and intonation cues, etc
: as a means of denigrating others, I question your use, albeit in quotes,
: of the word "remote". I'm not saying it isn't remote and therefore it is
: great, I'm just saying that I don't think we can easily classify it as
: remote, moderate, or great.

I think you can build up quite a good picture based on what someone says
and on their posting patterns. I don't think "The Internet" (capitals, no
less) is as opaque a medium as you make it out to be.

: It is not easy to determine the validity of all information on The
: Internet without making use of extra supplementary information.

: We do have the problem, pointed out by someone else, of the possibly
: "too perfect" textbook characteristics of what is being posted.

I explained that one, but I don't mind explaining it again (you don't
mind having it explained again to you, do you now?). The reason my
"symptoms" are such a perfect fit to the textbook is because the people
causing the campaign "fitted me up" in such a way that what they did
would resemble the symptoms of schizophrenia. Hence TV, radio, other
media, people in the streets etc. By a fortunate coincidence (for them)
these mthods of harassment are the ones which offer easiest channels of
access (for them).

It's really quite neat. All it takes is for people to start believing
that the "symptoms" aren't symptoms but reality, though, and the house of
cards collapses in a heap. And there are _lots_ of people now who knoiw
full well what has gone on.

: If harrassment by email, etc, has happened by someone out of the country,
: can a complaint be made that results in arrest or whatever upon that
: person's entry into the country? An interesting point which Mike may be
: able to inform us about, as he's said he will be in the UK in a few weeks
: time.

Picture the scene at the airport;
"I arrest you for being Mike Corley and mailbombing people"

"But my name isn't Corley. Who he? Mailbombing isn't illegal is it? You'd
have to lock up a lot of people if sending annoying email was a crime"

"Er....."

==========

: context-free parts of articles, conversations and things-on-the-TV and
: assume they are meant for you. Mike, this is called paranoia.

But that's the way real abuse works, too. People interject words and
phrases into what they say which they know will have meaning for the listener.

And sometimes, they make it obvious. The very first evening of my job in
Oxford, we went for a drink with the technical director, and a couple
of other employees. The TD said in an "as-if" aside to one of the others,
"Is this the bloke who's been on TV?" (he said it directly in front of
me, and obviously meant mke to hear him saying it). The other person
replied, "Yes, I think so".

I think the subtext of what the TD said was "Why are they bothering with
him? He's so insignificant, why would they possibly want to spend the
resources going after him and putting all that expensive technology in
his home, when there must be much better targets?". The Technical
Director was given to sometimes disrespecting people, you see, and in my
case he couldn't see the point of anyone expending money on harassing me.

: The point is that there are two possibilities happening here-

: 1. There's a large conspiracy of people out to get you, for no
: other reason than that they have the means to do so, and that
: it involves a lot of the Media & a proportion of the public

: 2. You (who admit to having some headspace problems) are suffering
: from acute paranoid schizophrenia.

: Possibility #1 is _possible_, but would be unprecendented (OTOH,
: how would we know?), unfeasible, and many other things beginning
: with _un_ which I can't think of at the moment. Besides, if there
: was something going on, chances are some of us here would know
: about it, and I'm convinced that nobody does.

"Unprecedented" hits the nail on the head. It _is_ unprecedented, but we
have only just reached the technical stage at which it is feasible, and
we know video-spying is done to other people (NB the Diana-Hewitt
episode) and is a routine tool of security agencies.

Perhaps what is unprecedented is not the technical side, but the social
manipulation of many people by a concealed element in what other
countries would be called the secret police. The most disturbing element
is the degree to which people allow themselves to be unquestioningly
manipulated by an evil element within the state.

Peter Ceresole (peter@cara.demon.co.uk) wrote:
: In article <Ds0L1o.BMF.0.bloor@torfree.net>,
: bu765@torfree.net (Mike Corley) quoted a typical, overblown Bernard Levin
: piece, which sounds exactly like any number of other pieces by Levin over
: the past thirty years.

: He then goes on to draw an anguished parallel with a totally unrelated
: incident that had happened between him and a friend a few days earlier.

It is in the same style as his other pieces, but it's so close to what
actually happened a few days previously, that it's completely reasonable
to assume that someone told Levin about the meeting, hammed it up a
little bit and motivated him to write that article.

Look at the parallels;

1. "madman running loose about London"

2. it's about a meeting which took place recently

3. the police are called (he must be controlled, however much that
consumes in resources)

4. he might be violent, approach with caution, yes we're laughing but
really we're afraid of him, or is it perhaps our own propaganda that
we're letting manipulate us

5. he "bursts into tears, and swears it's all true - and it is" a very
exaggerated impression of the conclusion of that meeting

Don't worry if you don't believe me, neither my friend to whom I
explained this nor my GP believe me either (until the friend found out
otherwise!). If someone just presented this to you as I am presenting it
now then I wouldn't find it credible (most likely), so it's not until you
actually find out it's true that you can find it credible. And by then
it's too late, because they've got you in their trap and explained how
"funny" the abuse is.

: of the word "remote". I'm not saying it isn't remote and therefore it is
: great, I'm just saying that I don't think we can easily classify it as
: remote, moderate, or great.

I think you can build up quite a good picture based on what someone says
and on their posting patterns. I don't think "The Internet" (capitals, no
less) is as opaque a medium as you make it out to be.

: It is not easy to determine the validity of all information on The
: Internet without making use of extra supplementary information.

: We do have the problem, pointed out by someone else, of the possibly
: "too perfect" textbook characteristics of what is being posted.

I explained that one, but I don't mind explaining it again (you don't
mind having it explained again to you, do you now?). The reason my
"symptoms" are such a perfect fit to the textbook is because the people
causing the campaign "fitted me up" in such a way that what they did
would resemble the symptoms of schizophrenia. Hence TV, radio, other
media, people in the streets etc. By a fortunate coincidence (for them)
these mthods of harassment are the ones which offer easiest channels of
access (for them).

It's really quite neat. All it takes is for people to start believing
that the "symptoms" aren't symptoms but reality, though, and the house of
cards collapses in a heap. And there are _lots_ of people now who knoiw
full well what has gone on.

: If harrassment by email, etc, has happened by someone out of the country,
: can a complaint be made that results in arrest or whatever upon that
: person's entry into the country? An interesting point which Mike may be
: able to inform us about, as he's said he will be in the UK in a few weeks
: time.

Picture the scene at the airport;
"I arrest you for being Mike Corley and mailbombing people"

"But my name isn't Corley. Who he? Mailbombing isn't illegal is it? You'd
have to lock up a lot of people if sending annoying email was a crime"

"Er....."

: context-free parts of articles, conversations and things-on-the-TV and
: assume they are meant for you. Mike, this is called paranoia.

But that's the way real abuse works, too. People interject words and
phrases into what they say which they know will have meaning for the listener.

And sometimes, they make it obvious. The very first evening of my job in
Oxford, we went for a drink with the technical director, and a couple
of other employees. The TD said in an "as-if" aside to one of the others,
"Is this the bloke who's been on TV?" (he said it directly in front of
me, and obviously meant mke to hear him saying it). The other person
replied, "Yes, I think so".

I think the subtext of what the TD said was "Why are they bothering with
him? He's so insignificant, why would they possibly want to spend the
resources going after him and putting all that expensive technology in
his home, when there must be much better targets?". The Technical
Director was given to sometimes disrespecting people, you see, and in my
case he couldn't see the point of anyone expending money on harassing me.

"Unprecedented" hits the nail on the head. It _is_ unprecedented, but we
have only just reached the technical stage at which it is feasible, and
we know video-spying is done to other people (NB the Diana-Hewitt
episode) and is a routine tool of security agencies.

Perhaps what is unprecedented is not the technical side, but the social
manipulation of many people by a concealed element in what other
countries would be called the secret police. The most disturbing element
is the degree to which people allow themselves to be unquestioningly
manipulated by an evil element within the state.

Charlie...If what you are looking for is a single band rig for 2, all you have to decide is if you want it recent enough for computer control, or not, and how much power you want to run.
You can get in for 300 bucks or so with old Kenwoods (TS700 series) or Icom (IC251) or Yaesu (FT221)...If you move up to something like a more recent IC275H, it will run you about double that amount...You get more power, computer control, PL on FM...stuff like that. Some of the other rigs mentioned like the Yaesu 726 and 736 are not 2 meter only rigs.
Another favorite of mine was the Yaesu FT225RD...problem with some of these rigs is that they are now aproaching, or past 20 years old....you may well end up with someone's problem rig. A really great multimode rig that is new enough to have a tone board (option) and has a real hot receiver....and not too expensive is the Kenwood TR751A. Although it is a smaller 12 volt mobile rig....it has feet for desktop use...so would work out great!

Peter Ceresole (peter@cara.demon.co.uk) wrote:
: In article <Ds0L1o.BMF.0.bloor@torfree.net>,
: bu765@torfree.net (Mike Corley) quoted a typical, overblown Bernard Levin
: piece, which sounds exactly like any number of other pieces by Levin over
: the past thirty years.

: He then goes on to draw an anguished parallel with a totally unrelated
: incident that had happened between him and a friend a few days earlier.

It is in the same style as his other pieces, but it's so close to what
actually happened a few days previously, that it's completely reasonable
to assume that someone told Levin about the meeting, hammed it up a
little bit and motivated him to write that article.

Look at the parallels;

1. "madman running loose about London"

2. it's about a meeting which took place recently

3. the police are called (he must be controlled, however much that
consumes in resources)

4. he might be violent, approach with caution, yes we're laughing but
really we're afraid of him, or is it perhaps our own propaganda that
we're letting manipulate us

5. he "bursts into tears, and swears it's all true - and it is" a very
exaggerated impression of the conclusion of that meeting

Don't worry if you don't believe me, neither my friend to whom I
explained this nor my GP believe me either (until the friend found out
otherwise!). If someone just presented this to you as I am presenting it
now then I wouldn't find it credible (most likely), so it's not until you
actually find out it's true that you can find it credible. And by then
it's too late, because they've got you in their trap and explained how
"funny" the abuse is.

Given that Mr Corley clearly holds a certain fascination for some people,
and that his website, although "informative", isn't exactly ideal for
encouraging discussion of the sort that we all enjoy so much (including
Mike himself, by the look of things), would anyone be up for a Mike
Corley newsgroup - uk.fan.mike-corley, alt.fan.mike-corley, whatever?
(Sorry, I'm not very well up on these things.)

This would be a perfect place for Mike to post his writings, and perhaps
the occasional "look at the ...mike-corley newsgroup" posting in uk.misc
and so on would be accepted in place of the current cross-posts.

Sad, confused and emotional disturbed Mike Corley wrote:

{ snip }

Because he has made himself into a martyr and now he finds it impossible to back down. Mike's big secret has now been exposed. He made everything up.

Every time Mike makes allegations against the police, MI5, Tom-Dick-and-Harry etc. those organisations have taken people off vitally important work to ascertain whether or not there was any substance in Mike's ranting allegations.

When I'm told by someone who really does know such things that there was never any plot to get Mike then I trust that person sufficiently enough to accept his word.

The problem is Mike has escalated matters to an extreme level and like many silly billys he will find it impossible to give up all his self created crap and to live a normal life. After all what can Mike do now this crap has been exposed as untrue ? What new cause can Mike dedicate himself to ? (Some might read that as: who else can Mike now start upsetting ?)

So Mike write to John Major, c/o the Private Secretary, 10 Downing Street, London SW1A 2AA and ask the Prime Minister to help you. I'd normally disclose his fax numbers but if I did that you might jam up the lines with abusive postings just like you do here on Usenet.

Is anyone interested in joining with me to do a mass e-mailing of protests to Anon Penet and to Toronto Free Net in an attempt to flood their computer systems thus forcing them to seriously consider pulling the plug on Mike ? I'm not sure but is my proposal called a "flame" ?

> for email addresses.

Perhaps we should give Mike 7 days from today (6 July 96) to come to his senses and they start a massive multiple E-mailing campaign to Toronto Free Net. If all us victims send multiple copies of E-mails to the right addresses in Toronto then perhaps the Canadians will begin to get the appropriate message.

Copy e-mailed to Mike, just so he knows what is coming if he persists.

>accept his word.

Come on "Big Ears", why don't you admit that you made this posting? This is exactly the same line you were feeding me a few months ago. The posts are from the same news server, it's even the same newsreading software (Forte Agent .99e/16.227).

I'm afraid that if you friend "in the know" denied the existence of a plot then he was being, as they say, economical with the truth. Judging by the extreme reaction in London in May, and the panic you're showing now, as well as the replay post yesterday, I would say that things are hotting up again. But for you this time, not for me. I am out of harm's way, and there is very little you can do as long as I stay out of the UK.

Sad, confused and emotional disturbed Mike Corley wrote:

{ snip }

Because he has made himself into a martyr and now he finds it impossible to back down. Mike's big secret has now been exposed. He made everything up.

Every time Mike makes allegations against the police, MI5, Tom-Dick-and-Harry etc. those organisations have taken people off vitally important work to ascertain whether or not there was any substance in Mike's ranting allegations.

When I'm told by someone who really does know such things that there was never any plot to get Mike then I trust that person sufficiently enough to accept his word.

The problem is Mike has escalated matters to an extreme level and like many silly billys he will find it impossible to give up all his self created crap and to live a normal life. After all what can Mike do now this crap has been exposed as untrue ? What new cause can Mike dedicate himself to ? (Some might read that as: who else can Mike now start upsetting ?)

So Mike write to John Major, c/o the Private Secretary, 10 Downing Street, London SW1A 2AA and ask the Prime Minister to help you. I'd normally disclose his fax numbers but if I did that you might jam up the lines with abusive postings just like you do here on Usenet.

Is anyone interested in joining with me to do a mass e-mailing of protests to Anon Penet and to Toronto Free Net in an attempt to flood their computer systems thus forcing them to seriously consider pulling the plug on Mike ? I'm not sure but is my proposal called a "flame" ?

Perhaps we should give Mike 7 days from today (6 July 96) to come to his senses and they start a massive multiple E-mailing campaign to Toronto Free Net. If all us victims send multiple copies of E-mails to the right addresses in Toronto then perhaps the Canadians will begin to get the appropriate message.

Copy e-mailed to Mike, just so he knows what is coming if he persists.

I see. So they're not wasting six years of manpower to persecute you. They're wasting six years of manpower to prove I'm _not_ being persecuted.

I wish I was clever enough to think of something like that. I really, really do.

Can't disagree with that sentiment.

Wasn't it documented that MI5 sometimes "bought" journalists and broadcasters?
I remember reading a report by some jouralist who had been offered an extra
tax-free income by MI5 to become their covert mouthpiece, and had refused.

Bet you lots of others didn't refuse. Why do you think MI5 have such easy
access to the BBC and media? Because they're directly paying them off, that's why.

It has been reported several times. The most recent was in Private Eye,
a few months back. As I recall they also wanted information from him;
journalists would be a natural choice for members of the Security Service
and the Secret Intelligence Service for information sources.

> It might be interesting to see what he had to say regarding their
> attempt to recruit him.

He was most concerned that many others would have accepted such an
offer. However, we can probably make an educated guess as to some of
those who accepted: Nigel West (Rupert Allason, MP) and Chapman Pincher
would come near to the top of the list.

This is true. I frequently employ private detectives to spy on people
(there's a good reason for this and I'll tell you if you guess
correctly) and one such detective showed me the latest technology only
last week. A small rucksack. One strap of the rucksack has a tiny hole
in it that you wouldn't notice unless someone pointed to it. That's the
camera: the wires lead into the rucksack itself where there is a video
tape recorder little bigger than a Walkman. I don't know if that's what
Roger Cook uses but it certainly explains why it is that the subject can
look straight into the lens and not realise (s)he's being filmed. Now, I
say "latest technology" and I think that's the technology that the
police use as well as the retired police who become private detectives,
but no doubt the security services have far more sophisticated
equipment.

: > In summary, for there to be a serious possibility that Mike
: >Corley's allegations are true, there needs to be evidence of two
: >things. Firstly, there must be evidence of subversive activity on
: >his part. Secondly, there needs to be evidence of MI5 taking
: >measures to counter this subversive activity, in proportion to the
: >magnitude of the threat posed. Upon reading Mike Corley's posts,

: Alan,

: What about the following scenario? MI5 conducts "experiments" including
: field trials of novel surveillance methods. Say there was a "research
: project" underway to see just how invasive a surveillance of an
: individual could be. Perhaps it wasn't research, perhaps it was for
: training of novice personnel. Either way, there is a sizeable risk of
: detection. In order to minimise the consequences of this, you choose
: someone who is out of the public eye, and if possible someone whose
: credibility is already damaged - by diagnosis of schizophrenia, for example.
: This will facilitate the "plausible denial" if something goes wrong.

: I think this would be closer to Mike's theory.

: Mike, if you are reading, please don't post the story again. Anyone can
: read it at [snip] if they are interested. Also, don't
: think that I actually *believe* the above. On cost alone, it is extremely
: unlikely to be true, and some elements of the story (people in the media
: being "in on it") are just too crazy (though I can see how the paranoia
: builds to the extent that you can see "them" everywhere).

My argument is that the fact that it's so totally crazy is what makes it so
plausible and so hard to prove.

I shall continue to try to find ways to kick down the house of cards. Because
it is a brittle structure. It only needs one person to corroborate, and then
it's all over.

: P.S. Anyone else ever thought of "what-ifs" along the same lines? I
: remember as a boy daydreaming that maybe I was the focus of national
: attention in a "let's follow the life of one person from life to
: death" study - that while I was out or in bed there were programmes on
: the television about my life so far, etc. It makes for a good fiction,

Perhaps MI5 have become victims of their own paranoia. Their agency has been thought of as acting disreputably, so when their decision arrives, they don't think twice about breaking the law. Whereas say CSIS (the Canadian equivalent) is at pains to point out how it would never ever do anything in contravention of the law, and how it is strictly controlled in what it does and how it does it.

If this matter does ever make it into the public gaze, then it won't just be a few individuals in the media or security service who'll get hit. The UK is supposed to be a civilized democratic country (East Germany called themselves a democracy and they had the Stasi, but anyway). In a civilized country these things shouldn't be happening - and it is ultimately Parliament and the government who are answerable for not imposing sufficient restraints and accountability on those who are supposed to be ensuring security for citizens, not jeopardising it.

I don't have florid symptoms. But I'm in a difficult situation, because those people who don't know, aren't going to believe, and those who do, they just go along with the crowd. It's never a good idea to go against the grain, and the grain here is defined by interests in the establishment and the media. Even people who could say out loud what was happening won't, because then there's a risk that they'll be seen as traitors and ostracised.

Usually this type of 'hidden abuse' is racial and targetted at a racial minority within a country. You keep the minorities out of the good jobs, but you don't admit discrimination exists. It happens everywhere, not just in Britain. The persecution that is going on now is in reality a refined form of racism. Instead of "nigger" it's "nutter", and abusing the mentally ill is still socially acceptable today. In 50 years it might not be, but today there isn't any social or legal sanction against it.

So really they've refined racial harassment down to a minority of one. The words may be different, but the methods are the same.

Well, the "legal option" has just foundered on the rock of lawyers refusing to deal with me on the grounds that my perception of harassment must be due to the disease.

So we're back to square one again, the same place we were two years ago.

Now perhaps one of our uk.legal participants can clarify this point. To me it seems illogical that lawyers should have the final say on whether you are allowed to proceed with a civil case or not. Is there a default mechanism or agency for cases such as mine where it is difficult to find a solicitor to represent you? What exactly is the "official Solicitor"? What is it possible to do if you can't find a lawyer to represent you?

A chance to get a useful response out of the uk newsgroups! perhaps they can be good for something else besides spamming.
.....

Represent yourself....like the defendants in the McLibel trial.
you will need to read some law..but you CAN legally represent yourself I believe.
Mike W.
.....
From: burridge@osiris.win-uk.net (Paul Burridge)

Yes, a lot of people do this nowadays. Saves on legal fees too. Lots of reading up required first, though.

What can I do to get competent legal help though? If the case is on the face of it so bizarre that no solicitor would represent me or talk to me, then surely there must be a default mechanism? What is the "official Solicitor" that's been mentioned?
.....

All you need do is go to a good library & read up about it - that's what the McLibel 2 did.

Subject: "Absolute Obscene" David Hepworth (GLR)
Newsgroups: uk.misc,uk.legal,alt.radio.uk,uk.media,uk.media.radio.misc
Organization: Toronto Free-Net
Summary:
Keywords:

Last night (21/Feb/97), I was listening to BBC GLR. You have to understand that I was listening by stealth. Back in 1990 I used to have Capital blaring out of the speakers all over the garden ("if he listens to Capital then he can't be all bad", thanks ever so much). But now I listen on my walkman on headphones with the volume turned right down. It could not possibly be overheard by any listening device, no matter how sensitive, because sound does not carry from the headphones.

Yet somehow they are still able to tell which station I am listening to on the walkman. And last night, I bravely tuned to GLR 94.9FM at around 8.45pm. Everything went well for the first half hour or so. The DJ (today GLR told me it was David Hepworth) had a "rock star spelling competition" (how do you spell Shakespear's Sister?), no trouble there. I was recording the show onto tape just in case anything unpleasant happened, as I had reason to think it might.

Around 9.10pm, it did. Here, precisely, is what Hepworth said after the song "Come Around" by the Muttonbirds (I have this on tape, and at some point will be posting the audio on my website);

"New album's called 'Envy of Angels', that comes out soon, that's the single that's already out, I would imagine, that's 'Come Around', the Muttonbirds, er, coming up after this, we got the rock-and-roll A-level, we have, I assume, Brian do we have an embarrassment of prizes in there, we do, don't we, (EMPHASIS) absolute obscene (END-EMPHASIS) amounts of prizes, there will no doubt be a riot at the back door", and that's, er, A-level coming up after this"

The key phrases in what he said are, "EMBARRASSMENT of prizes", and what he himself emphasized verbally, "ABSOLUTE OBSCENE amount of prizes". It is my belief (based on content and tone of voice) that when he spoke these phrases he knew I was listening, and that the phrases refer directly to my situation. The "EMBARRASSMENT" is the embarrassment he and other media people would feel at having their wrongdoing exposed; the "ABSOLUTE OBSCENE" (which he verbally emphasized) described the disgusting sexual abuse which the harassers have been throwing at me.

Needless to say, I can't prove this is what he meant, although this has happened enough times that it's hard not to recognise it when you see it. But I shall be sending him a copy of this explanation. We'll see what he has to say

for himself.

I will try to explain with greater clarity.

I am prone to have ideas of "interactive watching" by people on TV, and
"interactive listening" by people on the radio; which means as I listen to
their programme, they are aware that I am listening (because my home is spied
on, and those doing the spying phone up the radio station and tell them that I
am listening to them), and they then interject nasty remarks in what they say.
This is what I believe may have happened on Friday night with GLR, and what I
was trying to explain in my article.

It's happened before with other radio stations, most worryingly when I am
listening quietly on my walkman as happened on Friday. This time, the
interjected words were "embarrassment" and "absolute obscene". The "absolute
obscene" referred to the abuse which is currently being directed at me.

I hope that's a little clearer.

Subject: "Scandalous, Frivolous or Vexatious"
Newsgroups: uk.misc,uk.legal
Organization: Toronto Free-Net
Summary:
Keywords:

A couple of weeks ago I issued a summons against the BBC in my local county court, for the tort of private nuisance caused by the spying by their newsreaders on my home. My argument was that their spying had prevented me watching the news at home, and therefore interfered with my normal use of my home.

The BBC's Litigation Dept at White City have replied not with a defence, but with an application for my claim to be struck out because;

(a) it discloses no reasonable cause of action; and/or
(b) it is scandalous, frivolous or vexatious.

Their application will be heard next week. They have not made any affidavit in support of their application, nor have they given particulars as to why they consider my summons to be unarguable in law, which would be a necessary condition for there to be no reasonable cause of action.

I am more worried about point (b). Allegations are scandalous (says Stuart Sime's book) if they impute dishonesty against another party; which my allegations do, against the BBC's newsreaders. As for frivolous or vexatious, I think that will be up to me to make a good argument for the effect the BBC's spying has had on my life, and up to the district judge's opinion of my case.

Apparently seeking to have a claim struck out in this way is common practice when the plaintiff is a litigant-in-person. Even if it is struck out, there is always the opportunity to appeal. I think we could be in for a fight next week.

Yep. Just not, the, I think 180 posts, one week, when his illness
got really bad. Oh yeah, and there was only three real posts,
just repeated 60 times.

>Mike does a first class job of drawing out the real personality
>of the person hiding behind a node name. The way people react
>to Mike gives it all away.

Erm, explain this rather dubious statement.

>As for you. Don't you think it's a trifle condescending to refer
>to people as mad. I know they are homeless and without internet
>access, but maybe they are just eccentric.

Congratulations. This is my first real flame for about a year.

I try to control my anger when I come across another uninformed
naive idiot on usenet, but sometimes it goes free. We've had Corley
for well over three years now, and his constant spams of various degrees
have killed a couple of usenet groups I really rather lied. uk.media,
to name but one. I gets my goat to read another useless fucker
thinking he is a harmless eccentric.

Mike is mentally ill. He is unwilling to deal with it. He seems to
think that uk.misc is some sort of forum that MI5 reads. And it
should be avenged. He's mailbombed a large quantity of people,
because they opposed his spamming.

1. He thinks MI5 watches him through his television
2. He thinks all references to mad people, refer to him
3. He thinks all people shouting, are shouting at him.
4. He's been diagnosed as mentally ill, just not a paranoid
schizophrenic.
5. He gives not a shit about any newsgroups he abuses.
6. He goes through quiet periods, then _very_ nasty periods.
7. All evidence of this great conspiracy is laughable, to say the
least.
8. He gives internet/usenet a bad name to the media. Including
mailbombing Chris Tarrant and faxing various celebrities.

I do not condescend to him. I actually know what he does, and has done
in the past, and am frankly not too respectful of him. He can be openly
referred to as "mad" because he is. Let's check my mailbox saves:

>MC had seen the light and stopped spamming.

He hadn't seen the light at all. His level of spamming had got to
such outrageous proportions that we had to mount a concerted
attempt to get his account(s) closed. The reason for the lack of
spam lately is that Mike has been furiously swotting up on Law so
he can bring an action as a LIP against the BBC (all solicitors
having quite rightly and honourably declined to act for him). When
this course of action is exhausted without result, I confidently
predict that we will once again be the innocent victims of his ire
and the spamming will commence again.

Subject: I am being ignored
Newsgroups: uk.misc,uk.legal
Organization: Toronto Free-Net
Summary:
Keywords:

Something mildly unusual is happening. Nobody has been getting at me for the last couple of weeks. Best of all, about three weeks ago I bought a video recorder to try to get some evidence from the News etc, and despite having watched Martyn Lewis, Michael Buerk and the whole lot of them, not one of them has said anything to me in the last three weeks. And I have been listening to and recording Capital, with no ill effect. All in all, I am being comprehensively ignored.

Of course, I should have video-taped the news programmes back in 1990/91/92 (and even 93) when it was still all going on. Anthony Johnsson (casually name-drop to stick the knife in) will tell you how intelligent a person I am, yet I didn't have the good sense to record the programmes at the time, and it's a bit late now.

Today another avenue of exploration closed when my second summons against the BBC was struck out (basically through lack of evidence), and an order was made by the district judge saying that I could not sue John Birt again without the express permission of the court. She explained that this was for my own good, to save me the summons fees. Costs were not awarded though (the BBC didn't even really seek costs), and I am free to sue anyone else I take a shine to.
.....
It is not that you are being ignored.... it is just that as your mental health improves, so your paranoia eases.

OR...

The dark forces are gathering strength for the final battle with you...

Seriously though, it's nice to see you back - cos as long as they are persecuting you, I can relax knowing they haven't got time to bother me!

Mike Corley (bu765@torfree.net) wrote:

[unreasonable optimism snipped]

Well, that didn't last very long, did it?

Capital Radio this evening approx 8.35pm, Neil Long's programme a few moments after I switched to it (I am listening to it as I type this). The following spouted from his mouth;

"want to see Jacko in town? what a gig it's going to be, that guy is amazing, and PSYCHOTIC, but amazing on stage, 0171-4200958, on stage he's a MADMAN but he's wonderful"

God, I am so tired of this. It's been going on for seven years. When's it going to stop?

I have the above extract on tape. When I get around to it I will post it, and the Hepworth snippet, as audio files on the website. Of course, all the doubting Thomases and Smids can carry on doubting, because the mere fact that moments after switching on the DJ starts talking about "psychotic", that's not proof is it?

I wrote an aggrieved letter to Chris Tarrant at Capital and sent it off today, copied to Richard Park, Group Director of Programmes. I suppose they'll just lie as usual. Bastards, basically.
.....
The solution is surely to not have a TV, video, radio or telephone in the house, Mike. That way they can't be used to watch you.

>The solution is surely to not have a TV, video, radio or telephone in
>the house, Mike. That way they can't be used to watch you.

No. I tried that strategy in 1990/91 when I sold my television and stopped listening to the radio. It didn't work because they got at me through co-workers and eventually the general public.

The solution is to gather evidence by recording everything, and then complain or sue if possible. I wish I'd recorded it all five or six years ago, then I might be more successful in a legal action now.

.....

Did anyone else watch the X-Files on Sky last night (Sunday 13th April) and recognise Mike's symptons in the chap with the tattoo? It was quite interesting to see someone responding in precisely the same way, picking up on individual words and phrases in ordinary sentences and applying parts to themselves as though they were intended.

Not a pleasant ending though. You take care, Mike, and keep taking the medication. uk.misc just wouldn't be the same without you now.

>moments after switching on the DJ starts talking about "psychotic", that's not
>proof is it?

No, it isn't, but you knew that anyway.

Mike, how is it that you think that this can't be a coincidence because it happened 'moments' after you switched on the radio? Haven't you just told us that you haven't heard a thing for two weeks? Going two weeks watching TV & listening to the radio without a reference to 'mad', 'crazy' or 'loony' is quite an acheivement, especially given the trashy radio you seem to prefer.

I've just spent a lot of the weekend trying to keep a manic depressive under control, so that she doesn't have to go back into hospital and lose the last few months' memories to ECT. One thing I've noticed is that manic depressives almost seek to foster their fantasies, they enjoy the control and the high. You seem to be the same - you refuse to answer the points put to you that explain away what you call persecution totally - do you have the courage of your convictions to reply to this? Or do you enjoy the attention your illness brings you?

Do please tell the *truth*. It has been longer than *2* weeks as I'm sure
you have noticed, hasn't it ?

Well I claim responsibility for the absence of persecution. When I rang
John Major's personal private secretary, not the personal political one or
any of the others in the same office, and I said you would vote for the
Conservative Party at the General Election the secretary said Johnny would
be so happy and as a sign of gratitude he rang-up the Head of MI5 and told
them to save money for tax cuts by abandoning forthwith their campaign
against you. Consequently MI5 and MI6 have been able to redeploy urgently
needed resources (i.e. manpower and telecoms interceptions) against an
international band of (*****censored*****).

On behalf of the law-abiding and decent citizens in the British islands, I
would like to sincerely thank you for your invaluable contribution to
crime fighting by your instrumental achievement in releasing badly needed
and very scarce MI5 and MI6 resources.

Many thanks,

Please don't forget it is National Election time and the news broadcasts
at 21:00 on BBC1 are preoccupied with British politics.

> Of course, I should have video-taped the news programmes back in 1990/91/92
> (and even 93) when it was still all going on.

Any particular date in mind ? I have a few in the library. You can also
purchase copies from the BBC on 0181-743 8000 (central switchboard).

> Anthony Johnsson (casually name-drop to stick the knife in) will tell you how intelligent
> a person I am, yet I didn't have the good sense to record the programmes at the time,
> and it's a bit late now.

Perhaps it is for the best. Now that it is all over, you can return to
Canada. Did you manage to get your Canadian citizenship ? What did your
contracts at MI5 say about you becoming Canadian ? You never did mention
the name of your MI5 liaison officer nor of any of the others.

That's true. But as it is now all over there is no need to worry about
the past. MI5 said your file has been removed from the Registry and put
in a burn-bag so there is nothing left for anyone ever to find.

By the way, what was the URL of your famous Corley web site ?

I have to admit that it is actually mildly amusing to have newsreaders watching you, although it is tiresome after a bit. I am currently in an interesting situation, because after my lawsuits against them I think the BBC newscasters have stopped watching me entirely; I also think that ITN, in particular John Suchet, *are* still watching but they're being subtle about it (his blink pattern followed mine).

Being called nasty words is quite horrible though, and seems gratuitous; what do they gain by it, except to exercise their sadism?

: >I think we all ought to remember that schizophrenia is a
: >psychosis, and as such, unless you are American and believe
: >that *anything* can be dealt with through counselling and/or
: >psychotherapy, will not respond to this type of treatment.

: Tell me about it. My friend is now unhappily resident in Warneford
: mental health unit, or whatever they call psychiatric hospitals nowardays.

I've never been in a hospital as an in-patient, ever. I think I've been very lucky in that regard.

: Having said that, one should seek to disabuse even psychotics of their
: delusions.

The medicines haven't made any difference to my ideas. They obviously make a difference in the emotional impact and reaction.
.....
>I've never been in a hospital as an in-patient, ever. I think I've been very

You have. They're not pleasant atmospheres, especially the secure wings, which have more in common with prisons ('airlock' doors, list of 'banned' articles, continuous observation). They have to be that way, unfortunately.

>Uh-oh. Peak Practice slagging you off as well now, eh Mike?

You better believe it. Tuesday's episode had one of its characters being
labelled as a "lunatic" with "something wrong with them". I changed channels
rapidly at this point, but in retrospect perhaps I should have carried on
watching and taped the program.

A few days ago I bought a video recorder (about time too) for evidence
gathering purposes. But strangely the TV news (both BBC and ITN) haven't
uttered a sound over the last few days. Almost as if they know they're being
taped...

>
>You better believe it. Tuesday's episode had one of its characters being
>labelled as a "lunatic" with "something wrong with them".

And?

There are many characters in TV programmes who _are_ lunatics with
'something wrong with them'. Why do you think this alludes to you?

In the eponymous book, Cervantes' Don Quixote is described as 'crazy'
'mad' and 'lunatic'. Do you think this is a reference to yourself,
albeit written by a time-travelling 17th century Spaniard?

If you accept that the character of Don Quixote can be described thus
without it being a reference to you, what problem do you have with
Peak Practice? Or do you enjoy tilting at your own little windmills?

A friend's lodger has turned out to be paranoid schizophrenic. Her
obsessions are strikingly similar to yours, she is convinced that she
is being bugged, and that students at her college are making fun of
her for being foreign. She has been looking for the services of a
private detective. Maybe Oxford has this unfortunate effect on foreigners?

I must say that I'm surviving rather well, or that's what the man
under the stairs told me yesterday.

Victor Lewis-Smith has broken the silence in his TV review column "Goon and best forgotten" in the Evening Standard (on Thursday 8/May). He said, "If I sound paranoid, that's probably because I once worked there. Eventually, I had to leave because they were all trying to kill me but, for sheer pathological hatred of the Corporation, I couldn't hold a candle to Spike Milligan".

I take this to be about me, because recently I wrote to both the BBC and Capital Radio, saying "I believe the current purpose of the harassment is to force me to kill myself to prevent the harassers, yourselves included, from being brought to justice, and last year there were several incidents of people shouting 'suicide' at me, which would appear to corroborate that view." I think VLS's words about the BBC "all trying to kill me" shows he has seen or heard of what I sent to the BBC or Capital.

Nasty eh? I believe that VLS or his mates read this newsgroup. I wonder how he would explain his article?

.....

Erm, Mike, I'm a bit of a fan of Victor Lewis-Smith, ever since his days of "BuyGones". I must admit, he often likes to play the flawed lunatic evil nasty person. He's been doing it for years, with prank calls, far

before your illness. Its his act. He wouldn't be VLS without it.

He doesn't like the "Goons" either. It isn't about you.

>I take this to be about me, because recently I wrote to both the BBC and
>Capital Radio, saying "I believe the current purpose of the harassment is to

I don't think Victor Lewis-Smith has worked for the BBC (or Capital) for several years (1994 was the last time...), so the connection, is paranoia here.

Personally, I believe VLS as a person of reasonable integrity, who wouldn't give a fuck about you...

>Nasty eh? I believe that VLS or his mates read this newsgroup. I wonder how he
>would explain his article?

Keep up the medication, not as many people read this newsgroup as you think, even though you are now incorporating that into your illness.

Victor? Are you there?

Organization: Toronto Free-Net
Summary:
Keywords:

>Last night (21/Feb/97), I was listening to BBC GLR. You have to understand that
>I was listening by stealth. Back in 1990 I used to have Capital blaring out of

Not much changes. Today I was listening again to David Hepworth's show on GLR, having more or less waded in on it by accident. Here is the exchange;

David: "we have executive drivetime, we have Brian in charge of the prize cupboard. Brian it's not a bad prize cupboard this week is it?"

Brian: "no David it's an absolute (EMPHASIS) embarrassment (END-EMPHASIS) of prizes this evening" (laughter)

David: "what have we got?"

Brian: "well in my left hand alone we've got that .... Gary Clale, I don't know if you remember him obviously still alive and kicking...."

David: "Rock and roll spelling test is your first opportunity to take advantage of this embarrassment of prizes"

What do I read into this exchange? The laughter after the word "embarrassment" shows they're aware of the last complaint I made on usenet (copied by snail-mail to them). The "left hand" business is I think a coded way of calling me a w***er (the term would be better applied to Brian and David).

I have a tape of this exchange, and will eventually get around to posting it on the website.

1464. MI5 Persecution: Overview (235)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-08-20 19:43:58 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07072019435588@4ax.com>
Source record: 4584
Cross-posted to:
rec.radio.amateur.equipment,alt.bainaries.pictures.erotica.oral,alt.fan.elton-john,sci.engr.color,it.comp.giochi.action

Overview

What all these snatches of video and audio, and newspaper articles, have in common is that none of them provide conclusive or very convincing
evidence of their being directed against me, or forming part of a campaign against me. Other people with my illness doubtless could produce similar
non-proof if they were minded to do so.

Good, now we've got the disclaimer out of the way, we can describe precisely what it is that is on display in this part of the site. In the video
section, we have Quicktime (MPEG-4) clips of Jon Snow of ITN in action, also interviews with Ken Clarke and John Major of the ousted Tory regime. These are
embedded in the page using QuickTime. While each audio/video clip is coded to automatically download the QuickTime player, you may find it helpful to
download QuickTime from Apple's website before you start viewing the media files.

Note that each item is awarded a rating of the confidence I feel that it is directed at me, expressed as a percentage. Items with 50% or
more are probably about me; 100% indicates a "dead cert".

In audio we have MP3 files of harassment at work in Canada in late 1996, also GLR's David Hepworth not even trying to pretend that he isn't getting
at me, and a snippet of Capital. There is also an album track which I have taken as being about me. The newspapers section contains articles by Bernard
Levin on his encounter with a madman who "bursts into tears, and swears it is all
true - and it is". Also a Private Eye cover, and snippet from Victor Lewis-Smith.

I have added several recordings of abuse "in public". By Sept/1998 I had seven minidiscs of such recordings, unfortunately containing mostly very
nasty sexual slanders which I will not be publishing on this website. The recordings were made on a Sony Minidisc Walkman MZ-R30, which I purchased
in Canada in July/1997, with ECM-T140 microphone. After both the MZ-R30 and the microphone reached the end of their lives, in June/2001 I purchased as
replacement my current recording gear, an MZ-R900 walkman with ECM-T145 microphone.

Share and Enjoy! I hope you enjoy partaking in my delusions which have been recorded with high fidelity digital equipment and presented for your
listening pleasure.

Ken Clarke (1), April 1997

Certainty level: 30%

The first of two video segments from the same program, this shows
Jon Snow interviewing Ken Clarke in April 1997, during the general
election campaign. The following exchange is heard;

Jon Snow: "You say we are booming in your posters, the bust's around the corner"

Ken Clarke: "You took that from three years ago, when I was being
advised to do all kinds of mad things to stimulate the economy,
and being told that I had to take desperate measures to get it going"

At this time I was watching television almost continuously at home,
with a video recorder whirring away, trying to obtain from the
newscasters a reaction which would give them away. I think this is an
instance where it happened. Ken Clarke first darts a glance straight at
the video camera (and perhaps at a monitor next to it showing my living
room), then comes out with "all kinds of mad things", while engaging in a
facial display involving raising of eyebrows and lowering of eyelids.
To me at the time, and also now, it looked as if he was selecting a
context into which he could drop the word "mad" as a directed insult against me.

Ken Clarke (2), April 1997

Certainty level: 30%

The second of two video segments from the same programme, this shows
Ken Clarke during the election campaign. He makes the following statement;

"we have a party, and we have a Cabinet which has produced a manifesto
consistent with our policy of the last five years;
people are challenging us on the basis there's been some monstrous
conspiracy between all the politicians to guide us we know not where,
we know where we're going, we wish to be a leading influence in the European Union"

It should be fairly obvious what I read into in the above sentences.
The "monstrous conspiracy between all the politicians" could of course
apply to the public perception of closer European integration, but
I took it as referring to the conspiracy of politicians and
media people against me. Again, facial expression comes into it; as Clarke
speaks of the "monstrous conspiracy" his eyebrows twitch and it is clear
that something or somebody is being made fun of.

1467. MI5 Persecution: Dimbleby / John Major, April 1997 (3904)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-08-20 20:33:16 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07072020331348@4ax.com>
Source record: 4587
Cross-posted to:
rec.radio.amateur.equipment,alt.bainaries.pictures.erotica.oral,alt.fan.elton-john,sci.engr.color,it.comp.giochi.action

Dimbleby / John Major, April 1997

Certainty level: 90%

Dimbleby interviews John Major during the election campaign. Here is
the exchange, regarding Neil Hamilton, the "sleazy" Tory candidate;

Dimbleby: "It's a direct quotation from what he said to Sir Gordon Downey
and what he said to his local newspaper, the Knutsford Guardian".
Major: "Well, heaven forfend that I should doubt what the Knutsford
Guardian actually said"
Dimbleby: "Well I should hope so"
Major: "Absolutely, it would be quite unforgivable to doubt the
Knutsford Guardian"

What I find in this segment is an assonance between "Knutsford" and "Nut"
or "Nuts". I think Dimbleby deliberately invents the play on words,
and says it clearly enough for Major to pick it up and repeat it.
You can gauge Dimbleby's intent from his facial expression of false
honesty when he uses the words "Knutsford Guardian"; and Major's reaction
follows from his recognition of Dimbleby's intent; Major smiles and says
it would be "unforgivable to doubt the Knutsford Guardian".
These are much clearer on the original video than on this Quicktime clip.

rec.radio.amateur.equipment,alt.bainaries.pictures.erotica.oral,alt.fan.elton-john,sci.engr.color,it.comp.giochi.action

Channel Four TV News - 12/Feb/1999

Certainty level: 100%

I am positively, utterly, completely sure this item is about me. It's a bit subtle so the objective reader might not understand my certainty. Here is
what happened. I was watching Channel Four News with Jon Snow, on the day Clinton "got off" (as it were) in the Monica-gate scandal. Snow said;

"[and we're anticipating that the President himself will make his] first comments after the trial in which he has now been cleared at around half-past seven. So we'll have more on the historic judgment, we'll also be considering [starts smiling] the winners and losers in this whole sorry saga. Now further doubts have been...."

When Snow said "half-past seven", I looked at the clock on the mantelpiece above the TV. Snow saw my glance, and in reaction to my glance at the clock,
smiled. I think he was smiling at what he perceived as my self-importance.

Usually when newscasters or radio presenters laugh at me, there is an excuse for their laughter; usually they manage to find some reason for my
being "funny"; their amusement is blamed on me; it is my "fault" they are laughing. And so it was with this instance; Jon Snow thought it was funny
that I should be so interested in seeing Clinton, and his half-smile while reading the words "winners and losers" expresses that.

I wrote to Snow at ITN shortly after this broadcast to ask him about his behaviour; of course, he didn't reply.

Chris Tarrant - 10/March/1999

Certainty level: 25%

This one might be aimed at me, or it might be tinged with a whiff of intent, although I only give one chance in four for Tarrant's thoughts being aimed
at me when he said this. During his "Who wants to be a Millionaire" TV show in March 1999, he said;

if you're watching the show jumping up and down screaming at the telly,
remember you could be here. You can either seek professional help or call us...

The background is as follows. In early March I'd sent a quantity of emails to Capital FM, the London radio station where Mr Tarrant has his breakfast
show. They were addressed to the email account which Mr Tarrant used to read emails posted on Capital's website. Capital objected to the quantity
of emails - in fact, they contacted the Metropolitan Police's Computer Crime unit, who, in turn, "felt my collar" by giving me a verbal warning
over the phone to cease this behaviour.

The emails contained the words which I had heard Mr Tarrant speak in early 1994, namely;

"You know this bloke? He says we're trying to kill him.
We should be done for attempted manslaughter".

At the time of writing (May 1999), the Police have not told me what aspect of the emails was "illegal", nor despite my repeated urging have they
questioned Mr Tarrant about his remarks from 1994.

Regarding the clip from Tarrant's show above. The Police spoke to me on the afternoon of Wednesday 10 March 1999. Tarrant's live show went out
that same evening. The Police have told me that after speaking to me they told Capital FM that they'd spoken to me regarding the emails. So Tarrant
would have known by the time of the show who'd sent the emails and why.... and it's quite possible that his remarks about "seeking professional help"
were aimed at me personally following my attempts to persuade him to own up to his 1994 remarks.

1477. MI5 Persecution: Chris Tarrant - 10/March/1999 (235)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-08-25 05:48:49 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07072505485546@4ax.com>
Source record: 4597
Cross-posted to:
rec.radio.amateur.equipment,alt.bainaries.pictures.erotica.oral,alt.fan.elton-john,sci.engr.color,it.comp.giochi.action

Chris Tarrant - 10/March/1999

Certainty level: 25%

This one might be aimed at me, or it might be tinged with a whiff of intent, although I only give one chance in four for Tarrant's thoughts being aimed
at me when he said this. During his "Who wants to be a Millionaire" TV show in March 1999, he said;

if you're watching the show jumping up and down screaming at the telly,
remember you could be here. You can either seek professional help or call us...

The background is as follows. In early March I'd sent a quantity of emails to Capital FM, the London radio station where Mr Tarrant has his breakfast
show. They were addressed to the email account which Mr Tarrant used to read emails posted on Capital's website. Capital objected to the quantity
of emails - in fact, they contacted the Metropolitan Police's Computer Crime unit, who, in turn, "felt my collar" by giving me a verbal warning
over the phone to cease this behaviour.

The emails contained the words which I had heard Mr Tarrant speak in early 1994, namely;

"You know this bloke? He says we're trying to kill him.
We should be done for attempted manslaughter".

At the time of writing (May 1999), the Police have not told me what aspect of the emails was "illegal", nor despite my repeated urging have they
questioned Mr Tarrant about his remarks from 1994.

Regarding the clip from Tarrant's show above. The Police spoke to me on the afternoon of Wednesday 10 March 1999. Tarrant's live show went out
that same evening. The Police have told me that after speaking to me they told Capital FM that they'd spoken to me regarding the emails. So Tarrant
would have known by the time of the show who'd sent the emails and why.... and it's quite possible that his remarks about "seeking professional help"
were aimed at me personally following my attempts to persuade him to own up to his 1994 remarks.

rec.radio.amateur.equipment,alt.bainaries.pictures.erotica.oral,alt.fan.elton-john,sci.engr.color,it.comp.giochi.action

Nicholas Witchell - 10/April/1999

Certainty level: 100%

This clip is of Nicholas Witchell reading the BBC2 evening news at 7pm on Saturday 10 April 1999. You have to understand that the psychopaths of
the Security Service consider their abuse of me to be "so funny"; and central to their persecution of me is their inducement of their "bought
journalists" like the BBC's Nicholas Witchell to laugh at me on television.

So in this clip we see Witchell smirking and grinning while he reads the news. Only part of the news broadcast is shown in the clip; preceding it,
Witchell's upper lip quivers in mirth for several minutes, until his entire mouth twists into the uncontrollable smile shown in this clip,
through the excuse of a weak non-joke about sports fixtures.

1479. MI5 Persecution: England expects every man to do his duty (2681)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-08-25 06:41:05 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07072506411280@4ax.com>
Source record: 4449
Cross-posted to:
rec.radio.amateur.equipment,alt.bainaries.pictures.erotica.oral,alt.fan.elton-john,sci.engr.color,it.comp.giochi.action

"England expects every man to do his duty"

Certainty level: 90%

This video clip portrays a fairly-certain case of unpleasant MI5 harassment; because of context, surrounding events,
not just this one happening. It's the first time an MI5 agent has been caught on video, and, presumably to their chagrin,
their paid agent is either engaging in an onanistic practice, or, more probably, pretending to do so, in order to
carry out an act of harassment.

The background is as follows. In late June 2000 I had posted the following message to Usenet, about MI5's making
obscene noises at me on several recent occasions;

>From: bu765@torfree.net (Mike Corley)
>Subject: relax, don't do it (mi5 again)
>Date: 22 Jun 2000 00:00:00 GMT
>
>you will recall that a couple of weeks ago I was supposing what MI5 were
>doing with their 'single'handed' posting antics at 2am
>
>exciting stuff
>
>so about a week ago someone rings me up at home.... 'is that Emmanuel
>Goldstein?' then he phones back the following day and goes 'huaaaagh' on
>the phone before dropping the handset in excitement
>
>and a day or two later, just coming out of our house to put something in
>the rubbish bin, a pair of blokes over the other side of the road, again
>start making orgasmic noises
>
>I'm not paranoid enough to record minidisc when I pop out for a few
>seconds..... but perhaps I should be

The video clip, which was captured on 1/September/2000, is the culmination of that thread of harassment. You
have to understand that MI5's abuse is in threads; they choose a topic, and then continue with it for months
and years. Sometimes they drop a topic, usually to be replaced by a worse one, and you never hear of it again.

If the person in the video clip were not an MI5 agent, then he would deserve privacy, despite carrying out a real
or feigned act in a public place. But I am almost 100% sure, because of context, that this man was one of their
operatives, which removes any consideration of privacy from his act. He is facing away and cannot be clearly
identified from this clip. I've never seen this man before or since, but that is true of most other such incidents.

1480. MI5 Persecution: C4 SnowMail - January/2001 (3904)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-08-25 07:12:21 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07072507122805@4ax.com>
Source record: 4450
Cross-posted to:
rec.radio.amateur.equipment,alt.bainaries.pictures.erotica.oral,alt.fan.elton-john,sci.engr.color,it.comp.giochi.action

C4 SnowMail - January/2001

Certainty level: 50%

In January 2001 I signed up for Channel 4 TV News's email service SnowMail, under an anonymous email address.
Quite soon Jon Snow and others started getting at me in the SnowMail bulletins, so I promptly unsubscribed.
Here are three distributed messages which may be intended to be against me; I have given these items a joint
probability of 50% only, since it is quite difficult to be sure these are against me, although I think they
may well be.

First item is from 5 January 2001. "Back passage contacts" might genuinely be about Labour were communicating
in a shielded way with ITN; but it may be about Snow's covert communications with me on his programme and in
this bulletin; and it's a slightly strange thing for him to say, it suggests the human body's back passage.
"I wish they'd come and talk on our website".... Snow knows I'm subscribed to his mailing list, and he may be
encouraging me to talk to him by email; again, if that comment were genuinely about Labour, then it would be
a strange thing to say, since the politicians talk to Snow by phone and on his programme, so they wouldn't talk
to him by email; my suspicion at the time is that he was trying to persuade me to talk to him by email,
so he could decently lie that my thoughts of reference were incorrect.

From: "Snow C4N, Jon"
Subject: Channel 4 News briefing
Date: Fri, 5 Jan 2001 17:15:06 -0000
MIME-Version: 1.0

January 5, 2000

Good afternoon dear viewer,

Well the 'snowmail' drew a little ire from Labour HQ yesterday. A sensitive call at 6.35pm from my friendly
mentor there sought to correct the impression I gave in yesterday's missive that in some way Labour was bounced
into naming these latest millionaire donors. Well I'm afraid they were...rest assured Paul

Hamlyn would not have
been named without the diligent sleuthing of my colleagues, and had HE not been named neither would these latest two.

The only serious inaccuracy I must plead to was the promise that we would put these matters to a 'senior Labour
person'...alas none was forthcoming...I shall make no such rash promise again. My same mentor was on the phone again
during last night's Channel 4 News urging us to 'get some reality into the programme'. I fear we may have touched a
sensitive nerve...and the election campaign has not even started, or has it? I shall try to keep you posted with these
'back passage contacts' as the campaign unfolds..from all sides. I do wish they'd come and talk things over with all
of us on the web site...here's an open invitation...

So to today:

Harold Shipman murdered as many as 250 people it now turns out. But he is never to be tried and relatives who seek
closure to their uncertainties will never reap satisfaction..we have the DPP, the Chief Medical Officer and a solicitor
for aggrieved and bereaved families on the programme..the world's second-worst mass murderer..can he be allowed to
escape further action?

Sending private/sexy emails in company time gets workers the sack..Big Brother spies on office premises..is electronic
life in the work place getting out of hand? We explore what we can...and if you are not sure what you can and can't
send, our site spells out the legal dos and don'ts and gives you the chance to put your views to us.

The CIA publishes its risk assessment for the world in the coming years..beyond the CIA itself, what's the biggest
threat to life and liberty? Find out on Channel 4 News..and a major encounter with a man expected to take a top job
in the Bush administration...

And a sumptuous piece from Nicholas Glass in Valencia..a city transformed by a brilliant young architect for half
the price of what the Dome cost us.

Lots moving, see you at 7.00,best as ever,

Jon Snow

The next contact was on 11 January, with the unsubtle words "the lunatics have taken over the newsroom"
from Krishnan GM. The phrase needs no explanation as to why it might be a dig at me.

From: "Guru-Murthy C4N, Krishnan"
Subject: Channel 4 News briefing
Date: Thu, 11 Jan 2001 16:56:25 -0000

MIME-Version: 1.0

January 11, 2001

Good Afternoon. Jon's away so the lunatics have taken over the newsroom. I am joined by Samira for tonight's show.

The Depleted Uranium confusion deepens. What did Ministers and senior officers know about the risks to soldiers?
What did they tell others? And why the lack of candour over the recent documents that have surfaced? Having
dismissed the army report leaked yesterday warning of the dangers of exposure to DU as written by a trainee and
littered with mistakes, the Ministry of Defence now accepts it was written by an experienced officer.
But they won't say who. More awkwardly it emerges that senior officers decided a month after it was written that
the report should be circulated to all personnel likely to come into contact with DU. But was it? Nobody seems to
know. Our Science Correspondent Andrew Veitch has also visited the lab in Oxford that could begin testing
veterans for Depleted Uranium within six months, but they have had no contact from the government as yet. From
the Tories, Mr Duncan Smith is likely to join us. And we have Defence Secretary Hoon coming into the studio to
answer the obvious (and not so obvious) questions.

No interest rate cut today from the Bank of England, but could it be next month? As real fears are raised about
the likelihood of recession in the US how could it affect us over here? There's been a recent consensus that
Britain could weather the storm instead of falling into the usual pattern of shadowing American trends. But how
realistic is that? And what about all that inward investment we rely on from the States? Liam Halligan has been
looking at just what impact economic downturn across the water would have on us.

The former Bosnian Serb President Biljana Plavsic pleaded not guilty to charges of warcrimes including genocide
today. She was number two to Karazdic and a reputed hardliner during the "ethnic cleansing" of Bosnia.
But has a deal been done on her sentence if found guilty? Just why did she get on a plane and give herself up
to the Hague War Crimes Tribunal? Nobody seems to have any explanation. Her lawyers are asking for special
accommodation and even the possibility of bail. Gaby Rado is there and joining us live is the first Prosecutor
in the Hague Judge Goldstone to discuss whether plea bargains and deals are the only way to get the real villains.

Also the astonishing news that scientists in America have bred the first genetically engineered monkey. What will

they be used for and what's the next step? Does anybody really believe they won't do it to humans before too
long? Julian Rush will have details.

All that and loads more at seven. See you then, I hope. Krishnan.

The third and final item is from 24 January, shortly after which I unsubscribed from SnowMail. Again, it is difficult
to be sure if this item refers to me; it may do, it may not do, 50% captures the possibility. Snow refers to
"third leg of [Blair's] political footstool". In English culture "third leg" indicates one's male member;
Snow's phrase may be a sexual reference, of which there were others around that time.

From: "Snow C4N, Jon"
Subject: Channel 4 News briefing
Date: Wed, 24 Jan 2001 16:37:36 -0000
MIME-Version: 1.0

January 24, 2001

Good evening dear Channel 4 News viewer,

There are times in this business when you suffer severe attacks of deja vu...haven't I already said "Mandelson
Resigns!"...I'm afraid I have, and tonight I shall say it again. He's gone, the fat lady has not only sung but
died completely and utterly on his career...that is the end of the former Northern Ireland Secretary's political career.

It's a body blow against Blair for whom Mandelson was a mentor, manipulator, calculator, friend, brother and the
third leg of his political footstool.
It's a body blow for a Prime Minister who has had to have him resign not once but twice. It calls into question
Tony Blair's judgement. Mandy, probably one of the most brilliant spirits in politics, flew too close to the
sun...suffering finally at the hand of his own diabolical flaw.
Amazingly it's a flaw Blair understood more keenly than anyone...

And then there are the Hindujas who have compromised every political party with ridiculous photographed party
poses..who are they and how do they work?
Masses moving on all fronts on this story tonight. We have the resignation speech in full on our site www.channel4.com/news;
if you want to see how Mandelson bowed out.

There are other developments:

The cancer tragedy at Nottingham Queens medical centre..the wrong drug going into the spinal column of an eighteen-year-old
Leukemia victim who's now in intensive care, dangerously ill...it's happened before..why has it happened again?

And a moving interview with Sharon Sage who's mother Lorna Sage wrote a spell binding memoir highly rated in last night's
Whitbread Prize. An exceptional piece....

A highly political night....see you at seven on four...best, as ever, Jon

After this email I unsubscribed from SnowMail. I could not be sure that these items were or were not about me,
but it's an unpleasant feeling that Mr Snow might be getting at me in writing, as he certainly was when he watched
me while presenting the news; so I cut my losses, so to speak, and bailed out.

Cross-posted to:
rec.radio.amateur.equipment,alt.bainaries.pictures.erotica.oral,alt.fan.elton-john,sci.engr.color,it.comp.giochi.action

BBC-TV "See You, See Me" - 7/Dec/2001

Certainty level: 80%

On Friday 7 December 2001, BBC Schools aired a TV programme from their "See You, See Me" series.
The series was based in Scotland, with Grant Stott and Wilma Kennedy trying to find some stolen jewels.
Its web home is www.bbc.co.uk/scotland/education/seeyouseeme/

The programme appeared to make some "subtext" references to my situation. Kennedy refers to "it's not fair",
which is a key phrase; its existence started with OCTS MD Hugh S.-W. who humorously referred to my treatment
with the same phrase.
The subtle statement is that it is fair, because we're doing it, and we're always right, even when we're wrong.

The phrase "useless idiot" from the police chief is a clear insult directed at me, and needs no explanation.

But it is the third item in this clip which is most telling. Stott says the words, "humiliating in front of
the whole public, it would crucify us" if the investigation were called off. That's the phrase that assures
this clip of an 80% probability rating. MI5 are trying to humiliate me "in front of the whole public",
and their strategy is a mixture of ambiguous covert, such as this very programme, and clear overt.

1482. MI5 Persecution: Channel Four TV News - 10/April/2002 (6350)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-08-25 08:14:15 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07072508142153@4ax.com>
Source record: 4452
Cross-posted to:
rec.radio.amateur.equipment,alt.bainaries.pictures.erotica.oral,alt.fan.elton-john,sci.engr.color,it.comp.giochi.action

Channel Four TV News - 10/April/2002

Certainty level: 80%

I was watching Jon Snow on Channel Four TV News on Wednesday 10 April, and he again reacted on seeing me
watching his programme. At 7.25pm he was reading an item on atrocities during the Balkan war;

JS: "It was Europe's worst massacre since the Second World War, and Dutch army officers [cough] and the
United Nations should share the blame. So says the first authoritative report into the murder of
thousands of Muslim men in Srebrenice at the height of the Bosnian war in 1995. The 7,500 page document
took Dutch Government researchers six years to prepare, and it condemns military and political leaders
for sending peacekeepers on a mission impossible. Our Foreign Affairs correspondent Gaby Rado,
who went to Srebrenice very soon after the massacre, is with us now. Gaby, how damning is this report?"

GR: "Well it is very severe. It accuses the Dutch Government of sending badly armed and badly briefed
Dutch soldiers into a very dangerous space out of a sense of national arrogance basically. It accuses
the United Nations basically of..."

There are two incidents in this one recording. The first (80% certainty) is when Jon Snow develops a frog in
his throat in the first sentence, shortly after reading the text "Europe's worst massacre". There is both
verbal expression and facial expression at that point; he is laughing at me, which is at odds with the serious
material he is reading. His eyebrows twitch upwards, and he is smirking at the phrase "Europe's worst massacre", and its application to the Security Service's actions against me. Another aspect
is that when Snow said "Europe's worst massacre", I facially reacted; in return, Snow would have seen
my change of expression, and followed it with his own reaction. He almost says "United States" instead of
"United Nations"; he isn't looking at his autocue, his mind is off what he is reading, instead he is looking
at me in the little monitor where he sees me through the television.

The first incident I'm fairly sure about, but the second I only give a 20% certainty to; it's when Gaby Rado
talks of a "sense of national arrogance", supposedly about the Dutch, but perhaps the English actions
against me for over a decade. If Rado's statement were about me, then it would be condemnatory of MI5
as being "arrogant"; but I cannot be reasonably certain it's about me, or much less so that Snow's
reaction in the first instance, anyway.

BBC1 TV News - 18/Dec/2002

Certainty level: 30%

This item occurred on Wednesday 18/December/2002, on BBC1 TV News shortly after 6pm. It is one of the "coincidence"
category of happenings, where people by supposed coincidence repeat exactly the words I have said or thought very recently.
In this case, the BBC's New York correspondent Stephen Evans, live from NYC, says the words "airy fairy language",
during a piece on Britain's entry in the competition for a successor to the WTC after 9/11.

I had been thinking the words "airy fairy" a day or two previously and may have spoken them in my sleep. I did not speak them awake.
The TV practice in 1990-92 had been to repeat on TV/radio (or at work) words which I had either spoken while awake, or words I had
thought but not said consciously - since I know that I sometimes say things in my sleep, but cannot later recall saying them,
obviously since I was unconscious at the time. The TV news reader or reporter then finds a context in which to drop a particular phrase;
this practice has a famous exemplar in the "Phil the Greek" item relating to the Duke of Edinburgh - who had been called Phil the Greek
in Private Eye, then a TV reporter managed to structure his report to include the words "fill the Greek community with alarm".
It might appear funny, but when such "intentional coincidence" happens a lot, as in 1990-92, and when it supports other methods of obscenity,
then the amusement value wanes.

The choice of words appears to form a homosexual reference - the way it works is that the Security Service are blokes fantasising continually
about another bloke, so to avert the obvious observation of their being gay
see here for another instance of unwholesome MI5 fantasising in public),
they try to assign the attribute to the victim - they do this sort of thing all the time, with all sorts of attributes. However, in this
particular case I give it only a one in three probability, since this incident seems to have been a one-off at that particular time.

Life is so hard

Certainty level: 100%

This relates to harassment at my workplace in Canada. Yes, "they" had
their claws into my employers in North America, it doesn't just happen
in England, it happens here as well.

During the second half of 1996, at work, I was sitting near a co-worker
whom we shall call Mark (we can, because that's his name). This guy
occasionally came out with words and phrases that made me think that
"they" had got to him and were supplying him with information about my
home life (not social life please note, because of course I don't actually
have a social life here).

During November 1996 I tried to catch him in the act of saying something
"meaningful", a difficult exercise because as soon as he saw a tape
recorder, he shut up completely, except for times when he knew he would
be out of range of the walkman. (Note that the quality of this recording
is not very good; I was just using a four-year-old tape walkman with
a cheap microphone, quite low-tech).

During the evening of 12 November 1996, at home in my apartment (flat to
you UK-ers), I said "life is so hard, and then you die". A nihilistic,
negative thing to say, but quite distinctive. The following day,
13 November, Mark said loudly, "life is so hard eh, and then you die"
followed by loud laughter.

In my book the precise repetition of the words makes this incident a
100% certainty. You, the reader, may differ, but then living in a free
country allows each of us to have our own opinions, doesn't it?

GLR-David Hepworth (21/Feb/1997)

Certainty level: 80%

I was listening to BBC Greater London Radio (GLR) by stealth, ie. on my walkman with headphones, with the sound turned right down, to prevent anyone from hearing what I was listening to. Yet somehow "they" are still able to tell what station I am listening to on the walkman. After half an hour or so listening to GLR, DJ David Hepworth came out with this;

"I assume Brian, do we have an embarrassment of prizes in there, we do, don't we, absolute obscene amounts of prizes, there will no doubt be a riot at the back door, and that's A-level coming up after this"

The key phrases in what he said are, "EMBARRASSMENT of prizes", and what he himself emphasised verbally, "ABSOLUTE OBSCENE amount of prizes". It is my belief (based on content and tone of voice) that when he spoke these phrases he knew I was listening, and that the phrases refer directly to my situation. The "EMBARRASSMENT" is the embarrassment he and other media people would feel at having their wrongdoing exposed; the "ABSOLUTE OBSCENE" (which he verbally emphasised) described the disgusting sexual abuse which the harassers have been throwing at me.

Of course, I can't prove that this is what he meant, although this has happened enough times that it's hard not to recognise it when you see it. I sent David Hepworth a copy of this explanation, with the results listed in a subsequent item (David Hepworth 9/May/1997).

GLR-David Hepworth (9/May/1997)

Certainty level: 100%

This time I deliberately listened to Hepworth with the sound turned up on the radio, to try to get a reaction. Sure enough, he and his cronies reacted;

David: "we have executive drivetime, and we have Brian in charge of the prize cupboard. Brian it's not a bad prize cupboard this week is it?"

Brian: "no David in fact it's an absolute (EMPHASIS) embarrassment (END-EMPHASIS) of prizes this evening" (laughter)

David: "what have we got?"

Brian: "well in my left hand alone we've got that .... Gary Clale, I don't know if you remember him obviously still alive and kicking.... and that's just in my left hand"

David: "So it's certainly worth competing. Rock and roll spelling test is your first opportunity to take advantage of this embarrassment of prizes"

What I "read into" this item should again be quite obvious. Remember, I sent off a letter of complaint to Hepworth after his spying activity during the previous show. Here the emphasis on "absolute embarrassment" of prizes shows he knows this is a "key" phrase.

It might be interesting to try to talk to DJs like Hepworth and ask them what they get out of abusing their listeners. But if you challenge them directly, they show their true colour (yellow) by either not answering the challenge, or by denying that harassment has taken place.

Capital Radio (11/April/1997)

Certainty level: 10%

A nice easy one here. The DJ is heard to say (around 8.30pm);

"Jacko in town, what a gig it's going to be, that guy is amazing, and
psychotic, but amazing on stage, 0171-420-0958, on stage he's a madman
but he's wonderful"

I was listening to Capital loud and clear, trying to get a reaction.
The above may have been a reaction. I'm not sure if it was, and I'm not
sure that it wasn't.

Neil Fox's Juke Box on Capital Radio (week ending 15/March/1998)

Certainty level: 70%

Here is an excerpt from Neil Fox's show on Capital Radio 95.8FM, sometime during the week ending Sunday 15/March/1998 (probably during the weekend, but I don't remember).

First I will give the text of the conversation between Neil Fox and telephone caller Martin, then I will state my interpretation.

(conversation) (F=Dr Fox, M=Martin the caller)

F: coming up on the jukebox, the hotline's 0171-4848-958, just a quick shout here and so who's this going to be then Mr Producer?
(staff, shouting) MARTIN!
F: Couldn't quite hear you, it's going to be?
(staff, normal voice) Martin.
F: Thank you. Martin, hello.
M: Hello, Foxy.
F: How are you Martin.
M: Er, knackered.
F: Why?
M: Didn't get much sleep last night. Party down the road.
F: What time did you go to bed?
M: Four o'clock this morning.
F: Well that sounds quite a reasonable Saturday night if you ask me.
M: I was up at eight.
F: You were up at eight this morning?
M: Yeah.
F: That's sick. Why? What on earth made you get out of bed at eight this morning?
M: My father.
F: Well that's no good. Why is he being sicko, is he being a sadist?
M: No, he out there, sort of clearing room.
F: Listen, is your dad there?
M: No, he's downstairs.
F: Oh mate, can you get him?
M: No.
F: Does he not let you on the phone? The only reason is that I wouldn't mind having a chat with someone who makes anyone get up at eight o'clock on a Sunday morning. I'm sorry, that's ill isn't it, that's out of order.
M: It's sick.
F: I'm just going to ask around here. What do you think then, eight o'clock

Sunday morning? That's out of order isn't it, for any father?
(staff) Yeah, definitely.
F: Is he like victimising you or something, is there any reason why he wanted you up at eight o'clock? To clean your room?
M: Well as I say I got up at eight this morning to clean my room and it looks worse that it did yesterday.
F: Well I should have just left it and stayed in there until eleven o'clock if I was you.
M: Well I was up, I didn't get out of bed.
F: What, you didn't get out of bed at eight o'clock? No, he woke you up at eight o'clock. Did you do any cleaning at all?
M: I haven't touched my bedroom.
F: Top man. Boy you're going to get your arse kicked later aren't you. Now a song for you, what can we play?
M: Guns and Roses, "Sweet Child of Mine".
F: And we're going to dedicate this to your father?
M: No we're not, we'll dedicate this to my good mate Jamie, who's sitting on the bed now.
F: Right, hello Jamie. And anyone else? Any top totty in your life at the moment?
M: Unfortunately no.
F: The totty factor is quite low at the moment is it?
M: It's dead.
F: It's dead? What, nothing?
M: Nothing.
F: What, zero? Well, that's pathetic. No wonder you're down. You stay out til four o'clock and nothing. We'd better have words when we're off the radio I think. We need to give you a team talk. You have a good night tonight.
M: And you.
F: Take care.
(song starts)
F: Actually something was going through my mind. I think I'll leave it.

I'm not really sure whether this is in any way about me. It probably isn't. Probably it's just my nasty suspicious mind finding links where none exist. However, here is an explanation of why it might, possibly, be about me.

Throughout this interview, I was throwing abuse at the radio, and to my mind, Neil Fox was hearing the abuse, and responding interactively. This explains why he sounds so stressed when talking to telephone caller Martin, and the general violence of his words including "Boy you're going to get your arse kicked later aren't you".

The piece starts of with the producer shouting the name of the caller, which might be related to my loud vocalisations at the radio. The trouble starts off with Fox saying "That's sick". "Sick" might be taken as a reference to my condition. Then Fox says, "Why is he being sicko, is he being a sadist?", again sick = my illness, "sadist" = attitude of my oppressors towards me. "that's ill isn't it" = further comment on my illness. "Is he like victimising you or something" = again what my enemies are doing to me.

Fox sounds quite happy when he gets Martin to say "It's sick"; as you would expect him to, if the comment were directed at me. It is a constant feature of my enemies' harassment of me that they get intermediaries to verbalise the abuse. Immediately after saying "victimising you" Fox gives a little laugh, to show he thinks the victimisation (of me, not Martin) is funny.

Fox gets increasingly nasty as the piece progresses. "Boy you're going to get your arse kicked later aren't you" is not really what you would expect him to say if he were just talking to Martin. Fox is on the same side as Martin, so why would he be so verbally aggressive to him? On the other hand, if the piece is about me, then his strong words start to make sense.

Fox's jubilation at finding that Martin's "totty factor" is "dead" again doesn't make much sense unless you think that he might not be considering Martin's totty factor, but mine, since it's a fairly well known fact that my "totty factor" is not significantly above zero.

To round off the 135 second interchange, just as the next track is starting, Fox says, "Actually something was going through my mind. I think I'll leave it". Given that I was chucking abuse at Fox throughout, it is only natural for him have thought up a reply that he would have wished to have made, except that such a reply would (a) probably not be suitable for a family show, and (b) have given the game away completely.

So there you are. You the jury, what say you in the case of plaintiff vs. Neil Fox's Juke Box, guilty or not guilty?

Foxy's Showtime on Capital FM 25/11/98 7.35pm

Certainty level: 100%

This one, I can say with absolute certainty, is about me. It was recorded on my Sony Recording Walkman on the evening of Wednesday 25 November 1998. It doesn't mention me by name, so the objective observer might have trouble understanding why I'm so sure it's about me. I'm sure, because the harassment had restarted over the period when this piece was broadcast, and what Capital transmitted would have been in context with events at the time. (Sorry if that explanation is somewhat opaque, but I don't really want to embarrass myself by giving an explanation in detail, and an intelligent reader should be able to work it out for him/her self.)

This isn't the first time Capital have "got at" me; they were doing so right at the very beginning in summer 1990, when they said, "if he listens to Capital then he can't be all bad"; and Tarrant made remarks about me in his breakfast show in spring 1994, when he said, "you know this bloke? he says we're trying to kill him. We should be done for attempted manslaughter."

Unfortunately I didn't record those previous, much more conclusive instances of harassment by Capital DJs, and Capital Radio tells me they only keep recordings for three months. But lately I've been recording everything, and here is one product of that recording.

Neil Fox was introducing some petite Swedish songstress, sounded like Amelia, when he said something about her petite-ness ;

"she's a big big girl, actually she's really about tiny, she's this big, would you say what less than....."

then one of his studio staff shouted, "six inches"

then Fox laughed and said, "less than a meter tall, definitely"

What I think the "six inches" referred to should be obvious. I think it's sexual abuse directed at me.

Also there were a lot of words like "crazy", "mad" etc on this programme, which reinforced my belief that this was on purpose directed at myself.

I think Fox may be something of an unwilling participant in this abuse, he doesn't want to be an abuser but the persecutors are using his show and his staff to get at me. This is not the first time this sort of thing has happened from his show; and my guess is that it won't be the last

Keith-

What are the circumstances when this occurs? As Pat suggested, the IC-706 is voltage sensitive, and may temporarily go dark when you start your car. However, it should immediately come back to life after full voltage is restored. Otherwise, you could have a DC wiring problem.

One problem I had with my old IC-706 (original), was that it would occasionally run down the car battery overnight. The next morning the battery was dead and the rig was hot.

As far as I can tell, the problem was with final power transistor leakage. Their collector circuits are not switched but are connected directly to the DC voltage input. After jumping the battery, the rig would appear to work OK.

One thing you did not mention: Are you using the radio with the control head remoted? Or are you using it connected to the radio. Early on, Icom had a problem with the remote cable picking up rf and shutting the radio off. I had the problem myself on 2 of them. After consulting AES & Icom, I was told to put ferrite cores on that cable. So I did. One as close to the radio under the seat as possible and one near the control head. The problem went away in both cases. Same is true for the new IC-7000 in the remote setup.

I have a 706mkIIg and it does the same thing. It would cut off and on on receive and also transmitt. About 2 years ago it was doing that and it finaly did not power back on. I sent it off and several things were replaced. It worked fine after that for over a year. It is now powering off and back on about once or twice a day.

It is not a power issue as it is in the house and is being fed from an Astron 50 amp supply. The supply is working fine as I also have 746 pro hooked to the same supply. The voltage out is around the nominal 13.8 volts. I have checked the connections to the 706 and the connector on the back of the rig and could not find any problems. It will put out around 100 watts on the lower bands so I doubt there is a power supply problem with it.

> But when I was at a local beach yesterday, the same thing happened.

> My question is, could weak batteries possibly cause this kind of behavior?

Yes! That is *exactly* what happens as the batteries come to the end
of their lives in the Superadio.

As that time draws close, you'll have to turn the radio up a little
more to get the same volume, but you probably won't notice. Then, the
sound will become a little distorted, and you might eventually notice
that. Not too much later, what you describe will happen. (The FM
section takes more power than the AM and will stop working sooner.)

When you tried the radio the next day, as you wrote above, it worked
because the batteries had had enough time to build up a little charge,
not because it was inside (although some might argue the heat of the
outdoors could have increased the resistance of the components in the
radio more than it could have increased the output of the
simultaneously-dying batteries and was, thus, a factor). You'll
sometimes be able to operate the FM a little longer if you do it at a
low level.....

I've never seen a radio in which the tuner sections are separately powered. Compared to the output stages, they draw little current.

And very few radios -- the GE P970A being an exception -- have separate AM and FM tuners. We never established if this was the case with the Superradio.

1501. Motorola Service monitor

I have a Motorola Service Monitor, R2001D/HS, that is surplus and we no longer use. Unit powes up and was being used regularly when we stopped using it. The battery does not hold a charge but unit works well on AC power. I will look at any reasonable offers seriously.

Since the topic of this thread is the GE Superadio, you should look at the schematics of the radio to provide some validity to your statement. According to the schematics, both the Superadio I and Superadio III remove power to the tuner circuits not being used.

While the tune sections may draw little current relative to the audio circuitry when performing at full output, at lower output, the extra current can have a significant impact on battery life.

>

Your apparent definition of tuner refers to the variable capacitor. Again, your statement can be verified by looking at the schematics. The Superadio I uses a single 6 section variable capacitor. The Superadio III uses varactors for tuning. They are driven from a single source.

However, if your definition of tuner includes all the circuitry from the antenna to detected audio, the Superadio I and III do not have separate tuners as they both have common IF circuits.

That's not fair craigm. You are using actual data and facts vs. an unsupported general conjecture.

And you're right about William not knowing what he's talking about in this case. That seems to be the norm for many around here. Defending one's previous posts by pleading ignorance doesn't make up for making false generalized statements. Once the misinformation is posted, many will unfortunately believe it to be true. Thanks for offering the factual counterpoints.

Excuse me?

I serviced electronic equipment throughout high school and long after. Most of the general statements I made are correct.

Disputing the plausibility of a claim has nothing to do with whether I know what I'm talking about. I would rather be wrong because I was applying common sense, than be right because I blindly believed what someone else claims.

Radios tend to be designed as cheaply as possible. That means using as many common circuits as possible, and avoiding "unnecessary" components (such as switches to disabled "unused" circuitry). Radios such as the P-970 and Superadio are the exceptions, not the rule.

Well I am sticking with my old IC751. A Guy in Italy made a replacement
ramboard and sold em all over the world, what the board did was fix it
so it was impossible for the IC751 to loose its brain (operating system).
Mine did that and I lost most of the bands were lost, no way to restore
them. The Italian guy made a whole new board to replace the original
one so you could never loose the operating system itself, you would
only loose the 32 memories you had stored manually. These of course
could of course be reset one by one in a few mins.

Was I not clear enough for you?

We were talking about Superadios. They are obviously something you know little or nothing about. Hence the quote: "And you're right about William not knowing what he's talking about in this case."

1508. Manual needed for JPS SNV-4 DSP Voter (Older model)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-08-29 14:09:14 UTC
From: **THE-RFI-EMI-GUY** <rhyolite@nettally.com>
Message-ID: <46d57d5b$0$11049$4c368faf@roadrunner.com>
Source record: 4478

Has anyone a manual for the JPS SNV-4 Voter? This appears to be an earlier model (about 11-12 years) JPS DSP voter that was a 4 channel model. (This is not same as currrent SNV-12 model) I checked JPS website and found nothing.

The reason I am interested is that I picked up one of these for a project and it is lacking the correct documentation to set the dip switches.

The unit I have has Control Board Assembly 5940-202000 which has only two dip switches S1 and S2. The manual (partial) that I have (rev 1.1 July 1996) references a S3 on the control board with additional switches plus a parallel control I/O port 9 which this specific unit does not have. I don't have a board with S3 so the instructions are probably wrong for S1 and S2. So I think I need a rev 1.0 manual or earlier. If it helps, my control board has a lot of empty layout that was apparently for an 8 channel version with part number suffix beginning with 4 instead of 2.

I have the unit on the bench working pretty well, as far as audio performance, but I really can't get the COR and repeater PTT logic sorted out without a better understanding of the DIP switch settings. I suspect I haven't got S1 and S2 on the control board set properly and I am not entirely sure about SW3/6 on the DSP boards either considering that switch positions 7 and 8 are not referenced.

Can anyone help me or direct me to where I could find either a paper or soft copy of the manual and any programming notes?

Thanks

1514. FT-1000 auto-tuner problem

Newsgroup: rec.radio.amateur.equipment
Date: 2007-09-01 02:03:19 UTC
From: "Rick (W-A-one-R-K-T)" <get.my.email@from.qrz.com>
Message-ID: <pan.2007.09.01.02.03.18.303130@from.qrz.com>
Source record: 4484

I'm having some trouble with the auto-tuner in my Yaesu FT-1000 and I'm wondering if anyone can help.

If I turn on the auto-tuner, even when I have a near-perfect match to the antenna, the SWR goes very high and the output power goes very low. If I hit START, the WAIT light comes on and then it just sits there, nothing happens, only way out is to turn the auto-tuner off.

I'm waiting for a service manual to arrive and then I'll troubleshoot it, but meanwhile I wanted to find out if any of the rest of you have seen that problem, or if there is a common thing that causes it.

It's relatively unimportant at this time because I use an external tuner with a ladder-line-fed inverted V, but I'd like the internal tuner to work...

The radio is an older FT-1000, no -D or -MP or any other suffix.

Thanks for any help...

Message-ID: <pan.2007.09.01.13.21.54.978834@from.qrz.com>
Source record: 4486

I have gotten a little farther in troubleshooting the autotuner in the FT-1000. It seems that it works perfectly on all bands except 20 meters, where it won't work at all.

I have no service information for the FT-1000 in general or the autotuner in particular. Anyone have any idea whether there is some specific thing that's unique to 20 meters that might have gone bad?

I would have suspected one of the tuned circuits (open L, shorted C) but the thing doesn't even try to find a match, just sits there showing a very high SWR and not making any moves at all.

I suppose it could still be one of the LCs, and the thing just shows such a high SWR that it gives up and doesn't even try (but, it also doesn't light the "HI SWR" LED...).

>I am LQQking for a Hustler 160m mobile coil and whip.

Keep LQQking. There isn't, and never has been, such a product sold by
Hustler. There are a number of conversion kits around (or make your own)
but you can't really expect much efficiency from such a dramatically
shortened antenna.

Why are you knocking this product? Did you purchase one of these units and
have you tried to use it or do you just have something against Telstar and
you like to bitch??

I am not involved with nor have any monetary investments with Telstar!

Should be simple for you guys,
I'd need a schematics for building 2 input antenna coupler for TV antennas.

Thank you!

GGap

>Should be simple for you guys,
>I'd need a schematics for building 2 input antenna coupler for TV antennas.

"Insufficient data". You need to be more precise about what you're trying to accomplish.

I can think of at least five possible interpretations for "2 input antenna coupler":

- A power divider, which allows two separate TVs or radios to be fed from a single antenna, over that antenna's full frequency range (a.k.a. a "splitter")

- A power combiner, which the signals from two identical (or similar) antennas to be combined and fed to a single output (e.g. to allow "stacking" of antennas for increased directional gain).

- A "duplexer", which allows the outputs of two dissimilar antennas, which handle different frequency ranges (e.g. VHF and UHF) to be fed down a single feedline.

- A "channel combiner", which allows the outputs of two (possibly similar) antennas, pointed in different directions to pick up different stations, to be combined without interference. [Single-channel combiners are available commercially; more complex combiners can be made but they aren't trivial.]

- An impedance matcher, which allows an antenna of one impedance to be used with a feedline of another impedance (e.g. a balun which goes from a 75-ohm coax to a 300-ohm twinlead-type antenna).

Thanks Dave, by antenna coupler I meant a power combiner, but,
precisely, since channels which are emitted from tv transmitters (obviously
in 2 directions from my home) are not overlapping, nor are adjacent, I think
of pointing logperiodical antennas to transmitters and couple them into one
tv cable towards receiver.

Use a phasing harness or an antenna coupler.

http://www.kyes.com/antenna/stackluge.html

You COULD build a coupler with a few inductors and capacitors, but... why bother? A good quality vhf/vhf combiner (aka splitter) or uhf/vhf combiner (aka duplexer) is about $5 US.

That may work acceptably, if your log periodic antennas have a high enough front-to-back ratio, so that each is rejecting the signals coming from the transmitters "behind" it. Without sufficient F/B rejection, you'll end up with some amount of cancellation/interference between the two. And, even with high F/B rejection in the antennas, you can still end up with ghosting and interference if the antenna pointing "away" from a transmitter picks up a signal reflected from buildings, trees, or mountains.

You'll have to accept some amount of signal loss, no matter what you do... the combiner will have some loss, and (to the extent that it doesn't isolate one antenna from the other) each antenna will act as a load on the other and will actually re-transmit some of the other antenna's signal.

Building an effective broadband signal combiner isn't rocket science, but neither it is trivial. Frankly, in your situation, I'd recommend that you just buy a commercial combiner. For example,

http://www.starkelectronic.com/cmjoiner.htm

The first item #0538 is a two-way combiner/joiner made by ChannelMaster, which appears to be designed to do just what you want... $9.95 plus shipping. It takes 75-ohm coaxes from the antennas (you'd need 75-to-300-ohm balun on each antenna) and feeds a 75-ohm downlink with the combined signals.

Click on the "Winegard Combiners" link on that page, and you'll see the Winegard CC-7870 (same idea, higher cost) as well as the SD-3700 (which has 300-ohm inputs and a 75-ohm output - no need for separate baluns on the antennas - just run some 300-ohm twinlead from each antenna to the joiner).

The other alternate solutions to this problem that wouldn't have the potential ghosting problem would be: use filtering combiners (feasible for one or two "joined" channels, probably too expensive for more than that), or use one antenna with a rotator, or use two antennas and two feedlines and a "which antenna?" switch at the TV set.

Source record: 4505

Human natures are fine tuned for gene pool survival.

The way we evolve in the gene pool is that when we're not at war,
we're in a race.

Peace and freedom means competition. Some people are uncompetitive. So
they don't want to compete. Those people demand slavery.More...

Those who demand slavery are not necessarily poorer or richer,
superior or inferior. Those are people that somehow do not like
competition.

The farm owning farmers in southern US, for example, do not want to
compete with the higher salary the industrial north has, so they
demand slavery. This happens despite the fact that the landlords are
already way richer than their slaves.

Uncompetitive businesses also do not want customers to be free to
choose the best products. They demand enslavements of consumers by
restricting consumers choice to choose better products.

As time goes by and consensual productive means to aquire wealth
become available, those who oppose competition tends to be the one
inferior.

When we're not at war, we're in a race. So in a sense, some part of
life is a zero-sum game. The happiness of some superior competitors
correlate with gene pool survival of such people. This correlate with
the extinction of inferior people and this make inferior people
unhappy....page...

For example, women prefer rich smart males and normal males prefer as
many females as possible. Actually poor males prefer more money rather
than more women, but that's later.

If rich smart males get more females, then rich smart alpha males will
survive better in the gene pool. That means, the other males do not
get any. Hence, the lesser males will not be happy. They will then
come up with monogamy to ration females in equal share for everyone.

Those who are uncompetitive are not going to say honestly that they
are disgruntled competitors. They're going to come up with some
religious unscientific fairy tales to come up with pretext that
freedom, such as free sex is wrong.

In short, whenever someone is happy, whenever something gives
pleasure, happiness, and money, you can count that someone, somewhere,
somehow, will come up with some fairy tales of who knows what that

somehow it's wrong, bad, and should be prohibited.

The preference to snuff of happiness earned by others are called envy. In a sense, those who want to be happy are meant to kill each other with those who are envious.

Unless those who run the fastest also hit the hardest, success is simply a bridge to a gas chamber. Deviation from free fair competition turns life into some form of gun fight.

Not everyone can be appeased in a gun fight. Envy is simply unappeasable. The way to keep pursuing our happiness and still be alive is either to kill, or threaten to kill, those who are envious of us that it's not to their best interests to kill or prosecute us....page...

That's why I strongly support death penalty. Without it, all succesful people will be slaughtered by bigots that don't mind going to jail for it.

It's also the same reason why many ugly women oppose porn. That's because those women are envy bigots.

Think of it this way. Pretty women can just show some skin and make millions of dollars. Ugly women has to sexually serve poor males and get knocked up for much less money.

If this keeps going, pretty women can pick the best males with the best genes and provide their sons with better education, opportunity, and more initial start up capital.

The pretty genes will survive better in the gene pool and the ugly will be outcompeted, like in Europe or Japan. All thanks to porn.

Obviously, pretty porn stars are way better of then ugly wife. Becoming a porn star or prostitute is then one of the best job ever in this world.

However, out of envy, ugly women will want to prevent that. What's their justification? By saying that all the good jobs are so bad that it can't possibly consensual, and hence has to be prohibited.

They said that porn should be prohibited to protect women. Which women? Not the consenting one of course. How in the earth people get protected from consensual offers anyway. It's there to protect disgruntled envy competitors.

Trying to participate in the Maritime Mobile Service Net on 14.300 this weekend with that contest on has convinced me I need a better receiver.

Any suggestions for a good general-coverage receiver with a good IF DSP?

I like the transceivers I have (FT-1000 and TS-940S) and don't want to get rid of them or trade them in for one of the new megabuck rigs but I do need a better receiver for times like this weekend.

Any suggestions would be most appreciated...

Source record: 4510

Looking for the best audio DSP add-on box that I can insert between radio and speaker.

I have a relatively old Am-Com DSP speaker that I use with the IC-735 and it works reasonably well though it doesn't really have any versatility (no way to adjust the filter characteristics or depth). In any case I need something I can use with the SP-5 speaker that matches the FT-1000.

Any suggestions appreciated... thanks...

Ken,

Low voltage

RF in the "shack".

Two known issues with this radio. If the radio is remoted, check to see
that the little screw that fastens the remote cable is secured to the body
of the radio. This is VERY important! Make sure it is TIGHT. This will
shut the radio off as RF will get into it via the non-shielded cable
(without the little screw) if the screw is omitted or loose.

PURE B--- S---

The peak power is the peak power is the peak power!

Distorting the audio with a speech processor ... distorts the audio.

Distorted audio is distorted audio is distorted audio.

Modulation is supposed to fluctuate greatly. It is supposed to replicate your voice which fluctuates greatly. If it does not replicate your voice it is by definition DISTORTION!!

Most processors cause 'nasal' and high pitched sounding audio because our voices are not 'nasal or high pitched. It is called DISTORTION.

I can see why you're more interested in $$ than in accuracy.

If I put a CONSTANT amplitude swept frequency signal, swept from 300 to 3000 Hz, audio bandwidth, to the input to a transmitting device and I get a VARIABLE amplitude signal, swept from 300 to 3000 Hz, as the audio output, the device has DISTORTED the audio.

That's just what speech compressors accomplish.

Every single speech processor is a controlled distortion device. You can market and do salesmanship all you want. You are still selling a device that distorts the audio.

Distortion is distortion!!

You are correct, of course. But there are instances where distortion
increases intelligibility. as I'm sure an EE knows in spades.

It not only Distorts the audio signal but causes either over deviation on FM
or Splatter on both AM and SSB, and that's the garbage you hear on adjacent
channels.
If you look real close on some built-in CB power meters, instead of the
signal increasing, it actually decreases!
Distortion = Flat topping of the signal...

Far be it for me to in any way shape or form, defend the spamming hype, marketing what is nothing more than a common IC made for the purpose, but I'm going to disagree with you to some extent.

By your definition, any bandpass filtering, such as you set up in your example, would cause "distortion." The transfer function with respect to frequency is nonlinear, i.e. it's distorted.

Unless you're one of the guys gargling on 14.18 MHZ, I hope you would not argue that frequency response shaping is not something that we want to do in (voice) communications systems.

So assuming we agree on that, then like the guy negotiating with the gal he's trying to bed, we now are just negotiating the price, or acceptable amount of distortion.

Since the purpose of a communication system (unless you're just peddling hardware) is to communicate, then one has to look at the trade-off between distortion and intelligibility. If purposefully "distorting" the signal by frequency shaping, compression, clipping or any combination thereof improves the intelligibility at the other end of the circuit then "distortion" is a good thing, semantics aside.

Ed, of course you are correct. The problem with CB compressors and the folks who use them is that they don't know or pay attention to the reasonable limits.

My oldest son owns and runs an interstate long haul trucking business. I have heard more garbage on 27.185 MHz from over compressed, over powered, over distorted, off frequency, boosted radios while riding shotgun with him than I care to recall.

Most audio 'power' is in the lower portion of the voice spectrum. Increasing the mid range by 2 to 4 dB, adding 2 to 4 dB of audio spectral distortion, does increase received intelligibility AND it does sound un-natural. Also, increasing the average audio power output from 30% duty cycle to 50 or 60% audio power output increases the thermal load on the PA final and heat sink by 100% in SSB and by approximately 40-50% in AM. I don't believe CB rigs have thermal designs for the heavier duty cycle.

When I chase DX on the ham bands I do not use compression. My transmitted audio passband is 300 to 2400 Hz [IC 756 P3]. I have four HF radios [IC756P3, IC746, IC706MKIIg, and KW TS570D] all with built in compression capability.

If I can't work them on SSB I do it the easiest way possible ... CW [Don't need compression on CW] :-)

I have heard so many over-compressed signals on 75 and 20 meters that I'll turn on two meters and join a local rag chew or round table where we old farts solve all the world's problems.

One of the things that I liked about some Yaesu radios (haven't used them
all to know) was that obtaining robust/strong audio with my bassy, soft

voice was as simple as turning up the mic gain a bit so that it was just entering distortion. This trick even works on my FT-690R and used to work quite well on my FT-726R as well. Getting my voice to project through any radio has been a constant struggle.

Later on, with the advent of the IC-706, I was able to get good intelligibility by shifting the "window" a bit through the crystal filters. This is simply a matter of a software adjustment.

Like you, I do not use speech processors. They seem to be "tuned" for voices that are a tad higher in frequency than my voice, so are completely counter productive when engaged.

I have a Robyn 520D CB set from 1977 that is paired with an EF Johnson ceramic element mic. No, it does not match at all, but it can make any male voice sound like the God Thor when they talk. I keep it around just to remember how far we have come. <G>

Has anyone used an 8 pin mic on the Yaesu FT857 in place of the
standard stock microphone. Obviously you have to get around the RJ45
by doing this. Are there adapters available, or do you pretty much
have to hack off the connector on another microphone to do this?

Please EMAIL me responses to n9vu at yahoo dot com

Thanks,

GB

I am looking for the wiring diagram of the MH-34 speaker/mike which
I'm using for my VX2R 2m/70cm handheld . I believe it's compatible
with other Yaesu equipment so there should be a few of them around.
Want to make a splitter to use a separate station speaker when using
the rig at the shack (I know, there is a speaker connector on the mic
body, but that means another wire running to the mike which is not
very neat).
I think the diagram is on the box, which I've lost.
Tnx

Good evening, Brian.

So, how do you like it?

Does it live up to all that hype on the Universal Radio sales page?

If it does half of what the marketing types at UR claim it does, it sounds like a pretty good unit.

Kind of pricey, though. But I guess all of the good stuff is pricey, these days.

Hi, Jerry.

I have used my IC-706 mobile in a car, truck, motorcycle, and airplane,
always with the remote and cable, and have never yet used the screw to
hold it in. Never had a problem.

It will shut itself off due to low voltage, though. Had that happen many
times when using it in the shack on an AGM battery.

CURRENT MODEL. Transmits form 1.8-30 MHz & Receives from .5-30 MHz.
150 Watts. DIGITAL SIGNAL PROCESSING. For Amateur Radio, Type accepted
for Marine Radio HF SSB & CW, Commercial HF, etc. Go to this website
for all the information on the SG-2000 ADSP2: - - http://sgcworld.com/2000ProductPage.html
- - This is just back from SGC where it was updated and serviced. The
front panel is perfect. There are a few scratches on the top.
Electrically the radio is in perfect condition. It comes with the mic
and the power cord. And, if I can find them a quick start card and a
manual. (The updated manual is available on the SGC website as a Free
download. The price is $1,450 plus actual shipping cost from my zip
code to yours. My zip code is 32224. Contact Bill - -
iamw7gsa@gmail.com - - or call me at 904-821-5055 (eastern time). I
ship worldwide. I can accept Cash, Money Order or Bank Transfer.
Please add 3% for PayPal. Thanks for looking. Bill

Outstanding SWL rcvr, a 10 out of 10. As a ham rcvr it's a 9 out of
10.

> Does it live up to all that hype on the Universal Radio sales page?

On one hand in general yes, on the other hand no radio lives up to
it's manufacturer's marketing hype. There's a detailed by the-the-
numbers review of it in the ARRL website.

The rec.radio.info newsgroup, first established in 1993, has been recently revived by an active moderation team. We are currently seeking suitable information, FAQ, and bulletin articles from the entire rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our newsgroup.

We are seeking a replacement maintainer for the following information bulletin formerly posted to rec.radio.amateur.* (and currently archived at http://www.faqs.org/faqs/radio/personal-intro/):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

We are willing to provide any technical support necessary to get this article updated and automatically posted again at a regular interval. This would include establishing contact with the original maintainer for any necessary permissions. We would prefer to seek a new, dedicated maintainer at this time, rather than start auto-posting the original article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to rec-radio-info-request@panix.com.

>LOL

Laugh all you want but clearly you don't understand what you think you
understand.

We are talking "communication" systems here not hi-fi. If the
intelligibility improves faster than the distortion due to
instantaneous peak clipping then that is a net positive.

As an aside, I actually did myself a disservice by defining the onset
of clipping at the point where a 3 dB input change gave a 2 dB output
change. This is actually quite a bit of clipping, which means that my
"15 dB" clipping is considerably higher.

At the usual operating level, distortion is much lower. Furthermore,
following publication Schureuer offered some justified criticism over
my use of the Plessey IC. This device was a source of some of the
distortion, which is actually multiplied by the subsequent clipping
process.

I later built a discrete compressor using a linearized FET as the gain control element and also incorporated noise gating. Operationally, the distortion was negligible and the performance was phenomenal.

But back to you.

Your (actually Analog Device's) circuit is an AGC system and cannot limit instantaneous peaks. So following compression of a big peak, the amplitude of subsequent signals is reduced. This is helpful in preventing overdrive of subsequent stages and provides a marginal improvement in "talk power" but it is nowhere as effective as true peak clipping.

Sorry, those are the facts.

BTW, the Kenwood TS-870 (which I use) is widely acclaimed for its audio quality and is arguably the most sought after rig by the "hi-fi" SSB garglers. It uses split-band speech clipping.

We know, it has been ripped apart on this newsgroup a few times. It's not a good product. If fitted without using the correct alignment procedures and test equipment it will ruin performance and cause splattering over the bands and generate harmonics. Not many people who have the "really loud = really far" mentality will know how to use test equipment, they tend to be the ones with a lack of knowledge. Maybe the type who believe polishing the aerial will lower the VSWR!
The circuit has no RF filtering for a start, it is not screened in any way, it has a light that you will never see once the radio is put back together and it will have no benefit over the microphone that was designed to operate with the radio. It will cause distortion and harmonics unless the radio is realigned using test gear. If you use that on AM/SSB you will sound terrible, it is a waste of time. There is no way that the circuit differentiates between a voice and background noises, so raising the level many times and keeping it at 100% will mean that the sound will just be a "noise". Compare that to a normal mic, audio nearer to it such as the operator voice will be louder than what is in the background.
The product is out of date, has no market and probably would have been better 20+ years ago.

I certainly wouldn't recommend it, from a radio engineers point of view.

The SkyWave 2879ABTC was discontinued because of a poor profit margin.
We hated to do it... but with the temperature compensating biasing...
and all the premium components and chassis... it was just too costly
to manufacture. Unlike other companies, we will discontinue a product
before we will cost reduce it to a point that sacrafices quality and
reliability. Sometimes I just go back and look at the photos... just
for old times sake...

I was composing a point-by-point response to this when I had a power
failure and lost it. I'm not about to redo it, but let me summarize.

I am no fan of Telstar and his spam marketing on these groups and many
of his claims are BS.

That said, you seem to know little more about the subject than does
he.

BTW, to see the performance of this thing without the hype:

John Doe and Deek are full of shit,Deek is saying that if you compress audio
its distorted, He is full of it.
Deek if you run a 300 or 1000, or 3000 Hz signal into a good compressor,
since the circuit its only a controlled gain amp, the sinewave will come
out not distorted. Thats like saying that a volume control will distort the
audio. This is why I dislike EE, they think everybody should bend over to
them because the got a degree. Hell I have seen some EE that could not tie
their own shoes. You said you served as Chief Engineer on a major Military
System, does that make you special, it that why most programs are full of
the blind leading the blind, costing us Millions.
I have seen many like you and notice if they ever brag about how smart they
are usally means that they are full of shit trying to impress the
one without brains.

I conclude that the VOICEMAX issue has died, has had the funeral and now should be buried.

Those who advocate high distortion levels and poor quality signals can spend their $$$ and buy it.

Those who prefer low distortion and clean sounding signals won't.

Let the trip to the cemetery begin.

Thanks for your conclusion. Maybe you should contact the engineers at
Analog Devices and explain to them that their SSM2166 chip is just
plain no good. I'm sure they'd be happy to hear from you... lol

> since the circuit its only a controlled gain amp, the sinewave will come
> out not distorted.

Simple test. Use a dual channel oscilloscope.

Display the input signal on one channel.

Display the output signal on the other.

Normalize the gain at one frequency, and don't touch the gain for the duration of the test.

Adjust both traces to overlap each other.

Insert a swept frequency audio signal into the device. If the two traces are not identical, the circuit introduces DISTORTION.

A brief course in Fourier transforms will convince you that a distorted sine wave signal is still a series of sine waves, the fundamental, the 2nd, 3rd, 4th harmonic, etc. The existence of those harmonics is by definition DISTORTION.

Your choice of expletives indicates either: you are losing the discussion and have decided to shout louder; or, you are still in need of further intellectual development. I recommend you spend 4 or 5 years earning an EE degree from an accredited university.

You may desire distortion for some purpose, but it is still distortion.

I'm surprised at you... being a chief engineer and all... you should realize that in this audio application we're talking strictly about harmonic distortion. After all, that's what you can hear. In the Analog Devices datasheet (page2)... this is given for the SSM2166 as "Total Harmonic Distortion including internal chip noise" of typical 0.25%... and a maximum of 0.5%. These figures rival the finest audio equipment!

First why don't you address the spam marketing part?

Then you can simply look the word "hype" up in a dictionary. It's a
simple word with a more precise meaning than "fuzzy audio", for
example.

So a bandpass filter for example is a distortion generator? Better
tip off all of those BC stations and recording studios that are using
equalizers.

I see. So a perfect sine wave run through a perfect clipper will
generate a 2nd harmonic?

1606. Emergency Generators That Interfere

Newsgroup: rec.radio.amateur.equipment
Date: 2007-09-20 00:19:37 UTC
From: Fred McKenzie <fmmck@aol.com>
Message-ID: <fmmck-3905A5.20193619092007@nntp.aioe.org>
Source record: 4426

Ignition noise is not the only way a generator can interfere with radio reception.

A Honda "inverter" generator was used at this year's Field Day, but it caused a broad-band noise on the HF bands. Locating the generator as far as possible from antennas helped.

An inverter generator produces 3-phase AC power, rectifies it and drives a DC-to-AC inverter that produces 60 Hz power. Result is a lighter-weight generator, and greater efficiency can be achieved by reducing engine speed when less power is used. Honda's also have extremely low acoustic noise levels.

A call from the Honda dealer to Honda Technical Support received a reply that you have to use a LONG extension cord because inverters generate radio interference! I have since used a portable AM/Short-wave radio to check the Honda generator as well as one from Yamaha. Both wiped-out reception up to the 18 MHz range of the radio, when the radio was within several feet of the generator.

Does anyone have experience cleaning-up the interference from the inverter in one of these generators?

I don't know, but short of a lot of filtering (and figure X db power losses from the filter) and sheilding might help.

I was annoyed by these lightweight inverters that are basically souped up switching power suplies (even the ones in computers are cleaner), but I finally bought an old dynamotor from Fair Radio Sales (Lima, Ohio) that ran 24 volts in (two deep cycle marine batteries in series, here) and nameplate output is 117 VAC at 60 cps, max 300+ watts continuous duty and about 600 watts input, DC at 24 v, and 25 amps. It is very very clean and I can hook up radios and just about hear no RF noise. It even runs at 12 vdc input and reduced output voltage, maybe 50-60 volts ac, but sounds like a lower speed, too, so maybe like 40 cycles per second.

If you get one (they are about $75 now), you need to spin the commutator a few times to wipe off the copper oxide build up, then it takes off like it should.

So, if you have 90-95% efficiency in a inverter-generator, and build a RF filter that causes--assuming--3 db insertion loss, you're ending up at 50% efficiency anyway and you still have to worry about resonances, impedances, power handling, inductances, capacitances, etc.

Your other option is just run all solid state gear off batteries (and solar cells?) if you want no noise and simplicity.

1608. For Sale: SGC Automatic HF Antenna Tuner - MAC-200

Newsgroup: rec.radio.amateur.equipment

Source record: 4428

I have a Brand NEW SGC MAC-200 200 watt Automatic Antenna Tuner I bought for a project a couple months ago. The project was canceled and the tuner was never used.

This is a 200 watt Automatic Antenna Tuner that has inputs for 5 antennas. The tuner will either automatically find the best antenna or you can switch the antennas manually. The unit is about two months old and the one year warranty is still in effect. The unit requires a small 13.8 vdc power source. I will find one and include it at no extra cost.

This is a great companion for the SG-2000 or the SG-2020 transceivers. Click on this link for more information on this unit - http://sgcworld.com/MACProductPage.html - .

I paid about $269 for it and I will sell it for $239 plus 9.85 shipping in the lower 48 states. Alaska, Hawaii and International shipping is more. It comes in the original box with the manual. Please contact me at: - iamw7gsa@gmail.com - .

Thanks, Bill.

Absolutely! The output does NOT replicate the input. That is distortion!

Your definition of distortion is limited to harmonic distortion. There are other forms of distortion that have been used throughout the industry for years.

When the output does not faithfully replicate the input, including any gain factor, it is distortion. So, a bandpass filter absolutely introduces distortion when it is used to exclude components of a broad band of signals.

Better
> tip off all of those BC stations and recording studios that are using

recording studios know exactly what they are doing. they are selectively distorting the audio to achieve a desired effect. See my other post on this topic.

In the general cse the distortion products for all frequency components have to be considered in the analysis. The coefficients for any one or more frequency components can have a zero value.

A perfect sine wave running through a perfect clipper will produce a square wave that is harmonically an infinite series of odd valued frequency components.

A device that cause an amplitude variation as a function of frequency does not replicate the input signal. By definition that is distortion [I naver stated that it is harmonic distortion. Your definition of distortion is incomplete.]

Don't put words in my mouth. I asked *you* whether *you* thought a
BPF was a distortion generator. Now we know your position. Any
device that doesn't have DC to daylight frequency response and a
perfect, infinite headroom, linear transfer function causes
distortion. Gotcha.

Uh huh. So recording studio personnel know what they are doing, but
when I said earlier:

"Since the purpose of a communication system (unless you're just
peddling hardware) is to communicate, then one has to look at the
trade-off between distortion and intelligibility. If purposefully
"distorting" the signal by frequency shaping, compression, clipping or
any combination thereof improves the intelligibility at the other end
of the circuit then "distortion" is a good thing, semantics aside."

I didn't know what I'm talking about. Right?

>>>A brief course in Fourier transforms will convince you that a distorted sine
>>>wave signal is still a series of sine waves, the fundamental, the 2nd, 3rd, 4th
>>>harmonic, etc. The existence of those harmonics is by definition DISTORTION.

And of course you believe that you are the only one in this discussion
that understands Fourier transforms.

>>
>>
>> I see. So a perfect sine wave run through a perfect clipper will
>> generate a 2nd harmonic?
>>
>>
>In the general cse the distortion products for all frequency components have to

Why are you slipping into the "general case" when everything else you
have put forth is in absolute terms?

>
>A perfect sine wave running through a perfect clipper will produce a square wave
>that is harmonically an infinite series of odd valued frequency components.

Which is different from "a series of sine waves, the fundamental, the
2nd, 3rd, 4th harmonic, etc."

>
>A device that cause an amplitude variation as a function of frequency does not
>replicate the input signal. By definition that is distortion [I naver stated
>that it is harmonic distortion. Your definition of distortion is incomplete.]

You are "distorting" what I said, I never offered any definitions.

1613. LT-2S transverter power module problem

Newsgroup: rec.radio.amateur.equipment

From: 9A4QV <adam9a4qv@yahoo.com>
Message-ID: <fct5k8$r6b$1@ss408.t-com.hr>
Source record: 4434

Hello,

I have LT-2S (first model) not working properly, somebody "repair" power module and insert some odd power transistors.

There is no information on manual, which original power transistors are used, so anybody knows, please let me know.

What I found inside is: BLY87A and 2N6080???.

Thanks, Adam

Not only exhaust, heat and fresh air for combustion, you'll need to bypass/lowpass any electrical conductor going in or out of the enclosure, and those cheap clip on ferrites won't do much good, you need pi networks on the conductor itself. You might start with the inverter section of the generator, make sure it's in a well sealed (electrically) enclosure, bypass/lowpass the conductors coming out of it and as long as you don't cause problems with circuit cooling put some RF absorber inside the enclosure, if it gets absorbed inside it won't get out, and don't be dissuaded by the absorber specs, they work quite well in the HF range. You can also get free samples.

Adam,

I don't have the LT-2s but I do have what I believe are the two major
units inside, the TV28-144 transverter and the PA-1441 amplifier.

The PA-1441 uses a 2N6080 driver and 2N6081 final.

I've put the schematic here of you need it:

www.k6mhe.com/n7ws/PA1441.pdf

Hope this helps.

ps. These units are now surplus to me, so I offer them for sale for
$225 USD.

Fred,

I have an EU2000 that I use for charging the batteries in my 5th wheel
trailer. I have limited experience with operating the radio equipment
from this "QTH" but here is what I have observed.

First I found that the major noise source was the switch-mode battery
charger built into the trailer. In fact the original one acually
interferred with home OTA TV while the trailer was parked beside my
house! I replaced it with an IOTA unit that supposedly meets FCC
requirements but is still a noise source.

I finally built an analog "smart charger" using an Astron PS for the
raw DC and pass transistors and a UC3906 IC.

Once this was cleaned up I could hear the noise from the Honda. I
should back up and say that in my earlier attempts to clean up the
charger noise I determined that a lot of it was conducted on the AC
side, so I had previously installed an industrial grade brute force
line filter at the trailer's AC distribution panel.

So from that respect, the AC side is pretty well filtered, although the filter isn't necessarily installed in an optimum location. But I don't think this matters because my further experience is that most of the remaining noise is radiated.

Shielding is of course out of the question as a practical matter. This leaves the physical separation between the generator and the antenna as the best remedy.

I also operate Field Day from home in Class 1E. The Honda sits right outside the shack and powers the Astron PS that runs the radio. I float a deep cycle battery across the 13.8 V. The generator runs in Econo throttle mode and runs for hours like this. I'm hard put to even know that it's run out of gas unless I keep my eye on the battery voltage.

I mostly run only 20-meters and the antenna is a 3-element beam located about 100' away. Even pointing at the shack I cannot hear any RFI from the generator. When I slip down to 40 or 80-meters any RFI is buried in atmospheric noise.

So I think Honda is right; get a long extension cord and move the generator away from the antenna.

Regards,

Wes N7WS

Hello Wes,

This help a lot, the diagram is alomust the same.
I got the reply from ssb Germany, and they say that the final was 2n4046 or blw60c.
Both parts obsolete now,

Anyhow, any 25-30w 175mhz transistor will do the job, of course capable AB class.

Thanks for help,
Adam

Oh...your bias is magical? It uses no components for compensation?

I always suspected your design to be that of an imaginary nature.

Not magical... it used the base-emitter voltage drop of an MJE3055T (mounted directly to heat sink) to track with the 2SC2879 power transistors. Since it used a transistor with gain... it worked so much better than just a plain old diode on the sink for tracking. It worked fantastic... I was able to set set class AB bias (I chose about 200Ma) on the power transistors... and hold +/-5% collector current changes from -40 to +100C heat sink temp during amp operation.

How well it works depends on how well you hacked the design from this
link I posted (while pointing out some of the many problems with your
earlier splatterbox):

http://www.ifwtech.co.uk/g3sek/tr-bias/tr-bias1.htm

> I was able to set set class AB bias (I chose about
>200Ma) on the power transistors... and hold +/-5% collector current
>changes from -40 to +100C heat sink temp during amp operation.

That's interesting. Previously you said your bias scheme can "hold the
500mA bias to 10% from -30 to +85C". It's funny how many times you
have changed the specs. I especially enjoyed the time when you changed
the power output specs three times in one week after you were caught
fabricating them instead of actually measuring them. Oh well, such is
the life of an internet-educated hack.

But alas, there's still one unresolved issue here, Brian.... where's
the schematic?

If base is what you like a good small rig without too much cost could be a
Icom 718.
Big Readout, front fire speaker, built in DSP. Find one that has had the
AGC mod done to it if possible.
There is a recent Mod that is much better than the ones out there now.

Its not a bad unit without it.
Good TS50s Kenwoods are also a great rig base or Mobile. In fact its Noise
blanker is hard to beet.

Some used solid-state Heathkits are also very good.

Just a few.

Jim if it were me, I would first decide on whether your station will be base
or mobile or possibly both.
The same rig can be used for base and mobile - but in this case it narrows
your choice of rigs to the smaller compact ones.
If mobile and base, then two separate antennas are needed- one for the
vehicle - other for base use.

Decide whether you want an all solid state rig or can tolrate one with
vacuum tubes

Be aware that most recent rigs require a 12V power supply which for your
vehicle is simply wiring to the car 12V system, preferrbly directly to the
car battery. But for base use, a 12V power supply is needed i.e., 117V to
12V. Current requirements vary, but 12V at 25 Amps works for many rigs. So
another expense is a power supply for base use.

Next decide if you want to make your own antennas, saves lotsa money. Use
Google to look up "Homebrew Ham antennas"
If you opt for a commercial antenna, consider a used one and refurbish it.
Incude the cost of coax and maybe an SWR meter

After the antenna with the money left over, perhaps check e-bay and swap
listings for rigs in your price range.

Then check E-Ham reviews for what users have to say about the various ones
URL:
http://www.eham.net/reviews/products/14

So you need to make some decisions before anyone can recommend a rig and
antenna and keep into the $800 range
Base? Mobile?, Both?,
{Antenna, Homebrew , used, or new)????
Solid state or tubed, or hybrid??

Then repost

Jim

I am a newly licensed amaateur in the UK. I had similar budget to you
and looked around for a while. The Icom 706MkIIG was recommended and
is perfect. Its small, easy to slot in the car but performs
brilliantly from home even with a simple low cost half size G5RV and a
coliner for 2m.

Jim, I'm going to let you and the others here come up with a good solution for your HF rig....

My only comment is to spend your money on the radio and minimize the expenditure on an antenna. There is no reason you can not make a very good performing dipole, or inverted V type antenna with spending hardly any money on it.

I never left, Brian.

> your always good for a laugh.

I'm glad you're amused. But don't you think it's time for you to get a job and relieve the financial burden on your parents and the Illinois welfare system? If I lived in that state I would be outraged that you are leeching my hard-earned tax dollars, but I don't. I guess people over there prefer to coddle malingering basement-dwellers. You are certainly lucky to live in a place with such generous folks, Brian. Over here on the left coast you would have to support yourself with gainful employment. And I hope that gives you something else to laugh about, cause the thought of you actually working for your keep sure leaves -me- ROTFLMMFAO!!!

BTW, where's that schematic?

This is the first time I've been to that link. The circuit he shows
with the two transistors is similar to mine. My feeling is that his is
needlessly more complex, but I'm sure it works. I also agree with his
statements about the diode method used for tracking. That method works
a little better than no tracking and is not worth the effort. This is
because putting two diodes in parallel never works right. One always
has a lower drop... and hogs.

Frank... I didn't say the diode scheme didn't work... I said it didn't
work well. Actaually, the Motorola RF Data Manual shows this scheme in
many of their designs... so maybe you give them a call and let them
know how foolish they are... lol
But seriously, the diode thing isn't worth the trouble unless you are
willing to hand-select components that go alaong with that circuit.
Even then, it's certainly not the best method. By the way... the diode
tracking scheme does try and use two diodes in parallel. Sorry you
don't see that... but that's how it is... and why it doesn't work
well.

Hmmm... a discussion about the biasing of an RF amplifier is not
relevant to this NG huh?
Find another outlet for your complaints... lol

Strange!

Have you guys now taken up knitting and crocheting?

Hmmm. I liked it better when you actually discussed electronic circuits!

So you claim it doesn't work because one diode will "hog" the current?
Well, that's the point! D1 "hogs" the current and establishes a fixed
voltage for the base of TR1!!! But alas, it only works if your ground
plane is 9 square feet.......

So where's that schematic, Brian?

You have received a lot of good advice. The icom 817 with dsp is a safe
bet, but I would set some money aside for an antenna tuner and a power
supply. A manual tuner with a cross needle meter is a good learning tool
for someone new to HF that will also tune a variety of wire antennas
which you can make (not buy.) Scout around for a used power supply. $800
should get you on the air.

What you really need is an "Elmer" in the Ukiah area. I am near Chico,
but may be able to offer some help via email. Please contact me off-list.

1659. ICOM IC-746PRO FM VSWR meter performance?

Newsgroup: rec.radio.amateur.equipment
Date: 2007-09-24 23:50:32 UTC
From: "C.Andrews Lavarre" <alavarre@ids.net>
Message-ID: <E3YJi.50466$hP1.7364@newsfe13.lga>
Source record: 4332

How does the VSWR reading work on 2M FM?

I've had this rig for about five years, but never ventured into 2M-land with it until today, although I've used an IC-W32A HT with a rubber ducky for about the last ten years.

Yesterday built the dual band Jpole vertical from

http://www.arrl.org/qst/2007/03/fong.pdf

It works wonders with both the 746 and HT. I can hit all kinds of repeaters I could not with the HT and rubber ducky alone.

That's the good news.

The bad news is that despite good performance and reports, the VSWR reading on the 746 goes off the scale to infinity.

I know the antenna tuner only works at HF and 50MHz but find no such caveat for the VSWR sensor. Does it work at 2 meters?

As usual Frank you are missing the important point here. That point being that you can't simply parallel two diodes... and have them share currents. This would have to be done in order for any tracking between the two. The problem is that one diode will always turn on before the other... and take all current. Now I ask you... where is the sharing/ tracking in that scenario? The answer is: there is no sharing/ tracking... because one diode with the lowest drop will hog the entire current... and the other diode will be off. this is why the gentleman on the web page link that YOU provided says it that scheme works like crap. He's absolutely right!

Amazing. Two major bungles within one month. First you couldn't
recognize a simple voltage multiplier, and now you show that you can't
even understand the basic principle of diode biasing of a transistor.

> this is why the gentleman
>on the web page link that YOU provided says it that scheme works like

Bovine excrement. Ever heard of equalizing of current through a series
resistance? Often called a ballast resistor. Used quite often in power
transistors where there are several base/emiter pn jumctions.

Check the resistance of your test leads. They may be more resistive
than the meter has zeroing range.

Also check the battery terminals, sometimes if a battery is allowed to
leak it will wreck the low resistance contact that is necessary for the
Rx1 range to work. The battery is sourcing pretty high current in
this range.

The topic is the concept of using a diode to bias a transistor, a
concept understood by any first-year electronics student.

But not you.

The BE junction stays at or above quiescient current BECAUSE the diode
is hogging the current. It even says that in the article (that you
obviously didn't understand).

Two diodes..... sheesh..... I'll bet you've never seen a Vbe curve,
either.

>You have suceeded... end of conversation with you.

Well, since that's the closest thing to an admission of ignorance that
you are capable of, I'll take all nine square feet...... ROTFLMMFAO!!!

OK James... less not discuss ballasting... because that has no bearing
in this particular discussion. Maybe you can tell us how the diode
method of biasing shown at http://www.ifwtech.co.uk/g3sek/tr-bias/tr-bias1.htm
(bad circuits section) works. And since you think that circuit works
well. Please tell us why.

It could be a bad contact on the battery holder or the range switch. R X 1 uses a lot more
battery
current than R X 100 so that small internal resistances matter. The usual case is that
someone
attempted to measure voltage on the R X 1 setting. There are probably burned resistors in
the
ohmeter circuit. There is no internal adjustment for R X 1, AFAIK.

No, it's either a (very) bad connection - or quite possibly a cooked R16
- check it - it takes a beating in 260s (should be 11.2 ohms)...

1674. identify 10GHz cavity with diode in it

Newsgroup: rec.radio.amateur.equipment
Date: 2007-09-25 20:21:28 UTC
From: none <"bram\\@(none)">
Message-ID: <46f96dc9$1_5@news.bluewin.ch>
Source record: 4347

Hello everyone,

I have found two devices which look like gunnplexers, but without a mixer diode. Well, actually, it only looks like a diode in a cavity to me, because I do not have sufficient experience in microwaves. If anyone could tell me more about it, like what it could be used for, I'd be glad to know.

Pictures of that 'thing' are on the following website:
http://bram.ch.eu.org/galleries/?gn=gunn

On the fourth picture, you can see the diode symbol printed on the white cylinder, at the left.

The two diodes on the top are presumably zener diodes, and they have an orange marking on the edge, followed by a brown and a violet one.

Dimensions are:
- cavity: 1.9cm x 1cm
- depth (exterior): 4,2cm
- wall thickness seems to be around 2mm, but I have no way to measure right now

I'm looking forward to becoming active on 10GHz, and have found some nice websites explaining the basics of Gunnplexers and the like, with needed circuitry to get them working. But all of them are more complex than this device.

Thanks in advance,

kind regards, 73's

For an HF beginner, I'd recommend staying away from low-power QRP or
used rigs.

A good 100-watt all-band rig, brand new, would be something like the
Icom 718, a little over $500. Add a 25-amp Astron switching power
supply for about $130-150. That leaves you about $150 for a soldering
iron, the ARRL antenna handbook, some wire and coax, and a few other
odds and ends. Wouldn't hurt to get an inexpensive MFJ antenna tuner
with a cross-needle SWR meter. Build a dipole and you're on the air.

Or get a TenTec Triton IV (aka 540 w/ analog dial or 544 w/ digital dial)
and TenTec power supply; maybe $250 for the pair? Mid-70's "no tune"
(that means you must have a "tuner"!) transistorized radio made in the
USA. Or run the radio from a 12-volt battery with a $10 float charger
from Harbor Freight; instant emergency power! Get a good crossed-needle
SWR meter but make your own "tuner" (a homebrew inductor, a capacitor
from an old radio, and two alligator clips). A 100-150 watt soldering
GUN (irons are usually too small for soldering PL-259 connectors) will
be handy (although you COULD buy ready-made coax). Throw some wire into
the air (or connect to something metallic, preferably high and long),
and you should have several hundred dollars left over.

Hello, I have for sale a IC-756 Original. It is in perfect shape and works flawless but has the horizontal lines in the display which is a common problem with this model. I am the original owner and a non smoker. The only problem I have had with this radio is a motor in the antenna tuner quit and it was easily replaced. The radio has full output and works great. It comes with the stock mic. If you are interested or would like me to email you some pictures please let me know. The price is $600 plus $10 for shipping. Please remove NOSPAM from my email address. Thanks, Mike

|OK James... less not discuss ballasting... because that has no bearing
|in this particular discussion. Maybe you can tell us how the diode
|method of biasing shown at http://www.ifwtech.co.uk/g3sek/tr-bias/tr-bias1.htm
|(bad circuits section) works. And since you think that circuit works
|well. Please tell us why.
|www.telstar-electronics.com
|------------

Actually quite simple if you understand nodal analysis. Per Kirchoff's
Laws the total current leaving a node must equal the current entering
a node. The particular node that is of interest is in bad circuit A,
is the junction of VRI, D1 and the base of the transisitor. For DC
analysis the cap is an open circuit and the RFC is essentially a
short. The current through D1 is set by the value of VR1, the supply
voltage and the internal pn junction of the diode. The voltage drop
across D1 is determined by the current flowing through the diode. In
turn this sets the Vbe voltage of the base/emmitter PN junction. The
instantaineous base/emmiter current varies with RF drive level. Should
this current exceed 1/10th the current through D1, then D1 starts to
loose regulation. This is the basic workings of a shunt regulator. Any
good first year tech should know this.

For either circuits, bad A and B, to work properly, the D1 diode
current should be ten times the peak instantaineous base current of
the RF power transistor. This type of biasing is good for low power RF
devices. When dealing with large power devices, ie in the 100W and
more class, this is not a good bias as the wasted heat in VR1 and D1
is very inefficient and prone to failure. Also there is no protection
should a voltage spike on the DC supply propogate through. Most
bipolar RF device do not like more than about 4 VDC base/emmiter
voltage. Both circuits have no provisions for limiting the bias
voltage in such a manner to cause permanent damage to the base/emitter
junction.

I have for sale an SGC SG-2000 ADSP2 (Digital Singal Processing) 150 watt HF transceiver.

This Unit is for both Amateur radio and Marine radio use.

It transmitts and receives CONTINUOUSLY from 1.8 Mhz to 30 Mhz with no gaps. USB, LSB, CW & AM.

The unit is electronically perfect, the front panel is perfect. There are a few scratches on the top of the case.

It comes with the mic, DC power cord, all metal base and quick start card.

I will ship internationally.

The price is $1,150 plus actual shipping charges.

You can email me at: w7gsa@yahoo.com (w7gsa at gmail.com) or you can phone me at 904-821-5055 9am to 9pm eastern time.

For more detailed information go to: - - http://sgcworld.com/Publications/Manuals/ADSP2Head.pdf

Sorry for being off-topic, but the heath/zenith NG seems to have died.
Does it help if I have an expired ham license? :-)

I have need of an RS-232 terminal, and I know that
my H89 (with no floppy--boat anchor!) contains one.

Can anyone point me to details for disconnecting the
H19 board from the CPU board and connecting it instead
to the DB-25 on the back?

(Even better, connecting it directly to a DB-9 which I'd have to buy)

I need it to configure a Sun Ultra, since I don't have a Sun monitor.

Thanks

What is preventing you from using a PC (desktop or laptop) or a Mac
running a terminal emulator as your console terminal for the Sun WS?
That would involve somewhat less work than converting the H89 and
you would have the benefit of emulating a terminal type appropriate
for the Sun serial console.

None of my Macs have RS-232 (though of course I can get a USB converter)
But I do have a Kubuntu box with RS-232 which I could hook up with a
crossover. However, if it didn't work, I wouldn't know whether to blame
the Sun or my emulator config.

Plus, without a floppy drive, the H89 is useless, so this gets
something out of it.

This is from vague, 27-year-old recollection.
There are two boards in the H89. One of the boards
is the computer, the other is a terminal. The terminal
board is the one attached to the actual CRT, the computer
is attached to the (100KB, hard-sectored) diskette drive.

The computer and terminal are attached with a single
cable with perhaps 5-7 lines using standard RS-232
levels. You just need to pull that cable off, figure
out the pinning on it, and make a replacement cable to
connect to the DB-25. I can't remember well, and I advise
proceeding with caution, but I very vaguely recall that
maybe you could move the cable that connects the computer
to the DB-25 to the terminal board, after removing the
cable that connects the two boards together.

>

Indeed, using the terminal portion has merit, but why not also
add the missing floppy (I presume it is just the 5 1/4" drive
that you lack)? Look in dumpsters, curbside, surplus and
thrift stores for any old XT-clone to rescue a full-height
floppy ;)

Regards,

Michael

1694. Power Oscillator

Newsgroup: rec.radio.amateur.equipment

I'm trying to realize a simple RF power oscillator to experiment RF
induction for educational goal. I found a lot of amateur radio
transmitter schematics but my goal is something of more easy because
I don't need of modulation, antenna matching and so on. My ideal
scheme
is an equivalent of "one tube Colpitts oscillator" but using a power
mosfet ot transistor. My friend told me that there are "4 watts RFID
reader working at 13.56MHz" scheme, but I found nothing in the web.
Someone can help me?
Thanks in advance for your attention,
Antonio

All the software is gone--damaged by two many years of garage and
basement storage, and I finally got up the courage to discard the
remains.

Also, the "hard-sector" disks these things used are not as easy to find.
I actually have some old Wintel boxes with soft-sector drives.

My H89 drive is not actually missing--it is "out-of-alignment"
and I don't have the tools to fix that.

There's anyway no particular value to me any more in running
HDOS or CP/M. It's been too long--I grew accustomed to AmigaDOS,
and then to MacOS 9, and now Mac OS X (with Solaris, Linux, and
FreeBSD for off-loading non-user-interface tasks)

Hey, an alternate idea: Anyone in northeast Indiana want to bring
over a serial terminal long enough to reinstall and configure Solaris
and Kubuntu, and take what's left of the Heathkit as my inadequate
"thank you" ? :-)

Hmmm. That's probably correct! In fact, if I recall correctly,
there are both DCE and DTE connectors on the back.

Thanks, I will definitely look into that!

> You've got some vintage hardware there ;-)

Just call me cheap. The vast majority of the computers
I've had cost less than fifty dollars each.

Check www.hamradio.com for their store in Woodbridge VA. What you may consider is going to the store, ordering and have it shipped to an out-of-state address (like to your hotel in MD or DC). There is no sales-tax on out-of-state shipments but there is on store delivery. Sales tax rate 5%.

1704. VoiceMax Speech Processor - Special Auction Units

I see the SplatterMax is going down the same path as your amp; drop
the price bit by bit until you finally accept the fact that nobody
wants your junk, justify it as some sort of economic viability issue,
then beg the groups for new ideas.

Maybe you should just start the brain-picking now. That way you could
have your next magical CB accessory on the market before you run out
of "buyers" for your current entrepreneurial fiasco.

Source record: 4381

not too scientifically i cured a noisy gen i read some articles i
think in qst about a ham that tried to do same w/a noisy car

i took rfshielding tape around all the wires made a 'rf' proof can to
shield stuff i thought would radiate super grounded everything
properly including the gen frame and i also made some rfabsorbing
sheetmetal like plates to cover the gen execpt for air/exaust which
had a little copper screen hinged door flap the shielding was mostly
scrap so it didn't cost much and kept the basic weight and size of the
gen same since it had a pipe like frame and the shielding i hung inside
that

you can try to see if there is a particular 'thing' in the gen that
radiates , spark plug? it's cable? the inverter? if it's mostly one
item perhaps you can just shield that/??

best of luck

Message-ID: <1191378089.924986.25950@d55g2000hsg.googlegroups.com>
Source record: 4388

I recently bought a used Yaesu FT-212RH, in very good condition,
everything seems to work fine.
Though the S-meter is a somewhat odd or very, very stingy.

When talking to people simplex, the s-meter (bars) either dont show
any signal strength at all or very little, even when the simplex
station is strong. When listening to repeaters the s-meter bar lights
show up in varying signal strengths, so I know the S-meter does work.

Does someone have a service manual or know how to adjust this S-
meter.

Thank You

Body handling: HTML body converted to readable text

I have repaired the receiver.....if anybody needs any help with their unit, feel free to e-mail me directly. I think I will post the alignment procedure up on the WRL website once I get everything aligned.The actual problem turned out to be a broken connection from the bifilar wound RF output transformer.

I would hook it up to a signal generator with a calibrated attenuator first,
just to make sure that you don't have a blown front end device. Also, you
will be able to see how many microvolts are required to "move the meter".
You should be able to easily hear a 0.1uV signal from the generator.

Pete

I'm in the market for a GPS gadget, but I can't seem to find one that
does everything that I want. The new whizbang "turn left in 100
ft....50 ft....turn now" kind don't seem to have a Latitude and
Longitude readout for exact positioning. What I know about APRS
would fill a book, but for the time being I'm mainly interested in
getting directions through some large cities and also being able to
report my exact position for HFTA antenna system purposes. Does such
a gadget exist? Thanks for any leads.

I have For Sale aN SG-2000 ADSP2 (Digital Singal Processing) 150 watt
HF transceiver.

This Unit is for both Amateur radio and Marine radio use.

It transmitts and receives CONTINUOUSLY from 1.8 Mhz to 30 Mhz with no
gaps. USB, LSB, CW & AM.

The unit is electronically perfect, the front panel is perfect. There
are a few scratches on the top of the case.

It comes with the mic, DC power cord, all metal base and quick start
card. Updated manual is available for Free online.
I will ship internationally.

The price is $1,050 plus actual shipping charges.

You can email me at: w7gsa@yahoo.com (w7gsa at yahoo.com) or you can
phone me at 904-821-5055 9am to 9pm eastern time.

For more detailed information go to: - -
http://sgcworld.com/Publications/Manuals/ADSP2Head.pdf

Please email me for pictures.

I will also consider a trade for a 400 to 600 watt HF amp, like an
SG-500 or similar.

Bill

Since I'm on the north side of Washington DC anyway that is a useful bit
of info. Trouble is I can't get there without paying a toll and driving
an extra hour. So it would have to be a really big ticket item to make
it worth while. But if I order on line into Maryland were HRO does not
have a brick and mortar store I can duck the sales tax and the toll.

All of the current Garmin mapping handhelds will do that.

For US buyers, out of the box, they have a crude "basemap" of the US with Interstates and major roads within cities, but you can buy detailed maps of north America for navigation.

https://buy.garmin.com/shop/shop.do?cID=145
http://www.garmin.com/cartography/

Even without extra-cost maps, they all show latitude and longitude and most have NMEA outputs for connecting to external devices.

I have a 76CSx that I'm quite happy with.

https://buy.garmin.com/shop/shop.do?cID=145&pID=351

I'm sure the other makers have essentially similar products.

I would suppose that if one used some fairly high resistance wire, and had the resistance / foot data for that wire, that they could "wind" their own 11.2 ohm resistor. I may do that with my 260 some time.

Ed

1738. WANTED: Solid State 300 to 600 watt HF Amplifier

Newsgroup: rec.radio.amateur.equipment
Date: 2007-10-07 00:13:51 UTC
From: ebohnn@gmail.com
Message-ID: <1191716031.567511.327500@k79g2000hse.googlegroups.com>
Source record: 4212

I would like to buy a good quality solid state 300 to 600 watt HF amp,
like an SG-500 or similar.

The amp should be in good to excellent condition both physically and
electronically, with full output power.

The amp can operate off of 110vac or 13.8 vdc.

I can pay you with a cashier's check, post office money order or
PayPal...which ever you prefer.

If you have one available, please email me at w7gsa@yahoo.com

Thanks,

Bill

Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/swap-guide

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.swap (and currently archived at
http://www.faqs.org/faqs/radio/swap-guide/ ):

radio/swap-guide
Subject: Rec.radio.swap FAQ: A Guide to Buying and Selling on Usenet
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 6 Nov 2001 19:25:51 GMT
Posting-Frequency: Monthly

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.

All

If i were to purchase a hand held 2m / 70cms transceiver would it have
the same transmit coverage as those i can buy in the UK?

Many thanks

Andy

1744. Kenwood K2AT power supply

Newsgroup: rec.radio.amateur.equipment
Date: 2007-10-07 19:50:57 UTC
From: James Barrett <xucaen@comcast.net>
Message-ID: <xb6dnSUJBMH4qpTanZ2dnUVZ_rSinZ2d@comcast.com>

I have a question for anyone who owns a Kenwood K2AT hand held and uses
an external DC Power supply. Page 9 of the owner's manual says that the
voltage must be between 12.0v and 16.0v (page 9) but does not say what
the amps should be. I read somewhere out there that 1.8A should be used.
However, the picture in the owner's manual shows a DC cable (the PG-2W)
with 4A fuses. Other radio's use 3A, so I am wondering if the K2AT can
handle 3A, especially considering that the PG-2W has 4A fuses in it.

Is 3A safe for my K2AT?

thanks,

Jim

You are not the only one to ask the same question.

The radio will only draw as much current as it needs. It is only the
voltage that maters and it must be what the rig is rated for. The power
supply must be able to put out the ammount of current needed or more. As
long as the voltage is within the correct range, you could hook it up to a
100 amp supply if that is what you have.
You should have a fuse in the line rated at whatever the manufactor says.
This will reduce the damage and save the wiring and power supply if
something does gowrong with the Kenwood.

Think of it as hooking up somethin to the 120 volt AC outlet in your house.
As long as the device is rated around 120 volts AC it will only take what it
needs, be it a 5 watt night light or a 1200 watt heater or hair dryer.

Probably not with out some modifications. The USA bands are usually wider
than other countries. Many rigs will have a jumper or two that can be cut
or added to change the frequency coverage , especially the transmittter.

I don't know if it is permitted in other countries, but in the USA we can
cut the wires so it will cover more than we are licened to transmitt on.
Just can not transmitt there. Other countries may be differant.

Possibly. The U.S. 2m band is 144-148 mHz, the U.K. is 144-146. Most
radios sold in the U.S. are able to transmit on the entire band. It
would work in the U.K., but there may be legal restrictions on importing
them. At one time didn't the police use channels in 146-148 mHz?

70CM is different. The FM portion of the band in the U.S. is 440 mHz,
in the U.K. 430. Some handhelds will transmit on both, some won't.
Again there may be legal issues about importing a radio that transmits
"out of band".

The other issue is repeaters. At one time all Euopean repeaters used a 1750 Hz
tone to "unlock" them. This was transmitted to bring the repeater out of standby
and during normal usage it was not needed once "unlocked".

U.S. repeaters never used the tone, if they used anything (and by now probably
all do), they used subuadible continuous tones (CTCSS or the Motorola trademark
PL). From what I understand the U.K. is moving over to CTCSS also, but you
may encounter a repeater that uses the 1750Hz tone.

Just as an aside, check about 6m and 220mHz. Here 6m is not available for
FM, and there is no 220mHz band at all.

Geoff.

1750. Help identify a desk-type microphone?

Newsgroup: rec.radio.amateur.equipment
Date: 2007-10-08 18:07:31 UTC
From: mcalhoun@ksu.edu
Message-ID: <fedrl3$1ul@unix1.cc.ksu.edu>
Source record: 4224

While sorting through my "collection" of junque microphones,
I found a desk-type mic with
* a fairly thick and heavy base with
* a four-wire cable,
* an RCA logo on the front, below and to the left of
* a plastic horizontal TRANSMIT bar, and
* a sticker on the bottom which says (and sorta looks like):

SHURE BROTHERS INC.
Controlled magnetic microphone
Model #MI-559156-1
Made in Evanston, ILL., U.S.A.
U.S. Patent D-198,850

In addition to the expected switch, the base also hides a one-transistor
something (presumably an amplifier). By treating the "amplifier" as a
three-terminal device, the wiring was simple enough to trace:
* two wires for PTT and
* two for audio
and it did work with my HF radio, although the mike did NOT seem very
sensitive.

Does anyone have any information about this mike and/or the radio it
might have originally accompanied? Since there is no provision for
an internal battery, I wonder if its radio supplied a voltage on one
of the audio wires?

All

I thinki take it from the responses that i might be better off not
buying a handheld in the USA for use in the UK. Given that most will
come with only 110v chargers and i will need to use an adaptor, the
lack of toneburst (albeit most repeaters now use CTCSS) and the
differential 70cms frequencies. The £1=$2 makes the prices VERY
tempting and i could buy a top of the range handheld for the same cost
as a run of the mill one in the UK. Lastly, most of the warranties
would mean i had to ship it back if it went wrong.

Any other thoughts.

Andy

The Garmin NUVI 350 has a thorough street mapping system, voice prompts, and a mode where I am looking at my QTH right now as N43D 07'10.1" and W071D 26'58.8"

It sounds like it could meet your needs. It is pricey though.

W0PBV-

RCA used to make VHF/UHF NBFM two-way radio systems. I would guess that this microphone was used for dispatching with an older model base station.

You might check the Shure web site and see if they have any information on the model number. However, it may be a proprietary number for RCA.

The Shure Controlled Magnetic or Controlled Reluctance microphone elements came in both high and low impedances. You might do a simple 1 KHz impedance test on the element to determine which yours is. It could most likely be used without the transistor amplifier if it matched a radio's requirements. For example, the low impedance elements are about 200 Ohms, and work OK with Kenwood radios such as the TS-450.

The transistor amplifier is most likely to use a relatively low-output microphone element with a radio originally designed for use with a high-output carbon microphone. You didn't mention what HF radio you used it with, but some recent Icom transceivers use a similar arrangement with an amplified electret element. The low sensitivity you experienced may be due to the old amplifier requiring a higher bias level than the modern transceiver can provide.

There are plans for one you can build in the August 1998 issue of QST.

Year and a half ago I bought Yaesu VX2R in the US - works fine in EU.
Has 90-240V charger (just needs the pwr socket adapter), toneburst and
switchable deviation. Warranty of course only 1 year, but at the US
prices it's worth the gamble. If it died today, I would just pitch it
and get the new VX3.

1760. Kenwood Speakers, SP-930 vs SP-940

Newsgroup: rec.radio.amateur.equipment
Date: 2007-10-09 19:32:52 UTC
From: "Rick (W-A-one-R-K-T)" <get.my.email@from.qrz.com>

Source record: 4234

Have any of you seen the Kenwood SP-930 and SP-940 speakers side by side, and can you tell me the difference in appearance?

I'm just trying to determine if an SP-930 would be a good cosmetic match for my TS-940S, or should I look for an SP-940.

Also, do you know if there is any difference in the way they perform e.g. the filters?

Thanks...

Rich

If i could find a similar spec handheld BUT with a higher output than
3 watts that would be ideal. I was looking for something with 5-7
watts output and a decent battery life.

Thanks

Andy

Something like this maybe?

http://www.tti-test.com/products-tti/pdf-brochure/prec-tsa-2p.pdf

I had one for a while and although it did not have all the bells and
whistles of its more expensive relations it was great to get a general
idea of what was happening.

Next problem is that they are no longer produced but I have seen two on
Ebay in the UK in the last year, one was me selling mine, I recall it
went for about $250:00 ï¿½125:00

Good luck.

I have the Sony SA, but used a Tek 475 for a display. Works well for
simple stuff like Cable Tv and DBS/Sat Work, but if I need real Data
there is nothing quite as Good as a Good HP SA.......

In earlier periods of my hi fi experience the issue of soundstaging depth and precision[or good stereo effect] was never really an essential part of my enjoyment of a system.

The more I have experienced though the more I have come to value this as an absolute necessity iin terms of enjoyment and engagement.The ability to hear all the instruments and voices as distinct entities within a three dimensional sonic picture is enthralling stuff.Voices and instuments should have a shape,not just a suggestion of a shape.

A recent experience with a friends ME 550 power amp trialled in my system was a really interesting confirmation of just how getting one component wrong in a system can completely destroy this illusion.This despite all the other components being strong in this area.

Like very many transistor power amps the ME has absolutely no depth to
the soundstage.I have been told that this is typical of amplifiers which use lots of negative feedback and have high damping factors.Many
CD players are like this too although they seem to have improved in this area a great deal.The ME sounded remarkably like a cheap Kenwood
power amp I used to run woofers with.Great bass but no imaging.Rotel power amps I have used sound like this too.
Many of the digital type amps sound like this too although again they seem to be improving.The latest Nuforce amps are quite good for imaging precision and depth.

Amplifiers like the Supratek Malbec and Monduese [Wolcotts too I believe] have variable feedback and damping factors.With these it is very easy to fiddle with these adjustments to hear for yourself how too much feedback and,to a lesser extent too much damping,can cause the 3D imaging to collapse from something approximating a pyramid on its side[pointy bit in front of your face] to a sausage with a squashed middle section.

I think the tragedy is that many people never get to hear how involving a stereo system can be when the imaging is right.This was certainly the case with me until somebody sat me down in an front of such a system.

All

Can anyone recommend a verical antenna that i can mount on the roof of my 3 story house that works from 80m upwards and wont upset the nighbours (too much). I have looked at various Butternuts etc but it seems like they only work well when ground mounted. Also keen to get one that is not to noisy as in a relativly built up area. I would not operate with more than 100W

I have looked at reviews on EHAM but they all seem to be mixed.

Thanks

Andiroo

Andiroo,
I had a bunch of very strong cable donated to me by the local
NAVAL raedio stn. It was about 1/4" in diameter and included
Ceramic bar insulaters etc. I had a 4" vertical aluminum pipe
imbeded in concrete at the base. It was about 30' long and another
slightly slightly smaller aluminum pipe which telescoped into the lower
one. Total height was about 50 feet when fully raised. At the top
I had a thick very tough plastic ring with wholes around the edges
so I caould anchor the antenna wires to the insluating ring and then
had 3 inverted vertical antennas all fed by RG8U Coax into a will
insulated box. In other words 3 inverted V's you might call it.
They opposite end of the antennas were 1/4 " bronze braid wire.
One set was cut for 40 meters, one for 80 meters, and the last
for 15 meters. Coax feeders were cut to proper lengths for
best matching and lowest loss. The antenna worked fantastically.
All 3 bands and stood up with no breakage even during near hits
from several hurricanes and Kona storams. Results were excellent.
I also had a 3KW roller coil tuner in the shack which permitted
tuneing to zero swr on all bands 80/40/20/15/10 meters.
As I said this material from NM0 site was real tough stuff.
The aluminum mast that supported it all was about 4" in diameter
and set in concrete block. Hole in side to put all the feed line
inside the vertical aluminum pipe. At top of the 4" pipe had another
3" pipe interleaved into the 4" pipe so could raise and lower the
upper section easily. On the air results were fantastic.
The antennas faned out at the roof tie point insulators.
If your lot is at least 50' by 100' its just
about what I have.

Would it be safe to connect my HT directly to a 12v car battery? If the
HT will only draw the amperage it needs, and the voltage is within the
specs, it should be safe, right?

Thanks,

I answered my own question. car batteries tend to have voltage spikes,
which would damage the HT. Just wanted to throw this out in case anyone
else ever has the same question.

Source record: 4258

Hi, I have a Yaesu FT-301D - digital hf rig.

Here is the problem... the rig works great but the digital display
does not work properly.
The display will only read out the following when on... example. 80m
reads 3.000.0, 40m 7.000.0 20m, 14.000.0 and so on When I turn the
dial the frequency displayed stays the same. No change or any attempt
to change its reading.
Ive checked the connections to the display boards, all looks ok.. As
I mentioend the rig works fine except for this.
Any suggestions ?

Maybe yes, maybe no.

Some HTs require _less_ than 12 volts, and will be damaged by the
higher voltage. This should be clear in the manual.

A car's electrical system as a whole is a less safe thing to connect
an HT to than an isolated car battery, if the vehicle is being
operated. A vehicle's voltage distribution system is subject to
voltage spikes and surges (in particular, due to a phenomenon called
"load dump" e.g. turning the lights off while the engine is running).
Car electronics usually requires that the device be able to withstand
a load-dump spike of up to 50 volts. Many HTs won't survive this.

The manufacturer-recommended "plug into cigarette-lighter outlet"
adapters for HTs often include some filtering and spike suppression
circuitry.

The FT-301D had a few issues with the digital display -- one which was overheating.

Post at Fox Tango (Yaesu User's Group)
http://foxtango.org/foxtango001.htm

Carol Maher is moderator and likely has the troubleshooting info you need.

Hello,

I recently found this great transmitter, and went to great lengths to get it out from the back of a huge old warehouse.

Unfortunately, the manual seems scarce.

I would like to buy, borrow, copy, etc.. the manual so I can fix the set. Usually a manual wouldn't be strictly necessary, but the set is difficult to service since when you slide any of the drawers out, it's instantly disconnected from the frame wiring! ha!

(Anyone got a "service cable" for it? Other owners of the URT-12?)

So, if anyone is kind enough to make available a manual I would appreciate it greatly.

Pictures of the set (I have not had time to clean the cabinet, sorry) are here:

http://www.bunkerofdoom.com/mil/urt12/index.html

I think it's a good piece of Coast Guard history, I'd like to restore it. - and get it on the air!

Thank you,

Patrick Jankowiak

Nortex Electronics
In Memory of Lewis E. Cearly Jr., Proprietor
Lewis Cearley, 84, passed away Friday, Oct. 5, 2007, at a local hospital. Funeral: 1:30 p.m. Tuesday in Greenwood Chapel. Interment: Greenwood Memorial Park. Visitation: 6 to 8 p.m. Monday at Greenwood Funeral Home. Pallbearers: Gordon Callaway, Ed Forrester, Bob Martin, Ken McAllister, Mike Stroud, Jimmy Waters. Honorary pallbearers: Bob Carr, Bryan Goulette, Perry Hale, Steve Haney, Jerry McKinney, Robert Plum, Pete Pratt, Mark Rosso. Lewis was born July 21, 1923, to Lewis E. Cearley and Ina Carson Cearley in Childress. His family moved to Fort Worth in 1936. He graduated from Tech High School and joined the Navy in 1942. He served on the aircraft carrier, Tulagi, in the South Pacific, participating in three invasions, plus always dodging the kamikaze. Lewis enjoyed participating in squadron reunions. Lewis developed an intense interest in electronics at an early age; for example, he wired an entire house when he was 14. He started the Cearley Co. on Pennsylvania Avenue in 1954. In 1976, he established Nortex Electronics on West Vickery Boulevard, passing out advice, spare parts and good cheer until a month before his death. Lewis and Joy Cearley were married in 1967, putting an end to his happy bachelor days. They celebrated their 40th anniversary on Aug. 12, 2007. His stepson, John Watson, died in 2001. Survivors: Wife, Joy; sister, Sylvia Cearley of Fort Worth; stepdaughter, Kay Haddaway and husband, Richard of Santa Fe; stepdaughter-in-law, Brenda Watson of College Station; stepgrandsons, James Haddaway and wife, Shannon of Fort Worth, Keith Watson of College Station; stepgranddaughter, Dr. Kimberly Hill and husband, Jeff of Georgetown; and stepgreat-grandchildren, George Haddaway, Vivian Haddaway, Ethan Hill and Avery Hill. Published in the Star-Telegram on 10/7/2007.
Lewis was a great friend to many electroncs and photography enthusiasts and is sorely missed. Lewis was my very good friend. During the week of Monday OCT 15 through Saturday OCT 20, 2007, the store will be open to the public to make any final purchases.
It is strongly recommended to do so, as after this, the store will be closed and all goods will be recycled.
NOTE: Thursday-Saturday of the above week is a special and very final "garage sale" also open to the public.

Have searched high and low for an operators manual, no luck.
Service manuals are easy to find, but, not what I need.
Anyone have an operators manual?

I have most of it sorted out just playing with it but am not sure about a couple of things.
Found it at a hamfest last weekend. Nice little clock but would like to set it up correctly.
If anyone can help it would be appreciated.

There are a couple of repair services on Internet for this clock.

QST normally reviews rigs shortly after they come out, and their 735
review (it's online at the ARRL website) is dated January, 1986. I
bought my 735 around that date and still have it, although I'm using
an Icom 7000 nowadays.

The 735 has a fairly "hot" receiver by yesterday's or today's
standards. A good noise blanker. It's an excellent CW rig. If it's
missing the CW filter the passband tuning will narrow the bandwidth to
about 800 cycles. Limited memories, about 11. Two VFOs. All HF bands,
including WARC bands.

Like all older radios, some of the proprietary parts are no longer
made, and may be hard to locate anywhere. The optical encoder for the
main tuning knob, for instance. Mine went bad; one technician couldn't
fix it; another one did -- lucked out.

On the back of the radio, you can hook up a separate receiving antenna
and a transverter.

It sold new in the $800 range -- it was considered to be a
medium-level rig -- better than the cheapest, but below the big rigs
of the time, like the Kenwood 930, 940, etc. I think it was
discontinued in the early or mid 1990s.

Does anybody know if the Astatic D-104 will work with an old Drake T4X-C?
What are your thoughts on amplified vs. unamplified D-104 for this use.
Thanks, K1HL

The issue is whether the microphone output impedance matches the rig's input impedance. The D-104 is high impedance, it had a crystal cartridge though I don't know if that changed with time; I don't know what the input of the Drake is.

A lot of those built in preamps were about adapting to different rigs. If the rig has low(er) impedance, then a single transistor is one way to give the microphone a high impedance load while a low impedance output for the rig.

If you simply load down a high impedance microphone, you'll end up little output and a distorted frequency response.

> though I don't know if that changed with time;

There were two versions of the D-104. The most common one used a crystal
element. The other was a ceramic element. I once called Astatic and asked
if I should be using the ceramic instead of the crystal ones because
of my voice (lots of bass). The engineer I spoke to told me that
the expression "crystal clear" also applied to their microphones.

The ceramic elements were used in high noise environments and were
relatively rare.

I also have their 10-DA microphone, which uses the same stand but
has a dynamic element. They have been called the "best SSB" microphone
by many people.

> I don't know what the input of the Drake is.

You should probably ask on the Drake list, but AFAIK they are
high impedence and should work fine.

Lots of things can go wrong with microphones, the elements can age,
there may be hidden damage (or incompetent repairs), etc. It would
be a good idea to check to see if there is an amp in the base, and
if so, you might as well use it.

If not, I would try it without one.

Obviously before you use it for that once in a lifetime contact,
try it out on the air and see what people say.

You may not like the way it performs. I find they have too
much high frequency response and not enough low. My wife, who
has a much higher voice, has far better results.

Geoff.

1820. Wanted Yaesu FT-101 in UK

Newsgroup: rec.radio.amateur.equipment
Date: 2007-10-23 22:38:17 UTC
From: Andiroo <a.richman@btinternet.com>
Message-ID: <1193179097.398186.140690@i38g2000prf.googlegroups.com>
Source record: 4294

All

I am after a FT-101 (one of the later versions would be most desirable) from someone in the UK. Ideally it will have been well maintained but no over modified / butchered. Any accessories also needed. I fancy an alternative to my super slick Icom rig.

Email me if you have such surplus kit.

Regards

Andy

Hi folks,
I switch after a couple weeks back from standard to remote MH-59
microphone on my FT-857D.
The functions on this remote mike don't work exept the red button to
switch te set on and off.No DTMF,no light.
I change in menu 59 from normal to RMT but no luck.
Otherwise the standard mike do also not every function.
Up works,but FST will put set on and off and DWN does nothing.
Very strange.A couple weeks ago it will work.
At least same and both microphones works with all functions on my FT-
897D.
Someone a sugestion?
tnx

1824. A decent amateur receiver/transmitter setup

Thanks for taking the time to read this. I know next to nothing about this topic, however, the radio is not for me. It's for my dad. He was very active in radios from around WWII thru the 50s. His job and family came first though, so I guess he had to let some of his hobbies go. Since he's retired and doesn't get around as well as he used to, he's thinking about getting back into radio.

I think he got "sticker shock" when he looked at a trade magazine recently. I tried to tell him we aren't in the 50s anymore and he said "Yea, but dam they're high."

My question is: How much should an 80 meter radio w/antenna sell for? We're not talking top of the line here, but quality and reliability are important (as is cost).

Any information, links, suggestions, opinions, etc. will be most welcome. Thank You in advance. TC.

Source record: 4299

As you said, it isn't the fifties anymore. No one sells rigs just for a single HF band, unless they are oddball, low power rigs without enough power to be useful.

Icom makes a low end rig, the IC-718, that offers 100 watts output that performs reliably and is very useable. Yaesu and Kenwood probably offer rigs in the same performance class at similar prices.

Today's currency (USD) is worth ten times less than the same currency in the fifties. Multiply old prices by ten to see what they would cost today. You will find that you are getting much more radio capability and reliability for your dollar today than you ever could have dreamed of in the fifties.

Based on articles, I've seen, the prices for a typical HF rig these days isn't all that much different from the prices for rigs back in the 1950s, once you adjust for inflation.

> My question is: How much should an 80 meter radio w/antenna sell for?

The cost for a usable antenna should be very modest, if your dad has room to put up a simple wire dipole in the back yard. You can make a serviceable antenna using wire and insulators available from any decent hardware or homebuilding store. $25-$50 in materials ought to do it, if everything is bought new, and the cost can be brought down to next to nothing if you have leftover wire from another project and/or are good at scrounging.

As for a radio... $750 would get an FT-857D compact (HF/VHF/UHF all-mode). $870 would get the FT-897D - essentially the same radio in a larger, base-type package. Other 100-watt HF rigs seem to start in the same basic price range... around $1000 is a common price point.

CW-only or lower-power radios are somewhat less. If by "80 meters" you literally mean the CW end of the band only - if your dad isn't a phone guy - then something like this might do? If he wants sideband and/or AM as well, then a full-function radio would probably be called for. The least-expensive new 75-meter LSB-only transceiver I know of at the moment is the MFJ-9475X, at $270, and it might not have the power or reliability that your dad would want.

>We're not talking top of the line here, but quality and reliability are
>important (as is cost).

In your place (and his) I'd seriously consider going with a used radio. They're not hard to come by, as active hams upgrade to newer radios and as old radios become available through silent-key sales and auctions.

Hooking up with a local ham-club would probably be a good idea. Putting the word out at a meeting or two that he's looking for a serviceable-but-not-fancy HF rig might very well turn up a few that people have sitting on their shelves. I'd expect that he'd probably be able to get something decent (maybe 5-10 years old) for perhaps half the price of a new radio of similar basic capabilities. Some of the ham-radio dealers have used equipment for sale (either radios they have accepted for tradein, or as consignment sales).

Local ham-radio fleamarkets, auctions on eBay, and online swapmeet sales on QRZ.COM are all possibilities. One has to be careful, though, to make sure that one is being sold a radio which actually works properly and hasn't had all of the Magic Blue Smoke escape. That's one reason I suggest a local (hamclub) acquisition - you'll at least know where the seller hangs out :-). Test the radio carefully before buying, or get an iron-clad right-of-return-within-30-days guarantee.

A few years ago I got somewhat lucky, and managed to buy a Ten-Tec 555 Scout with a bunch of band modules and a power supply for only $300. This is a 50-watt sideband radio with individual plug-in modules for the bands - a bit quirky but very usable - it was my HF-mobile radio for about three years.

If you adjust for inflation, the rigs of today are dirt cheep.

A typical Johnson Viking would be around $ 300 and a receiver would be around $ 150 to $ 200. That is around $ 450 to $ 500 in 1955. I was not aroung those years, and don't know what the typical wages were, but they probably were under $ 1.00 an hour. For around $ 1500 you can get an Icom 746 Pro that will do things only dreamed about in the 50's. I bought one in March for $ 1400 after the rebate and free shipping with the matching power supply. The Icom 706 is a lot less than that. There are several lowband transceivers out now that are about half that . That would only be 4 to 5 times the cost of the 50's station. The wages now are probably 10 times that or more.

To top it all off most have more money left over now to buy things than they did in the 50's. I grew up then and many were lucky to have a used car about 5 or 6 years old. Now lots have atleast two cars and not too many are that old.

A rig to start (under/about 200$) for an absolute novice.

At the moment, no antenna is installed yet (I can't install it)
so I was thinking to something about mobile or a HT.

What do you suggest to get?

A VX-3R is a right choice?

Thanks in advance

Hi, My first radio is a Kenwood K2AT 2 meter HT. In my area 2 meters is
where the local action is. Check with some of your local radio clubs and
see which band is used most frequently.

For very accurate calculations of inflation, go here:

http://www.westegg.com/inflation/

What cost $300 in 1955 would cost $2173 in 2006 (the calculator
is based on the last completed year).

So a radio that costs $1400 today would have cost $193 in 1955
That Heathkit AT-1 transmitter that sold for $29.50 would cost $213
today - which actually sounds just about right to me - I would pay
that for an AT-1 'modern' kit were it available.

So all in all, things haven't changed all that much really in price terms.
But performance? Not even on the table - things we can do today in
a tiny space were not even science fiction in 1955, much less on the
radio store shelf.

But imagine if you could go back and order 2 or 3 of every Heathkit
from 1955 and stash them away until today. THAT would take care
of the inflation issue in a heartbeat on eBay! An unbuilt AT-1 today
would probably fetch $4000 or more...

Thanks for the inflation calculator. I was just guessing on the wages in the middle 50's.

That shows I was in the ballpark. Now about the least expensive transceiver is an Icom at $ 550. Add about $ 150 for a power supply and you have $ 700 in a rig that would probalby out do the Collins rigs of the 50's that could cost from $ 1200 to almost $ 2000. The Icom 7800 at $ 10,000 would maybe equal the best Collins in terms of the adjusted inflation. As you said that rig would almost be science fiction in the 50's.

As far as the AT-1 , I was given one that was in a bad state of repair about 15 years ago. Didn't do anything with it, but about 5 years later I gave it to a friend that wanted one to restore. He did a very good job of it, even had the chassie replated. Hard to tell what e-bay would get for an unbuilt kit. If it is like some of the others, I could retire and lead a good life if I had a couple of each of the unbuilt Heathkits. Around 1973 I did put together some of their low end test equipment. Still have the VTVM. In the 80's I bought a SB-101 from a ham that had put it together in the late 60's. For what it was, it was a very nice rig. Wish I had that one back.

Although I frequently look for other sites, I find EHam to be the best over-all ham radio web site to browse regularly. (http://www.eham.com).

Does anyone else here suggest any other site with comparible quality and breadth of topics?

Message-ID: <1193707048.376473.306960@19g2000hsx.googlegroups.com>
Source record: 4181

Hi all,

I picked up five Motorola Astro Spectra VHF mobile radios at a Motorola employee auction here in Ft. Worth, Texas. I guess they were stuffed in the corner some where in the factory, because they're all still in their boxes. All have cables, speakers, microphones, manuals, and of course the radio itself, model D04KKH9PW7AN (see http://www.batlabs.com/astromob.html for what this means). All but one includes the trunnion mounting bracket. They include options G806AA (Astro Digital ?), G51AA (Enhanced Smartnet), W797AP (Encryption DVP-?), W544AK (3 db Gain Antenna), G133AB, and G239AC (internal options).

I've powered them all up and done some basic tests (buttons all work, PTT seems to work, speaker works, etc...). I don't have RSS or a RIB, so I can't program them, but there's no reason why they shouldn't work.

All are in new or like new condition: no scratches, plastic still covering the display, most accessories still in bubble wrap or plastic bags, etc.... The boxes are the original boxes, with serial and model numbers matching the radios.

Is there any interest in these before I plop them on E-bay? Previous E-bay sales have these going for $400-$500 each, but usually in an obviously used condition.

Email or call me at 817-231-7384.

Thanks,
Michael White

1859. Help with Vector Voltmeter measurements

Newsgroup: rec.radio.amateur.equipment
Date: 2007-10-31 08:22:27 UTC
From: David <dwhuisman@bigpond.com>
Message-ID: <7XWVi.7101$CN4.3598@news-server.bigpond.net.au>
Source record: 4183

I recently purchased an older model HP8753 Vector network analyzer. It came with the reflection test set and calibration standards.

I have looked for some time on the net and cannot find any documents that describe how to make practical measurements.

Initially I want to characterise some passive components (caps etc) and I also want to be able to measure the unput impedance of an active device.

Can someone please point me in the right direction or maybe explain how I set up a test. I have seen responses in books showing the impedance of a capacitor and the self resonant response but when I connect a Cap to the test port on the reflection test set I can see the correct capacitance curve on the Smith chart display but when I switch to mag, the line is flat acorss the band. I cannot tell from the Smith Chart where it is self responant.

Thanks in advance for any help

Regards

David

1860. FA: MFJ-974 Balanced Line Tuner

Newsgroup: rec.radio.amateur.equipment
Date: 2007-11-01 01:53:54 UTC

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&rd=1&item=200168425941&ssPageName=STRK:MESE:IT&ih=010

Continuous 3.5-30 MHz, good for Amateur bands and serious SWL.

Rated 300 watts PEP, 150 watts CW, built-in Cross-Needle SWR/Power meter with 0-30 and 0-300 watt scales, measuring Average and Peak Power.

This tuner uses a T-network that is advertised to match 20-2000 ohm loads. Designed for Balanced Lines, it can also be configured for Coax lines and random long wires.

It might not "load the bedsprings," but should make your Xcvr happy in most other situations.

A decent 'TRUE' balanced line tuner. I own one and have it dedicated to my IC-746 with a balanced feedline to a CF Doublet.

Not interested in buying this one, just posting an endorsement.

I'll second that endoresement - I, too have been using the MFJ-974H to feed my W7FG 80M Dipole with ladder line and it has been the best over-all antenna system I've had in decades.

Anyone have any experience with or knowledge of the DSO 2150 USB
Oscilloscope. I see it on Ebay and the price looks too good to be
true (Chinese-made).

I am just getting into homebrewing and can see a scope would be a good
addition to my DVM to help me troubleshoot projects.

I'd appreciate any feedback. All I can find on the web is the ebay
listings for this product.

I'm a little leery on this, but really am not familiar with this
type of modern scope apparatus to offer any valid opinion on it.
Personally, I prefer the older high quality units you can find on EBay
for about the same price, such as a Tektronics 465.

On eBay: http://cgi.ebay.co.uk/ws/eBayISAPI.dll?ViewItem&item=320177560839

Check bellow what you are getting for one price!!!

Kenwood TS-450SAT Review at eHam : http://www.eham.net/reviews/detail/989
Lovely Kenwood. Superb condition. Tunes any antenna. Covering 160 through 10 meters including the WARC bands with 100 watts output. From Non-smoking environment.
---> with YK-88C1 CW Filter 500 Hz [8.83 MHz IF !!!
---> Power Cord
---> Instruction, external control & Service manual's!!!

Kenwood MC-60 desk mic Review at eHam :
http://www.eham.net/reviews/detail/1112
The Kenwood MC-60A has been a popular desk mic among Kenwood owners for many years. It has a communication type dynamic unidirectional moving coil type mic element. It features UP-DOWN tuning plus a built-in pre-amp. There is a switch for PTT (push to talk) and also a lock feature. The mic impedance may be set for 50K ohms or 500 ohms. The frequency response is 150 Hz to 10 kHz (-6dB) with the Preamp off and 200 Hz to 7 kHz (-6 dB) with the Preamp on. The heavy zinc die-cast base provides extra stability. The mic terminates to a standard 8 pin mic plug. The preamp requires two AA cells which are mounted through the bottom of the base.

VHF Alinco DJ 190 Review at eHam : http://www.eham.net/reviews/detail/3076
Alinco DJ-191 Hand-Held 2m Transceiver with extra battery and antenna. Fully working condition!!!

DL4YHF Pic Keyer with memory!!! More info at:
http://freenet-homepage.de/dl4yhf/pic_key.html
Record & Play up to 2 cw messages. The Speed range from 20 to 300 letters per minute. With full manual and schematic.

I've been homebrewing for a couple of years now and have bought several scopes at hamfests for exactly that reason: they give you invaluable information.

If you can develop the patience, get your scopes at a hamfest (or see below) and be prepared to go to several spread out over at least a year.

Know what you want before you go. My work is all at low HF frequencies (below 5 mHz) so I didn't need high spec high bandwidth. You need to be able to ask the guys selling the stuff what the history is and be wary of vague answers. Some guys have inverters and will be glad to offer to show you that it works (go for it). A hint on bandwidth is what the time base will go down to. One microsecond per division means a megacycle (Hz to the newtimers), so the rolloff will decrease sensitivity at progressively higher freq. Be wary of dust level, loose knobs and shafts, a stickyness on the surface of the outside (as if it was in a restaurant oil frying kitchen for 20 years), etc. The problems I have run into with old used scopes is that they have not been turned on for 20-30 years, and within an hour or two of being on, burns out something and then its dead. Another problem I've had is jitter/intermittents (and not due to dirty switches, but you can have that problem, too). Be wary of scopes with a limited vertical sensitivity range (such as one Heathkit scope that goes 1x, 10x, and 100x). The older tecktronix scopes are excellent. I have the notion that the newer ones (being much more complicated) are hard to fix (and I've been inside some of mine). Look for manuals (particularly if you might think you will someday be fixing it) and that you might need a second scope to fix the first, or vice-versa. I remember the 564 series which had parts (and tubes) all spread out like crazy, but easy to find everything, easy to get a soldering iron in, etc. But, they can develop problems that are hard to trace, etc. If you have a chance to buy two, then you can use the second one for spare parts or signal clues when tring to fix the first one. I'd also consider, preferably, to see you do a google search for used oscilloscope dealers who will give you something like a 30 day warranty as a normal feature of the sale. You scope arrives busted, or craps out within the warranty, then you have a fallback.

This year I went to a bunch of hamfests. First hamfest, I bought two, one not so good and the other one crapped out on me. After several more hamfests and nothing or nothing I wanted, the last fest yielded five scopes for me, one old RCA (tube) and four Tektronix 5100 (three) and 922 (one) boxes and paid about $100, total, for all of them. Walk around and get interested near the end; you will find guys who _really_ want to not take them home again and are lowing the price every 10-15 minutes. One of the five had serious problems and I'm saving it for spare parts, spare scope tube.

I also like analog VOMs better than DVMs.

Hi David,

You wrote:

> Initially I want to characterise some passive components (caps etc) and I
> also want to be able to measure the unput impedance of an active device.

When you measure a passive component, you may want to measure the capacitor shunted on the transmission line. Consider, in your mind, what will happen at DC and at infinite frequency when these two different signals see this network. At DC, the capactitor is an open, so we should have full power transfer, and at infinite freq, the "ideal" capacitor is a short, so we should have zero transfer of power. Obviously, this is not the case of a real capacitor. It acts like a capacitor up until it hits it's self resonant frequency (SRF) then it starts becoming more inductive as you increase in frequency. You should see this on your log plot when you measure S21 insertion loss with the capacitor shunted on a transmission line between ports 1 and 2.

1873. Running Multimode Appllication (MixW) with SW-only headset audio break-in...?

Newsgroup: rec.radio.amateur.equipment
Date: 2007-11-03 23:22:01 UTC
From: martywittrock@juno.com
Message-ID: <1194132121.139666.251380@o38g2000hse.googlegroups.com>
Source record: 4197

Looking for an application (or applications running concurrently) or an approach to use a internet headset on my desktop or laptop for voice, while doing MixW (2.18) for Multimode operations. Ideally I'd like to use the soundcard output from the desktop or laptop for the multimode operation and be able to break-in with voice when needed - - or for that matter use it as my default mode for voice ops (software only - no rigblaster or similar hardware). Ideally I'd like to use the line out as the method for input mic audio to my Kenwood 140S (I'll trim the input for correct audio level with a potentiometer).

Has anyone done this with software apps only? And preferably using MixW?

Thanks es 73's - KN0CK

Message-ID: <1194217386.972465.230100@o3g2000hsb.googlegroups.com>
Source record: 4051

All

I have just purchased a second radio - an old Icom IC-751 to sit next to my modern Icom 706 MkIIG.

I was powering my Icom 706 with a SEC-1223 power supply which is a 23A 13.8V Switch Mode Power Supply (Input 230V AC, Output 13.8V DC, Output current 23A continuous (25A peak) Thermostatic Fan cooled).

The new radio looks like it needs a power supply that can provide 20A peak.

The question is can i run both radios off the same power supply provided i dont transmit on both at the same time or will i need to buy a second power supply for the new radio?

Thanks

Andy

As long as the radios do not draw more current than the power supply can put
out there is no reason not to.

I have an Astron 50 amp supply and have a 706, 746 and a couple of vhf/uhf
rigs hooked to it.
As I have plenty of current reserve I have even transmitted on two of them
at one time.

1879. Re: Two transceivers one power supply

The receiver current on the 706 is 2-amps. Assuming the 751 is
somewhere around there you should be fine having them both on at the
same time for receiving. Just be sure you don't accidently transmit
with both at the same time.

Dick

I own a 706MKII and am happy with it. Just to give you a "FWIW". Icom first came out with the "706". From what I am told, it was an "OK" radio although I have not used one. Icom then came out with the 706MKII which has a vastly superior receiver over its predecessor. I have used mine mobile and have taken it out of the country and operated DX portable. The current version is of the 706 is the 706MKIIG. This version offers UHF capabilities and from what I am told has a receiver superior to the 706MKII.

I have an Icom IC-706MKIIG, an Icom IC-736, and a Mirage B-5016G amplifier all connected to the same Astron 35 amp supply. I can transmit on 2-meters with the 706 and the amp doing 150 watts, and still receive HF with the 736 without any problems at all. My total current draw doing this is about 21-22 amps.

For those of you who have not yet seen the ARRL bulletin:

Motorola USA has announced its intention to launch a tender offer to acquire a controlling interest in Vertex Standard Co, Ltd. Vertex Standard is the parent company of Yaesu. Motorola will own 80 percent of Vertex Standard; Tokogiken, a privately held Japanese company, controlled by current president and CEO of Vertex Standard Jun Hasegawa, will retain 20 percent, forming a joint venture. The total purchase price for 80 percent of the outstanding shares on a fully diluted basis will be approximately US $108 million.

We carry this model on our website, www.partsforhdtv.com. Honestly, I haven't used it for more than 20 minutes but I can tell it works like a charm. I worked in a navigation center (ACC) for almost ten years, where I used handful of very expensive measurement tools. I think this one is comparable in terms of functionality. Moreover, saving waveform on screen in varies format really helps. I like this feature most. We had an R/S spectrum analysis which features a FDD years ago and it save me many times. We caught many intermittent problems which could not be recreated. And we always had many remote helpers handy for help.....

staff, getting what help I could from other
patients, and suffering agonies when they could not or
would not attend to my needs. At the end of two weeks the
stony-faced woman doctor came, accompanied by the heavy-
weight nurse. Roughly they tore the plaster off my left arm
and left leg. I had never seen any patient treated like this
before, and when I showed signs of falling, the stalwart
nurse supported me by my damaged left arm.
During the next week I hobbled round, helping patients
as best I could. All I had to wear was a blanket, and I was
wondering how I would get clothing. On the twenty-second
day of my stay in the hospital two policemen came to the
ward. Ripping off my blanket, they shoved a suit of clothes
at me, and shouted, "Hurry, you are being deported. You
should have left three weeks ago."
"But how could I leave when I was unconscious through
no fault of mine?" I argued.
A blow across the face was the only answer. The second

policeman loosened his revolver in its holster suggestively. They hustled me down the stairs and into the office of the Political Commissar.

80

"You did not tell us, when you were admitted, that you were being deported," he said angrily. "You have had treatment under false pretences and now you must pay for it."

My only diffi-
culties have been when I had a perfectly legitimate passport.
Passports merely inconvenience the innocent traveler,
causing him to be subjected to ridiculous red tape. Lack of
a passport has never hindered a person who had to cross
frontiers. However, presumably there have to be pass-
ports in order to harass harmless travelers and give work
to hordes of often very unpleasant officials. This is
not a treatise on how to cross frontiers illegally, so I will
just say that without difficulty the three of us entered
Czechoslovakia. The guard went his way, and we went
ours.
"My home is at Levice," said Jozef, "I want to go home.
You can stay with me as long as you like."
Together we made our way to Kosice, Zvolen, and on to
Levice, walking, getting lifts, and riding on trains. Jozef
knew the country well, knew where to get potatoes or beets
or anything which could be eaten.

At long last, we walked up a mean street in Levice to a small house. Jozef knocked, and as there was no reply, knocked again. With extreme cau

1907. Need Info: Pure Sine Wave Inverters and Radio Noise

Newsgroup: rec.radio.amateur.equipment
Date: 2007-11-09 11:11:21 UTC
From: "Rick (W-A-one-R-K-T)" <get.my.email@from.qrz.com>
Message-ID: <pan.2007.11.09.11.11.19.207512@from.qrz.com>
Source record: 4081

I have a cheap Wal Mart so-called "modified sine wave" inverter that puts out hash and noise all across the HF band. I would like to replace it with a pure sine wave inverter that supposedly solves that problem. However I have read some stories about pure sine wave inverters that still put out noise across the HF band, even if they are located 30 feet away from the operating position (mine will be located on another floor and about 25 feet away).

I really can't afford to spend the money on a pure sine wave inverter only to find out later that it's unacceptably noisy (meaning, anything above about S2 or so). So, I'm hoping that one of you has been there and done that and knows of a good pure sine wave inverter that's quiet.

The inverter will be located in the middle of the house, in the basement, connected to a 220 amp hour battery. I have wired an AC outlet in the shack, down at one end of the house, to a 110V plug down near the inverter.

Equipment I plan to run from this includes: Hammarlund HQ-180A receiver, Heath Marauder transmitter, Kenwood TS-940S, Yaesu FT-1000, and a 60-watt table lamp. Rarely if ever will all of that be running at once (and never will more than one transmitter be transmitting at the same time) but if I want to run it all at once for a while it needs to be able to handle it. So, I figured maybe a 1000-watt inverter.

Any info gratefully appreciated...

As I live out in the Alaskan Bush, generate ALL my own power, run
my cabin off a Battery/Inverter System when the genset is not running,
and have been in the MF/HF Radio Business more than 40 Years, I have
a Realtime prospective on this question.

I started out with a Trace 2624 Inverter powering my cabin 20 years ago.
It was at the time one of the more expensive MSW Inverter/Charger systems
and served me very well for about 5 years. The Inverer/Battery is
located about 25 Ft from the cabin, in the Powerhousse, which also
houses the twin 20Kw Diesel Gensets, that are the Primary Power for
my operation. The Trace 2624 did raise the noise level, on MF/HF
about 1.5 S-Units, on my twin Kenwood TS-690's, from 1.2 S-Units
to 2.7 S-Units. As you can imagine the local noise is rarely a problem,
when compared with the Atmospheric Noise here, and compared to our

City Dwelling Friends, it doesn't even get in their BallPark.

When the Trace SW Series Inverters were first introduced, I purchased one of the first SW-4024's, with the idea to lower my local noise, and get back that 1.5 S-Units of Dynamic Range. After the installation was completed, it turned out that I regained about .9 S-Units, which I felt was respecable, considering that all the Power wires from the PowerHouse to the Cabin, are overhead, and not buried, and are directly under the MF/HF Antenna Farm.

I think you should PLAN on buying one of the Higher End, SineWave inverter Systems, as these seem to have a much lower ambinat noise output than the cheaper units. Trace still builds the SW Series Inverters, and I have seen some impressive OutBack Power Systems that other MF/HF Operators have installed with very little locally generated noise. You could also build a Faraday Cage for you Inverter/Battery Encloser, and use Noise Filters on the Input and Output Power Lines from the Encloser, which would greatly reduce any locally generated noise from your Power system.

Bruce in alaska who still uses the 2624 and the 4024 20 years later

Want to TRADE...Your Orion I for my Jupiter plus CASH?

Are you downsizing your shack?

Or, if the Orion is just more radio then you need, I may be
interested in trading my Jupiter with the factory installed antenna
tuner and CASH; for your Orion I with (or without) the factory
installed antenna tuner.

If you are interested in talking about it, please email me at
w7gsa@yahoo.com (w7gsa at yahoo dot com)

Thanks,

Bill

1913. MI5 Persecution: Neil Fox (Nov/1998) (480)

Foxy's Showtime on Capital FM 25/11/98 7.35pm

Certainty level: 100%

This one, I can say with absolute certainty, is about me. It was recorded on my Sony Recording Walkman on the evening of Wednesday 25 November 1998. It doesn't mention me by name, so the objective observer might have trouble understanding why I'm so sure it's about me. I'm sure, because the harassment had restarted over the period when this piece was broadcast, and what Capital transmitted would have been in context with events at the time. (Sorry if that explanation is somewhat opaque, but I don't really want to embarrass myself by giving an explanation in detail, and an intelligent reader should be able to work it out for him/her self.)

This isn't the first time Capital have "got at" me; they were doing so right at the very beginning in summer 1990, when they said, "if he listens to Capital then he can't be all bad"; and Tarrant made remarks about me in his breakfast show in spring 1994, when he said, "you know this bloke? he says we're trying to kill him. We should be done for attempted manslaughter."

Unfortunately I didn't record those previous, much more conclusive instances of harassment by Capital DJs, and Capital Radio tells me they only keep recordings for three months. But lately I've been recording everything, and here is one product of that recording.

Neil Fox was introducing some petite Swedish songstress, sounded like Amelia, when he said something about her petite-ness ;

"she's a big big girl, actually she's really about tiny, she's this big, would you say what less than....."

then one of his studio staff shouted, "six inches"

then Fox laughed and said, "less than a meter tall, definitely"

What I think the "six inches" referred to should be obvious. I think it's sexual abuse directed at me.

Also there were a lot of words like "crazy", "mad" etc on this programme, which reinforced my belief that this was on purpose directed at myself.

I think Fox may be something of an unwilling participant in this abuse, he doesn't want to be an abuser but the persecutors are using his show and his staff to get at me. This is not the first time this sort of thing has happened from his show; and my guess is that it won't be the last

Jackie King from the Flying Eye 14/3/99

Certainty level: 40%

In early March 1999, Capital Radio alleged they had received some emails, one of which was forwarded to me. It contained the words, "you know this bloke, he says we're trying to kill him, we should be done for attempted manslaughter!" which Chris Tarrant had said in 1994.

Following these emails there was an explosion in abuse activity, both from Capital Radio, and from MI5 themselves. MI5 followed me around and hurled abuse at me. The following audio file contains what may be abuse from the radio station.

Jackie King from the Flying Eye made these remarks on Sunday (14/3/99) lunchtime 12.24pm; "gas main work being, er, HANDLED if you like (laughs, embarrassed) outside Madame Tussauds, Euston Road obviously feeling the backlash of that".

The key word is "handled", which she sounds embarrassed to be saying; to me it looks like an attempt at a sexual slander. Capital Radio aren't even pretending not to get at me any more. I asked Chris Tarrant several times about his remark from 1994, and he has consistently avoided answering.

Virgin Radio-Johnny Boy (21/August/1998)

Certainty level: 60%

On Saturday 15 August 1998 I attended a gathering of contributors to newsgroup uk.misc at London's Victoria railway station. Also present was Simon G, who had previously given this description of what he would be wearing;

At 06:36 AM 13/8/98 GMT, Simon wrote:
>further clarification to aid recognition, i'll be wearing
>a t shirt, a brown suede waistcoat, a brown suede miniskirt,
>& a pair of patchwork leggings (& may have a widebrimmed straw
>hat, too).

It is my belief that my persecutors, who monitor my home telephone line (and consequently read all modem communications including email), were aware of this meeting, and may even have observed the "meat" taking place.

Following the "meat" it seemed to me that one or two attempts were made by my persecutors to portray me as "gay", on the basis of Simon's suede miniskirt, which in their inventiveness my persecutors attributed to me, not Simon. (Just for the record, Simon is hetero, and has agreed to the above email extract being published.) The following item from Johnny Boy's Wheels of Steel (between 7pm-11pm, Friday 21/8/98) is one such attempt.

(conversation) (J=Johnny-Boy, H=Hipster)

J: Texas of course part of V98 this weekend enjoy it if you're going. Keep your eyes out on Sunday in Chelmsford for Hipster, because he's going to be there. What are you going to be wearing?

H: I'll be wearing my, er, my suede shorts.
(sycophantic laughter)

J: and believe me he ain't joking, he ain't joking. OK coming next at Virgin on the Wheels of Steel...

Why do I think Hipster's "suede shorts" refers to Simon's mini-skirt? Because "suede" in both cases (obvious!); because "suede shorts" indicates "gay" which they were trying to pin on me; because "shorts" = something short, such as a "mini"-skirt; and because the two DJs both laughed as soon as Hipster said "suede shorts", they knew what the joke was, they knew that they were meant (and probably paid) to find it funny.

Cross-posted to: alt.internet.search-engines,alt.sex.algore.lick.the.wet.toad,alt.sex.boys,alt.testing.it,rec.radio.amateur.equipment

Virgin Radio-Johnny Boy (19/June/1999)

Certainty level: 30%

I'm not quite sure about this one, so I've given it a one in three chance of being about me. First the background.... from mid-March 1999 for some three or four months, every weekend, I bombarded Westminster MPs with faxes about the terrible, all-encompassing MI5 Persecution. (Jesting aside, it really is terrible and all-encompassing, in the UK anyway.) Of course each week some MPs replied; but in June 1999, after I'd been at it some three months, I started getting "covert" feedback from Virgin Radio.

The first feedback I got was from Danny Baker, on Sunday 13th June. That weekend I was sending an article which contained biting criticism of the police inaction in this case. Danny Baker on his Virgin radio show started an angry rant that "he knows it's rubbish", ie. he was rubbishing what I'd said in that weekend's faxed article. Unfortunately I wasn't recording this programme.

The next possible Virgin-Radio feedback was a week later on 19th June 1999. This is contained in the audio file above, in which Johnny Boy on his "Wheels of Steel" programme says;

"and if you would like to put a triple play together, ahhh.... because quite frankly Hipster and me are running out of ideas...."

He goes on to counter Hipster's "how dare you" with a protestation that he is "only joking".

What I reckon is that my article faxed to MPs that weekend was forwarded by one of the recipients to Virgin Radio. My article had included the words;

"I am beginning to run out of both new topics and energy to write these articles."

So what I reckon is that Johnny Boy read the article.... and rephrased the above line "run out of ... new topics" to "running out of ideas". I recognise that this is a pretty tenuous inference to make.... but do listen to the audio file, from the "ahhh...." pause in JB's speech you can guess he is about to say something "risky" and at someone's expense. Anyway, I listen to the Wheels of Steel regularly and will continue to do so, recording it as I always do - so any future funny remarks will get immortalised on these pages!

Brighton Day Trip - 24/Sept/1998

Certainty level: 5%

On a day trip to Brighton, carrying a minidisc recorder, I managed to collect several indistinct instances of what I think were people swearing at me. Between the 0.5 and 1.5 second marks of the above recording is something that sounds like "nutter". I recorded at least three other much more obscene sexual words on the same day.

I don't honestly think the "nutter" recorded here is part of the conspiracy against me. I've been called similar things elsewhere, where it's been blindingly clear that the insult does form part of the conspiracy - but not in this case. This illustrates quite a worrying point - as a result of the many years of abuse "in public", I now sometimes simply don't know whether somebody is insulting me because they think I look like a dweeb, or whether the conspiracy is in action. Sometimes, due to background noise and people talking quietly relative to ambient noise, I can't be sure of what's being said, even after listening to it again on my minidisc. Or put another way, I now have a mild form of what I recognise to be occasional auditory delusions - but these are fuelled by the many years of actual verbal abuse.

POSK Cafe - 2/Feb/1998

Here are two independent segments, both of which occurred in London on the same day, the first at a Polish cafe, the second on the Tube.

Certainty level: 100%

POSK is the Polish Social-Cultural Centre in Hammersmith, London. It has quite a nice cafe which does pierogi, golabki etc. I went there with my mother early in 1998. Seated at the window table were three Polish men talking amongst themselves. One of them let rip with a sexual obscenity which was clearly directed at me (it's the same one that's been heard again and again since about November 1995), and which was recorded on my minidisc walkman. I have not included it in the above excerpt, which shows the reaction of another of the trio to the first man's swearing - namely, "jestes swinia jednak" which in English is "nevertheless you're a swine".

Certainty level: 20%

Somewhere on the London Underground. "Psycho" (I think - a little unclear).

1920. MI5 Persecution: Leicester Square 9/2/98 (13524)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-11-11 10:36:19 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07101114324719@4ax.com>
Source record: 4094
Cross-posted to: alt.internet.search-engines,alt.sex.algore.lick.the.wet.toad,alt.sex.boys,alt.testing.it,rec.radio.amateur.equipment

Leicester Square - 9/Feb/1998

In February 1998 I spent some time in Leicester Square, in the West End of London. This is a very busy area of London, and one which can be relied on to produce "contacts". Capital Radio's offices and their cafe are located here, the Trocadero is nearby, and the place is full of cinemas and entertainment venues.

Certainty level: 100%

A young girl is heard to say, "Alright I'm going to talk to myself" to her friends, followed by all of them laughing together, as I passed by.

Believe me, I do not look mad in real life, these young people would not have directed their comments and laughter at me unless they had already been told by others that I was ill. I am absolutely certain that their behaviour was directed at me, and this audio file is particularly clear.

Certainty level: 60%

This one was recorded in a cafe in Green Park. Two women are talking to each other, one of them says to the other, "something wrong with him", with an emphasis on the "wrong".

The words "something wrong with him" have been repeated at me dozens of times, at my former workplace in Canada, in England, etc. The words are quite deliberately chosen to have two meanings; they obviously imply that I am ill, without forcing the abusers to demean themselves by using more pejorative terms, although they have shown that they have no compunction in that area; and secondly, the words "wrong ... him" make me at fault, and place the guilt for the abusers' wrongdoing on my shoulders.

Certainty level: 30%

Recorded on a Victoria line tube train leaving Green Park station.
If you listen carefully you can pick up the word "hunchback". The speaker had emitted a swear word immediately before this excerpt; both the swear word, and the "hunchback", were (I believe) directed at me.

BA984 LHR->TXL 13/June/1998

Certainty level: 100%

In June 1998 I travelled on the above British Airways flight to Berlin with my mother, to visit her family. There were two women in seats 30D/E, about 4/5 rows behind us. It was quite obvious from the torrent of abuse during these flight that these women had been instructed to harass me and attempt to obtain a reaction.

I did manage to record much of the flight, but unfortunately much of the recording is unclear because of high background noise on the aircraft. The following three excerpts from the recording are the best I can do.

The segment at position 11:34 minutes on my recording contains a fairly quiet word "paranoid", followed immediately by a much louder "yeah, he's paranoid, yeah". During the flight the abuse was not sexual, as it so often is elsewhere, but attacking my mental health.

One of the women in seats 30D/E said "paranoid" very clearly towards the end of the flight, but unfortunately I had run out of minidisc space and stopped recording by then. There is absolutely no doubt in my mind that these women were directed to harass me. This harassment happens without fail on British Airways flights; I've been on something like three or four BA flights in the last 5 years and it's happened each time. Presumably this is because of international law which says incidents on aircraft during flight are actionable in the airline's country of origin - so my persecutors want a reaction from me, and they want to see me "done" in the UK where they can influence the justice system.

These incidents never happen on foreign-domiciled carriers.

Not likely to find one as the Heathkit computers prior to the
PC world (other than the H8) used hard sectored disks. I can
not remember the last time I saw a 5 1/4" hard sectored drive!!

I cannot remember any differences in the drives, only the media.
The sector holes and index hole were all on the same circle.

I used to use a cheap punch to make hard sectored
media and IIRC, I just lined up the punch on the index hole
and then rotated the media a certain number of degrees, punched,
repeated, until done.

Here is an excerpt from a website that describes drive and media
specifications (http://www.retrotechnology.com/herbs_stuff/drive.html):

> Facts on hard sectored diskettes and "drives"
>
> 1) Hard sector means that the DISKETTE (not the drive) has multiple holes,
> one for each sector. Normal (soft sectored) diskettes have only ONE hole
> to mark the "index" or beginning of a track. There is a small hole in
> the envelope (8-inch, 5.25-inch) which exposes this hole to the disk
> drive. For hard sectored disks, there are additional holes to mark the

> beginning of each sector. The index hole is an additional hole between
> two sector holes.
>
> 2) 5.25 inch hard sector diskettes came with 10 sector (11 holes) and
> rarely 16 sector (17 holes). To count holes, grab a diskette. Rotate
> the "doughnut" inside the diskette's envelope and count the holes.
> Remember the index hole is in between two sector holes (so a smaller
> spacing). Classic systems which used 5.25 inch hard sectored diskettes
> include Heath H89 (10 sector), NorthStar (10 sector).
>
> 3)For 8-inch diskettes, hard sectored diskettes came with 32 sectors
> (33 holes). These disks were otherwise identical to soft-sectored 8-inch
> diskettes. But, there was another, even older hard-sectored scheme, where
> the index hole was near the outer edge of the envelope and far offset
> from center.
>
> 4)While in most cases, it's the MEDIA not the DRIVE which determines
> hard-sectored operation, there were some 8-inch drives (Shugart 800
> and 801) which provided circuitry to generate hard sector pulses from
> soft sectored diskettes. (Or was that to filter hard sector pulses OUT
> from hard sectored diskettes? Check with the Shugart 800/801 manual...

Regards,

Michael

I am looking for an Orion I.

I would like to have the built-in
antenna tuner, but I will consider one without it. It should have
Rev. 2 done.

If possible I would prefer to pick the rig up rather
then having it shipped, I live in Jacksonville, Florida, so anywhere
with in a 100 miles or so would be great.

Please let me know what you
have available. My email address is: w7gsa@... w7gsa at gmail
dot com)

Thanks,

Bill

1933. MI5 Persecution: BA984 LHR->TXL 13/6/98 (483)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-11-17 02:29:06 UTC

BA984 LHR->TXL 13/June/1998

Certainty level: 100%

In June 1998 I travelled on the above British Airways flight to Berlin with my mother, to visit her family. There were two women in seats 30D/E, about 4/5 rows behind us. It was quite obvious from the torrent of abuse during these flight that these women had been instructed to harass me and attempt to obtain a reaction.

I did manage to record much of the flight, but unfortunately much of the recording is unclear because of high background noise on the aircraft. The following three excerpts from the recording are the best I can do.

The segment at position 11:34 minutes on my recording contains a fairly quiet word "paranoid", followed immediately by a much louder "yeah, he's paranoid, yeah". During the flight the abuse was not sexual, as it so often is elsewhere, but attacking my mental health.

One of the women in seats 30D/E said "paranoid" very clearly towards the end of the flight, but unfortunately I had run out of minidisc space and stopped recording by then. There is absolutely no doubt in my mind that these women were directed to harass me. This harassment happens without fail on British Airways flights; I've been on something like three or four BA flights in the last 5 years and it's happened each time. Presumably this is because of international law which says incidents on aircraft during flight are actionable in the airline's country of origin - so my persecutors want a reaction from me, and they want to see me "done" in the UK where they can influence the justice system.

These incidents never happen on foreign-domiciled carriers.

Evil old bat in BHS 18/12/98

Certainty level: 40%

Not quite sure how sure I am about this one. I went down to Croydon (Surrey) with my mother to buy her a beret. After doing the shopping, we went to the BHS store restaurant to lunch on fish and chips.

You can guess the rest. Auditory hallucinations my shrink calls them, faithfully recorded on Sony minidisc. Some old cow going on about "see that chap, the one over there, something's wrong with him".

It is quite tiring being attacked by random idiots in the street, or as in this case, by some random, evil old bat in a restaurant. Fortunately it is only a sporadic occurrence. My enemies seem of late reluctant to waste resources in my direction. Should I take this as an insult? Am I not worth the millions of taxpayers money which has been wasted on me? Are the obsessives of MI5 themselves the "nutters" and "really mad" which they accuse me of being? Interestingly this suggestion as to the psychological profiles of Security Service personnel has been made by others... it does lead one to wonder, doesn't it?

Ravenscourt Park 20/3/99

Certainty level: 70%

On Saturday I went to Hammersmith, specifically Ravenscourt Park. There had recently been a resurgence of persecution activity, following the Capital spams. I went to the cafe in the park and had a cup of coffee outside, with my mother. As I went inside the cafe to return the cups, a woman shouted a sexual obscenity (not present on this audio file - don't ask), and she said loudly "something's wrong with him". You can just about hear it in the audio file; listen very carefully, several times; it is distinguishable.

Much less subtle is the male voice shouting "take care he's a nutter" immediately after the woman's voice. As on the other recordings there's a lot of noise, but what the people say can be clearly heard.

Given that I take medication and look and behave quite sanely, and that there had been increased abuse over the last couple of weeks, it seems pretty unlikely that this incident was just spontaneous.... of course, you couldn't prove otherwise, but then that's the way MI5 mean their abuse to look.

Battersea Library 29/3/99

Certainty level: 60%

This one is quite dull. During the month of March 1999, MI5 made another determined attempt to "get" me, substantially through radio programmes, through Jon Snow on Channel Four News, and through abuse in public, of which this is one example.

Recorded on my minidisc-walkman on Monday 29 March 1999, this audio file consists of two girls talking. One says to the other, "he's got something wrong with him." The usual words. How many millions a year do the Security Service waste on this? But they've denied it - how silly of me to forget. And they're not liars either, are they?

Royal Festival Hall 15/4/99

Certainty level: 100%

Another "day in the life of", this one. January and February were quiet; in March it all started again; by the middle of April the resurgence of abuse had been going on for over a month. And this, with 100% certainty, is one manifestation of the abuse.

On Thursday 15 April 1999, 1pm lunchtime, I was at the booking office at the Royal Festival Hall near Waterloo Station in London, buying a ticket for a friend. A woman was at the counter next to me. She said;

"it would kill it, you know, it would just be overkill...
.. they can't stop can they"

It was obvious to everyone, the ticket agents included, that her comments were directed at me, and that "they" (ie. MI5) were "killing" me.

I've heard similar things said at various other times, but rarely have their intentions been expressed as clearly as this. The woman also expressed the obsessive nature of MI5's preoccupation with me, by saying, "they can't stop can they".

Balham - LT bus (8/July/1999)

Certainty level: 90%

I am very sure about this one. I got back from holidays on Wednesday. There were two incidents, both on the tube, on the way back from the airport. There was a further incident the following day, Thursday, on the bus (the 155 I think) in Balham, where two girls started spouting abuse about "crazy", etc. Naturally I had my minidisc with me and was able to record their words.

The cynical reader might think my demeanour or behaviour had given rise to the taunts of "crazy" recorded above. But I assure you my behaviour on the bus would not have made anyone think I was ill; and the taunts the previous day were the same sexual words as previously; so I'm quite sure that these incidents are either deliberately staged, or indicative of an overall high level of awareness among the London public, particularly in the part of London where I live.

Clapham South (17/Feb/2000)

Certainty level: 100%

In February 2000, MI5's hate campaign against me was in full swing. They sent people into the road where I live in south London, to swear at me and abuse me as I was leaving or returning home. One such instance is recorded on the above audio file.

On Thursday 17 February 2000, I had just left my home, en route for Croydon, when two youths approached, going in the other direction. One of them said with a smile on his face something which I didn't recognize, and still don't understand despite it being on this audio clip. His demeanour made it clear his statement was directed at me. I coughed, and in response to that, he continued his insult, calling me a "wanker", which is very clearly recorded on this audio clip.

Two days later, in the very early morning of Sunday 20 February 2000, MI5 inflicted another insult against me just outside my house, when, returning from Croydon, two youths approached (MI5 agents always go in packs of at least two - they're too cowardly to go anywhere on their own) and one of them said quietly and bitterly to the other that "he's shitty, very shitty".

It is still comparatively rare for MI5 to send people to my house, or to my road, to harass me. Usually they know where I'm going to, since they have bugs on my phone and in each room of my house; and they send people to that location, or on the train or tube getting there.

Cross-posted to: alt.testing.it,rec.radio.amateur.equipment,de.comp.os.unix.x11,free.uk.talk.edinburgh,no.it.tjenester.nettilbydere

Clapham Junction (6/May/2000)

Certainty level: 60%

On Saturday 6 May 2000, I was in Clapham Junction, shopping and visiting the library. At precisely 12:29pm, the above audio clip was recorded, in front of Arding and Hobbs department store. One girl was saying to her friend,

"He's a homosexual, they can say whatever they want."

There are several reasons why I think this comment might be about me. Firstly, temporal proximity to other such incidents. The persecution had restarted about two to three days before this clip was recorded. Cause of restart unknown. Personally I think it's because I was going on holiday to France the following Monday - MI5 do like to take holidays abroad at the taxpayer's expense, and inventing reasons to resurrect their hate campaign just before I go on holiday is something they've done before.

Secondly, although I am not gay, they have used such references against me before. At Oxford Computer Group in 1994, manager Steve Mitchell simultaneously abused me and another employee but saying we were "of a similar bent". Such insults show latent or quite overt homosexuality on the part of the abuser.

Thirdly, the sort of people who abuse on the basis of mental illness are the same people who abuse others on the basis of sexuality, race, religion, etc. If they can abuse a disabled man, then they will surely do so based on the other criteria mentioned.

There is still some room for doubt, though, which is why I have assigned this recording a certainty level of only slightly above evens. But "they can say whatever they want" is what gives the game away; they just choose a differentiating feature on which to base their abuse; and if one such feature gets too boring ("we've called him a nutter for the last ten years so now we'll call him something else") then they invent a different lie to throw at me.

Balham High Road (3/Nov/2000)

Certainty level: 60%

On 3 November 2000, I had just got off the bus in Balham High Road,
when I heard a group of schoolgirls shouting and laughing. One of them yelled;

"He's an idiot you know."

You can hear this on the above clip; it is followed by laughter. I am
not quite sure this is about me, which is why I have only given it
a two in three probability. I have been attacked many times with the
word "idiot", which seems to be a favourite with intellectual lightweights
who want to bring down bigger game. (Back in 1992 I was so worried by the
attacks on my intelligence that I took the test and joined Mensa......
does that make me a *clever* idiot? Never mind.)

Crescent Grove, Clapham Common (2/Dec/2000)

Certainty level: 100%

This is one of those clips where I am absolutely, 100% certain it's inflicted by MI5 on me, because of background, context. On Saturday 2 December 2000, I was walking from my home to a pub on Clapham Common, and on the way was in proximity to a group of three English youths who were walking the other way. They turned from the main road into a private estate called Crescent Grove. Here is what they said;

(first youth) "He masturbates!"
(his mate responds) "Yeah, he masturbates!"
(and again) "Thief!"

There is a lot of context associated with this incident, which I will now relate.

Firstly, the verbal sexual abuse is a popular one with MI5, and as a statement about me is currently mostly in their imaginations. The accusation has to be seen relative to MI5's persecutory actions in late November and early December 2000, and in fact for some months leading up to this. Their relevant activities in June 2000 are documented in a message in this evidence item; following from that, they sent someone to simulate an act in front of my window, which was captured on film.

It is the publication of the video of their agent performing the act on himself which caused MI5 to restart this thread of harassment in the first few days of December 2000. But there are some subtleties; I uploaded the digitised video to this website on 26/November/2000; but I did not announce its existence on the newsgroups until Sunday 3/December/2000. These youths' slur was made the previous day, on Saturday 2/Dec. That tells us quite a lot. According to my website logs, there were no accesses to the video file before Sunday 3/Dec. So why did MI5 restart this particular thread of abuse, before their agent's activities were published on the newsgroup? The conclusion we reach is that they were watching my internet connection, either decoding the telephone line, or at the ISP; and/or they may be able to physically see what is on my notebook computer's screen, from RF transmissions from its VGA circuitry. I do not know whether the latter is technically feasible, but the former certainly is, and I have known for years that MI5 bugs my internet activities and phone calls. It is from their observation of my internet connection that they were able to tell, without accessing the video file over the net, that it was of their agent in a compromising position; and it was from that observation that their shouted slur on 2/Dec emanates.

The second accusation, "Thief!", is even more interesting. It relates to occurrences from June of 2000, some six months before these youths threw the word at me. It shows just how wide in reach geographically and temporally the MI5 persecution is; they react to something which happened half a year previously.

In the first half of 2000, MI5 made a determined assault on my friendships. In one particular case, that of A. whom I had known for virtually all my life, they partly succeeded. This person made pointed references to me which made it clear he knew what was happening; at one point he started asking "do you know anything about the FBI and the CIA". In June 2000, we went to see a film in the West End. I paid for both of us, and then asked him to return what I had paid for his ticket, some £7.50. He was reluctant to do so. Eventually he returned £5, settling for the lesser gain of £2.50.

I did not call him a thief to his face, but I may have spoken the word while I was at home, either conscious or in my sleep. MI5 have very tight control over everything I do and say in my home through their bugs; if I say anything against someone in "their" camp, they turn round the accusation against me. So, from the fact that A. tried to garner a few pounds at my expense, MI5 create the accusation, six months later..... "thief!".

1944. MI5 Persecution: Jon Holmes (4-5/Jan/2002) (22233)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-11-17 20:33:51 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07101800301717@4ax.com>
Source record: 4118
Cross-posted to: alt.testing.it,rec.radio.amateur.equipment,de.comp.os.unix.x11,free.uk.talk.edinburgh,no.it.tjenester.nettilbydere

Virgin Radio-Jon Holmes (4-5/Jan/2002)

Here are two segments from Virgin FM, one on Friday, the other on Saturday,
both from the Jon Holmes evening show.

Certainty level: 80%

In early January 2002 I listened for the first time in some months to Virgin Radio,
specifically to the Jon Holmes evening show on Friday 4 January 2002. They promptly
attacked me verbally. Again, context is relevant. There are three instances in the
space of two minutes on this extract;

00:18 "are you lying?"
00:22 "it's not fair"
01:24 "everyone at the amateur c+ turbo programmers club found it hilarious"

The first phrase is a straight slander. MI5 were trying to portray me as a liar at
around this time; I have other audio with the same accusation. "are you lying?";
unsophisticated.

It's closely followed by the words "it's not fair". Note carefully the way he says it,
quickly, as if to deny what he says. The phrase "not fair" was first created by OCTS MD
H S.-W. in Nov/1992, and picked up on my first visit to hospital soon after
"they should have paid your fare").
Again, unsophisticated parrotting of a key phrase.

The third phrase is explicable through contemporaneous context. That morning I had
phoned about a C++ course. "c+ turbo programmers club"... again, somewhat brazen
we're-listening-to-what-he-says-on-the-phone, and he-can't-prove-it. Something got lost
in translation from MI5's watchers to Virgin, because "c+ turbo" means nothing.... there
is no C+ turbo language, only C++, of which Turbo C++ is one implementation.

Certainty level: 80%

I wasn't entirely convinced from Friday's programme, but the following evening's
show confirmed it. It contained a number of references to my condition, of which the
following excerpt is one such;

00:09 "I'm not well, and no-one cares"
00:24 "my voice sounds all funny"
01:01 "do you mean people that aren't mad"
01:05 "medical problem is it"

"I'm not well" doesn't mean he has a cold; it means he is being sarcastic about my
mental illness. "my voice sounds all funny" refers to the change in nature of my
voice when acute illness hits. "do you mean people that aren't mad" is obvious.
"medical problem is it"..... rubbing salt into the wound.

Balham Hill Post Office (14/Nov/2002)

Certainty level: 80%

By mid-November 2002 the persecution had again dwindled, as happens sometimes, when along came this item.
I spent most of my time at home, going occasionally to the shops in Clapham South, or into town to meet people. On this particular
Thursday I only left the house once, for less than fifteen minutes to post a letter (special delivery, because my ordinary and
recorded delivery letters had been disappearing en route for some time - not that anyone would accuse MI5 of such petty harassment).
At the post office counter there was an Asian guy talking into his mobile phone and grinning away. There is a probability that
his comments were directed at me, as I will explain further. The second segment of audio closely follows the first segment.

"you'll do it today? let's meet about 3 o'clock and have some lunch. I got stuff to do and I'll go to the bank,
get this sh.. fucking moving yeah. Even just a little bit do something. He doesn't understand, you know what it is,
I don't want to tell him again cause then he might, he thinks we're having a go at him, I'm not having a go at him,
I'm explain to him"

Explanation: The guy is talking about some bloke who is unnamed, however it might be interpreted as being in code about me.
"I'll go to the bank"... variously interpretable, either literally, or as sounds-like "wank" which has been a consistent
theme in MI5's abuse. "get this shit fucking moving"... abuse... could be interpreted as MI5's criticism of my inertness.
The state spends hundreds of thousands of pounds a year - they want to see some result, not just neutrality and ordinariness.
"he doesn't understand"... MI5 claim I'm stupid... but the numbers and bits of paper prove otherwise, so perhaps what that
is really about is their agents' subconscious perception of themselves.

"having a go at him"... sounds like they're having a go at me, doesn't it? You might take the audio at face value and assume
it's about some other guy, but it's normal MI5 procedure to pretend to be talking about someone else, and make the content of
the message very relevant to me, or their perception of me.

"for some reason it doesn't get into his head, I don't know why... he's lost it completely, hasn't he"

What reason is there for it not getting into his (my) head? Stupidity is implied. Also implied is that it does get into his head;
we're intentionally causing him damage. He's lost it completely... for some time I have suffered from OCD... lost it completely
is the persecutors' observation of my illness, which they see through the surveillance on my home, which they caused.

Eclipse pub in Balham (20/Dec/2002)

Certainty level: 70%

On Friday 20/December/2002 I went to Balham to do some shopping and eating. When I went into the Eclipse pub for a meal
there were two girls already at the bar being server, I ordered and sat down near the window. They sat down at the opposite
window seat, out of sight. After a few minutes they started screaming repetitively "section, section". They were reading
something and were trying to pretend that they were just repeating from what they were reading, but in reality it was quite
obvious they were talking about me, specifically to confinement under mental health.

As you can guess the behaviour of these unwise young things shows them to be from the underprivileged category which due to
the natural laws of society is seldom seen in the better classes of restaurant - the McDonald's next door is their more
usual habitat. My guess is that these two females were deliberately placed in the Eclipse with orders to be offensive to
me personally. The alternative would be that no-one had ordered them and they were just being rude on their own account,
but that is improbable, for two reasons; first, I was out of sight of them and one does not usually "pick on" a person
one cannot see; secondly, there had that afternoon in Balham been other, less distinct incidents immediately preceding this,
and it is inferable that MI5 were making quite a serious effort to create a physical incident, as they have done on
numerous occasions previously. I give my interpretation a two in three chance of validity.

Barbican Library - 6/Feb/2003

Certainty level: 100%

Here's an item from early February 2003, at which time Security Service were re-igniting hostilities against me, a direct result of my appeal
for a legal hearing against their organisation. On Thursday 6/Feb/2003 I went to the Barbican in central London with my mother to visit the library
and have a meal. Security Service naturally knew about it because it had been mentioned the previous day in our house which is under constant
surveillance on grounds of "National Security", so they may have been able to inform staff there to say something to me, as has been done elsewhere.
Two of the people at the Enquiries desk in the library obviously knew of my circumstances, I spoke to one of them who was very polite, and while
I was waiting I heard the other speaking with a little less politeness, as recorded on this audio file. He said, "I spy", to start a game of
guess what "I spy"; unsubtle, MI5 Spy. Then, at the 34 second mark on this clip he said;

"So obvious you couldn't even get that. I shall have to kill you. ha, ha, ha"

The words "I shall have to kill you" are interesting because such overt expression is rarely heard. Security Service wish me extinct.
Some years ago they were openly shouting "suicide" at me, so that is established. But there is an element of doublethink in their attitude;
they use people's natural prejudice against mentally ill, who are popularly painted by media as being aggressive, to try to tinge the group's
view of me and MI5's actions against me. The Security Service religion is that the country's enemies are deadly, and must therefore be
extinguished. Hence, we must seize eagerly upon the disabled schizophrenic from Clapham, and throttle him, because who knows what'll happen if we don't.

There may be a subtle agenda of population control in what the Security Service have been doing in this country since 1990. In the current issue
of 2600 Magazine (the Hacker quarterly, which I read from time to time) there is a quote from Hermann Goering on page 2; "the people can always
be brought to the bidding of the leaders. All you have to do is tell them they are being attacked. It works the same in any country".
2600 printed the quote as a comment on the projected war against Iraq, which does not appear to pose any threat to the territory of
those countries which wish to invade it. However the quote is somewhat relevant to my case, which is widely known about within Britain;
the security service instructs all right thinking citizens to do MI5's bidding and band together against a common enemy, while at the same time
there is a suggestion of "look what'll happen to you if you don't obey us".

1948. MI5 Persecution: Bernard Levin - The Times (30933)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-11-18 07:35:42 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07101811321095@4ax.com>
Source record: 4122
Cross-posted to: alt.testing.it,rec.radio.amateur.equipment,de.comp.os.unix.x11,free.uk.talk.edinburgh,no.it.tjenester.nettilbydere

Fanatic's Fare for the Common Man

Certainty level: 90%

The article reproduced below was penned by Bernard Levin
for the Features section of the Times on 21 September 1991. To my mind, it
described the situation at the time and in particular a recent meeting with
a friend, during which I for the first time admitted to someone other than
my GP that I had been subjected to a conspiracy of harassment over the
previous year and a half.

There is a madman running loose about London, called David Campbell; I have
no reason to believe that he is violent, but he should certainly be
approached with caution. You may know him by the curious glitter in his
eyes and a persistent trembling of his hands; if that does not suffice, you
will find him attempting to thrust no fewer than 48 books into your arms,
all hardbacks, with a promise that, if you should return to the same
meeting-place next year, he will heave another 80 at you.

If, by now, the police have arrived and are keeping a close watch on him,
you may feel sufficiently emboldened to examine the books. The jackets are
a model of uncluttered typography, elegantly and simply laid out; there is
an unobtrusive colophon of a rising sun, probably not picked at random.
Gaining confidence - the lunatic is smiling by now, and the policemen, who
know about such things, have significantly removed their helmets - you
could do worse than take the jacket off the first book in the pile. The
only word possible to describe the binding is sumptuous; real cloth in a
glorious shade of dark green, with the title and author in black and gold
on the spine.

Look at it more closely; your eyes do not deceive you - it truly does have
real top-bands and tail-bands, in yellow, and, for good measure, a silk
marker ribbon in a lighter green. The paper is cream-wove and acid-free,
and the book is sewn, not glued.

Throughout the encounter, I should have mentioned, our loony has been
chattering away, although what he is trying to say is almost impossible to
understand; after a time, however, he becomes sufficiently coherent to make
clear that he is trying to sell the books to you. Well, now, such quality
in bookmaking today can only be for collectors' limited editions at a
fearsome price - £30, £40, £50?

No, no, he says, the glitter more powerful than ever and the trembling of
his hands rapidly spreading throughout his entire body; no, no - the books
are priced variously at £7, £8 or £9, with the top price £12.

At this, the policemen understandably put their helmets back on; one of them draws his truncheon and the other can be heard summoning reinforcements on his walkie-talkie. The madman bursts into tears, and swears it is all true.

And it is.

David Campbell has acquired the entire rights to the whole of the Everyman's Library, which died a lingering and shameful death a decade or so ago, and he proposes to start it all over again - 48 volumes this September and 80 more next year, in editions I have described, at the prices specified. He proposes to launch his amazing venture simultaneously in Britain and the United States, with the massive firepower of Random Century at his back in this country, and the dashing cavalry of Knopf across the water, and no one who loves literature and courage will forbear to cheer.

At the time this article was written I had believed for some time that columnists in the Times and other journalists had been making references to my situation. Nothing unusual about this you may think, plenty of people have the same sort of ideas and obviously the papers aren't writing about them, so why should my beliefs not be as false as those of others?

What makes this article so extraordinary is that three or four days immediately preceding its publication, I had a meeting with a friend, during the course of which we discussed the media persecution, and in particular that by Times columnists. It seemed to me, reading the article by Levin in Saturday's paper, that he was describing in some detail his "artist's impression" of that meeting. Most telling are the final sentences, when he writes, "The madman bursts into tears, and swears it is all true. And it is." Although I did not "burst into tears" (he seems to be using a bit of poetic licence and exaggerating) I did try hard to convince my friend that it was all true; and I am able to concur with Mr Levin, because, of course, it is.

At the beginning of the piece Levin reveals a fear of being attacked by the "irrational" subject of his story, saying "I have no reason to believe that he is violent, but he should certainly be approached with caution". This goes back to the xenophobic propaganda of "defence" against a "threat" which was seen at the very beginning of the harassment. The impression of a "madman running loose" who needs to be controlled through an agency which assigns to itself the mantle of the "police" is also one which had been expressed elsewhere.

In the final paragraph of this extract, his reference to Everyman's Library as having "died a lingering and shameful death a decade or so ago" shows clearly what sort of conclusion they wish to their campaign. They want a permanent solution, and as they are prevented from achieving that solution directly, they waste significant resources on methods which have been repeatedly shown to be ineffective for such a purpose.

Private Eye, 23 Oct 1992

Certainty level: 25%

I'm not really sure whether this cover was intended to get at me,
or whether it was re-interpreted after publication to be about me.
This issue of Private Eye came out in October 1992, by which time I had
been under severe continuous pressure at work and from the general
population in Oxford for many months. It had John Major saying to his
wife, "Come back, Norma!" under the title "Major's support lowest ever".

There's a story behind this. In late October I was in the local pub
(the Rose and Crown, nice traditional name eh) with two people from
work, Simon and Phil. Phil had with him a copy of the current Private
Eye. These are both "nice people" and on my side, I hasten to add.
Simon pointed out the message on the magazine's cover to Phil, and asked
"what do you think about that". Phil answered, "Well usually they
[Private Eye] get it right". This exchange happened in front of me.
Although I was ill at the time (this was before I'd started taking
medicines) I hadn't read anything into the Eye cover until these guys
pointed it out to me.

Sometime later, again in the same road, a student shouted to
one of his friends, "so when are you COMING BACK?", again in front
of me.

What I realised Phil thought it meant was a double-entendre, the
"coming" referring to the act of ejaculation, the "back" referring
to the human back-side. So in a play on words you get a person who
is referred to as a back-side ejaculating. Charming.

Of course, Phil could have been wrong. Perhaps there was no such meaning
intended by Private Eye. Perhaps he saw meaning which wasn't there.
Perhaps the moon is made from green cheese. Who knows?

Victor Lewis-Smith

Certainty level: 10%

Victor Lewis-Smith has issued a denial through his webmaster
John Hayward-Warburton regarding this article; he says quite categorically
it's not written about me. I kind-of sort-of believe him, but I think
the conspiracy is so wide that the phrase "Eventually, I had to leave
because they were all trying to kill me" could have been intended to be
as if from any paranoid person, but could have been influenced by my
case in the particular. So the influence could have been sort-of
subconscious.

This article is from the Evening Standard of Thursday May 8, 1997.
It is titled "Goon, and best forgotten" and may be found on page 31.

I think VLS has written/produced stuff specifically about me in the past,
both in his Evening Standard column, one of which is reproduced below
(in another case, he was talking about computer hacking, and I think that
was directed at me), and a television programme in around late 1993
when he has a taxi driver who says "they're all trying to kill me guv"
and VLS responds "you're supposed to be quite intelligent aren't you".

However, his webmaster has issued a formal denial on his behalf, so it
is not for me to oppose what he has stated categorically.

1951. MI5 Persecution: Introduction to Sent Faxes (483)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-11-18 12:29:00 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07101816252711@4ax.com>
Source record: 4126
Cross-posted to: alt.testing.it,rec.radio.amateur.equipment,de.comp.os.unix.x11,free.uk.talk.edinburgh,no.it.tjenester.nettilbydere

Introduction to the Sent Faxes webpages

Between 1998 and April/2000 I sent some thirty articles on the subject of the MI5 Persecution to
British politicians, media, legal and diplomatic entities in the UK. Of those articles 24 are reproduced
on this part of the website. They were originally composed as Microsoft Word documents, and saved to HTML
form for publication here. A few of them were slightly edited in format for readability.

You will see that these articles cover quite comprehensively what has been going on since 1990, there being
quite a lot of material to cover, since it is a rare week that goes by without MI5 making some harassing
or threatening action against me. "How could it be True?"... they use the mental illness which they induced
in me as a ready explanation for my complaints. Who started it, why did it start, why it continues...
these faxed articles provide examination in more depth of the treatment in the Frequently Asked Questions webpages.
The sheer meaninglessness of the Secret Police actions is highlighted; their operatives make their livelihoods
by cynically exploiting the taxpayers, when in a more responsible country they would be looking at the inside of
prison cells.

The validity of this observation is proven by their reaction to my several suggestions in the articles that I
would cease sending faxes if MI5's agents (and it's always the same people doing the persecution) desisted from
continually harassing me. A number of times, you will see in the faxed articles, I have suggested that
we come to a "peace of mind agreement" where I cease complaining and they cease harassing. On one occasion,
I wrote to Hugh S.-W., the director of OCTS where I was employed in 1992-94 and who is aware of the
circumstances, asking that he intercede to bring this matter to a close, by initiating a meeting between
myself and the persecutors to mutually settle our differences; he didn't reply, but MI5 did soon after - they said "This is what you wanted, wasn't it?, some sort of confrontation?". The reality is the people stalking me are not interested in any settlement; for them crime pays, and
pays handsomely; moreover it is State-approved crime; the Police will never investigate or take action;

it is corruption on an incredible level and scale, and it has gone on for over a decade.

You will see that the articles contain three elements; firstly, there are original written articles,
many in the first half of 1999 when I was writing new articles every week and sending them by email and
fax during the weekend; then there are "MI5 Persecution Update" articles, which list happenings recent to
a particular transmission; and finally there is the "old faithful" Frequently Asked Questions article
which was sent on a few occasions during the three year period. These articles generated a number of
interesting responses from politicians and other recipients, many of which are documented in the
"received faxes" area of these webpages.

I hope you enjoy reading these articles. I'm not as angry as these articles necessarily make out,
only sometimes, usually soon after the persecutors have said something unpleasant at me; the purpose
of putting lots of fire and ire into the mix is to try to chuck it into the public domain which might
lead to MI5 being forced to curb their actions. Unfortunately that aim was not achieved, despite
many, many thousands of faxes being sent. Also, if any policemen are reading this, then I'm (a bit) sorry
about the rude things I said about "the Bill" in one or two of the articles; the police have never done me
any harm (yet) by commission, only by omission of doing anything to investigate my complaints or treat
them seriously.

1952. MI5 Persecution: Faxes Sent to Diplomatic/Legal (2658)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-11-18 13:34:30 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07101817305770@4ax.com>
Source record: 4128
Cross-posted to: alt.testing.it,rec.radio.amateur.equipment,de.comp.os.unix.x11,free.uk.talk.edinburgh,no.it.tjenester.nettilbydere

Faxes Sent to British Diplomatic/Legal logs

During the 1998-2000 period my records indicate that I sent at least 3,642 faxes to diplomatic and legal offices
located in the British isles, of which 3,345 went via TPC's email-to-fax service and 297 were sent via fax-modem
direct from my computer. The actual figure is somewhat higher since, for most of this period, whenever a recipient
asked to be deleted from my mailing list, I totally wiped all entries including that from the logfile.

In the records "Y" indicates successful transmission from fax-modem, "N" indicates failed transmission from fax-modem.
"E" indicates an error occurred while transmitting via fax-modem and a fax may have been only partly transmitted.
"y" and "n" indicate success or failure via TPC.

In April 2000 I changed the method of operation by recording "R" when a recipient requested removal, rather than
wiping their details from my mailing list and records; and keeping "B" records for when TPC actioned a ban on a
recipient's fax-number, but the recipient did not write to ask me to cease faxing. The purpose of these changes
was to keep more accurate and complete records, but the intention was thwarted by the police complaint.

Faxes Sent to British Media logs

During the 1998-2000 period my records indicate that I sent at least 6,137 faxes to the British media,
of which 5,775 went via TPC's email-to-fax service and 362 were sent via fax-modem direct from my computer.
The actual figure is obviously higher since, for most of this period, whenever a recipient asked to be deleted
from my mailing list, I totally wiped all entries including that from the logfile.

In the records "Y" indicates successful transmission from fax-modem, "N" indicates failed transmission from fax-modem.
"E" indicates an error occurred while transmitting via fax-modem and a fax may have been only partly transmitted.
"y" and "n" indicate success or failure via TPC.

In April 2000 I changed the method of operation by recording "R" when a recipient requested removal, rather than
wiping their details from my mailing list and records; and keeping "B" records for when TPC actioned a ban on a
recipient's fax-number, but the recipient did not write to ask me to cease faxing. The purpose of these changes
was to keep more accurate and complete records, but the intention was thwarted by the police complaint.
Also in April 2000, I added some further fax numbers to my media mailing list and records, which is why some of the
faxnumbers below have only a single entry, and some indeed have none.

1954. MFJ or other ant anlalizer

Newsgroup: rec.radio.amateur.equipment
Date: 2007-11-18 16:04:55 UTC
From: Karl in Spokane <wa7ycp@yahoo.com>
Message-ID: <24af6c5f-4264-4fbc-b3e2-4d71a0218a9f@b40g2000prf.googlegroups.com>
Source record: 4125

Anyone have good luck with this unit? Looking for coverage in the 2,
1 1/4 meter bands.

1955. Re: MFJ or other ant anlalizer

>Anyone have good luck with this unit? Looking for coverage in the 2,
>1 1/4 meter bands.

Both the MFJ 259 and 269 cover the 2-meter band. The 269 also covers the 70 cm band. Neither covers the 1.25 meter band. As far as I know, MFJ has no analyzer which handles this range.

Both of the MFJ products work decently well within their limitations. Neither can display the sign of the reactive component of the impedance... you have to deduce whether it's inductive or capacitive by changing the analysis frequency slightly and seeing what happens to the reactance. Neither will work well if the antenna is picking up strong RF from another transmitter nearby - the voltage- and current-sensing diodes can't distinguish between RF from the analyzer, RF reflected back from the load impedance, and RF being picked up by the antenna. Both analyzers can actually be damaged by strong-enough RF picked up by the antenna - the zero-bias sensing diodes are somewhat fragile. The 269 is apparently vulnerable to diode damage if you switch the "UHF" mode on or off in ways which violate the warnings in the manual. The build quality of MFJ products isn't sterling.

However, these products are the de facto standard and "must have" in the ham radio community, and I think they work well enough to justify this reputation.

Autek Research makes a series of competing analyzers, one of which covers the VHF range (37-75 and 138-500+ MHz). They don't read out the reactive component of the impedance directly - they show the total Z, and the SWR, and you must compute R and X yourself (instructions are in the manual). Reports on eHam.net seem to indicate that Autek has a build-quality problem even worse than MFJ's, and serious problems with customer support and satisfaction.

Faxes Sent to British Parliament logs

During the 1998-2000 period my records indicate that I sent at least 14,480 faxes to the British Parliament
in Westminster, of which 9,138 went via TPC's email-to-fax service and 5,342 were sent via fax-modem direct from
my computer. The actual figure is obviously much higher since, for most of this period, whenever a recipient asked to
be deleted from my mailing list, I totally wiped all entries including that from the logfile.

In the records "Y" indicates successful transmission from fax-modem, "N" indicates failed transmission from fax-modem.
"E" indicates an error occurred while transmitting via fax-modem and a fax may have been only partly transmitted.
"y" and "n" indicate success or failure via TPC.

In April 2000 I changed the method of operation by recording "R" when a recipient requested removal, rather than
wiping their details from my mailing list and records; and keeping "B" records for when TPC actioned a ban on a
recipient's fax-number, but the recipient did not write to ask me to cease faxing. The purpose of these changes
was to keep more accurate and complete records, but the intention was thwarted by the police complaint.

I have the MFJ Differential T tuner with the roller inductor.
I had to use DEOXIT to clean the roller conductor as it gets crud
on the roller wire after extensive use. I still use it now after
5 years. MFJ augmented this tuner which is belt driven to a
gear driven upgrade which would be a heck of a lot more accurate
than my early version. It still works okay, but needs a cleaning
as you can work around the corroded spots on the roller inductor.

VoiceMax speech processor is not for everyone...
It's only for radio operators that want maximum range from their rig.
VoiceMax is no gimmick... it uses proven AGC technology to produce
tangible results. Want to know more?

1962. GMRS Watts v Distance?

Newsgroup: rec.radio.amateur.equipment
Date: 2007-11-21 00:39:12 UTC
From: Steve Calvin <calvins@optonline.net>
Message-ID: <Z6L0j.991$V51.83@newsfe10.lga>
Source record: 4136

Sorry if this isn't the right group to ask this, if not and someone know of a more appropriate group I'd appreciate a pointer.

I currently have GMRS radios that are rated at "16 miles" (yeah, maybe on the salt flats or over water, ok, we all know about that). The are rated at 2W on the GMRS freq's and .5w on FRS.

Why are the new "25 mile" units still rated at 2W? What's the difference in the two radios to justify the increased distance claims?

Can't be frequency or a change to the privacy codes or they wouldn't work with older radios.

Increased sensitivity/filtering? Hype?

It's just marketing hype Steve. Next thing you know they will be
50-mile units. A 2-watt HT would be lucky to get one mile let alone
25. Even 5-watt GMRS commercial units (like I have) are only useable
over a couple of miles unless you are line-of-sight. The ONLY way you
are going to get reliable communications over that kind of distance is
through a repeater.

Thanks Dick. I suspected it was just marketing but thought
that they may have come up with some great new antennae or
something in the receiver that I hadn't heard about.

The most probable reason is that this is pure marketing hyperbole.
The radios aren't better... they're just being quoted using more
optimistic (and typically unrealistic) test conditions, so that they
sound better than the old radios, so that they'll sell better.

> What's
>the difference in the two radios to justify the increased
>distance claims?
>
>Can't be frequency or a change to the privacy codes or they
>wouldn't work with older radios.

They *might* have more sensitive receivers, perhaps with a low-noise
front-end preamplifier.

I rather doubt it, though.

>Increased sensitivity/filtering? Hype?

Probably hype.

I've read some reports that indicate (based on buyers' experiences)
that there can be some very real different in useful range between
FMS/GMRS radios of different types. This might be due to actual (vs.
quoted) transmitter power, or to better receiver sensitivity, or to
the use of less-lossy rubber-duck antennas, or to the presence of a
more effective counterpoise within the radio.

I doubt, though, that all of these quality improvements, lumped
together, would come anywhere near extending the range of a 2-watt
handheld from 2 miles to 25 miles, under the same usage conditions. A
12:1 distance improvement would seem to require a 144:1 power or
sensitivity improvement... over 20 dB.

25 miles, on 2 watts of UHF, pretty much requires that both
transceivers be up on hilltops or high buildings, with a fairly clear
line-of-sight between. You aren't going to get that sort of distance
from ground-level to ground-level, unless you're lucky enough to catch
a very fortunate reflection from something high up... the horizon will
cut off line-of-sight. Similarly, you won't get that sort of range
amidst city building clutter.

Ah, yes, but those repeaters do miracles. I've personally hit a repeater in Camas, WA from Salem, OR (about 60 miles) with an Icom IC-2. My best haul so far into a repeater though took 30 watts, from the top of Coxcomb Hill in Astoria, OR to a repeater on Mt. Scott in Portland, around 100 miles. But that was still not as good a trick as the other.

GMRS, FRS, CB and whatever are not amateur radio.

It amazes me that people can't grasp that, and continue to
post such questions here.

Doing a decent search on the newsgroups would find appropriate
newsgroups. Clearly you didn't, since you found this one
and not the proper ones.

Doing a decent search would have found the same question asked,
and answered, many times before. Chances are really good if
you "chose" this newsgroup because you found discussion of
GMRS in old posts here, the very posts that made you think
the question was "on topic" was the same question, and if you'd
just looked at the replies you would have had the answer without
adding yet another off-topic question to the newsgroup.

Micheal,

Lighten up. They're more likely to get ACCURATE information from a ham NG
than from anything devoted to those particular forms of two way radio,
simply because there are many more hams that actually know the way things
work and can give real life stats on what they're likely to do.

Well, EXCUSE ME Mr. High and Mighty Ham Operator.... woooooo
I'm just shaking here!

For your information asshole, I've been involved with
computers for the last 34 years and use DOS, WindoZe, AIX,
Unix, Solaris, HP, and pretty much any flavor of Linux you
can think of.

Searches are subjective and if you don't happen to enter the
right arguments you ain't gonna get the right answer. Shoot me.

I sincerely <choke> apologize for monopolizing your valuable
time.

To all of the other reasonable and helpful replies I
received, I thank you all very much.

Mr. Black can kiss my ass

The range of these units is dependant on:
1. Altitude of the transmitting and receiving units
2. Power
3. Frequency
4. Obstructions
5. Antenna Gain
6. Receiver Sensitivity

For a Handy chart to estimate range-- See URL:
http://www.artscipub.com/simpleton/simp.range.html

I have transmitted over a 50 Mile range with 5 Watts - but was on top of a
mountain (like most repeaters)

At ground level for both units with standard antennas, range is a few miles.
Anything else is hype.
Pretty much the distance to the horizon -- see URL:
http://www.boatsafe.com/tools/horizon.htm

Power buys little extra range for unobstructed distance. Obstacles
is where power is inportant. I am not sure that 2 watts is maximum.
I was doing a test of a .5 watt Icom and a ~ 16 mi Midland. It
seemed to me the field strength was more than double. I
would think quadrupling power would double field voltage and I was
getting more than double field strength. .5 watt FRS have been reports of ~100 miles
between mountain tops. Nuts & Volts reported something like a 160 mi
skip of some sort in their FRS articles a long time ago. Ground level on boats
is normally about 3 mi., but air effects can increase that a whole bunch.
I don't know what mode of transmission I used to get when i
used my old 300 mw analog cell phone up around Lake Erie.
I used to go through a Canadian site in London from Astabula Ohio, about 70 mi.
That used to come in better than the US sites along the water at times.

Right now there are probably a high percentage of hams using
FRS, perhaps not GMRS. There used to be a GMRS and FRS forum
which is gone, but the ham groups is probably the best informed and
also the boating people. Sometimes people post to a group they are familiar
with, and not necessarily the best for answering the question.
They may respect the answers with people they
are familiar with. Perhaps they also are looking for another channel in case normal
inspecting does not come up with results in a given time.
As always, your going to get all kinds of answers, but on Usenet, you
tend to get corrected in a short interval.

A person can search with any method they choose. Using search engines,
especially Google, is getting more difficult do to extreme advertising.
I'm not sure where computers came into the discussion, but I worked for Digital in 1969.

With the "right" kind of propagation even .5W will do way over 100 miles but under normal circumstances count on line-of-sight but no more than 1 mile when in build-up or bushy areas. Your mileage may vary.

Repeater distances are usually line of sight (a repeater at 4.000 ft has a horizon of abt 80 miles if no obstructions in between. Draw an 80 mile circle around the repeater and you'll get the area you can reach.

Note: There usually are obstructions (hilly terrain) and without any special propagation signal strength at long distance will be less. Most FM type radio's do not have very sensitive receiving stages and if squelch is on sensitivity becomes even less. Solution: Use narrow band modulation such as SSB. Instead of spraeding your .5W over 15kHz put it in 3kHz. You'll be stronger on the other end - however now we're talking how it works for ham-radio: Do a lot with little power.....

Hype and poor/deceptive advertising. Probably the advertising dept. is clueless
as to actual specs.

2W on a unity gain antenna should have a maximum range of 1.4km (or 0.878 miles)
given the standard receive sensitivity of 0.2u.

GMRS is CB, and therefore, your better group by topic would have been
"rec.rado.cb." However, I agree with other responses that you would probably
get a better quality response here.

Thanks. I'm familiar with SSB, skip, etc. But I can't talk
others into going that route.

We use these for hunting in the northeast and I was just
perplexed how with the same power and what looks like
basically the same specs. then got a theoretical 8 mile
gain. I say theoretical because they *may* end up working a
mile in the woods but that would surprise me.

No matter how Mark Morgan, KB9RQZ tries to rationalize his reasoning for his actions, there is no excuse for the false reporting of lies about another person because he suspects something through his twisted logic and suspects that a certain person is the author of messages on a ham radio message board WITHOUT ANY PROOF WHATSOEVER . If anyone reading this knows Mr. Crow, they should inform him that Mr. Mark C. Morgan KB9RQZ, has alleged on the www.nimbusters.com ham board, that he called the hotline for the Florida Department of Child Protective Services and falsely reported that Mr. Crow has had inappropriate conversations with a 7 year old child concerning sex.

IMO this behavior on the part of Mr. Morgan and his actions are dispicable, but shows the great length that Mr. Morgan will go to persue/attack other hams who he thinks criticize his netique by taking his disputes off of the net and trying to affect someone's freedom and livelyhood by lauding false charges against anyone he deems is deserving of his tirade of revenge.

1980. Re: Why doesn't Mark want to bare the sole responsibility of his actions of lauding false charges against an innocent ham (Brian Crow) K3VR to Florida Child Protective Services...

Thanks again to you all (with one notable exception ;-)).
You've confirmed what I suspected all along but didn't
have/know the technical details enough to debunk the claims.

GMRS is NOT CB. See URL:
http://wireless.fcc.gov/services/index.htm?job=service_home&id=general_mobile

GMRS frequencies are UHF- FM and requires a license and a fee for
application (~ $75 ?). Use is sharply defined. Repeater operation is
permitted. There are severe penalties for non-licensed users.

Lots of details at URL:
http://www.provide.net/~prsg/wi-gmrs.htm

Out of curiosity - are you aware of any actual enforcement actions
in the past few years, taken against people using GMRS frequencies
without a license?

From what I can see, GMRS licensees are receiving next to no support
from the FCC in this regard. The GMRS-only frequencies seem to be
suffering from widespread interference from owners of the dual-mode
(FRS/GMRS) radios, using the GMRS frequencies without bothering to (or
even being aware of the legal requirement to) get a license.

I believe you are correct. They seem to be going the way CB
licenses. They finally realized that no one was getting the
license due to the inability or desire to track non-licensed
users. Except in some extreme cases, where the operator had
a stationary base station and was running high power.

Google shows several violations

Example
http://www.fcc.gov/eb/FieldNotices/2003/DOC-238457A1.html

The point is -- it is the law. If you are aware of that and ignore it - you were forwarned.

The FCC has its hands full - monitoring for idiots jamming Marine and Aircraft frequencies and causing ship or air collisions.

But non-licensed GMRSers do occaisionally get caught -- do you really want to be one of them???

Actually, GMRS has it's roots in Citizens Band, as it started out life
as Citizens Band Class A, when Citizens Band was Created in the 1960's.
It was changed to GMRS much more recently by Commission Action. At one
time ALL Citizen Band Radios were licensed, and required a License Fee
be paid, and in truth, all Citizens Band Radios are still Licensed by
the Commission, under a General Nationwide Blanket License created
when the Commission dropped the Individual Licenses, and Fees, for
those particular Radio Services.

Can you document a single case, where the FCC was involved in monitoring
Marine, and, or, Aircraft Frequencies for Jammers, that caused a
collision of a ship or aircraft? No, Really? Duh, I wonder why?

Lamont, you have no clue what the FCC, does, and what it has been doing,
since the ALGORE Bloodletting.

Maybe you should get a "Clue" before you make any more Foolish
Statements......

Indeed Bruce all that is true but today CB is
http://wireless.fcc.gov/services/index.htm?job=service_home&id=cb

GMRS is
http://wireless.fcc.gov/services/index.htm?job=service_home&id=general_mobile

Lot of differences, frequencies, modulation, useage, etc

We recently had a FCC spokesperson at our Ham Club and he stated the above.
I stand by my statements.

Jammers or any interfering frequency --- spurs, harmonics, intermod can
cause communication problems.

I refer you to URL:

AS someone on here said, GMRS is similar to CB (chicken bandits)
in that not all the GMRS chnls require any fee of any kind. I think
chnl 1 thru 7 do require a license from the FCC and its
$100 not $75 as someone said. If you stick to the "open chnls"
Chnl 11 is on of them you dont need call signs nor anything, just
use it like a telephone. I call sign, no identification required.

I will have to side with Bruce on this one. The GMRS band (formerly
Class A Citizen's Band) FRS and CB all fall under Part 95, Personal
Radio Services. Each has its own characteristics, but they are all
related to radio services for the general public as opposed to the
Amateur Radio Service under Part 97.

Agree but hopefully some readers are now aware of the differences between
the CB and GMRS.
One poster stated that GMRS is CB simply not true.

WRONG! GMRS is CB. It's defined in part 95, subpart A. All of part 95 is CB.
What you're thinking of is only the 27MHz allocation - part 95, subpart D. FRS

and MURS are also in part 95, and if you read the FCC's page on each, the FCC indicates that each is part of CB, but neither operates on 27MHz.

> GMRS frequencies are UHF- FM and requires a license and a fee for

It's still CB and you know it.

I know a lot of people are under that mis-conception because of the
combination FRS/GMRS radios sold at Wal-Mart, etc., but in actuality,
ALL GMRS channels require a license if operated as GMRS (over
1/2-watt, detachable antenna.) If you operate on one of the
interstial channels (FRS channels 1 thru 7), where FRS and GMRS
channels are the same, and you operate under the FRS rules (1/2-watt
maximum, non-detacheable antenna), then yes, you can operate one of
those channels without a license. But only as FRS, and not GMRS.

The latest fee for GMRS is $85.

Au Contraire please read the Wikipedia description
http://en.wikipedia.org/wiki/Cb_radio

Quote
"Citizens' Band radio (CB) is, in most countries, a system of
short-distance, simplex[1] radio communications between individuals on a
selection of 40 channels within the 27 MHz (11 meter) band. The CB radio
service should not be confused with FRS, GMRS, MURS, or amateur ("ham")
radio. "

Part 95 of the FCC Rules does not state that CB = GMRS
Should I believe Wikipedia, the FCC, or you?

There are several radio services covered under 47 C.F.R Part 95. The
FCC describes three of them as being part of the Citizen Band Radio
Services (CB, FRS and MURS.) The GMRS radio service is not described
by the FCC as being part of Citizen Band Radio Services.

Lamont, you have not shown ANY connection between your socalled FCC Monitoring of Marine and or Aviation Frequenices, and ANY collision of a Vessel or Aircraft. FYI, the FCC has very limited Fixed Monitoring Capability on VHF and UHF Marine and Aircraft Frequencies due to the LACK of Monitoring Stations. 99% of the Marine and Aviation Frequency Monitoring is done by the US Coast Guard, for Marine, and the FAA for Aviation. What little monitoring the FCC does, is done from Mobile Units, that are used for Specific Case Investigation, and is done by the local Field Office Engineers and Techs, of which there are 75% fewer of, since the ALGORE lead Bloodletting in the early 90's. The FCC just doesn't have the staff, to do what you are tallking about. They barely have enough staff, at each Field Office, to do the REQUIRED Paperwork to keep the Office OPEN.

Bruce in alaska who use to be one of those FCC Field Agents......

Wrong again Dick. I called the FCC and asked what chnls are "free"
and what chnls require a license. They told me and the ones
that the ones requiring a license cost $100 (not 75 as you claimed)..

I don't care who you talked to Joe, there are no "free" channels when
you use a GMRS radio that transmits with over 1/2-watt and has a
removeable antenna. They are only "free" if you transmit on one of
the interstitial channels with an FRS radio. When you transmit on one
of the "free" channels you are using FRS, even though the radio can
also transmit on one of the true GMRS channels. You really need to
read Part 95. If you transmit under the GMRS rules, you MUST have a
GMRS license. If you transmit under the FRS rules, you don't.

Did you even read the FCC document I referred to above? It clearly shows the fee to be $85. I recently renewed my GMRS license, and guess what? The fee was $85 just like the fee schedule shows.

Here is the latest version of the fee schedule, dated September 18, 2007.

I shall agree - not CURRENTLY is it called a CB service. GMRS is historically
"Class A CB." What is normally called "CB" today is historically "Class D CB."

2027. MI5 Persecution: Faxes Sent to Parliament1 (483)

Newsgroup: rec.radio.amateur.equipment

Faxes Sent to British Parliament logs

During the 1998-2000 period my records indicate that I sent at least 14,480 faxes to the British Parliament
in Westminster, of which 9,138 went via TPC's email-to-fax service and 5,342 were sent via fax-modem direct from
my computer. The actual figure is obviously much higher since, for most of this period, whenever a recipient asked to
be deleted from my mailing list, I totally wiped all entries including that from the logfile.

In the records "Y" indicates successful transmission from fax-modem, "N" indicates failed transmission from fax-modem.
"E" indicates an error occurred while transmitting via fax-modem and a fax may have been only partly transmitted.
"y" and "n" indicate success or failure via TPC.

In April 2000 I changed the method of operation by recording "R" when a recipient requested removal, rather than
wiping their details from my mailing list and records; and keeping "B" records for when TPC actioned a ban on a
recipient's fax-number, but the recipient did not write to ask me to cease faxing. The purpose of these changes
was to keep more accurate and complete records, but the intention was thwarted by the police complaint.

2029. MI5 Persecution: How Could It Be True? (4833)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-11-24 07:39:57 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07102407394461@4ax.com>

MI5 Persecution: How Could It Be True?

If you have the patience to read these articles you will be struck by how apparently fantastic the claims being put forward are. You may ask yourself why such seemingly nonsensical assertions are made. This matter has been discussed on the Internets UK-local newsgroups for three years now, and the denizens of the uk.misc newsgroup (the so-called "miscreants") have come up with a number of theories to explain these posts; it has been variously suggested that they are a troll (an artificial creation for the amusement of its author), that they are made by MI5 themselves with the purpose of discrediting other conspiracy theories, and that the poster is mentally ill and the articles are symptomatic of the illness (the view held by most miscreants).

Are these claims the product of mental illness, or is that just a cover?

The most obvious explanation, that the claims made result from the admitted mental illness of the author, is the one which the persecutors intend be the one accepted without consideration being given to the possibility of the claims being true. The persecutors have actually been very clever about this, both in selecting as their target someone who was known from school or university as being borderline schizophrenic, and in ensuring the nature of their persecution corresponds to what often features in the delusions of a schizophrenic.

The very first incident of the persecution occurred in June 1990, when I was still a student at university in London. It consisted of a reaction (giggling) from the newsreader, Sue Carpenter of ITN, to what she saw happening in my living-room at my parents home where I was living. Before your imagination gets the better of you I should make clear that what the newsreader was reacting to was not too embarrassing in nature; my mother had brought an apple for me into the the room, and Sue Carpenter found this amusing.

I recognized that Carpenter had reacted to what she had seen in my living-room, yet this idea still seemed completely fantastic to me. My reaction was to continue watching television, particularly the news, to see if this incident would be repeated. It was, many times, both on BBC and ITV. An intelligent person would have thought to obtain a video recorder and capture some of these incidents in order to try to explain to an observer what he saw in these broadcasts. Unfortunately, I failed this test of intelligence, since I did not record these programmes. I have recently attempted to obtain from ITN tapes of their news programmes dating back to summer 1990, but, unhappily, they have advised me that they do not have complete programmes including newsreaders comments dating back

to that period.

From the outset, the persecutors structured their actions to ensure that any complaint would be met with disbelief, and dismissed as delusional. This is why they chose as their target someone who was known at school and university to be borderline mentally ill; and it is why they fired the first shots of their campaign through the broadcast media. Schizophrenics commonly believe the media harass them; it would be exceptional for "full-duplex television" to exist in reality. Those with schizophrenia also commonly believe people are talking about them; again, the persecutors have shown themselves very rarely, but act through intermediaries, both in the workplace, and in public and during travel.

Mental illness is not the cause of these claims, but the simulation of its symptoms is a cover used by the persecutors to deny their victim the ability to have his compaints believed.

What evidence exists to support these claims of "interactive television/radio";?

Quite frankly, I have very little evidence to support my claims. You may examine the "Evidence" area of my website to see such evidence as I have been able to gather. None of it is remotely conclusive. The "smoking guns" all date back to 1990/91, and it is really rather late now to start trying to look for material dating back seven or eight years. In 1997 I started tape-recording every programme I watched or listened to. I also started carrying with me a high-fidelity minidisc-recorder with good quality microphone to catch incidents of public harassment, but this also has not been as successful or conclusive as I had hoped.

Perhaps the best item in the "Evidence" section is the audio file "Life is so hard" (it is labelled with Garfield the cartoon character on the site), which I have given a certainty level of 100%. This item relates to harassment at my workplace in Canada in 1996. A co-worker called Mark was coming up with phrases and expressions which were repeating things being said at my Canadian residence, consequently leading me to believe that my apartment and home phone were bugged, and that the persecutors were passing their gathered information on to Mark. On one particular evening I said in my apartment, "life is so hard, and then you die". The following day I was able to record Mark saying exactly the same phrase at work.

Unfortunately when "they" know you are recording them, they simply dont say things which would unambiguously show harassment. When Mark the co-worker knew he was being recorded, he only made his remarks out of range of the recorder, for example outside the building. When the TV newscasters or radio disc jockeys know they are being taped, they limit themselves to saying things which are ambiguous, which even in my mind may or may not be personally directed against me.

Who knows about this persecution?

Surprisingly many people know. People in the media, such as BBC and ITN newscasters including Martyn Lewis and Michael Buerk, and radio disc

jockeys such as Chris Tarrant of Capital Radio, know what is going on, and take part in it. Some co-workers at my former workplaces in England and Canada have known about the harassment. Quite a few people in the general public are also included. I believe the police are aware of the persecution, but, unfortunately, have chosen not to take any action to stop it. I have complained at my local police station in London several years ago, and I have stated on the internet newsgroups that I have done so, hence the police will be well aware of my wish to see the matter resolved. I believe their inaction denotes a dereliction of duty, but without good evidence, I am powerless to compel them to take steps to prevent further harassment, or deal with what has already taken place.

What is the purpose of sending these faxes?

These faxes are being sent to three distinct groups of people, namely Members of Parliament, the media, and diplomats & legal people. As you will have observed I am making use of the email-to-fax gateway at Demon Internet to send these faxes. I am forced to use this gateway since I currently live in North America, and cannot afford the high cost of direct phone calls to the UK.

My purpose in publicising my claims is firstly to discourage the persecutors from continuing their campaign, and also to attempt to bring their campaign out into the open, and thus perhaps identify the persecutors. Neither aim has been achieved yet, but I hope that with sufficient stimulation these aims may yet be accomplished.

The problem with the second aim is that those who read this article will fall into two groups, those who dont know anything about the persecution and consequently will disbelieve my claims as delusional, and those who do know about the harassment and may have some idea of who is behind it, but realise that if the harassers are exposed and the truth brought out into the open, then powerful British institutions will substantially lose prestige, and be exposed to ridicule.

It would give me hope to believe that these faxes will create a third group of people, those who find out that I am telling the truth, and who follow their consciences in standing up and seeing justice done. Only time will tell if this hope will be realized.

2030. MI5 Persecution: Why do you think MI5 are responsible? (7008)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-11-24 08:09:40 UTC
From: MI5Victim@mi5.gov.uk
Message-ID: <m07102408092790@4ax.com>
Source record: 3954
Cross-posted to: alt.testing.it,rec.radio.amateur.equipment,de.comp.os.unix.x11,free.uk.talk.edinburgh,no.it.tjenester.nettilbydere

Why do you think MI5 are responsible?

The question of who is ultimately responsible for this eight-year harassment is one which is very difficult to answer, as the persecutors have never clearly made their identities known to the persecutee. However, I believe I am correct in attributing the continuing victimisation to elements of the British Security Service MI5, and in this article, I will try to explain the reasons for this belief.

The British internet magazine ".net" featured my website on page 17 of their March 1998 issue (number 42). Their review kindly describes it as an "excellent site" and gives some details of what the net surfer will find there. Should you wish to reply to this article you can do so;

"When did you first suspect MI5 were responsible?"

Over Easter 1995 I went to see a local solicitor in London with a view to talking to the police about the harassment. Soon afterwards I did go to my local police station in Clapham and spoke to an officer there. The solicitor made a comment which suggested to me that the persecution I had been experiencing may have been organised by an intelligence service.

Up to this point, I did not have any clear idea as to who was behind the harassment. Only their agents were visible, in the media, on television news programmes, and on the radio; in the workplace, where things said at my home were repeated verbatim; and in some cases abuse in public and during travel, for example on the trip to Poland in June 1992 which I have already described.

Both from the fact that widely disparate individuals and organisations were employed as agents in the campaign against me, and from the fact that an entity would be required to marshal their resources in the areas of spying on my home and giving gathered information to their agents, it was clear to me that a single entity was responsible for carrying out the campaign. Yet from June 1990 until Easter 1995 I did not have a clear idea of who might be responsible. I guessed that perhaps some private individual or group of persons who saw themselves as my enemies had perhaps paid private detectives to organise the harassment. Alternatively, since the campaign had started in the media, I made a far-fetched supposition that perhaps it was an ad-hoc group of media people who had set themselves up in opposition to me. After Easter 1995 I saw that these guesses were wrong, and I made an I believe much more accurate estimate as to who my enemies really are.

"Why couldn't a private group be behind the persecution?"

There are several reasons why a private individual or group would not be behind this campaign.

Quantity of resources / Money. Here is what one Usenet (internet newsgroup) participant had to say (several years ago) on the topic of how much money it would cost just to keep the surveillance going.

PM: >But why? And why you? Do you realize how much it would cost to keep
PM: >one person under continuous surveillance for five years? Think about
PM: >all the man/hours. Say they _just_ allocated a two man team and a
PM: >supervisor. OK., Supervisor's salary, say, #30,000 a year. Two men,
PM: >#20,000 a year each. But they'd need to work in shifts -- so it would
PM: >be six men at #20,000 (which with on-costs would work out at more
like
PM: >#30,000 to the employer.)
PM: >
PM: >So, we're talking #30,000 x 6. #180,000. plus say, #40,000 for the
PM: >supervisor. #220,000. Then you've got the hardware involved. And
PM: >any transcription that needs doing. You don't think the 'Big Boss'
PM: >would listen to hours and hours of tapes, do you.
PM: >
PM: >So, all in all, you couldn't actually do the job for much less than
PM: >a quarter million a year. Over five years. What are you doing that
makes
PM: >it worth the while of the state to spend over one and a quarter
million
PM: >on you?

A private individual or group would not spend over a million pounds to verbally torture a victim without some financial motive or gain. Private industry is driven by the profit motive, and there is no financial profit to be had from carrying out a campaign in this way. If a private enterprise were behind it then they would have taken direct physical action a long time ago.

State enterprises, on the other hand, can afford to be wasteful, since they are funded by the taxpayer. They do not have to show a money profit. The employees or contractors employed by a state organisation such as MI5 are driven by their own personal profit motives, to make the most money out of their employers for the longest period of time. MI5 is funded to the tune of #150M p.a.; even a few hundred thousand a year would to them be affordable if their managers could convince themselves of the necessity of what they were doing.

Quality of resources / Technical resources - electronic and other surveillance. In summer 1994 a reputable and competent private detective agency was employed to conduct a counter-surveillance sweep of my home in London. They charged us over #400 for this, conducted a thorough search for radio transmitting devices, hard-wired "probe" microphones and also tested the telephone line. They found nothing. This was not altogether surprising, since it had been made very clear to me that there were bugs in my home; the "buggers" would not have made this clear unless they had felt their bugs were of sufficient sophistication as to be safe from

detection.

But there is another lesson to be gained from the failure of the private detectives to find anything. The agency employed was one of the most reputable in London. They were employed on the principle of "setting a thief to catch a thief", for if the harassment were being carried out by private detectives, as I then believed, then surely another set of private detectives would be able to find the bugs that they had planted. That these "private eyes" were unable to find anything, and that the harassers were confident that they would not be able to find any bugs, points to the harassers being an order of sophistication above a private agency, and leads me again to believe that a state intelligence service is responsible for the surveillance and harassment.

Quality of resources / Technical resources - Interception of Postal service. In summer 1994 when I emigrated to Canada to try to escape the harassment, I wrote letters home to my family and friends in London. Quite soon after my arrival in Canada, the harassers were able to find precisely where I was staying. The only way I can see of "their" being able to find out my new address was by interception of my letters to the UK.

Later in 1994, I conducted an experiment to see if my letters home were indeed being read. In a letter home I wrote of being depressed and talked in vague terms of suicide. I deliberately chose this topic, since I believed it was the outcome my harassers were trying to achieve, and that if they read the letter, they would "echo" its contents. Sure enough, soon afterwards there were two incidents of people shouting "suicide" at me in public places in Canada.

It is inconceivable for a private agency to have the ability to intercept postal mail. The state security service on the other hand is well known to engage in these activities.

Quality of resources / Access to Media. One of the strangest aspects of this case is the access "they" have to the broadcast and print media. I still do not understand what could persuade newscasters such as Martyn Lewis and Michael Buerk, who consider themselves "gentlemen", to behave in an almost voyeuristic way by "peeking" into the living room of one of their viewers. A year ago I wrote to the BBC asking if these newscasters would confirm or deny the accusations made against them. The BBC replied that their newscasters had denied the accusations, but refused to do so in writing.

It is well known that MI5 have the ability to plant stories in certain newspapers, but convincing television newscasters to "watch" a viewer while they read the news would surely be very difficult for them to accomplish, unless they presented themselves to these journalists as being, for example, a group in the media who were seeing to it that I got my "deserved" treatment. MI5 has a history of manipulating the media, so it might not be too difficult for them to accomplish such a trick, whereas a private group would not have this ability.

"Have they ever denied that they are the Security Service?"

No. Never. This is in fact the main reason why I believe "they" are MI5 and not a privately funded group. If my guess had been wrong then I am sure that "they" would have crowed over my mistake, but they have never admitted nor denied that they are employees of MI5.

In early January 1996 I flew on a British Airways jet from London to Montreal; also present on the plane, about three or four rows behind me, were two young men, one of them fat and voluble, the other silent. It was quite clear that these two had been planted on the aircraft to "wind me up". The fat youth described the town in Poland where I had spent Christmas, and made some unpleasant personal slurs against me. Most interestingly, he said the words, "he doesnt know who we are".

Now I find this particular form of words very interesting, because while it is not a clear admission, it is only a half-hearted attempt at denial of my guess that "they" = "MI5". Had my guess been wrong, the fat youth would surely have said so more clearly.

"If MI5 were behind it, why would they wish to mask their involvement?"

I have heard a number of times a belief from people in the media that it is they, the media people, who are behind the abuse. In spring 1994 Chris Tarrant the Capital Radio D.J. said sarcastically on his breakfast show, "You know this bloke? he says were trying to kill him. We should be done for attempted manslaughter". We, we, we. Tarrant thought it was a media conspiracy.

Returning to the question of "interactive watching" by television newscasters, it would again be much easier for them to take part in that sort of activity if they convinced themselves that the surveillance and abuse were organised by "their own", by media people. It must be second nature to MI5 to mask their involvement in the matters they deal with; in this case, they pretend the campaign is organised by a group in the media, and any journalists who suspect otherwise keep their silence.

Conclusion

Over the last three years I have stated with some force my belief that MI5 are responsible for my misfortunes. I have done so on Internet newsgroups, in letters and faxes to people in politics and the media in the UK, and in 1997 I made a formal complaint to MI5 regarding their activities; the Security Service Tribunal replied in June 1997 that "no determination in your favour has been made on your complaint". (I believe the statement by the Security Service Tribunal can be disregarded, as they have never, ever made a ruling in favour of a complainant.) In three years of naming MI5 as my oppressor "they" have never denied the charge. To me, their silence on this point indicates that my guess was accurate. I believe my persecutors stand identified. The question of why they should carry out this campaign is one I will try to answer in a future article.

MI5 Persecution Update: Friday 15 May, 1998

The persecution has been quite severe for the last week. It appears that my enemies are reacting to the steady stream of faxes making their way over the Atlantic to the fax machines of Westminster politicians and the media. Here is whats happened in the last few days;

The week started off with an incident in the cafeteria at a local shopping centre where I habitually drink my morning coffee. My enemies have concentrated since winter 1995/96 on throwing a particularly horrible sexual slander against me. They "put people up" to repeat this slander against me, and this is what happened again here.

On Thursday morning (yesterday), instead of going to the usual cafeteria I went to a nearby convenience store for coffee. The same horrible sexual slander was shouted at me very loudly by a member of staff as I walked into the store. This was the first time I had ever bought morning coffee in that shop. The other staff obviously knew what was going on, one of them said, "they screwed up my life".

The fax gateway I use to send these faxes to the UK has been working hard these last few days to shut down my access by barring the accounts I use to send these faxes.

I have received an anonymous threat from fax number 0171-219-6101 (the machine gave its name as "ETRA-HoC") which said, "Stop sending to this fax no 0171-219-6101 or else" (the consequences of continued transmission were unspecified). I invited the sender to apologise for his threat, but received no response.

This all adds up to quite a severe reaction to my faxes of the last few weeks. I actually find this quite heartening since it shows that my faxes are finding the mark and there may yet be a breakthrough in my efforts to expose the Security Service conpiracy of abuse against me which has now been going on for eight years.

MI5 Persecution: "Why would they be doing this to you, sir?"

This article will concentrate on the difficult question of "Why". The question which forms the title of this piece was asked of me by the police officer I spoke to in Easter 1995, when I went to make my complaint.

There are really two sides to this question. Firstly, why should MI5 be harassing anybody in this fashion? Secondly, if they choose to behave in this way, why should they have selected me in particular, and not somebody else? Alternatively, why did the persecution start, and why is it

continuing?

I do not have definite answers to either side of this question, since my persecutors have usually kept themselves hidden and only acted through other parties. To know "why", one would have to know who the persecutors are, and something of their personalities, since their abuse is almost certainly symptomatic of a personality disorder of the abusers. Certain things however can be deduced about the abusers from the nature of their behaviour, and I will talk about this later in the article.

Why did it start?

It is clear that the persecution must have been initiated by someone who knew me personally, either at school, or at university, or socially, and knew that I was borderline mentally ill, since this is what makes me a target for the persecutors. Unfortunately, the originators have never been identified, and there are several possible candidates. Neither has the link from the originators of the persecution, to the persecutors themselves, ever been made clear. So who are the originators?

University Staff

The identity of the originators may lie in the timing of the persecution. It started in June 1990, while I was finishing a course at Imperial College in London, and a year after I graduated from Cambridge, where I received a degree in computer science. At Cambridge I had achieved some notoriety in the computer lab from various nefarious exploits. Roger Needham attacked me by saying that "there were great hopes for it, but it failed terribly". When I started at Imperial I found that my reputation had preceded me; Cambridge computer lab had spoken to I.C. lecturers about me. I.C. lecturer Frank McCabe summed up commenting about "setting up a straw man so you can tear him down". (Despite being "torn down" by the Cambridge computer labs lecturers, I still achieved a good first degree and a Masters degree at Imperial.)

Other students at university

So, the originators may have been university staff who knew me from my student days. But there are other possibilities. I had other enemies at university, including some fellow students. At my Cambridge college it was common knowledge that my mental health was dubious, and it was known that I talked to myself in my sleep - the floor and walls were quite permeable to noise, so other students heard. I was given the nickname "gibber" because of this habit. Sometime later, I managed to catch myself talking in my sleep when I woke up in the middle of the night.

Here is a quote from a participant in the internet newsgroup where I have been posting for the last three years;

>One thing which has been missing from this discussion is this simple
>prognosis: that maybe he is right and that, despite his admitted
>mental condition, there really is a campaign against him organised by
>now-influential ex-students of his university.

People I knew socially

I had yet other enemies in 1990 (I am a man of many enemies!). In January 1990 I broke up with some people I had been going out with socially. One of them, by the name of Andy Turner, wrote a letter to Alan Freeman, who at the time was a Radio 1 DJ. Freeman read part of the letter out on his Rock Show, about the "one who wore out his welcome with random precision", saying "thats a hell of a letter you wrote there Andy", and "with a schizophrenic youre never alone".

It is my belief that Andy Turner and his friends were trying to make trouble for me, and Turner wrote to Freeman with this in mind. Freeman may have discussed the letter with others, and things may have snowballed from there. This is, of course, pure supposition. The fact is that I do not know who the originators are, and can only guess.

Once it started, why is it continuing?

The answer to this question is obvious. It is unacceptable to the "powers that be" in the UK to have somebody running around who knows he has been targeted by the Security Service and media organizations, and who is in a position to embarrass British institutions. This has become particularly evident in the last week; as I send more faxes to UK politicians and media, so the pressure on me grows, and the volume of abuse increases.

Part of the reason the persecution continues is in the personalities of the abusers, and it is this subject to which I will turn to next, since the key to understanding the persecution lies in understanding those who carry it out, as much as we can.

The Security Service operatives, the persecutors, are they psychopaths?

Let us first examine the definition of the term "psychopath". DSM-IV defines "anti-social personality disorder" as a "pattern of disregard for and violation of the rights of others ... deceitfulness, irritability and aggressiveness ... consistent irresponsibility and lack of remorse". The Harvard Mental Health Letter of Sept 1995 describes these people as using "charm, manipulation, intimidation and violence to control others and satisfy their own needs. Lacking in conscience and in feelings for others, they cold-bloodedly take what they want and do as they please", having "no guilt or regret".

I must say, reading this description of the condition, that it fits the persecutors perfectly. The persecutors have never shown the slightest remorse or guilt. Even when I was severely ill, they continued to abuse me. They have repeatedly blamed their actions on me, which is another trait common amongst psychopaths. They have no respect for my legal or personal rights, and they use intimidation and verbal violence.

If the MI5 operatives are psychopaths then it would explain both why the persecution started, and the degree of verbal violence. Psychopaths by definition damage other people; here, the MI5 operatives find an outlet for their personality disorder, through "cripple-kicking".

Xenophobia on the basis of mental illness, and race

My enemies have made clear many times that one of the reasons they are persecuting me is because of my admitted mental illness. However, it is my belief that they are also persecuting me because I am not of ethnic English origin, and the fact that there have been several incidents of an overtly racist nature reinforces this view.

In one case, two youths on a tube train in London made openly racist references to me as a "soft toy, not up to British Standards". Another person near my home made remarks about "Polish people". In yet another incident in Croydon, a youth made comments about "foreigners".

But the main thrust of their xenophobia is because of my mental illness. I should make clear that I do not look ill; if you met me, you would not know that I had the illness. I take a relatively low dose of medication, and feel quite well. But the persecutors have repeatedly harped on about my supposed serious mental illness; they have called me a "nutter", a "schizophrenic", etc. They have also persuaded other people to use these terms of abuse. They are able to get away with this because abusing the mentally ill is still something which is mostly acceptable in Britain; the media do it, "nutter" is not taboo in the way that "nigger" is.

Conclusion

There are several groups of people who might have wished to cause me trouble, and I still do not know who originated the persecution. Nor do I know how the originators came to be in contact with the (presumed) Security Service operatives who have been carrying out the campaign. To know conclusively why it started, we would have to know who started it, and this information is not available.

However, we can infer some things about the personalities of the persecutors from their methods, and from the degree of verbal violence they employ. It is clear that a main reason for the continuing harassment is the psychopathic disorder of the MI5 agents who carry it out. That they have never been "brought to book" for their misdeeds reinforces their belief that they do no wrong; and, unhappily, until they are brought to book, their persecution campaign looks set to continue.

MI5 Persecution: .net Magazine Applauds my Website

The March 1998 issue (number 42) of .net Magazine reviews the MI5
Persecution website describing it as an "excellent site". The webpages
describe in detail the nature of my persecution since 1990 by what are
believed to be elements of the UK security service.

(snip image)

You are encouraged to read the web pages which include

o a FAQ section outlining the nature of the persecutors, their methods
of harassment through the media, people at work and among the general public
o an evidence section, which carries audio and video clips of media and
workplace harassment, rated according to how directly I think they refer to me
o factual descriptions of the state security agencies involved
o scanned texts of the complaints I have made to media and state security agencies involved
o posts which have been made to netnews over the last three years on this topic

MI5 Persecution Update: Friday 13 November, 1998

If You Intend To Reply, Please Read This

If you have any questions or observations you would like to share with me, then you are very welcome to reply to my fax number 0171-681-1190. But please.... keep your response to one page if you can! I have had several people faxing my article back to me, including one MP faxing back twenty pages. I do not know if he had anything intelligent to say in his 20-page fax because I applied judicious use of the "Delete" key on my computer. Faxes over a page or two will be deleted without being read.

MI5 Resume Hostilities in Response to these Faxes

When I wrote last weeks "MI5 Persecution Update" I remarked how quiet my life had become. No longer! MI5 have restarted hostilities with a vengeance the past week, in response I believe to the faxes I have been sending to members of the House of Commons.

On Saturday 7 November I went to Clapham Picture House cinema to see the film "Antz" (a very enjoyable film). At the cinema, I was verbally assaulted by a group of teenagers with the words "still crazy", repeated about ten times. There was a film with that name showing at the cinema, but it was clear their abuse was directed at me. I do not look ill, so why would they pick on me? answer, the incident was set-up by the persecutors. One of the teenagers also said to another, "I don't know what we're laughing at".

The following day, Sunday 8/11/98, I was on my way to play squash when I was verbally assaulted by a youth who said "it was so funny", without the slightest trace of humour. What he meant by this phrase was that was funny, and they were trying to humiliate me. I have heard this phrase "it was so funny" used at me before many, many times over the last eight and half years.

Please Encourage Keith Hill MP to Help Me

I live in a bugged house, bugged both for audio and video. My movements are monitored by MI5. The Security Service have followed me to Canada, to Poland and the Continent, to the States. I cannot work anywhere, not in England, not in Canada, because MI5 will destroy whatever employment I am able to obtain. I have asked Keith Hill MP to help me, and he has refused.

The situation is intolerable. It is Mr Hills job to help me out of this mess. So, please, as I said in the last fax a week ago: Do not waste your time returning multiple copies of my faxes to my fax mailbox, as some of

you have done. Instead;

Please encourage Keith Hill M.P. to help me.

I am sorry to be using this device to encourage Mr Hill to help, but I think eight and half years are quite enough and it is time something was done to bring this matter to a close.

MI5 Persecution : BBC Newscasters Spying on my Home

This week's topic is the quite extraordinary claim that BBC newscasters such as Martyn Lewis and Michael Buerk have spied on my living room while they read the news. I currently have an advert running for the next six months in Private Eye's "Eye Say" column (at a cost of over ₱200) which says,"MI5 Persecution - BBC Newscasters Spying on my Home"; the story of my campaign in the Eye is on my Website
at; http://www.pair.com/spook/evidence/plaint/priveye.htm

BBCs staff magazine Ariel also ran my advert "BBC Newsreaders Spying on my home" for one issue in the Personal category on 8/July/1997 before it was spotted and axed by editor Robin Reynolds; please see
webpage; http://www.pair.com/spook/evidence/plaint/ariel.htm

Beginnings

The very first incident in the "MI5/BBC Persecution" occurred in June of 1990, when a newsreader reacted to what she saw in my living room at home as she read the news. My mother had brought an apple for me into the room, whereupon the newsreader smirked and giggled, apparently finding this funny. I couldn't believe what I was seeing. I carried on watching news and other television programmes to see if presenters would show signs of "interactive watching"; to my surprise, this happened again and
again. Unfortunately, I did not have my wits sufficiently about me to videotape these programmes, and it is now almost impossible to obtain recordings dating back to 1990.

Most of the "TV watching" has occurred on the news, and most of it in summer 1990, although some as late as autumn 1993. My website has a few extracts of what might be politicians "getting at" me, in particular John Major and interviewer Dimbleby sharing a joke about the "Knutsford Guardian" which is almost certainly about me.

I sold my portable TV in autumn 1990 and stopped watching television regularly. I realise now that this may have been a mistake. What I should have done was to watch TV and listen to the radio, but tape-record everything and make a note of what each excerpt meant to me. I would then be in a much stronger position as regards to evidence that I am now. That is what I am trying to do now, but unsurprisingly the TV/radio presenters have stopped getting at me, now they know they are being recorded.

Examples of Media Harassment

Here are a few examples which I can still remember of media harassment;

In early 1992 I was watching the BBC news with Martyn Lewis on a small black-and-white portable television at my then home in Oxford. I threw a term of abuse at Lewis; he flinched, then gave a grin and made a comment from which I understood that he had been on my side, but might have changed his mind as a result of what Id just said to him.

Victor Lewis Smith in his TV (BBC2?) program at the end of 1993, had a taxi-driver saying, "theyre all out to get me", to which VLS replied, "but you're quite intelligent aren't you?" (what a nice chap VLS is, compliments no less!)

Paul Daniels the TV magician, sometime in 1990-92 (sorry I can't be more precise but it was so long ago), made a "crying face" and put his face in his hands, which was his way of expressing that I was frequently crying in 1990-92, and that he and other media people found my crying funny.

Kenny Everett (deceased) on some talk show, compared me to a "huge ape" who "scratches himself"; he made some other remarks about what the "ape" got up to which unfortunately I cant remember. (I remember that Everetts comments were quite sympathetic and human, but were obviously about me.)

Stephen Fry on another talkshow (Wogan I think) talking about "masturbatory fantasies", he then referred to me with the words "you prat"; I wonder if the studio audience knew what he was talking about and to whom his comments were directed?

Griff Rhys Jones on Clive James' TV show, made a "lunatic face" (wide fixed grin) to which I said to the TV that he had a "face like a horse's arse", to which Clive James said to GRJ "did you hear that?"

Crimestoppers summer 1990, remarks by a Midlands police officer on the programme, while Nick Ross was presenter (as far as I can remember). The officer talked about "in car entertainment". Nick Ross said to officer, "why don't you stop doing it?" to which he replied, "we can't while he's like this".

BBC2 Newsnight in autumn 1993 had a piece on football hooliganism. A black interviewee said apparently of the hooligans, but in fact of me; "they're just idiots, carry on with the surveillance".

There was an incident with Jonathan Ross which I remember clearly; he was on both BBC and ITV television at the same time, one (ITV I think) was recorded, the other channel was live. Ross has a speech impediment which causes him to pronounce his "r"s as "w". I sarcastically said something about "Mr Woss" to the recorded channel, then turned over to where he was live, and he repeated "Woss" with heavy emphasis and sarcasm.

On the radio, in spring 1994, Chris Tarrant made a sarcastic remark in his morning show, saying "he says were trying to kill him, we should be done for attempted manslaughter", to which another of the studio staff said, "oh no, dont say that". His comment was in reply to a comparison Id made the previous evening between my persecutors and the Polish secret police who murdered dissidents.

Martyn Lewis Denies & Lies, But Wont in Writing

In February 1997 I wrote to BBC Viewer & Listener Correspondence and asked them to investigate the claim that their newscasters had engaged in "interactive watching". They replied that they had asked Martyn Lewis and Michael Buerk whether they had engaged in such practices, and that they had both made verbal denials to VLC, but were refusing to put their denials in writing.

I can understand that they might think that if they were to make written denials to me, then many other people with my condition might write to them with similar questions. But Ive asked a couple of journalists if theyve been writing about me, theyve made written denials, Ive believed them, and I have not put their denials on my website because, since I believe their denials, it would not be relevant to publish them.

To me it looks as if Lewis and Buerk are happy to lie verbally but not in writing, because written falsehoods would place them unambiguously in the wrong, whereas they can try to talk their way out of verbal lies if they are ever caught, or perhaps even deny the verbal lies completely? If they lie without shame, then why would they have any shame about future lies about lying?

One of the strangest aspects of "TV watching" is that Buerk and Lewis have convinced themselves that their "interactive spying" is reasonable behaviour. Martyn Lewis thinks of himself as a "gentleman". He expressed in 1992 that he was "on my side". If this matter ever comes out into the open, I wonder what these newscasters will have to say for themselves, and what the British public will make of their behaviour?

Media Persecution Evidence on my Website

You may directly access the Evidence section on my website at URL;

The category currently contains four video segments, a number of audio files and three published articles. The first video of ITN's John Suchet is unfortunately a mistake - after looking at it again it is obviously not about me. The two Ken Clarke excerpts may or may not be about me; it is funny that he should keep on harping about "paranoia" and "madness", but I have given these ratings of only 30% certainty, as it is more likely that they are not about me in particular, and Clarke is simply displaying the normal prejudices against the mentally ill found in much of society.

The piece I find most interesting is the Dimbleby/John Major interview from April 1997. I have assigned this a 90% rating. Dimbleby starts by emphasising a report from the "Knutsford Guardian". Major recognizes what's going on and joins in with a falsely apologetic "heaven forfend". The emphasis is on the first syllable pronounced "nuts" in "Knutsford", which is repeated three times. Of course this is hardly anywhere near convincing evidence; the really clear items were all in 1990-92, and they are basically unobtainable now.

If you're reading the website, have a look at the two files from David Hepworth's programme on GLR radio. The first one from 21/Feb/1997 has him

talking about an "embarassment" of prizes and "absolute obscene", in reference I believe to the verbal sexual abuse that was being used against me at the time (and which unfortunately is still current). In the second file dated 9/May/1997 he again talks about "absolute embarrassment" of prizes, followed by laughter. To my mind he knows I am listening to his programme, and deliberately makes these remarks for my benefit, with very little attempt to disguise their purpose.

Bernard Levin - "Fanatic's Fare for the Common Man"

On 21 September 1991 this article by Bernard Levin appeared in The Times. It is reproduced in the Evidence section of the website, or may be accessed directly at URL;

To my mind, Levin's article described the situation at the time and in particular a recent meeting with a friend, during which I for the first time admitted to someone other than my GP that I had been subjected to a conspiracy of harassment over the previous year and a half.

Levin writes about a "madman running loose about London" who "bursts into tears, and swears it is all true. And it is." I am pleased to agree with his assertion that "it is all true" because the truth is what I presented to my friend in September 1991 and it is what is being presented to the readership of these articles now.

Conclusion

The harassment, in particular media persecution, was at its strongest in 1990-92. Today, I am recording everything I watch, read and listen, and the media have pretty much given up. It is now incidents "in public" which make up what there is of MI5s persecution. But much of the material from 1990-92 still exists in archives, although the organisations which have those archives generally wont make the material available to the public, for copyright and other reasons.

MI5 can no longer employ the media to persecute me, partly because journalists now know who is behind the persecution, and also because I would publish any instances. My mistake during 1990-92 was to not record instances as they happened; Ive learned from that mistake, and know better now.

Mark, why do you persecute other hams with no proof?

Bill-

Parts used by Heath may not have been so obscure back then! However
they did mark them with their own proprietary numbers. Therefore you
need a cross reference before you can see how common they are.

I found such a cross reference at
http://www.d8apro.com/heath3.htm which has quite a long list of Heath
part numbers.

That web site has additional Heath information at
http://www.d8apro.com/heath1.htm .

Dick I think direct question to FCC via phone is enuff unless we got
liars at the FCC. Its $100 bux not $85. And as I said these are
sold at Radio Shack and chnls 1-thru 7 require the license.
You dare not open you mouth on those. Chnl 11 is free and clear
and about 4 others also and require no call sines nor charges of
any kind. No ID, nothing. I have mine locked to my wifes on
chnl 11 and though I listen to the licensed chnls some times,
they sound like they are breaking all the rules in the ID.
"hey frank did you finish your job yet"? "Answer no I'm about
to finish shortly" Those are mot even up to CB standards!!!

Joe -

What am I going to do with you? You are the classic case of you can
lead a horse to water, but you can't make him drink. Here is the
EXACT wording from the latest FCC fee schedule.

****

Part 95 General Mobile Radio Service

The instructions that follow are for filing applications. Select the
purpose of filing and follow the instructions below:
New, Renewal or Renewal/Modification
ï¿½ FCC 605
ï¿½ FCC 159
ï¿½ Payment/Fee Type Code: PAZR - $85.00 Fee

****

I cut and pasted that from the URL leading to the FCC PDF file on fees
that I listed for you in the previous message. I assure you the $85
fee is correct for a GMRS license.

I think the problem you are having is that you either asked the wrong
question, or didn't understand what the FCC person told you. If you

want to make sure there is no misunderstanding between you and the FCC, call them again and say these exact words, "I have a 25-watt GMRS radio in my car, and an antenna mounted on the roof. What are the channels that I can operate on without a license?" I guarantee you that they will say NONE!

I will try to explain this to you one more time, then I give up.

When you buy one of the 22-channel FRS/GMRS radios from Radio Shack, etc. these are primarily FRS radios. To meet the FRS specifications the must transmit with less than 1/2-watt and the antenna cannot be removeable. I.E. you cannot use any other antenna with it. They also have to meet a certain frequency tolerance.

Normally, an FRS radio has 14 channels. But in these hybrid radios there are 7 channels that are called the interstitial channels. These are channels use by both FRS and GMRS. Then there are 7 channels that are FRS only, and 7 channels that are GMRS only. There is also an emergency channel of 462.675 MHz for the 22nd channel. This is sometimes channel 0 in a GMRS radio.

You can operate on any of the first 14 channels without a license because they are FRS channels. However, you must have a license to operate on the 7 (8) channels that are GMRS only. The important thing to understand here is that, on the 7 interstitial channels (combination FRS and GMRS) they are only designated that way so you can talk to a GMRS operator and they to you on their 7 channels. However, when you talk to a GMRS operator on one of those 7 channels you are operating as FRS not GMRS. I don't know how I can make that concept any more clear. THERE ARE NO FREE GMRS channels, just free FRS channels. They just happen to be the same frequency. When I say GMRS operator, I'm talking about someone using a true GMRS radio up to 25-watts with a removable antenna, not one of these hybrid toy radios.

You're on your own now Joe. I have other things to do besides trying to teach you something useful when you won't listen.

Mark get help for your obsession with me, why allege that you are
being harrassed, then flood the group with questions for me. What do
you want Mark. You can't ask me questions, then when I respond to
your buffonery, allege that I am harrassing you. Why do you keep
stalking me, find someone else to dream about, your are mentally ill,
seek help.

>Both the MFJ 259 and 269 cover the 2-meter band....

>Autek Research makes a series of competing analyzers, one of which
>....[snip]....
>Reports on eHam.net seem to indicate that Autek
>has a build-quality problem even worse than MFJ's, and serious
>problems with customer support and satisfaction.

I purchased an Autek VA-1 which "measured" the Autek-supplied precision
resistors with a 10-15% error and it drifted terribily, but after I
complained by email and returned the unit (at my expense), they sent
me another (at their expense) which seems to work fine, so while they
had a build-quality problem, I have no complaints on their customer
support..

Well you got it all wrong. I dont have no 25 watts nor an external
antenna of any kind, just the 3 " rubber duck on top of the handheld.
You can lead me to beer but not water. Also am not a horse nor
a horses ass as you might think!!!!!!.

We all know that one of the most growing environmental problems that we are facing today is global warming and this is due to a lot of reasons that only points directly to our neglect to Mother Earth. And aside from those environmental problems that we are facing, the price of the petroleum gas are also skyrocketing day by day that it seems unstoppable and that it leaves the people feeling that they would have to pay for it with their arm and leg. Having built many Heathkits, I can assure you they were. :-)
Knowing how common 12v power supplies were/are, just look at the regulator
used in the PS for the Heath 2meter rig.

I will check out both of these. I still have a lot of Heath stuff. I
mean, when you are talking obscure, I even built the "Digital Clock" for
my wife. You know the one that stood 6' tall and used light bulbs stuck
into plastic segments for the display. Try to find any kind of bulb
suitable for replacing them!! The clock has languished in my attic for
years. I have recently given thought to changing the driver board and
just using LEDs. It's campy, but I still like that clock.

I still have a pair of monster Heathkit AS-1341 speakers in the living room --
in daily use since I built them in 1977, and still sound great.

15" slot-loaded woofer, two five-inch mid-range, and an array of three
dome-dispersion tweeters. Still the original drivers (Altec Lansing or JBL, I
forget...)

There is still no substitute for size. 8;)

Seek help Mr. Morgan, why do you laud false charges at an innocent
ham, and then allege someone made you do it. Take responsibility for
your actions, I'm sure that if you cause any harm, your victim will
ensure that you face up to your misdeed.

Ron,

Check with a farm supply such as Tractor Supply or even a good local hardware for grease which works well at low temps. Lithium grease is good, both for that and for general use. I am in a moderate climate, but those who live in extremes report it does the job. This topic comes up on bulletin board I subscribe to, and this is a recent comment from someone who would probably regard New England winters are balmy.

==========
Having often operated from the eastern part of Norway for many years with as daily temperature of minus 35 degrees in February - I have a little 'experience' from cold climates.

The long term solution is to change the grease to one that can tolerate the temperature and to mount a "motor warmer".

I used the heating element from a kettle. It keeps the rotor nice and warm in the winter ... but increases your electricity bill ... horses for courses ...

73 John. <la2qaa@amsat.org>

I have had very good luck using the synthetic grease you can find in any auto parts store. It keeps it's viscosity over a very wide range of temperatures and works well in Ohio summer & winter. It's more expensive and a little goes a long way.

Item is for sale on e-bay, auction ends Sunday 12-2 at 1900Z

To view item, copy and paste link below :

http://cgi.ebay.com/ws/eBayISAPI.dll?ViewItem&rd=1&item=290185692713&ssPageName=STRK:MESE:IT&ih=019

A magnificently built, balanced output antenna tuner for use with ladder line, open wire line.

Highlights & Features of this tuner:

The twin inductor/current balun design provides a truly balanced output.

(2) 14 uH roller inductors, coupled to a WW II vintage dial with 25 turns, 1/100 turn markings.

High/Low Impedance Switching: Switches the capacitor bank to tuner's input or output. "HI" position is used for impedances above 50 ohms; "LO" is used for impedances below 50 ohms.

Variable and fixed capacitance controls - continuous range is from 25 to 1250pf @ 4500 Vpk.

Variable capacitor dial is the classic 4-inch National Velvet Vernier.

Beautiful, real wood venier over aluminum front panel.

Dimensions: H,W,D = 8 X 19 x 15 inches, approximate weight = 30 lbs

Good luck with the bidding,

Bob WB2ICQ

MI5 Persecution Update: Friday 13 November, 1998

If You Intend To Reply, Please Read This

If you have any questions or observations you would like to share with me, then you are very welcome to reply to my fax number 0171-681-1190. But please.... keep your response to one page if you can! I have had several people faxing my article back to me, including one MP faxing back twenty pages. I do not know if he had anything intelligent to say in his 20-page fax because I applied judicious use of the "Delete" key on my computer. Faxes over a page or two will be deleted without being read.

MI5 Resume Hostilities in Response to these Faxes

When I wrote last weeks "MI5 Persecution Update" I remarked how quiet my life had become. No longer! MI5 have restarted hostilities with a vengeance the past week, in response I believe to the faxes I have been sending to members of the House of Commons.

On Saturday 7 November I went to Clapham Picture House cinema to see the film "Antz" (a very enjoyable film). At the cinema, I was verbally assaulted by a group of teenagers with the words "still crazy", repeated about ten times. There was a film with that name showing at the cinema, but it was clear their abuse was directed at me. I do not look ill, so why would they pick on me? answer, the incident was set-up by the persecutors. One of the teenagers also said to another, "I don't know what we're laughing at".

The following day, Sunday 8/11/98, I was on my way to play squash when I was verbally assaulted by a youth who said "it was so funny", without the slightest trace of humour. What he meant by this phrase was that was funny, and they were trying to humiliate me. I have heard this phrase "it was so funny" used at me before many, many times over the last eight and half years.

Please Encourage Keith Hill MP to Help Me

I live in a bugged house, bugged both for audio and video. My movements are monitored by MI5. The Security Service have followed me to Canada, to Poland and the Continent, to the States. I cannot work anywhere, not in England, not in Canada, because MI5 will destroy whatever employment I am able to obtain. I have asked Keith Hill MP to help me, and he has refused.

The situation is intolerable. It is Mr Hills job to help me out of this mess. So, please, as I said in the last fax a week ago: Do not waste your

time returning multiple copies of my faxes to my fax mailbox, as some of you have done. Instead;

Please encourage Keith Hill M.P. to help me.

I am sorry to be using this device to encourage Mr Hill to help, but I think eight and half years are quite enough and it is time something was done to bring this matter to a close.

MI5 Persecution : BBC Newscasters Spying on my Home

This week's topic is the quite extraordinary claim that BBC newscasters such as Martyn Lewis and Michael Buerk have spied on my living room while they read the news. I currently have an advert running for the next six months in Private Eye's "Eye Say" column (at a cost of over ₰200) which says,"MI5 Persecution - BBC Newscasters Spying on my Home"; the story of my campaign in the Eye is on my Website at; http://www.pair.com/spook/evidence/plaint/priveye.htm

BBCs staff magazine Ariel also ran my advert "BBC Newsreaders Spying on my home" for one issue in the Personal category on 8/July/1997 before it was spotted and axed by editor Robin Reynolds; please see webpage; http://www.pair.com/spook/evidence/plaint/ariel.htm

Beginnings

The very first incident in the "MI5/BBC Persecution" occurred in June of 1990, when a newsreader reacted to what she saw in my living room at home as she read the news. My mother had brought an apple for me into the room, whereupon the newsreader smirked and giggled, apparently finding this funny. I couldn't believe what I was seeing. I carried on watching news and other television programmes to see if presenters would show signs of "interactive watching"; to my surprise, this happened again and again. Unfortunately, I did not have my wits sufficiently about me to videotape these programmes, and it is now almost impossible to obtain recordings dating back to 1990.

Most of the "TV watching" has occurred on the news, and most of it in summer 1990, although some as late as autumn 1993. My website has a few extracts of what might be politicians "getting at" me, in particular John Major and interviewer Dimbleby sharing a joke about the "Knutsford Guardian" which is almost certainly about me.

I sold my portable TV in autumn 1990 and stopped watching television regularly. I realise now that this may have been a mistake. What I should have done was to watch TV and listen to the radio, but tape-record everything and make a note of what each excerpt meant to me. I would then be in a much stronger position as regards to evidence that I am now. That is what I am trying to do now, but unsurprisingly the TV/radio presenters have stopped getting at me, now they know they are being recorded.

Examples of Media Harassment

Here are a few examples which I can still remember of media harassment;

In early 1992 I was watching the BBC news with Martyn Lewis on a small black-and-white portable television at my then home in Oxford. I threw a term of abuse at Lewis; he flinched, then gave a grin and made a comment from which I understood that he had been on my side, but might have changed his mind as a result of what Id just said to him.

Victor Lewis Smith in his TV (BBC2?) program at the end of 1993, had a taxi-driver saying, "theyre all out to get me", to which VLS replied, "but you're quite intelligent aren't you?" (what a nice chap VLS is, compliments no less!)

Paul Daniels the TV magician, sometime in 1990-92 (sorry I can't be more precise but it was so long ago), made a "crying face" and put his face in his hands, which was his way of expressing that I was frequently crying in 1990-92, and that he and other media people found my crying funny.

Kenny Everett (deceased) on some talk show, compared me to a "huge ape" who "scratches himself"; he made some other remarks about what the "ape" got up to which unfortunately I cant remember. (I remember that Everetts comments were quite sympathetic and human, but were obviously about me.)

Stephen Fry on another talkshow (Wogan I think) talking about "masturbatory fantasies", he then referred to me with the words "you prat"; I wonder if the studio audience knew what he was talking about and to whom his comments were directed?

Griff Rhys Jones on Clive James' TV show, made a "lunatic face" (wide fixed grin) to which I said to the TV that he had a "face like a horse's arse", to which Clive James said to GRJ "did you hear that?"

Crimestoppers summer 1990, remarks by a Midlands police officer on the programme, while Nick Ross was presenter (as far as I can remember). The officer talked about "in car entertainment". Nick Ross said to officer, "why don't you stop doing it?" to which he replied, "we can't while he's like this".

BBC2 Newsnight in autumn 1993 had a piece on football hooliganism. A black interviewee said apparently of the hooligans, but in fact of me; "they're just idiots, carry on with the surveillance".

There was an incident with Jonathan Ross which I remember clearly; he was on both BBC and ITV television at the same time, one (ITV I think) was recorded, the other channel was live. Ross has a speech impediment which causes him to pronounce his "r"s as "w". I sarcastically said something about "Mr Woss" to the recorded channel, then turned over to where he was live, and he repeated "Woss" with heavy emphasis and sarcasm.

On the radio, in spring 1994, Chris Tarrant made a sarcastic remark in his morning show, saying "he says were trying to kill him, we should be done for attempted manslaughter", to which another of the studio staff said, "oh no, dont say that". His comment was in reply to a comparison Id made the previous evening between my persecutors and the Polish secret police who murdered dissidents.

Martyn Lewis Denies & Lies, But Wont in Writing

In February 1997 I wrote to BBC Viewer & Listener Correspondence and asked them to investigate the claim that their newscasters had engaged in "interactive watching". They replied that they had asked Martyn Lewis and Michael Buerk whether they had engaged in such practices, and that they had both made verbal denials to VLC, but were refusing to put their denials in writing.

I can understand that they might think that if they were to make written denials to me, then many other people with my condition might write to them with similar questions. But Ive asked a couple of journalists if theyve been writing about me, theyve made written denials, Ive believed them, and I have not put their denials on my website because, since I believe their denials, it would not be relevant to publish them.

To me it looks as if Lewis and Buerk are happy to lie verbally but not in writing, because written falsehoods would place them unambiguously in the wrong, whereas they can try to talk their way out of verbal lies if they are ever caught, or perhaps even deny the verbal lies completely? If they lie without shame, then why would they have any shame about future lies about lying?

One of the strangest aspects of "TV watching" is that Buerk and Lewis have convinced themselves that their "interactive spying" is reasonable behaviour. Martyn Lewis thinks of himself as a "gentleman". He expressed in 1992 that he was "on my side". If this matter ever comes out into the open, I wonder what these newscasters will have to say for themselves, and what the British public will make of their behaviour?

Media Persecution Evidence on my Website

You may directly access the Evidence section on my website at URL;

The category currently contains four video segments, a number of audio files and three published articles. The first video of ITN's John Suchet is unfortunately a mistake - after looking at it again it is obviously not about me. The two Ken Clarke excerpts may or may not be about me; it is funny that he should keep on harping about "paranoia" and "madness", but I have given these ratings of only 30% certainty, as it is more likely that they are not about me in particular, and Clarke is simply displaying the normal prejudices against the mentally ill found in much of society.

The piece I find most interesting is the Dimbleby/John Major interview from April 1997. I have assigned this a 90% rating. Dimbleby starts by emphasising a report from the "Knutsford Guardian". Major recognizes what's going on and joins in with a falsely apologetic "heaven forfend". The emphasis is on the first syllable pronounced "nuts" in "Knutsford", which is repeated three times. Of course this is hardly anywhere near convincing evidence; the really clear items were all in 1990-92, and they are basically unobtainable now.

If you're reading the website, have a look at the two files from David Hepworth's programme on GLR radio. The first one from 21/Feb/1997 has him

talking about an "embarassment" of prizes and "absolute obscene", in reference I believe to the verbal sexual abuse that was being used against me at the time (and which unfortunately is still current). In the second file dated 9/May/1997 he again talks about "absolute embarrassment" of prizes, followed by laughter. To my mind he knows I am listening to his programme, and deliberately makes these remarks for my benefit, with very little attempt to disguise their purpose.

Bernard Levin - "Fanatic's Fare for the Common Man"

On 21 September 1991 this article by Bernard Levin appeared in The Times. It is reproduced in the Evidence section of the website, or may be accessed directly at URL;

To my mind, Levin's article described the situation at the time and in particular a recent meeting with a friend, during which I for the first time admitted to someone other than my GP that I had been subjected to a conspiracy of harassment over the previous year and a half.

Levin writes about a "madman running loose about London" who "bursts into tears, and swears it is all true. And it is." I am pleased to agree with his assertion that "it is all true" because the truth is what I presented to my friend in September 1991 and it is what is being presented to the readership of these articles now.

Conclusion

The harassment, in particular media persecution, was at its strongest in 1990-92. Today, I am recording everything I watch, read and listen, and the media have pretty much given up. It is now incidents "in public" which make up what there is of MI5s persecution. But much of the material from 1990-92 still exists in archives, although the organisations which have those archives generally wont make the material available to the public, for copyright and other reasons.

MI5 can no longer employ the media to persecute me, partly because journalists now know who is behind the persecution, and also because I would publish any instances. My mistake during 1990-92 was to not record instances as they happened; Ive learned from that mistake, and know better now.

BBC newscaster Nicholas Witchell cant stop himself laughing

During 1990-91 there were very many instances of "interactive television" where newscasters and other TV presenters saw on a screen before them what was happening in my home, and reacted, frequently by laughing at me. During this period I unfortunately did not record these programmes. For the last year or two, I have been recording everything I watch, and there has been a drastic decrease in such incidents.

However, on occasion, television presenters do still engage in "interactive watching" and react to what they see. This has been evident with Jon Snow of Channel Four News recently - a particularly interesting case, since it has been established that he cannot be corrupted by money (it is well-documented that MI5 offered him a tax-free salary and he turned them down). I wonder what device MI5 are using to encourage him to do the "interactive watching"?

On Saturday 10 April 1999 at 7pm, Nicholas Witchell on BBC2 News reacted when he saw that I was watching the programme, and I have his reactions stored safely on videotape. I have watched this tape several times and I am entirely confident that my evaluation of his reactions is correct. For several minutes his upper lip quivered in mirth as he attempted to keep a straight face. Then finally his self-control evaporated through the excuse of a weak joke and his face collapsed into a grin.

The strange thing is that I dont know why he was laughing at me, what I had done recently to "deserve" to be laughed at. The MI5 persecutors usually manage to invent some justification as to why people should laugh at and/or abuse me ("hes an X", "it was so funny" etc), so Mr Witchell could have been laughing for any number of reasons. Perhaps he found the views I have been expressing in these articles amusing? I suppose if youre paid enough money and ordered to laugh then even the most innocuous thing becomes funny.

Jon Snow of Channel Four News cant stop himself smirking, either.

On 12 February 1999 I was watching Channel Four News presented by Jon Snow. As usual, I was recording the programme, so that if anything out of

the ordinary happened, Id be able to go back and watch it again.

Now, Jon Snow, by his own claim, is uncorruptible. He says he turned down an offer of a substantial tax-free salary from MI5 - they wanted to make him their mouthpiece, and he told them where to get off.

So you will be most surprised to learn that Jon Snow "interactively watched" me that evening, and on many other evenings. Approximately fifteen minutes into the programme, he announced that the US President would be making a live appearance at about 7.30pm; I looked at the clock on the mantelpiece; and Snow saw me looking at the clock, and visibly tried to suppress a smirk.

Uncorruptible, are you, Mister Snow? If not money, then why are you watching me, Mister Snow? Are they forcing you to watch me? Cant you turn the monitor off, Mister Snow?

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

Comparing the MI5 Persecution with German "Final Solution"

It might seem offensive to compare the mass murder of millions of civilians in wartime with the peacetime persecution of merely one person. Yet the comparison has been coursing through my mind for several years now, because the brutality of German intent to "sub-humans" is very much comparable to the brutality of British intent to someone they vituperate and term "not up to British standards". The methods may differ, but the persecutors mindset is the same.

The Germans first targeted the mentally disabled, too

During WW2 millions of ethnic Russians, Poles, Jews, mentally ill, gypsies and other minorities were rounded up and murdered in purpose-built camps by the German regime, in the name of "racial superiority". Fifty years on, the British Secret Police, MI5, instituted a campaign of mass hysteria; but in their cowardice, limited their activities to one single victim.

It is instructive to note that the early German "cleansing" effort was directed primarily not at Jews, but at the mentally ill. The Nazis set up the T4 project in the thirties to "cleanse" away 70,000 mentally disabled people, including schizophrenics and epileptics. After WW2 the Jews with their media influence used the reaction from the holocaust to roll back anti-semitism in the Western countries; however, the mentally ill are today still a persecuted group in the modern Western world as they were under the Nazis (the current Jewish home secretary in the UK intends to bring in laws for incarceration without any criminal charge for some mentally ill people - he protects his own minority, but does nothing for the other minorities in todays society), and this continuing bias forms a central cause for the current acts of persecution in the UK.

Widespread knowledge of what is happening to the "un-British" minority

In both the German persecution of the thirties and early forties, and the current British persecution, many, many people are well aware of whats happening. There is widespread complicity through inaction of populace; and in a substantial proportion of the mainstread population, the persecution had/has widespread enthusiastic support; yet in both the German case in the 1940s and the British today, the existence of persecution is a mass secret which must be never admitted out loud. In the recent Lawrence case this "secret bigotry" has been termed "institutionalised racism", and that is a very good word for what the British are doing today The persecutory attitudes and omerta regarding them are so deeply ingrained in the national psyche that they define the national mood

During WW2 many Germans knew minorities were disappearing, and through inaction quietly condoned their government's mass murder of "un-German" minorities and inferior "foreigners"; and in the 1990s, similarly, many English people know what the MI5 British Secret Police have been doing, and not only condone it, but actively take part, because of xenophobia against the "un-British" unit minority that is the target of "British" actions. This attitude by the British persecutors has been made explicit through the words "he's not up to British standards"; the British seem to have found their very own "untermenschen" to victimise.

Why these obsessive "holy wars" happen

This type of aggression occurs when the majority is threatened or humiliated in some way, economically, militarily or culturally. In pre-WW2 Germany the threat was primarily economic and military, following Germany's humiliating defeat in the first world war and the reparations it was forced to pay. In modern Britain, one might guess that the majority English who are behind the persecution feel pressured by the swiftly diminishing status of Britain in the world, and the rapidly increasing coloured colonisation of their country, which in time will see the ethnic English a minority in their own land, and their more antisocial elements, unable to reply to the obvious threat, instead project their aggression onto another, weaker, unit minority

In both cases there is a whiff of "holy war" or irrational obsession with the persecution. Certainly the German behaviour fifty years ago bordered on the not-quite-sane, and the current British behaviour towards their chosen victim is strongly tinged with a leave-taking of reason. And the choices open to the victims are the same, since MI5 will never allow me to escape them, "if he tries to run away we'll find him", just like the commandant of Auschwitz telling the new arrivals, "the only escape is through the chimney".

The Victim Will Destroy Us if We Dont Destroy Him First

The persecutors propaganda is the same. Fifty years ago the Germans said, "if we don't do it to the Jews then the Jews will do it to us"; and MI5's propaganda in the early nineties concentrated on their victim as a "monster" aesome "untermenschen" minority.

"We are decent fellows" say the Brutal Persecutors

During the course of researching this article I read part of the very interesting book, "Hitler - A Study in Tyranny", by Alan Bullock. This volume contains a quote from Himmler on the "Final Solution";

"Most of you know what it means when a hundred corpses are lying side by side, or five hundred or one thousand. To have stuck it out, and at the same time .... to have remained decent fellows, that is what has made us hard. This is a page of glory in our history which has never been written and is never to be written."

In the MI5 persecution, too, there is a thread of deliberate brutality to the sick and vulnerable, while the persecutors maintain that "we are decent fellows". There is almost a conscious schizophrenia in the self-attitudes of the Security Service operatives and those in the public who they employ against me, which reflects the contradiction evident in the German attitude above. On the one hand, they stoop to the lowest and most base behaviour; yet at the same time, the MI5 operatives tell themselves that since they are civilised British people, then surely they must by definition be "decent fellows". Any indecency is made the fault of the victim; "hes making us persecute him, so we need feel no guilt".

Yet the conduct is atypical of the way these peoples see their normal modes of behaviour. Befslaughter was not typical of normal German behaviour up to that point. Similarly, the current MI5 abuse goes against the grain of British self-image as being "reserved" and "decent", since they are using terms of abuse which are common among blacks and other supposedly less-developed races, but not among the English.

Conclusion

The ultimate aim of both persecutions is the humiliation and physical extinction of the persecuted group. The Germans did this in a very direct way; the British Secret Police MI5 are acting indirectly and relying on self-extinction of their target, because in peacetime and in the current somewhat false climate of "political correctness" more direct methods are impossible. If MI5 undertook more direct action the mass "omerta" would be broken.

I have written this article with sincerity to show how a historically recent persecution in another country parallels what is being done in this country today. In both cases, the evil-doers are of their countries establishments, and rely on widespread tacit support to maintain the persecution and omerta around it. While the holocaust was undoubtedly the greater evil, it is important to be aware of the fact that had the Germans not been defeated fifty years ago, their plans would have gone through to total completion. In Britain today no force threatens the "permanent government" of which the Security Service forms a part; and it looks very unlikely that the wrongs perpetrated by the MI5 secret police will ever be revealed to public view, and the British secret state brought to justice for its evil actions.

MI5 Persecution Update: Friday 30 April, 1999

If You Intend To Reply, Please Read This
Please.... keep your response to one page!. Faxes over a page or two will be deleted without being read.

Somewhere between 0 and 100%

The last few days there have been no clear recordable instances of abuse. However, while travelling on the Underground, while walking around near my home and going to friends homes, I am constantly troubled by thoughts that those people over there might be about to get at me; that the couple sitting in the opposite seats laughing are in fact laughing at me; et cetera, et cetera.

A comment by a scientist to the BSE inquiry sticks in my mind. He described the possible scale of the epidemic as "between 0% and 100%". It might not be happening, it might not happen at all, to any discernable degree.... or it might be total. Without clear recording, which seems to have become impossible the last couple of weeks, there is no way of knowing whether the harassment really is continuing, whether we have entered a temporary hiatus, or whether perhaps it has perhaps stopped for now.

But for the time being I think there arent any reasons to dicontinue these faxes. I only re-started them six weeks ago in response to a resumption of MI5 harassment; and I think I will need to be more convinced of absence of persecution before I discontinue my complaints.

The Newscasters are still watching

In the last few weeks there have been at least a couple of fairly overt instances of "interactive watching" by newscasters. I reported this in a previous "MI5 Persecution Update".

These instances are really very rare compared to 1990-91, when there were many dozens of such occurrences. Undoubtedly the reduction is due to my practice of videotaping everything I see. Recently I had the opportunity of showing this years "happenings" (Jon Snow/Nicholas Witchell) to my psychiatrist, and he agreed that in both cases the newscasters were expressing merriment without visible cause, and that objectively it might be possible for my claims to be true - although of course other people reported similar thoughts to him, and this thinking is usually a symptom of illness.

Read About the MI5 Persecution on the World Wide Web

The March 1998 issue (number 42) of .net Magazine reviews the website describing it as an "excellent site". Since August 11, 1996 over 50,000 people have browsed this website.

You are encouraged to read the web pages which include

a FAQ (frequently asked questions) section outlining the nature of the persecutors, their methods of harassment through the media, people at work and among the general public

an evidence section, which carries audio and video clips of media and workplace harassment, rated according to how directly I think they refer to me

objective descriptions of the state security agencies involved

scanned texts of the complaints I have made to media and state security agencies involved

posts which have been made to netnews over the last four years on this topic

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

MI5 Waste Taxpayer Millions on Pointless Hate-Campaign

Recently I was talking to an independent observer about the nature and purpose of the perceived campaign of persecution against me. The person I spoke to, a highly intelligent man, said he was struck by the utter pointlessness of the perceived campaign against me. He also said that, if my theories were in fact true, many people would have to be involved, in the surveillance itself, and in the technical side of the delivery of information from my home to TV studios for example, if the "interactive watching" were happening as described. He voiced these thoughts without any prompting from me; but both I and other observers had arrived at pretty much the same conclusions, some years ago.

I saw a team of four men at Toronto Airport in 1993

To carry out the surveillance alone, full-time, would employ four or five men, or their equivalent in terms of man-hours. Each man would "work" an eight-hour shift, so you would need at least three men doing the surveillance, plus a connecting link / manager. An indicator that this estimate is correct arrived in 1993, when I was accosted by one of a group of four men at Toronto Airport; he said, laughing, "if he tries to run away well find him". Plainly these were the men who had been involved in the intrusive surveillance of me for the preceding three years.

On other occasions, I have seen the same man on two or three occasions. On one such occasion, at Ottawas Civic Hospital in November 1996; he gave his name to the doctor as "Alan Holdsworth" or some such; my hearing is not very good sometimes and I am not sure of the surname, although I am sure "Alan" was his first name. I saw exactly the same man again in Ottawa, at the airport, in July 1998. Obviously, other people must be "working" with

this person; he would not be the sole agent employed in this case.

Usenet readers views on the Cost to MI5 of Running the Campaign

Here's what a couple of other people on internet newsgroups / Usenet (uk.misc) had to say regarding the cost of running such an operation...

PO: >Have some sense, grow up and smell reality. What you are talking about
PO: >would take loads of planning, tens of thousands of pounds and lots of
PO: >people involved in the planning, execution and maintenance of it. You
PO: >must have a very high opinion of yourself to think you are worth it.

and......

PM: >But why? And why you? Do you realize how much it would cost to keep
PM: >one person under continuous surveillance for five years? Think about
PM: >all the man/hours. Say they _just_ allocated a two man team and a
PM: >supervisor. OK., Supervisor's salary, say, #30,000 a year. Two men,
PM: >#20,000 a year each. But they'd need to work in shifts -- so it would
PM: >be six men at #20,000 (which with on-costs would work out at more
like
PM: >#30,000 to the employer.)
PM: >
PM: >So, we're talking #30,000 x 6. #180,000. plus say, #40,000 for the
PM: >supervisor. #220,000. Then you've got the hardware involved. And
PM: >any transcription that needs doing. You don't think the 'Big Boss'
PM: >would listen to hours and hours of tapes, do you.
PM: >
PM: >So, all in all, you couldn't actually do the job for much less than
PM: >a quarter million a year. Over five years. What are you doing that makes
PM: >it worth the while of the state to spend over one and a quarter million
PM: >on you?

Those are pretty much the sort of calculations that went through my head once I stopped to consider what it must be costing them to run this operation. At the very least, a quarter million a year - and probably much more, given the intrusive and human-resource-intensive methods employed. Times nine years. Equals well over two million pounds - and probably much, much more.

Its wasteful for someone with my skills to be unemployed

The wastefulness of the MI5 campaign against me is not just that of futile expenditure on their side. It is also extremely wasteful for someone with my talents to be unemployed and on a disability pension. I am highly qualified in numerate disciplines, yet am unable to work, specifically because of the MI5 hate-campaign against me. It is a terrible waste of resources for a supposedly efficient economy like that of the UK to be squandering the talents of a skilled and capable worker.

I made every effort to remain in employment for as long as I could, but ultimately I was defeated by MI5s employment of massive resources specifically targeted on my workplaces with the sole aim of seeing me

evicted from those workplaces. You might expect this sort of behaviour from the Stasi or some other secret police force in a communist country where labour is cheap, and the governments aim on seeing its citizens confined; but for a supposedly free and efficient economy like Britains, the wastefulness resulting both directly and indirectly from the Security Services activities is simply criminal, and should never be allowed.

The international dimension means the costs are multiplied many times overoer had any sense, then they have surely taken leave of them over the last nine years.

Four years of persecution in Canada

The persecution re-started within less than five minutes of my arrival in Canada, as documented above, and in the "frequently asked questions" article on the website. The words, "if he tries to run away well find him" spoken by one of the harassers at Toronto Airport are now imprinted on my mind.

A year later I emigrated to Canada, intending to find a job and settle there, hoping that MI5s interest in me might dim with time. I did manage to find work there, but my hopes of avoiding Security Service interest were ground into dust. As detailed above, I saw the same man in November 1996 and July 1998, both times in Ottawa. Apart from these encounters, there were numerous incidents between 1994 and 1998 of harassment, of an identical nature and in most cases using identical words to what had occurred in the UK. It became quite clear to me that the permanent surveillance and harassment operation which MI5 had subjected me to in England was being continued.

For a team of four or five men to be employed overseas must cost a lot more than if they operate in their home country. And for MI5 to continue the operation for a period of over four years, continuously, must cost many hundreds of thousands of pounds. This confirms my belief that the state is funding the campaign against mehat the Security Service receives current annual funding of #160M. Divided by 1850 staff, works out at #86,000. But the unit annual cost of each "watcher" must be much higher than this, especially given the frequently mobile and overseas nature of their actions of the last few years. A very conservative figure might be a little over #100,000 pa for each of a team of five people, or half a million pounds per year. For nine years, so far. So the most conservative estimate of the surveillance element alone is perhaps four or five million pounds since 1990.

This guesstimate is of course theoretical - I am not privy to inside details of how MI5 split their funding. But to take some other examples, the cost of a US counter-surveillance specialist per day is USD 5,000. Even if the agents permanently assigned to me are not of this calibre - even if they employ specialists when difficult work planting bugs etc is encountered - their salary and support costs must still be very high. The individual agents are doing well for themselves as they are well-paid to exercise psychopathic instincts which in any sane society

would see them in prison; but the taxpayers who must fund this terribly wasteful exercise are being "done" out of hundreds of thousands of pounds each year.

It must be emphasised that the above estimates are highly conservative. Besides the surveillance operation, it must carry a high cost in man-hours to propagate covert slanders through the population; to setup and maintain the "interactive watching" links to TV and radio stations, which these organisations continue desparately to "lie and deny"; and to induce antipathy in co-workers which would not otherwise exist.

Why they are wasting Millions of Pounds on a "Nobody from South London"

As remarked in the prologue to this article, it is really most extraordinary that the Security Service spends a chunk of its budget, every year for nine years so far, on a meaningless campaign against a "nobody from South London". That they are spending such a large amount of money has been confirmed to me on several occasions, usually by oblique references to "its costing this country millions". The supposed "logic" behind the persecution is that MI5 wish to avoid their harassment of me, and the involvement of the UK media, to be made public; yet as the reader will appreciate that is a circular argument, "theyre doing it because they want to keep it secret and avoid humiliation for themselves and their country" begs the question, "why did they start doing it in the first place?", to which in truth I myself do not know the answer.

Plainly MI5 with its rich budget can afford half a million pounds a year to waste on a "nobody from South London". Some time ago I was talking to a British surveillance professional on Compuserve who told me "this work costs a lot of money and is usally because the person I am following has done something (usually criminal) to warrant all this money and time being spent." Yet in this particular case it is plainly not the "victims fault" that the harassment is taking place. The hate-campaign against me is completely the creation of the obsessive psychologies of the MI5 agents who have made themselves my persecutors; it is obviously a "personal" campaign for them, and for years they misuse taxpayer funding to feed their insane, unnatural and fixated fantasies.

Hey Ted.

How about not posting Ebay ads to an antenna group?

Much appreciated, and it saves a complaint to Ebay.

Thanks for the consideration.

2094. save batteries: AM or FM?

Newsgroup: rec.radio.amateur.equipment
Date: 2007-12-03 04:02:42 UTC
From: jidanni@jidanni.org
Message-ID: <87zzzzzjfzs.fsf@jidanni.org>
Source record: 3918

Gentlemen, which uses less power, AM or FM?

It's hurricane season and power is out and all one has is a pocket AM/FM(mono) $3 radio, receive-only of course.

Let's say the same network news program can be listened to on an AM station or an FM station and we want to save battery power. So of course we use the earplug instead of the speaker, but which should we select, the AM or FM station? (If power use is equal then we will listen to FM as it sounds a little better.)

According to Horowitz & Hill's "The Art of Electronics" it seems that FM demodulation typically employs the use of one or two more op-amps than does AM modulation. (pg. 894) Of course, there are gobs of different receiver designs out there, and there's nothing preventing your radio's AM receiver from being less efficient than your FM receiver. So all things equal, AM is probably more efficient, and your biggest concern is simply how loudly you listen to your broadcast. I'd guess that even a small adjustment to your AF amplification will offset the current draw difference between the two modes. Your $3 receiver probably uses the cheapest circuits and components available, but i'm not experienced enough to say how that might change the game. It might be fun to get one of those kit AM radios that uses nothing but the broadcast energy to power a small ear piece - no batteries required. Hope that helps!

Nick, KI4YSP

A detector runs without extern batteries and power in the AM band and it
could by a good backup in such situations.

At the risk of setting off a war, I'd like the groups opinion of the "best" first HT. I want a 2m/70 cm unit, super compact is nice but not a priority. I think I want a full keypad, and I'm not sure on power.

Specific models? Brands? Power? Other must- or should-have features?

Please, replies to the group.

And you think eBay would care less? It would not harm their profits and
that is the only thing they think of.

Wouldn't even take a guess as to the best.
But I have the Kenwood TH-F6A

Very compact tri-band 144/220/440MHz

0.01~ 1300 MHz RX (widest transceiver in the industry)

See Kenwood site
http://www.kenwoodusa.com/Communications/Amateur_Radio/Portables/TH-F6A

And see what users think of their HT's at URL:

The answer might depend most on what kind of receiver you have. Most that I am aware of used (pretty much) the same transistors on AM as FM. You can use a VOM meter to measure battery current drain on AM and FM at a given volume level to be more definitive, but I think it will not be much different.

What is wrong with just having a set or two of spare batteries? Alkaline would be my preference.

$3 radio? Must be a very el-cheapo, no?

FM tends to fail before AM, mainly due to the fact that once the gain in the
IF stages drops far enough for it to no longer limit, the signal starts
getting AM noise in it. Also, FM detectors don't work as well at lower
signal levels.

I received this message from a friend and am not sure what to recommend.

Message is:
" I need a program that I can use to receive code sent by me to the computer in hopes of mastering my paddles. I have a keyer so I would assume something that would use my sound card would be the easiest but if a program that connects to one of the computer ports would be better that would not be a problem.what program would you recommend for this?"

Any ideas? Post here please. Thanks

Lamont

The original question was about "which uses less power, AM or FM" and I'll
stand by my speculation that it will depend on the receiver (and his
discussion was about a $3 radio, but did not specify transistor or what).
Some radios have switches that alter the circuitry slightly and without
knowing exactly how that is accomplished, we can't say whether one mode
draws more battery current than another. Most dual band radios that I've
seen use the same IF strip but alter the local oscilator frequency range.

The context of the question suggests he wants to know if the battery will
last longer on one mode or the other. Without more details, he would do
best to actually measure current drain with a VOM than to rely on
speculative arguments.

An AM radio station can be monitored FOREVER with a crystal receiver
using a reasonably sized long wire antenna, a good ground, and no
STEENKIN' batteries.

But, maybe that's not `sexy` enough for the OP.

A simple radio using a single specialized IC and a high impedance
earphone. Said to run for a year of continous useage on one AA battery.

Geoff.

I have restarted my former SDR-1000 blog and it now focuses on
Perseus, which has become my main receiver. If you wish to follow my
discoveries and comments, please check out:

http://www.perseus-sdr.blogspot.com/

There seems to be little hands-on information in the English language
about Perseus currently, other than the Perseus_SDR Yahoogroup. As Perseus
begins to appear in more and more DXers' shacks, I hope this blog will
help tropical band and medium wave DXers in particular share their findings
on this unique SDR.

Posting-Frequency: posted monthly
URL: http://www.faqs.org/faqs/radio/personal-intro/

Changes followed by "|".

The rec.radio.info newsgroup, first established in 1993, has been
recently revived by an active moderation team. We are currently seeking
suitable information, FAQ, and bulletin articles from the entire
rec.radio.* newsgroup hierarchy for simultaneous cross-posting to our
newsgroup.

We are seeking a replacement maintainer for the following information
bulletin formerly posted to rec.radio.amateur.* (and currently archived
at http://www.faqs.org/faqs/radio/personal-intro/ ):

radio/personal-intro
Subject: Guide to the rec.radio Newsgroups
Maintainer: jeffreyh@Hawaii.Edu (Jeffrey Herman)
Last Posted: 9 Nov 2001 06:18:17 GMT
Posting-Frequency: 15th of each month

We are willing to provide any technical support necessary to get this
article updated and automatically posted again at a regular interval.
This would include establishing contact with the original maintainer for
any necessary permissions. We would prefer to seek a new, dedicated
maintainer at this time, rather than start auto-posting the original
article ourselves.

For more information about our newsgroup, see:

http://www.panix.com/~rram/usenet/rri/index.html

Please direct any comments, questions, or criticisms to
rec-radio-info-request@panix.com.
```

I use a PST-63 turning a large array. I drained out the gear lube and
packed the thing full of white Lithium grease. Works just fine down
into sub zero temps although it's rare to see below zero around here
now days.

There are many freeware code reading programs on the
web. All work through the sound card and will read code from
a receiver or from a local source. Most will also send code
from the keyboard.
I don't think this is helpful for learning code. I
suggest using a code sending program, I like the G4FON
"Kotch" trainer, a Google search will find it. This program
can be set to send code from any text file.
Another good source of practice material is the W1AW
web page on the ARRL site. This has on line MP3 files at
several speeds. Can't vary the tone but its good machine
sent code. I think this is important to use for learning
because it gives you a standard for sending.
I may be very old fashioned (but so is Morse) but I
still think a beginner should start with a straight hand
key. Using a keyer requires learning a couple of things at
once. After getting pretty good with a hand key one can move
on to a keyer or bug.
BTW, code reading programs will generally tollerate a
reasonable amount of bad sending so the fact that one can
read your sending may not mean much in terms of quality.
Probably a plain sound recording of the sending is more
revealing. If you can read your own a couple of days later
you are probably doing OK.
BTW, the G4FON program allows setting the code for some
common variations like dithered timing and can introduce QRM
and QSB.

Back in the bad old days, when much wire and radio
traffic was handled by hand the ability of an operator to
read bad fists was important. This is pretty much like being
able to decipher bad handwriting. I think you have to get
pretty darn good to be able to do it. Code is also something
like learning shorthand: it becomes a life-time avocation,
provided you like it. I learned code in my teens, back when
dinosaurs roamed the streets, and am still working on it.

Kenwood TH-G71A with the optional 6-cell alkaline battery pack. Long
battery life, high power, use AA-rechargeable or alkaline, your choice.

2169. IC706IIG warm-up problem

Newsgroup: rec.radio.amateur.equipment
Date: 2007-12-09 18:45:47 UTC
From: Alan Peake <adpeake@killspam.internode.on.net>
Message-ID: <475C37DB.2010202@killspam.internode.on.net>
Source record: 3826

Hello all,
Looking for a few clues on a problem that two of us are having with the IC706IIG. On a cool day - say about 15C - both sets are fine at switch-on but about 15-30 minutes later, the transmitted and received audio becomes very noisy. Then, as the sets warm up, the problem disappears. It only seems to happen on frequencies above 60 MHz and looking at the audio out for a single input frequency, the spectrum appears to be smeared all over the audio bandwidth. I feel that a PLL is dropping out of lock somewhere but haven't managed to track it down yet. If anyone has had a similar experience or knows what the problem is, I'd be most grateful for any help.

Hello..

I have to choose good UHF Handheld for resonable price of'course..It will be used for communication in the shipyard,onboard of the vessel..Problem is the range..Every steel bulkhead or insulated wall will have a big influence on it..What's your experience and proposition regarding this matter? Any suggestion will be appreciated..

I use a Kenwood TK370 UHF HT that works great.
It's tough, the battery pack has good life.
I use mine on commercial and amateur everyday.
They're on ebay all the time for good prices.

Dear Sir / Madame,

Have a nice day!

This is Jenny form Edlite Company Limited.

Edlite Company Limited is a professional advertising solution provider developer and manufacturer located in Guangzhou, China. We've worked in this industry for nearly ten years, and with a full experience, we cooperated with more than 30 company in different countries and areas of the world.

Slim light box is a unique new advertising concept and medium. Using high power LED technology, which allows low heat generation, low power consumption, long lamp life span and even illumination across the viewing area. Due to the ultra slim size of the lamp.

What are the advantages?

A. Super slim,only 11~20mm thickness;

B. Single and double sides are available;

C. Flip frame design ,very convenient to fix and change the picture inside.

We look forward to the opportunity to provide you most competitive products as well as best service from China. PLS feel free to be in touch should there be any intretsing item.

Sample is available upon yr request.

** Welcom yr any inquiry mails or to be online MSN for further details and discussion **

Thanks & Best regards,

Jenny

Edlite Company Limited

Will you shut the fuck up already, fucking psycho?

Take your medication or go jump of a cliff. Or both.

K9YA Telegraph
Fifth Anniversary For The Good News About Amateur Radio

It's been another great year at the K9YA Telegraph. Thanks to your strong and continued support we're looking forward to celebrating our fifth anniversary in January 2008.

There's a definite buzz on the 'Net with the Telegraph earning enthusiastic comments from bloggers, reviewers and in discussion list threads. As we wrote at the completion of our first year: "Our success derives from you, our large, enthusiastic and devoted subscriber base worldwide, and to the writers whose contribution of personal stories-at once fascinating, humorous, enlightening and compelling-made the Telegraph staff's inaugural year one of consistent joy and fulfillment." That truth remains unchanged, but ever more encompassing as more of you, drawn from the international ham community, have joined the Telegraph readership and lent your experience to enlighten, evoke and entertain.

The Telegraph staff continues in its fifth year-as in our first-ebullient. Thank you for your messages of praise and encouragement, and remember: we're always on the lookout for your good story, or two.

The K9YA Telegraph is a free, monthly, general interest amateur radio publication read by hams in more than 100 countries. The Telegraph is a full-color e-Zine providing the stories and features most wanted by our subscribers because our subscribers write it. Check it out; we think you'll like it too.

http://www.k9ya.org

Subscribe FREE to the K9YA Telegraph. It's FREE! It's FUN, It's ALL ABOUT HAM RADIO!

The January 2008 issue includes:

A Scholar's View... By Philip Cala-Lazar, K9PL

The Race with Obstacles By Francisc Gr&#65533;nberg, YO4PX

Lincolnwood Pack 74's First JOTA By Joel Byron, WD9ICL

There Were Angels Dining at the Ritz By Rod Newkirk, VA3ZBB/W9BRD

Hog Morse By K9YA Telegraph Staff

Ham Quips By Dick Sylvan, W9CBT

If you're in the mood for Morse, hankering for history, gluttonous for gear, ravished for a review, needing nostalgia, or just plain famished for fun, you'll find it in the K9YA Telegraph.

To download sample issues, subscribe or write an article, visit the K9YA Telegraph Web site. http://www.k9ya.org

Nice site for Christmas deals.Discover key deals and specials at a
site that had tons of retailers and services at http://www.christmasplayland.com
.There is also a nice job search section as well that really helped me.

KVG is the one I remember right now. They are at the following address:
KVG
2240 Woolbright Rd, Ste 320-A
Boynton Beach, FL 33426-6325
407-734-9007
fax 407-734-9008

I don't think they have a web site.

73, Erich

What frequency do you want the filter at?
Ten Tec,
Icom,
Yaesu,
and
Kenwood
all use different intermediate frequencies.
INRAD supplies a variety.
Are you looking for one at high frequencies or low?
Are you building your own system?

Ed, N5EI

2305. FS Kenwood TS-830S + Accessories

Newsgroup: rec.radio.amateur.equipment
Date: 2007-12-15 08:17:55 UTC
From: West <nospam@gte.net>
Message-ID: <T4M8j.180$JW4.148@trnddc05>
Source record: 3729

FS: Absolutely beautiful cosmetic and functional condition Kenwood TS-830S. Late s/n from non-smoking home, well cared for. More than full output with recently replaced final tubes. System cleaned and calibrated to manufacturer's specs.

Comes with Matching Antenna Tuner, matching External Speaker with 3 filters and 2 inputs and Kenwood MC-50 matching Desk Mic, with owner's and service manuals. Pixs provided for only serious buyers.

References provided upon request.

Good Luck,
west
AF4GC

"one useless man is disgrace 2 become a law firm 3 or more become a congress"
adams

woger you are a Congress all in your own head

http://kb9rqz.bravejournal.com/
altopia is never used by KB9RQZ
nor is Konstans@hotmail.com ever udsed on the usenet from anywhere but google and noow
motezrella

posts from these sorucees are fakes

and get ou the newly recovered KB9RQZ.blogspot.com as well

G

"one useless man is disgrace 2 become a law firm 3 or more become a congress"
adams

woger you are a Congress all in your own head

http://kb9rqz.bravejournal.com/
altopia is never used by KB9RQZ
nor is Konstans@hotmail.com ever udsed on the usenet from anywhere but google and noow
motezrella

posts from these sorucees are fakes

and get ou the newly recovered KB9RQZ.blogspot.com as well

Hi , Im looking for the following Radio Shack items...

wanted - Radio Shack novelty radio model 12-465 - itsa red radio
shaped in the word 'Radio Shack"

wanted - Radio Shack garbage can - must be in good condition ;)

wanted - Radio shack weather station

Or, any other Radio Shack paraphernalia wanted

if you have anything that might interest me pls send me an Email

mkxATsympatico.ca

2322. MI5-Persecution: How Could It Be True? (489)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-12-16 10:43:12 UTC
From: MI5-Victim@mi5.gov.uk
Message-ID: <m07111610430976@4ax.com>
Source record: 3746
Cross-posted to: alt.testing.it,rec.radio.amateur.equipment,de.comp.os.unix.x11,finet.sex,free.uk.talk.edinburgh

MI5 Persecution: How Could It Be True?

If you have the patience to read these articles you will be struck by how apparently fantastic the claims being put forward are. You may ask yourself why such seemingly nonsensical assertions are made. This matter has been discussed on the Internets UK-local newsgroups for three years now, and the denizens of the uk.misc newsgroup (the so-called "miscreants") have come up with a number of theories to explain these posts; it has been variously suggested that they are a troll (an artificial creation for the amusement of its author), that they are made by MI5 themselves with the purpose of discrediting other conspiracy theories, and that the poster is mentally ill and the articles are symptomatic of the illness (the view held by most miscreants).

Are these claims the product of mental illness, or is that just a cover?

The most obvious explanation, that the claims made result from the admitted mental illness of the author, is the one which the persecutors intend be the one accepted without consideration being given to the possibility of the claims being true. The persecutors have actually been very clever about this, both in selecting as their target someone who was known from school or university as being borderline schizophrenic, and in ensuring the nature of their persecution corresponds to what often features in the delusions of a schizophrenic.

The very first incident of the persecution occurred in June 1990, when I was still a student at university in London. It consisted of a reaction (giggling) from the newsreader, Sue Carpenter of ITN, to what she saw happening in my living-room at my parents home where I was living. Before your imagination gets the better of you I should make clear that what the newsreader was reacting to was not too embarrassing in nature; my mother had brought an apple for me into the the room, and Sue Carpenter found this amusing.

I recognized that Carpenter had reacted to what she had seen in my living-room, yet this idea still seemed completely fantastic to me. My reaction was to continue watching television, particularly the news, to see if this incident would be repeated. It was, many times, both on BBC and ITV. An intelligent person would have thought to obtain a video recorder and capture some of these incidents in order to try to explain to an observer what he saw in these broadcasts. Unfortunately, I failed this test of intelligence, since I did not record these programmes. I have recently attempted to obtain from ITN tapes of their news programmes dating back to summer 1990, but, unhappily, they have advised me that they do not have complete programmes including newsreaders comments dating back

to that period.

From the outset, the persecutors structured their actions to ensure that any complaint would be met with disbelief, and dismissed as delusional. This is why they chose as their target someone who was known at school and university to be borderline mentally ill; and it is why they fired the first shots of their campaign through the broadcast media. Schizophrenics commonly believe the media harass them; it would be exceptional for "full-duplex television" to exist in reality. Those with schizophrenia also commonly believe people are talking about them; again, the persecutors have shown themselves very rarely, but act through intermediaries, both in the workplace, and in public and during travel.

Mental illness is not the cause of these claims, but the simulation of its symptoms is a cover used by the persecutors to deny their victim the ability to have his compaints believed.

What evidence exists to support these claims of "interactive television/radio";?

Quite frankly, I have very little evidence to support my claims. You may examine the "Evidence" area of my website to see such evidence as I have been able to gather. None of it is remotely conclusive. The "smoking guns" all date back to 1990/91, and it is really rather late now to start trying to look for material dating back seven or eight years. In 1997 I started tape-recording every programme I watched or listened to. I also started carrying with me a high-fidelity minidisc-recorder with good quality microphone to catch incidents of public harassment, but this also has not been as successful or conclusive as I had hoped.

Perhaps the best item in the "Evidence" section is the audio file "Life is so hard" (it is labelled with Garfield the cartoon character on the site), which I have given a certainty level of 100%. This item relates to harassment at my workplace in Canada in 1996. A co-worker called Mark was coming up with phrases and expressions which were repeating things being said at my Canadian residence, consequently leading me to believe that my apartment and home phone were bugged, and that the persecutors were passing their gathered information on to Mark. On one particular evening I said in my apartment, "life is so hard, and then you die". The following day I was able to record Mark saying exactly the same phrase at work.

Unfortunately when "they" know you are recording them, they simply dont say things which would unambiguously show harassment. When Mark the co-worker knew he was being recorded, he only made his remarks out of range of the recorder, for example outside the building. When the TV newscasters or radio disc jockeys know they are being taped, they limit themselves to saying things which are ambiguous, which even in my mind may or may not be personally directed against me.

Who knows about this persecution?

Surprisingly many people know. People in the media, such as BBC and ITN newscasters including Martyn Lewis and Michael Buerk, and radio disc

jockeys such as Chris Tarrant of Capital Radio, know what is going on, and take part in it. Some co-workers at my former workplaces in England and Canada have known about the harassment. Quite a few people in the general public are also included. I believe the police are aware of the persecution, but, unfortunately, have chosen not to take any action to stop it. I have complained at my local police station in London several years ago, and I have stated on the internet newsgroups that I have done so, hence the police will be well aware of my wish to see the matter resolved. I believe their inaction denotes a dereliction of duty, but without good evidence, I am powerless to compel them to take steps to prevent further harassment, or deal with what has already taken place.

What is the purpose of sending these faxes?

These faxes are being sent to three distinct groups of people, namely Members of Parliament, the media, and diplomats & legal people. As you will have observed I am making use of the email-to-fax gateway at Demon Internet to send these faxes. I am forced to use this gateway since I currently live in North America, and cannot afford the high cost of direct phone calls to the UK.

My purpose in publicising my claims is firstly to discourage the persecutors from continuing their campaign, and also to attempt to bring their campaign out into the open, and thus perhaps identify the persecutors. Neither aim has been achieved yet, but I hope that with sufficient stimulation these aims may yet be accomplished.

The problem with the second aim is that those who read this article will fall into two groups, those who dont know anything about the persecution and consequently will disbelieve my claims as delusional, and those who do know about the harassment and may have some idea of who is behind it, but realise that if the harassers are exposed and the truth brought out into the open, then powerful British institutions will substantially lose prestige, and be exposed to ridicule.

It would give me hope to believe that these faxes will create a third group of people, those who find out that I am telling the truth, and who follow their consciences in standing up and seeing justice done. Only time will tell if this hope will be realized.

2323. MI5-Persecution: Why do you think MI5 are responsible? (2672)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-12-16 11:42:14 UTC
From: MI5-Victim@mi5.gov.uk
Message-ID: <m07111611421187@4ax.com>
Source record: 3747
Cross-posted to: alt.testing.it,rec.radio.amateur.equipment,de.comp.os.unix.x11,finet.sex,free.uk.talk.edinburgh

Why do you think MI5 are responsible?

The question of who is ultimately responsible for this eight-year harassment is one which is very difficult to answer, as the persecutors have never clearly made their identities known to the persecutee. However, I believe I am correct in attributing the continuing victimisation to elements of the British Security Service MI5, and in this article, I will try to explain the reasons for this belief.

The British internet magazine ".net" featured my website on page 17 of their March 1998 issue (number 42). Their review kindly describes it as an "excellent site" and gives some details of what the net surfer will find there. Should you wish to reply to this article you can do so;

"When did you first suspect MI5 were responsible?"

Over Easter 1995 I went to see a local solicitor in London with a view to talking to the police about the harassment. Soon afterwards I did go to my local police station in Clapham and spoke to an officer there. The solicitor made a comment which suggested to me that the persecution I had been experiencing may have been organised by an intelligence service.

Up to this point, I did not have any clear idea as to who was behind the harassment. Only their agents were visible, in the media, on television news programmes, and on the radio; in the workplace, where things said at my home were repeated verbatim; and in some cases abuse in public and during travel, for example on the trip to Poland in June 1992 which I have already described.

Both from the fact that widely disparate individuals and organisations were employed as agents in the campaign against me, and from the fact that an entity would be required to marshal their resources in the areas of spying on my home and giving gathered information to their agents, it was clear to me that a single entity was responsible for carrying out the campaign. Yet from June 1990 until Easter 1995 I did not have a clear idea of who might be responsible. I guessed that perhaps some private individual or group of persons who saw themselves as my enemies had perhaps paid private detectives to organise the harassment. Alternatively, since the campaign had started in the media, I made a far-fetched supposition that perhaps it was an ad-hoc group of media people who had set themselves up in opposition to me. After Easter 1995 I saw that these guesses were wrong, and I made an I believe much more accurate estimate as to who my enemies really are.

"Why couldn't a private group be behind the persecution?"

There are several reasons why a private individual or group would not be behind this campaign.

Quantity of resources / Money. Here is what one Usenet (internet newsgroup) participant had to say (several years ago) on the topic of how much money it would cost just to keep the surveillance going.

PM: >But why? And why you? Do you realize how much it would cost to keep
PM: >one person under continuous surveillance for five years? Think about
PM: >all the man/hours. Say they _just_ allocated a two man team and a
PM: >supervisor. OK., Supervisor's salary, say, #30,000 a year. Two men,
PM: >#20,000 a year each. But they'd need to work in shifts -- so it would
PM: >be six men at #20,000 (which with on-costs would work out at more
like
PM: >#30,000 to the employer.)
PM: >
PM: >So, we're talking #30,000 x 6. #180,000. plus say, #40,000 for the
PM: >supervisor. #220,000. Then you've got the hardware involved. And
PM: >any transcription that needs doing. You don't think the 'Big Boss'
PM: >would listen to hours and hours of tapes, do you.
PM: >
PM: >So, all in all, you couldn't actually do the job for much less than
PM: >a quarter million a year. Over five years. What are you doing that
makes
PM: >it worth the while of the state to spend over one and a quarter
million
PM: >on you?

A private individual or group would not spend over a million pounds to verbally torture a victim without some financial motive or gain. Private industry is driven by the profit motive, and there is no financial profit to be had from carrying out a campaign in this way. If a private enterprise were behind it then they would have taken direct physical action a long time ago.

State enterprises, on the other hand, can afford to be wasteful, since they are funded by the taxpayer. They do not have to show a money profit. The employees or contractors employed by a state organisation such as MI5 are driven by their own personal profit motives, to make the most money out of their employers for the longest period of time. MI5 is funded to the tune of #150M p.a.; even a few hundred thousand a year would to them be affordable if their managers could convince themselves of the necessity of what they were doing.

Quality of resources / Technical resources - electronic and other surveillance. In summer 1994 a reputable and competent private detective agency was employed to conduct a counter-surveillance sweep of my home in London. They charged us over #400 for this, conducted a thorough search for radio transmitting devices, hard-wired "probe" microphones and also tested the telephone line. They found nothing. This was not altogether surprising, since it had been made very clear to me that there were bugs in my home; the "buggers" would not have made this clear unless they had felt their bugs were of sufficient sophistication as to be safe from

detection.

But there is another lesson to be gained from the failure of the private detectives to find anything. The agency employed was one of the most reputable in London. They were employed on the principle of "setting a thief to catch a thief", for if the harassment were being carried out by private detectives, as I then believed, then surely another set of private detectives would be able to find the bugs that they had planted. That these "private eyes" were unable to find anything, and that the harassers were confident that they would not be able to find any bugs, points to the harassers being an order of sophistication above a private agency, and leads me again to believe that a state intelligence service is responsible for the surveillance and harassment.

Quality of resources / Technical resources - Interception of Postal service. In summer 1994 when I emigrated to Canada to try to escape the harassment, I wrote letters home to my family and friends in London. Quite soon after my arrival in Canada, the harassers were able to find precisely where I was staying. The only way I can see of "their" being able to find out my new address was by interception of my letters to the UK.

Later in 1994, I conducted an experiment to see if my letters home were indeed being read. In a letter home I wrote of being depressed and talked in vague terms of suicide. I deliberately chose this topic, since I believed it was the outcome my harassers were trying to achieve, and that if they read the letter, they would "echo" its contents. Sure enough, soon afterwards there were two incidents of people shouting "suicide" at me in public places in Canada.

It is inconceivable for a private agency to have the ability to intercept postal mail. The state security service on the other hand is well known to engage in these activities.

Quality of resources / Access to Media. One of the strangest aspects of this case is the access "they" have to the broadcast and print media. I still do not understand what could persuade newscasters such as Martyn Lewis and Michael Buerk, who consider themselves "gentlemen", to behave in an almost voyeuristic way by "peeking" into the living room of one of their viewers. A year ago I wrote to the BBC asking if these newscasters would confirm or deny the accusations made against them. The BBC replied that their newscasters had denied the accusations, but refused to do so in writing.

It is well known that MI5 have the ability to plant stories in certain newspapers, but convincing television newscasters to "watch" a viewer while they read the news would surely be very difficult for them to accomplish, unless they presented themselves to these journalists as being, for example, a group in the media who were seeing to it that I got my "deserved" treatment. MI5 has a history of manipulating the media, so it might not be too difficult for them to accomplish such a trick, whereas a private group would not have this ability.

"Have they ever denied that they are the Security Service?"

No. Never. This is in fact the main reason why I believe "they" are MI5 and not a privately funded group. If my guess had been wrong then I am sure that "they" would have crowed over my mistake, but they have never admitted nor denied that they are employees of MI5.

In early January 1996 I flew on a British Airways jet from London to Montreal; also present on the plane, about three or four rows behind me, were two young men, one of them fat and voluble, the other silent. It was quite clear that these two had been planted on the aircraft to "wind me up". The fat youth described the town in Poland where I had spent Christmas, and made some unpleasant personal slurs against me. Most interestingly, he said the words, "he doesnt know who we are".

Now I find this particular form of words very interesting, because while it is not a clear admission, it is only a half-hearted attempt at denial of my guess that "they" = "MI5". Had my guess been wrong, the fat youth would surely have said so more clearly.

"If MI5 were behind it, why would they wish to mask their involvement?"

I have heard a number of times a belief from people in the media that it is they, the media people, who are behind the abuse. In spring 1994 Chris Tarrant the Capital Radio D.J. said sarcastically on his breakfast show, "You know this bloke? he says were trying to kill him. We should be done for attempted manslaughter". We, we, we. Tarrant thought it was a media conspiracy.

Returning to the question of "interactive watching" by television newscasters, it would again be much easier for them to take part in that sort of activity if they convinced themselves that the surveillance and abuse were organised by "their own", by media people. It must be second nature to MI5 to mask their involvement in the matters they deal with; in this case, they pretend the campaign is organised by a group in the media, and any journalists who suspect otherwise keep their silence.

Conclusion

Over the last three years I have stated with some force my belief that MI5 are responsible for my misfortunes. I have done so on Internet newsgroups, in letters and faxes to people in politics and the media in the UK, and in 1997 I made a formal complaint to MI5 regarding their activities; the Security Service Tribunal replied in June 1997 that "no determination in your favour has been made on your complaint". (I believe the statement by the Security Service Tribunal can be disregarded, as they have never, ever made a ruling in favour of a complainant.) In three years of naming MI5 as my oppressor "they" have never denied the charge. To me, their silence on this point indicates that my guess was accurate. I believe my persecutors stand identified. The question of why they should carry out this campaign is one I will try to answer in a future article.

MI5 Persecution Update: Friday 15 May, 1998

The persecution has been quite severe for the last week. It appears that my enemies are reacting to the steady stream of faxes making their way over the Atlantic to the fax machines of Westminster politicians and the media. Here is whats happened in the last few days;

The week started off with an incident in the cafeteria at a local shopping centre where I habitually drink my morning coffee. My enemies have concentrated since winter 1995/96 on throwing a particularly horrible sexual slander against me. They "put people up" to repeat this slander against me, and this is what happened again here.

On Thursday morning (yesterday), instead of going to the usual cafeteria I went to a nearby convenience store for coffee. The same horrible sexual slander was shouted at me very loudly by a member of staff as I walked into the store. This was the first time I had ever bought morning coffee in that shop. The other staff obviously knew what was going on, one of them said, "they screwed up my life".

The fax gateway I use to send these faxes to the UK has been working hard these last few days to shut down my access by barring the accounts I use to send these faxes.

I have received an anonymous threat from fax number 0171-219-6101 (the machine gave its name as "ETRA-HoC") which said, "Stop sending to this fax no 0171-219-6101 or else" (the consequences of continued transmission were unspecified). I invited the sender to apologise for his threat, but received no response.

This all adds up to quite a severe reaction to my faxes of the last few weeks. I actually find this quite heartening since it shows that my faxes are finding the mark and there may yet be a breakthrough in my efforts to expose the Security Service conpiracy of abuse against me which has now been going on for eight years.

MI5 Persecution: "Why would they be doing this to you, sir?"

This article will concentrate on the difficult question of "Why". The question which forms the title of this piece was asked of me by the police officer I spoke to in Easter 1995, when I went to make my complaint.

There are really two sides to this question. Firstly, why should MI5 be harassing anybody in this fashion? Secondly, if they choose to behave in this way, why should they have selected me in particular, and not somebody else? Alternatively, why did the persecution start, and why is it

continuing?

I do not have definite answers to either side of this question, since my persecutors have usually kept themselves hidden and only acted through other parties. To know "why", one would have to know who the persecutors are, and something of their personalities, since their abuse is almost certainly symptomatic of a personality disorder of the abusers. Certain things however can be deduced about the abusers from the nature of their behaviour, and I will talk about this later in the article.

Why did it start?

It is clear that the persecution must have been initiated by someone who knew me personally, either at school, or at university, or socially, and knew that I was borderline mentally ill, since this is what makes me a target for the persecutors. Unfortunately, the originators have never been identified, and there are several possible candidates. Neither has the link from the originators of the persecution, to the persecutors themselves, ever been made clear. So who are the originators?

University Staff

The identity of the originators may lie in the timing of the persecution. It started in June 1990, while I was finishing a course at Imperial College in London, and a year after I graduated from Cambridge, where I received a degree in computer science. At Cambridge I had achieved some notoriety in the computer lab from various nefarious exploits. Roger Needham attacked me by saying that "there were great hopes for it, but it failed terribly". When I started at Imperial I found that my reputation had preceded me; Cambridge computer lab had spoken to I.C. lecturers about me. I.C. lecturer Frank McCabe summed up commenting about "setting up a straw man so you can tear him down". (Despite being "torn down" by the Cambridge computer labs lecturers, I still achieved a good first degree and a Masters degree at Imperial.)

Other students at university

So, the originators may have been university staff who knew me from my student days. But there are other possibilities. I had other enemies at university, including some fellow students. At my Cambridge college it was common knowledge that my mental health was dubious, and it was known that I talked to myself in my sleep - the floor and walls were quite permeable to noise, so other students heard. I was given the nickname "gibber" because of this habit. Sometime later, I managed to catch myself talking in my sleep when I woke up in the middle of the night.

Here is a quote from a participant in the internet newsgroup where I have been posting for the last three years;

>One thing which has been missing from this discussion is this simple
>prognosis: that maybe he is right and that, despite his admitted
>mental condition, there really is a campaign against him organised by
>now-influential ex-students of his university.

People I knew socially

I had yet other enemies in 1990 (I am a man of many enemies!). In January 1990 I broke up with some people I had been going out with socially. One of them, by the name of Andy Turner, wrote a letter to Alan Freeman, who at the time was a Radio 1 DJ. Freeman read part of the letter out on his Rock Show, about the "one who wore out his welcome with random precision", saying "thats a hell of a letter you wrote there Andy", and "with a schizophrenic youre never alone".

It is my belief that Andy Turner and his friends were trying to make trouble for me, and Turner wrote to Freeman with this in mind. Freeman may have discussed the letter with others, and things may have snowballed from there. This is, of course, pure supposition. The fact is that I do not know who the originators are, and can only guess.

Once it started, why is it continuing?

The answer to this question is obvious. It is unacceptable to the "powers that be" in the UK to have somebody running around who knows he has been targeted by the Security Service and media organizations, and who is in a position to embarrass British institutions. This has become particularly evident in the last week; as I send more faxes to UK politicians and media, so the pressure on me grows, and the volume of abuse increases.

Part of the reason the persecution continues is in the personalities of the abusers, and it is this subject to which I will turn to next, since the key to understanding the persecution lies in understanding those who carry it out, as much as we can.

The Security Service operatives, the persecutors, are they psychopaths?

Let us first examine the definition of the term "psychopath". DSM-IV defines "anti-social personality disorder" as a "pattern of disregard for and violation of the rights of others ... deceitfulness, irritability and aggressiveness ... consistent irresponsibility and lack of remorse". The Harvard Mental Health Letter of Sept 1995 describes these people as using "charm, manipulation, intimidation and violence to control others and satisfy their own needs. Lacking in conscience and in feelings for others, they cold-bloodedly take what they want and do as they please", having "no guilt or regret".

I must say, reading this description of the condition, that it fits the persecutors perfectly. The persecutors have never shown the slightest remorse or guilt. Even when I was severely ill, they continued to abuse me. They have repeatedly blamed their actions on me, which is another trait common amongst psychopaths. They have no respect for my legal or personal rights, and they use intimidation and verbal violence.

If the MI5 operatives are psychopaths then it would explain both why the persecution started, and the degree of verbal violence. Psychopaths by definition damage other people; here, the MI5 operatives find an outlet for their personality disorder, through "cripple-kicking".

Xenophobia on the basis of mental illness, and race

My enemies have made clear many times that one of the reasons they are persecuting me is because of my admitted mental illness. However, it is my belief that they are also persecuting me because I am not of ethnic English origin, and the fact that there have been several incidents of an overtly racist nature reinforces this view.

In one case, two youths on a tube train in London made openly racist references to me as a "soft toy, not up to British Standards". Another person near my home made remarks about "Polish people". In yet another incident in Croydon, a youth made comments about "foreigners".

But the main thrust of their xenophobia is because of my mental illness. I should make clear that I do not look ill; if you met me, you would not know that I had the illness. I take a relatively low dose of medication, and feel quite well. But the persecutors have repeatedly harped on about my supposed serious mental illness; they have called me a "nutter", a "schizophrenic", etc. They have also persuaded other people to use these terms of abuse. They are able to get away with this because abusing the mentally ill is still something which is mostly acceptable in Britain; the media do it, "nutter" is not taboo in the way that "nigger" is.

Conclusion

There are several groups of people who might have wished to cause me trouble, and I still do not know who originated the persecution. Nor do I know how the originators came to be in contact with the (presumed) Security Service operatives who have been carrying out the campaign. To know conclusively why it started, we would have to know who started it, and this information is not available.

However, we can infer some things about the personalities of the persecutors from their methods, and from the degree of verbal violence they employ. It is clear that a main reason for the continuing harassment is the psychopathic disorder of the MI5 agents who carry it out. That they have never been "brought to book" for their misdeeds reinforces their belief that they do no wrong; and, unhappily, until they are brought to book, their persecution campaign looks set to continue.

MI5 Persecution: .net Magazine Applauds my Website

The March 1998 issue (number 42) of .net Magazine reviews the MI5
Persecution website describing it as an "excellent site". The webpages
describe in detail the nature of my persecution since 1990 by what are
believed to be elements of the UK security service.

(snip image)

You are encouraged to read the web pages which include

o a FAQ section outlining the nature of the persecutors, their methods
of harassment through the media, people at work and among the general public
o an evidence section, which carries audio and video clips of media and
workplace harassment, rated according to how directly I think they refer to me
o factual descriptions of the state security agencies involved
o scanned texts of the complaints I have made to media and state security agencies involved
o posts which have been made to netnews over the last three years on this topic

MI5 Persecution Update: Friday 13 November, 1998

If You Intend To Reply, Please Read This

If you have any questions or observations you would like to share with me, then you are very welcome to reply to my fax number 0171-681-1190. But please.... keep your response to one page if you can! I have had several people faxing my article back to me, including one MP faxing back twenty pages. I do not know if he had anything intelligent to say in his 20-page fax because I applied judicious use of the "Delete" key on my computer. Faxes over a page or two will be deleted without being read.

MI5 Resume Hostilities in Response to these Faxes

When I wrote last weeks "MI5 Persecution Update" I remarked how quiet my life had become. No longer! MI5 have restarted hostilities with a vengeance the past week, in response I believe to the faxes I have been sending to members of the House of Commons.

On Saturday 7 November I went to Clapham Picture House cinema to see the film "Antz" (a very enjoyable film). At the cinema, I was verbally assaulted by a group of teenagers with the words "still crazy", repeated about ten times. There was a film with that name showing at the cinema, but it was clear their abuse was directed at me. I do not look ill, so why would they pick on me? answer, the incident was set-up by the persecutors. One of the teenagers also said to another, "I don't know what we're laughing at".

The following day, Sunday 8/11/98, I was on my way to play squash when I was verbally assaulted by a youth who said "it was so funny", without the slightest trace of humour. What he meant by this phrase was that was funny, and they were trying to humiliate me. I have heard this phrase "it was so funny" used at me before many, many times over the last eight and half years.

Please Encourage Keith Hill MP to Help Me

I live in a bugged house, bugged both for audio and video. My movements are monitored by MI5. The Security Service have followed me to Canada, to Poland and the Continent, to the States. I cannot work anywhere, not in England, not in Canada, because MI5 will destroy whatever employment I am able to obtain. I have asked Keith Hill MP to help me, and he has refused.

The situation is intolerable. It is Mr Hills job to help me out of this mess. So, please, as I said in the last fax a week ago: Do not waste your time returning multiple copies of my faxes to my fax mailbox, as some of

you have done. Instead;

Please encourage Keith Hill M.P. to help me.

I am sorry to be using this device to encourage Mr Hill to help, but I think eight and half years are quite enough and it is time something was done to bring this matter to a close.

MI5 Persecution : BBC Newscasters Spying on my Home

This week's topic is the quite extraordinary claim that BBC newscasters such as Martyn Lewis and Michael Buerk have spied on my living room while they read the news. I currently have an advert running for the next six months in Private Eye's "Eye Say" column (at a cost of over ₱200) which says,"MI5 Persecution - BBC Newscasters Spying on my Home"; the story of my campaign in the Eye is on my Website
at; http://www.pair.com/spook/evidence/plaint/priveye.htm

BBCs staff magazine Ariel also ran my advert "BBC Newsreaders Spying on my home" for one issue in the Personal category on 8/July/1997 before it was spotted and axed by editor Robin Reynolds; please see
webpage; http://www.pair.com/spook/evidence/plaint/ariel.htm

Beginnings

The very first incident in the "MI5/BBC Persecution" occurred in June of 1990, when a newsreader reacted to what she saw in my living room at home as she read the news. My mother had brought an apple for me into the room, whereupon the newsreader smirked and giggled, apparently finding this funny. I couldn't believe what I was seeing. I carried on watching news and other television programmes to see if presenters would show signs of "interactive watching"; to my surprise, this happened again and
again. Unfortunately, I did not have my wits sufficiently about me to videotape these programmes, and it is now almost impossible to obtain recordings dating back to 1990.

Most of the "TV watching" has occurred on the news, and most of it in summer 1990, although some as late as autumn 1993. My website has a few extracts of what might be politicians "getting at" me, in particular John Major and interviewer Dimbleby sharing a joke about the "Knutsford Guardian" which is almost certainly about me.

I sold my portable TV in autumn 1990 and stopped watching television regularly. I realise now that this may have been a mistake. What I should have done was to watch TV and listen to the radio, but tape-record everything and make a note of what each excerpt meant to me. I would then be in a much stronger position as regards to evidence that I am now. That is what I am trying to do now, but unsurprisingly the TV/radio presenters have stopped getting at me, now they know they are being recorded.

Examples of Media Harassment

Here are a few examples which I can still remember of media harassment;

In early 1992 I was watching the BBC news with Martyn Lewis on a small black-and-white portable television at my then home in Oxford. I threw a term of abuse at Lewis; he flinched, then gave a grin and made a comment from which I understood that he had been on my side, but might have changed his mind as a result of what Id just said to him.

Victor Lewis Smith in his TV (BBC2?) program at the end of 1993, had a taxi-driver saying, "theyre all out to get me", to which VLS replied, "but you're quite intelligent aren't you?" (what a nice chap VLS is, compliments no less!)

Paul Daniels the TV magician, sometime in 1990-92 (sorry I can't be more precise but it was so long ago), made a "crying face" and put his face in his hands, which was his way of expressing that I was frequently crying in 1990-92, and that he and other media people found my crying funny.

Kenny Everett (deceased) on some talk show, compared me to a "huge ape" who "scratches himself"; he made some other remarks about what the "ape" got up to which unfortunately I cant remember. (I remember that Everetts comments were quite sympathetic and human, but were obviously about me.)

Stephen Fry on another talkshow (Wogan I think) talking about "masturbatory fantasies", he then referred to me with the words "you prat"; I wonder if the studio audience knew what he was talking about and to whom his comments were directed?

Griff Rhys Jones on Clive James' TV show, made a "lunatic face" (wide fixed grin) to which I said to the TV that he had a "face like a horse's arse", to which Clive James said to GRJ "did you hear that?"

Crimestoppers summer 1990, remarks by a Midlands police officer on the programme, while Nick Ross was presenter (as far as I can remember). The officer talked about "in car entertainment". Nick Ross said to officer, "why don't you stop doing it?" to which he replied, "we can't while he's like this".

BBC2 Newsnight in autumn 1993 had a piece on football hooliganism. A black interviewee said apparently of the hooligans, but in fact of me; "they're just idiots, carry on with the surveillance".

There was an incident with Jonathan Ross which I remember clearly; he was on both BBC and ITV television at the same time, one (ITV I think) was recorded, the other channel was live. Ross has a speech impediment which causes him to pronounce his "r"s as "w". I sarcastically said something about "Mr Woss" to the recorded channel, then turned over to where he was live, and he repeated "Woss" with heavy emphasis and sarcasm.

On the radio, in spring 1994, Chris Tarrant made a sarcastic remark in his morning show, saying "he says were trying to kill him, we should be done for attempted manslaughter", to which another of the studio staff said, "oh no, dont say that". His comment was in reply to a comparison Id made the previous evening between my persecutors and the Polish secret police who murdered dissidents.

Martyn Lewis Denies & Lies, But Wont in Writing

In February 1997 I wrote to BBC Viewer & Listener Correspondence and asked them to investigate the claim that their newscasters had engaged in "interactive watching". They replied that they had asked Martyn Lewis and Michael Buerk whether they had engaged in such practices, and that they had both made verbal denials to VLC, but were refusing to put their denials in writing.

I can understand that they might think that if they were to make written denials to me, then many other people with my condition might write to them with similar questions. But Ive asked a couple of journalists if theyve been writing about me, theyve made written denials, Ive believed them, and I have not put their denials on my website because, since I believe their denials, it would not be relevant to publish them.

To me it looks as if Lewis and Buerk are happy to lie verbally but not in writing, because written falsehoods would place them unambiguously in the wrong, whereas they can try to talk their way out of verbal lies if they are ever caught, or perhaps even deny the verbal lies completely? If they lie without shame, then why would they have any shame about future lies about lying?

One of the strangest aspects of "TV watching" is that Buerk and Lewis have convinced themselves that their "interactive spying" is reasonable behaviour. Martyn Lewis thinks of himself as a "gentleman". He expressed in 1992 that he was "on my side". If this matter ever comes out into the open, I wonder what these newscasters will have to say for themselves, and what the British public will make of their behaviour?

Media Persecution Evidence on my Website

You may directly access the Evidence section on my website at URL;

The category currently contains four video segments, a number of audio files and three published articles. The first video of ITN's John Suchet is unfortunately a mistake - after looking at it again it is obviously not about me. The two Ken Clarke excerpts may or may not be about me; it is funny that he should keep on harping about "paranoia" and "madness", but I have given these ratings of only 30% certainty, as it is more likely that they are not about me in particular, and Clarke is simply displaying the normal prejudices against the mentally ill found in much of society.

The piece I find most interesting is the Dimbleby/John Major interview from April 1997. I have assigned this a 90% rating. Dimbleby starts by emphasising a report from the "Knutsford Guardian". Major recognizes what's going on and joins in with a falsely apologetic "heaven forfend". The emphasis is on the first syllable pronounced "nuts" in "Knutsford", which is repeated three times. Of course this is hardly anywhere near convincing evidence; the really clear items were all in 1990-92, and they are basically unobtainable now.

If you're reading the website, have a look at the two files from David Hepworth's programme on GLR radio. The first one from 21/Feb/1997 has him

talking about an "embarassment" of prizes and "absolute obscene", in reference I believe to the verbal sexual abuse that was being used against me at the time (and which unfortunately is still current). In the second file dated 9/May/1997 he again talks about "absolute embarrassment" of prizes, followed by laughter. To my mind he knows I am listening to his programme, and deliberately makes these remarks for my benefit, with very little attempt to disguise their purpose.

Bernard Levin - "Fanatic's Fare for the Common Man"

On 21 September 1991 this article by Bernard Levin appeared in The Times. It is reproduced in the Evidence section of the website, or may be accessed directly at URL;

To my mind, Levin's article described the situation at the time and in particular a recent meeting with a friend, during which I for the first time admitted to someone other than my GP that I had been subjected to a conspiracy of harassment over the previous year and a half.

Levin writes about a "madman running loose about London" who "bursts into tears, and swears it is all true. And it is." I am pleased to agree with his assertion that "it is all true" because the truth is what I presented to my friend in September 1991 and it is what is being presented to the readership of these articles now.

Conclusion

The harassment, in particular media persecution, was at its strongest in 1990-92. Today, I am recording everything I watch, read and listen, and the media have pretty much given up. It is now incidents "in public" which make up what there is of MI5s persecution. But much of the material from 1990-92 still exists in archives, although the organisations which have those archives generally wont make the material available to the public, for copyright and other reasons.

MI5 can no longer employ the media to persecute me, partly because journalists now know who is behind the persecution, and also because I would publish any instances. My mistake during 1990-92 was to not record instances as they happened; Ive learned from that mistake, and know better now.

MI5 Persecution Update: Friday 19 March, 1999

If You Intend To Reply, Please Read This

Please.... keep your response to one page if you can! I have had several people faxing my article back to me, including one MP faxing back twenty pages. Faxes over a page or two will be deleted without being read.

Theyve started again. Why? I have no idea.

Unhappily, the persecutors, whoever they might be, have started their activities again over the last two weeks. Usually they try to blame their activities on their victim, but this time they have stopped even pretending that the persecution is my fault. Their verbal abuse appears as gratuitous as it is vicious.

Last Sunday 14 March, I went for a meal in Londons Chinatown with some friends. As we were walking down Gerrard St, a man shouted loudly, twice, the obscenity which has been directed at me for some three years now. This followed previous incidents where the same words had been used. It is very upsetting to be verbally abused in this way and to know that the cowardly abusers are guaranteed to "get away with it" because if you report it then it will be assumed to be part of your illness.

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

MI5 Persecution : How to Identify the Persecutors

Usually delusional thinking does not allow the perpetrators to be identified, or the alleged persecution to be proved. My so-called "delusions" are different, because I have several times over a period of some nine years seen the same people, in widely varying places. Most importantly, their names have been recorded, on aircraft passenger lists and hospital register; and if only the police would do their job conscientiously then the persecutors could be identified and this unhappy story brought to a final conclusion.

BA93 Heathrow->Toronto, 10 June 1993

In 1993 I flew to Toronto for a holiday. On disembarking from the aircraft, a group of four men who travelled together looked in my direction, and one of them said, laughing, "If he tries to run away well find him".

I was absolutely stunned when I heard this. I wasnt surprised that they had followed me to Canada, but it shocked me that they had been on the

same flight, and that one of them had foolishly given their group away. Unfortunately I was so stunned that I made no attempt to stop them as they got off the flight and proceeded into the terminal. I did not see these people again during my visit to Toronto. I do not know whether they followed me, or whether they were only part of a larger group, some of whom may have already been on the ground and awaiting my arrival.

Over the next few years I made a number of attempts, all unsuccessful, to obtain the passenger list for this flight. British Airways keeps passenger flight coupons for each flight; so if only the police would do the job that is being asked if them, then these four persecutors could be identified, and thus their employing organisation, which is very likely to be the Security Service, determined.

These four men were, apart from the joker who looked the odd man out in the pack, very serious individuals. They appeared to be in their forties or fifties, and my impression on seeing them was that they might have been former soldiers. Their campaign against me concentrates on how "funny" their abuse is; but in this they are plainly lying, because they realise how awful will be the damage to the establishment of which they form part, if the truth about the persecution ever sees the light of day.

The riddle of "Alan Holdsworth"

During Oct/Nov 1996 I saw a doctor several times about an infection, and on 2 Nov 1996 I went to Emergency at the Ottawa Civic Hospital and saw Dr Worthington, who was then Chief of Emergency Medicine. I had to wait several hours before being seen, and several people jumped ahead of me in the queue. One of these was a grey-haired man in his forties or fifties. This may have been one of the men on the BA flight in 1993; I cannot be sure. When Dr Worthington asked his name, he loudly said, "Tad", which is the common abbreviation of my name. Dr Worthington looked puzzled, glanced at the sheet in front of him, and said, "but your name is Alan Holdsworth isnt it?". (I am pretty sure his Christian name was Alan; I cannot be sure of the surname). The man looked put out, and said quietly, "yes".

Unfortunately, I did not follow up this incident immediately. Some time later, I wrote to Dr Worthington to ask the name of this patient, but he refused to give the name out.

I saw this person again two and a half years later, at Ottawa Airport, just as I was about to leave for England. In the warm weather, he was wearing a coat and woolly cap, and pacing up and down in a menacing and aggressive manner. Presumably he thought he was pretending to be a "nutter" and in this way was getting at me; my impression is that he doesnt need to pretend, Holdsworth or whatever his name is is clearly a psychopath and in a healthy society such a person would be locked up, instead of being paid public money to exercise his psychopathic instincts. But todays Britain, a country where the MI5 secret police are given free rein and nobody dares raise a voice in protest, is not a healthy society.

"He doesnt know who we are"

For some reason, whenever I take a British Airways flight, I get hassled by the "persecutors who wont admit theyre MI5". Since this business started, I have travelled BA three times; once in June 1993 BA93 (see above), once to/from Europe during Dec 95/Jan 96, and once in June 1998 with my mother to visit her family. The last journey, I was abused by two "plants" who kept repeating, loudly, "paranoid" (I have this recorded on minidisc). Presumably British Airways gives MI5 the seating plans for their flights, which allows MI5 to position their agents of abuse three rows behind me, so I cant face them, and they are throwing abuse at the back of my head. I have travelled BA as infrequently as possible; to Canada, I usually travel Air Canada.

Anyway, lets return to the second of the three BA trips, and in particular to the flight on 2 January 1996 from Berlin Tegel, to Heathrow, and onwards to Montreal Mirabel. Id waited all night at Tegel for the flight, and was very tired on reaching Heathrow. On the plane to Montreal, two youths sat about three/four rows behind me and to the right, in the window seats. One of them, a rather fat "asshole" to use the Americanism (it fits), kept on going on about "this bloke", saying among many other things, "he doesnt know who we are".

Now that form of words is particularly interesting, because from May 1995, some 8 months previously, I had been vigorously denouncing the "MI5 Persecution" on Usenet. So if Id guessed wrong, then you might expect the harassers to crow about it; which they have not done. If I had guessed right, and the persecutors have been silent before and since this flight, then they could either admit they were MI5, which would be a very serious thing for them to own up to, or they could brazenly lie, in which case I would report their lie, and since many people must surely know who they are, they would lose all credibility. So they have remained silent; apart from this one phrase on the BA flight, where one of their agents said, "he doesnt know who we are". Note carefully that this phrase is NOT a denial, it only appears to be a denial; since it does not say that my guess was wrong; it only states the objective fact that I do not know the identity of the persecutors, without giving any information as to the validity of my guess. Which leads me to posit that my guess was correct.

The Usual Words

The persecutors-who-wont-admit-theyre-MI5 have been active again this week. On Saturday 20/3/99 I visited Ravenscourt Park in west London, and was verbally assaulted with the usual words, "something wrong with him". This audio file is on the web at URL;

This afternoon (Friday 26/March) I was again verbally assaulted while travelling by bus. The same sexual obscenity was thrown at me, and the incident was recorded on my minidisc-walkman. Because of the deeply offensive nature of the slander, I will not be posting this on the website.

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

MI5 Persecution : Browse Website

The March 1998 issue (number 42) of .net Magazine reviews the website describing it as an "excellent site". Since August 11, 1996 over 50,000 people have browsed this website.

You are encouraged to read the web pages which include

a FAQ (frequently asked questions) section outlining the nature of the persecutors, their methods of harassment through the media, people at work and among the general public

an evidence section, which carries audio and video clips of media and workplace harassment, rated according to how directly I think they refer to me

objective descriptions of the state security agencies involved

scanned texts of the complaints I have made to media and state security agencies involved

posts which have been made to netnews over the last four years on this topic

This article outlines what is to be found on the webpages, which you are encouraged to browse for the complete story.

Frequently Asked Questions

Your excursion through the website starts with the "FAQ - Frequently Asked Questions" portion. MI5s campaign of harassment against me has been going on for almost 9 years, and its longevity and breadth is reflected in the FAQ. Many thousands of people in Britain and abroad, including some recipients of this fax, have known for many years of MI5s activities against me. The FAQ describes the mass "Omerta suppressing its publication"; we pretend Britain is part of the "Free World", yet the British Secret Police, which is what MI5 are, carry on for many years a campaign which politicians and the media know about, and rely on the silent complicity of so many thousands of people.

The FAQs introductory article names those who are "in the know"; media figures like Martyn Lewis, Michael Buerk, entertainment figures like Chris Tarrant, politicians and many in the general public, "all united in a conspiracy which breaks the laws which the UK does have regarding harassment, and all completely uncaring for any semblance of decency or elementary respect for individual rights.

Broadcast media play a key role in the harassment. The very first incident in June 1990 was when a television newsreader reacted to what she saw happen in my living room at home; such incidents of "interactive television" are still happening in 1999. The same goes for radio stations such as Capital FM. In spring 1994, Chris Tarrant on his Capital morning show made an aside to someone else in the studio, about a person he didn't identify. He said, "You know this bloke? He says we're trying to kill him. We should be done for attempted manslaughter". Tarrant and Capital have made strenuous efforts to avoid answering this charge.

Perhaps worst of all, MI5 have deliberately set-up many incidents in public places such as tube stations, shops, cinemas, where they have paid people to throw abuse at me. Since MI5 obtains funds to the tune of 160 million a year to fund its criminal activities, it has funds both to pay its operatives and to "buy" media figures and members of the public to take part in its campaign of persecution.

The Security Service are professional liars. They throw slanderous abuse, yet they refuse to admit out loud that they are doing so. When challenged about their activities through the Security Service Tribunal they lie and deny their activities. They induce other workers and managers at places of employment to take part in their campaign of abuse, presumably by buying them in the same way they buy media figures.

Complaints, and Press Coverage (BBC Lies, MI5 Lies)

As you might expect I have challenged both the Security Service, through the Security Service Tribunal, and offending broadcasters, to own up to what they have been doing. And as you might also expect, all of these people have lied through their teeth. Still worse, they have refused to commit unambiguous lies on paper; they have couched their lies in bureaucratic language, and allowed others to make false assurances and tell lies on their behalf. So when their lies are exposed, they will then tell further Clintonesque lies about how they werent really telling lies in the first place!

On 6/Feb/1997 the BBC told me they would "never engage in any form of surveillance activity such as you describe". The BBC told me Buerk and Lewis had refused to put their lies in writing, but had stated verbal falsehoods denying my accusations of "interactive watching" during news broadcasts. Clearly Buerk and Lewis fear being caught and exposed, so they hide behind their Viewer Correspondence department.

In March 1997 I issued a summons against the BBC to try to "smoke them out". This summons was struck out as "disclosing no reasonable cause of action", because I had acted as a Litigant-in-Person and most LiP summons are treated thus. My case was arguable in law, so the striking out was unjust.

In June 1997 the Security Service Tribunal wrote to me regarding the complaint I had brought against MI5 in February. They say, "The Security Service Tribunal have now investigated your complaint and have asked me to inform you that no determination in your favour has been made on your complaint." I think you can guess the contempt which I feel for the Security Service Tribunal, who have never made a determination against MI5, and act as merely a whitewashing body for the Security Service. Unsurprisingly in May 1997 the Interception of Communications Tribunal gave the same result.

The last few items of "Press Coverage" give details of mentions of the MI5 Persecution in various magazines and newspapers such as BBCs Ariel, the Observer and .net magazine.

Evidence

Some audio and video clips of evidence have been recorded. My weakness in this area is because most of the really unambiguous evidence would have been obtainable in 1990-92, but I wasnt taping anything at the time, and its very difficult to now obtain recordings from that period.

The audio clip "Life is so Hard" relates to harassment at my workplace in Canada. In the latter half of 1996, I was sitting near to co-worker Mark Lee, who kept coming out with words and phrases which showed MI5 were supplying him with data from my home life. For example, I would say something on the telephone at home, and the following day he would repeat verbatim what I had said. When Mark Lee saw I was recording what he was saying, he started to make his remarks more ambiguous, or make the obvious ones out of earshot of the recorder.

However, during the evening of 12 November 1996, at home in my apartment (flat to you UK-ers), I said "life is so hard, and then you die". A nihilistic, negative thing to say, but quite distinctive. The following day, 13 November, Mark said loudly, "life is so hard eh, and then you die" followed by loud laughter. I captured this on my tape-walkman and the computer-audio file is posted on the website.

There are a number of other audio files in the websites "Evidence" area demonstrating the abuse to which MI5 subject me to through their paid agents.

Also in this section is a very interesting article by journalist Bernard Levin, which followed a meeting I had with a friend in 1991, and to my mind describes in some details Levins "artists impression" of the meeting. He talks about a "madman" who "bursts into tears, and swears it is all true. And it is."

Internet Newsgroup (Usenet) archive

From May 1995 until the present day, this matter has been discussed exhaustively on internet newsgroups. The most interesting articles from the first two years of posts are documented here. This area is worth reading since most of the questions which the reader would ask, have been asked at some time or another by someone on usenet. Perhaps the very first article posted sums it all up so succinctly;

Date: Thu May 4 18:27:24 1995
Newsgroups: alt.conspiracy
Subject: BBC's Hidden Shame

Remember the two-way televisions in George Orwell's 1984? The ones which watched you back? Which you could never get rid of, only the sound could be turned down?
Well the country which brought Orwell into the world has made his nightmare follow into the world after him. Since 1990 the British have been waging war against one of their own citizens using surveillance to invade privacy and a campaign of abuse in the transmitted media in their efforts to humiliate their victim.
And the most remarkable thing about it is that what they do is not even illegal - the UK has no laws to protect the privacy of its citizens, nor does it proscribe harassment or abuse except in the case of racial abuse.
A lot of people in England know this to be going on, yet so far they have maintained perfect "omerta"; not a sound, not a squeak has escaped into the English press, and for all the covert harassment absolutely nothing has come out into the public domain.
Have the British gone mad? I think we should be told.

So how much deeper will the persecutors-who-wont-admit-theyre-MI5 sink in their campaign of lies and intimidation? Each time I thought they could sink no lower, they have managed to surprise me. You thought it could never happen here? When the MI5 British Secret Police make their smears against me, it is the corruption of the Establishment, which they are part of, that is demonstrated.

MI5 Persecution Update: Friday 16 April, 1999

If You Intend To Reply, Please Read This
Please.... keep your response to one page!. Faxes over a page or two will be deleted without being read.

BBC newscaster Nicholas Witchell cant stop himself laughing

During 1990-91 there were very many instances of "interactive television" where newscasters and other TV presenters saw on a screen before them what was happening in my home, and reacted, frequently by laughing at me. During this period I unfortunately did not record these programmes. For the last year or two, I have been recording everything I watch, and there has been a drastic decrease in such incidents.

However, on occasion, television presenters do still engage in "interactive watching" and react to what they see. This has been evident with Jon Snow of Channel Four News recently - a particularly interesting case, since it has been established that he cannot be corrupted by money (it is well-documented that MI5 offered him a tax-free salary and he turned them down). I wonder what device MI5 are using to encourage him to do the "interactive watching"?

On Saturday 10 April 1999 at 7pm, Nicholas Witchell on BBC2 News reacted when he saw that I was watching the programme, and I have his reactions stored safely on videotape. I have watched this tape several times and I am entirely confident that my evaluation of his reactions is correct. For several minutes his upper lip quivered in mirth as he attempted to keep a straight face. Then finally his self-control evaporated through the excuse of a weak joke and his face collapsed into a grin.

The strange thing is that I dont know why he was laughing at me, what I had done recently to "deserve" to be laughed at. The MI5 persecutors usually manage to invent some justification as to why people should laugh at and/or abuse me ("hes an X", "it was so funny" etc), so Mr Witchell could have been laughing for any number of reasons. Perhaps he found the views I have been expressing in these articles amusing? I suppose if youre paid enough money and ordered to laugh then even the most innocuous thing becomes funny.

Jon Snow of Channel Four News cant stop himself smirking, either.

On 12 February 1999 I was watching Channel Four News presented by Jon Snow. As usual, I was recording the programme, so that if anything out of

the ordinary happened, Id be able to go back and watch it again.

Now, Jon Snow, by his own claim, is uncorruptible. He says he turned down an offer of a substantial tax-free salary from MI5 - they wanted to make him their mouthpiece, and he told them where to get off.

So you will be most surprised to learn that Jon Snow "interactively watched" me that evening, and on many other evenings. Approximately fifteen minutes into the programme, he announced that the US President would be making a live appearance at about 7.30pm; I looked at the clock on the mantelpiece; and Snow saw me looking at the clock, and visibly tried to suppress a smirk.

Uncorruptible, are you, Mister Snow? If not money, then why are you watching me, Mister Snow? Are they forcing you to watch me? Cant you turn the monitor off, Mister Snow?

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

Comparing the MI5 Persecution with German "Final Solution"

It might seem offensive to compare the mass murder of millions of civilians in wartime with the peacetime persecution of merely one person. Yet the comparison has been coursing through my mind for several years now, because the brutality of German intent to "sub-humans" is very much comparable to the brutality of British intent to someone they vituperate and term "not up to British standards". The methods may differ, but the persecutors mindset is the same.

The Germans first targeted the mentally disabled, too

During WW2 millions of ethnic Russians, Poles, Jews, mentally ill, gypsies and other minorities were rounded up and murdered in purpose-built camps by the German regime, in the name of "racial superiority". Fifty years on, the British Secret Police, MI5, instituted a campaign of mass hysteria; but in their cowardice, limited their activities to one single victim.

It is instructive to note that the early German "cleansing" effort was directed primarily not at Jews, but at the mentally ill. The Nazis set up the T4 project in the thirties to "cleanse" away 70,000 mentally disabled people, including schizophrenics and epileptics. After WW2 the Jews with their media influence used the reaction from the holocaust to roll back anti-semitism in the Western countries; however, the mentally ill are today still a persecuted group in the modern Western world as they were under the Nazis (the current Jewish home secretary in the UK intends to bring in laws for incarceration without any criminal charge for some mentally ill people - he protects his own minority, but does nothing for the other minorities in todays society), and this continuing bias forms a central cause for the current acts of persecution in the UK.

Widespread knowledge of what is happening to the "un-British" minority

In both the German persecution of the thirties and early forties, and the current British persecution, many, many people are well aware of whats happening. There is widespread complicity through inaction of populace; and in a substantial proportion of the mainstread population, the persecution had/has widespread enthusiastic support; yet in both the German case in the 1940s and the British today, the existence of persecution is a mass secret which must be never admitted out loud. In the recent Lawrence case this "secret bigotry" has been termed "institutionalised racism", and that is a very good word for what the British are doing today The persecutory attitudes and omerta regarding them are so deeply ingrained in the national psyche that they define the national mood

During WW2 many Germans knew minorities were disappearing, and through inaction quietly condoned their government's mass murder of "un-German" minorities and inferior "foreigners"; and in the 1990s, similarly, many English people know what the MI5 British Secret Police have been doing, and not only condone it, but actively take part, because of xenophobia against the "un-British" unit minority that is the target of "British" actions. This attitude by the British persecutors has been made explicit through the words "he's not up to British standards"; the British seem to have found their very own "untermenschen" to victimise.

Why these obsessive "holy wars" happen

This type of aggression occurs when the majority is threatened or humiliated in some way, economically, militarily or culturally. In pre-WW2 Germany the threat was primarily economic and military, following Germany's humiliating defeat in the first world war and the reparations it was forced to pay. In modern Britain, one might guess that the majority English who are behind the persecution feel pressured by the swiftly diminishing status of Britain in the world, and the rapidly increasing coloured colonisation of their country, which in time will see the ethnic English a minority in their own land, and their more antisocial elements, unable to reply to the obvious threat, instead project their aggression onto another, weaker, unit minority

In both cases there is a whiff of "holy war" or irrational obsession with the persecution. Certainly the German behaviour fifty years ago bordered on the not-quite-sane, and the current British behaviour towards their chosen victim is strongly tinged with a leave-taking of reason. And the choices open to the victims are the same, since MI5 will never allow me to escape them, "if he tries to run away we'll find him", just like the commandant of Auschwitz telling the new arrivals, "the only escape is through the chimney".

The Victim Will Destroy Us if We Dont Destroy Him First

The persecutors propaganda is the same. Fifty years ago the Germans said, "if we don't do it to the Jews then the Jews will do it to us"; and MI5's propaganda in the early nineties concentrated on their victim as a "monster" aesome "untermenschen" minority.

"We are decent fellows" say the Brutal Persecutors

During the course of researching this article I read part of the very interesting book, "Hitler - A Study in Tyranny", by Alan Bullock. This volume contains a quote from Himmler on the "Final Solution";

"Most of you know what it means when a hundred corpses are lying side by side, or five hundred or one thousand. To have stuck it out, and at the same time .... to have remained decent fellows, that is what has made us hard. This is a page of glory in our history which has never been written and is never to be written."

In the MI5 persecution, too, there is a thread of deliberate brutality to the sick and vulnerable, while the persecutors maintain that "we are decent fellows". There is almost a conscious schizophrenia in the self-attitudes of the Security Service operatives and those in the public who they employ against me, which reflects the contradiction evident in the German attitude above. On the one hand, they stoop to the lowest and most base behaviour; yet at the same time, the MI5 operatives tell themselves that since they are civilised British people, then surely they must by definition be "decent fellows". Any indecency is made the fault of the victim; "hes making us persecute him, so we need feel no guilt".

Yet the conduct is atypical of the way these peoples see their normal modes of behaviour. Befslaughter was not typical of normal German behaviour up to that point. Similarly, the current MI5 abuse goes against the grain of British self-image as being "reserved" and "decent", since they are using terms of abuse which are common among blacks and other supposedly less-developed races, but not among the English.

Conclusion

The ultimate aim of both persecutions is the humiliation and physical extinction of the persecuted group. The Germans did this in a very direct way; the British Secret Police MI5 are acting indirectly and relying on self-extinction of their target, because in peacetime and in the current somewhat false climate of "political correctness" more direct methods are impossible. If MI5 undertook more direct action the mass "omerta" would be broken.

I have written this article with sincerity to show how a historically recent persecution in another country parallels what is being done in this country today. In both cases, the evil-doers are of their countries establishments, and rely on widespread tacit support to maintain the persecution and omerta around it. While the holocaust was undoubtedly the greater evil, it is important to be aware of the fact that had the Germans not been defeated fifty years ago, their plans would have gone through to total completion. In Britain today no force threatens the "permanent government" of which the Security Service forms a part; and it looks very unlikely that the wrongs perpetrated by the MI5 secret police will ever be revealed to public view, and the British secret state brought to justice for its evil actions.

MI5 Persecution Update: Friday 30 April, 1999

If You Intend To Reply, Please Read This
Please.... keep your response to one page!. Faxes over a page or two will be deleted without being read.

Somewhere between 0 and 100%

The last few days there have been no clear recordable instances of abuse. However, while travelling on the Underground, while walking around near my home and going to friends homes, I am constantly troubled by thoughts that those people over there might be about to get at me; that the couple sitting in the opposite seats laughing are in fact laughing at me; et cetera, et cetera.

A comment by a scientist to the BSE inquiry sticks in my mind. He described the possible scale of the epidemic as "between 0% and 100%". It might not be happening, it might not happen at all, to any discernable degree.... or it might be total. Without clear recording, which seems to have become impossible the last couple of weeks, there is no way of knowing whether the harassment really is continuing, whether we have entered a temporary hiatus, or whether perhaps it has perhaps stopped for now.

But for the time being I think there arent any reasons to dicontinue these faxes. I only re-started them six weeks ago in response to a resumption of MI5 harassment; and I think I will need to be more convinced of absence of persecution before I discontinue my complaints.

The Newscasters are still watching

In the last few weeks there have been at least a couple of fairly overt instances of "interactive watching" by newscasters. I reported this in a previous "MI5 Persecution Update".

These instances are really very rare compared to 1990-91, when there were many dozens of such occurrences. Undoubtedly the reduction is due to my practice of videotaping everything I see. Recently I had the opportunity of showing this years "happenings" (Jon Snow/Nicholas Witchell) to my psychiatrist, and he agreed that in both cases the newscasters were expressing merriment without visible cause, and that objectively it might be possible for my claims to be true - although of course other people reported similar thoughts to him, and this thinking is usually a symptom of illness.

Read About the MI5 Persecution on the World Wide Web

The March 1998 issue (number 42) of .net Magazine reviews the website describing it as an "excellent site". Since August 11, 1996 over 50,000 people have browsed this website.

an evidence section, which carries audio and video clips of media and workplace harassment, rated according to how directly I think they refer to me

objective descriptions of the state security agencies involved

scanned texts of the complaints I have made to media and state security agencies involved

posts which have been made to netnews over the last four years on this topic

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

MI5 Waste Taxpayer Millions on Pointless Hate-Campaign

Recently I was talking to an independent observer about the nature and purpose of the perceived campaign of persecution against me. The person I spoke to, a highly intelligent man, said he was struck by the utter pointlessness of the perceived campaign against me. He also said that, if my theories were in fact true, many people would have to be involved, in the surveillance itself, and in the technical side of the delivery of information from my home to TV studios for example, if the "interactive watching" were happening as described. He voiced these thoughts without any prompting from me; but both I and other observers had arrived at pretty much the same conclusions, some years ago.

I saw a team of four men at Toronto Airport in 1993

To carry out the surveillance alone, full-time, would employ four or five men, or their equivalent in terms of man-hours. Each man would "work" an eight-hour shift, so you would need at least three men doing the surveillance, plus a connecting link / manager. An indicator that this estimate is correct arrived in 1993, when I was accosted by one of a group of four men at Toronto Airport; he said, laughing, "if he tries to run away well find him". Plainly these were the men who had been involved in the intrusive surveillance of me for the preceding three years.

On other occasions, I have seen the same man on two or three occasions. On one such occasion, at Ottawas Civic Hospital in November 1996; he gave his name to the doctor as "Alan Holdsworth" or some such; my hearing is not very good sometimes and I am not sure of the surname, although I am sure "Alan" was his first name. I saw exactly the same man again in Ottawa, at the airport, in July 1998. Obviously, other people must be "working" with

this person; he would not be the sole agent employed in this case.

Usenet readers views on the Cost to MI5 of Running the Campaign

Here's what a couple of other people on internet newsgroups / Usenet (uk.misc) had to say regarding the cost of running such an operation...

PO: >Have some sense, grow up and smell reality. What you are talking about
PO: >would take loads of planning, tens of thousands of pounds and lots of
PO: >people involved in the planning, execution and maintenance of it. You
PO: >must have a very high opinion of yourself to think you are worth it.

and......

PM: >But why? And why you? Do you realize how much it would cost to keep
PM: >one person under continuous surveillance for five years? Think about
PM: >all the man/hours. Say they _just_ allocated a two man team and a
PM: >supervisor. OK., Supervisor's salary, say, #30,000 a year. Two men,
PM: >#20,000 a year each. But they'd need to work in shifts -- so it would

PM: >any transcription that needs doing. You don't think the 'Big Boss'
PM: >would listen to hours and hours of tapes, do you.
PM: >
PM: >So, all in all, you couldn't actually do the job for much less than
PM: >a quarter million a year. Over five years. What are you doing that makes
PM: >it worth the while of the state to spend over one and a quarter million
PM: >on you?

Those are pretty much the sort of calculations that went through my head once I stopped to consider what it must be costing them to run this operation. At the very least, a quarter million a year - and probably much more, given the intrusive and human-resource-intensive methods employed. Times nine years. Equals well over two million pounds - and probably much, much more.

Its wasteful for someone with my skills to be unemployed

The wastefulness of the MI5 campaign against me is not just that of futile expenditure on their side. It is also extremely wasteful for someone with my talents to be unemployed and on a disability pension. I am highly qualified in numerate disciplines, yet am unable to work, specifically because of the MI5 hate-campaign against me. It is a terrible waste of resources for a supposedly efficient economy like that of the UK to be squandering the talents of a skilled and capable worker.

I made every effort to remain in employment for as long as I could, but ultimately I was defeated by MI5s employment of massive resources specifically targeted on my workplaces with the sole aim of seeing me

evicted from those workplaces. You might expect this sort of behaviour from the Stasi or some other secret police force in a communist country where labour is cheap, and the governments aim on seeing its citizens confined; but for a supposedly free and efficient economy like Britains, the wastefulness resulting both directly and indirectly from the Security Services activities is simply criminal, and should never be allowed.

The international dimension means the costs are multiplied many times overoer had any sense, then they have surely taken leave of them over the last nine years.

Four years of persecution in Canada

The persecution re-started within less than five minutes of my arrival in Canada, as documented above, and in the "frequently asked questions" article on the website. The words, "if he tries to run away well find him" spoken by one of the harassers at Toronto Airport are now imprinted on my mind.

A year later I emigrated to Canada, intending to find a job and settle there, hoping that MI5s interest in me might dim with time. I did manage to find work there, but my hopes of avoiding Security Service interest were ground into dust. As detailed above, I saw the same man in November 1996 and July 1998, both times in Ottawa. Apart from these encounters, there were numerous incidents between 1994 and 1998 of harassment, of an identical nature and in most cases using identical words to what had occurred in the UK. It became quite clear to me that the permanent surveillance and harassment operation which MI5 had subjected me to in England was being continued.

For a team of four or five men to be employed overseas must cost a lot more than if they operate in their home country. And for MI5 to continue the operation for a period of over four years, continuously, must cost many hundreds of thousands of pounds. This confirms my belief that the state is funding the campaign against mehat the Security Service receives current annual funding of #160M. Divided by 1850 staff, works out at #86,000. But the unit annual cost of each "watcher" must be much higher than this, especially given the frequently mobile and overseas nature of their actions of the last few years. A very conservative figure might be a little over #100,000 pa for each of a team of five people, or half a million pounds per year. For nine years, so far. So the most conservative estimate of the surveillance element alone is perhaps four or five million pounds since 1990.

This guesstimate is of course theoretical - I am not privy to inside details of how MI5 split their funding. But to take some other examples, the cost of a US counter-surveillance specialist per day is USD 5,000. Even if the agents permanently assigned to me are not of this calibre - even if they employ specialists when difficult work planting bugs etc is encountered - their salary and support costs must still be very high. The individual agents are doing well for themselves as they are well-paid to exercise psychopathic instincts which in any sane society

would see them in prison; but the taxpayers who must fund this terribly wasteful exercise are being "done" out of hundreds of thousands of pounds each year.

It must be emphasised that the above estimates are highly conservative. Besides the surveillance operation, it must carry a high cost in man-hours to propagate covert slanders through the population; to setup and maintain the "interactive watching" links to TV and radio stations, which these organisations continue desparately to "lie and deny"; and to induce antipathy in co-workers which would not otherwise exist.

Why they are wasting Millions of Pounds on a "Nobody from South London"

As remarked in the prologue to this article, it is really most extraordinary that the Security Service spends a chunk of its budget, every year for nine years so far, on a meaningless campaign against a "nobody from South London". That they are spending such a large amount of money has been confirmed to me on several occasions, usually by oblique references to "its costing this country millions". The supposed "logic" behind the persecution is that MI5 wish to avoid their harassment of me, and the involvement of the UK media, to be made public; yet as the reader will appreciate that is a circular argument, "theyre doing it because they want to keep it secret and avoid humiliation for themselves and their country" begs the question, "why did they start doing it in the first place?", to which in truth I myself do not know the answer.

Plainly MI5 with its rich budget can afford half a million pounds a year to waste on a "nobody from South London". Some time ago I was talking to a British surveillance professional on Compuserve who told me "this work costs a lot of money and is usally because the person I am following has done something (usually criminal) to warrant all this money and time being spent." Yet in this particular case it is plainly not the "victims fault" that the harassment is taking place. The hate-campaign against me is completely the creation of the obsessive psychologies of the MI5 agents who have made themselves my persecutors; it is obviously a "personal" campaign for them, and for years they misuse taxpayer funding to feed their insane, unnatural and fixated fantasies.

2331. MI5-Persecution: Four Years of MI5 Persecution Posts on Internet Newsgroups (20136)

Newsgroup: rec.radio.amateur.equipment
Date: 2007-12-16 15:18:21 UTC
From: MI5-Victim@mi5.gov.uk
Message-ID: <m07111615181896@4ax.com>

Four Years of "MI5 Persecution" Posts on Internet Newsgroups

For approximately the first three years of the MI5 persecution, from June 1990 until late 1992, I kept as quiet as possible, in the hope that by not reacting, MI5s interest in me would decrease and they would simply go away of their own accord. This is the sort of behaviour some people employ against bullies; if the bullies arent getting a reaction, then they might simply go away and victimize someone else.

Unfortunately, this tactic didnt work. The quieter I became, the more shrill and hysterical the noise from the Security Service operatives. For about two years I didnt watch TV news at all. Yet this only heightened their obsessed fixation; they continued to follow me wherever I went, they continued to induce harassment at work by managers and fellow workers, and they continued to encourage me to commit suicide. They seemed to regard my refusal to react as a crime which they would have to "put right" by ever more extreme forms of abuse.

Finally, in 1995, I changed tactics radically. Since late 1994 I had had accounts with internet providers in Ontario, Canada. I discovered the cornucopia of internet newsgroups, on every topic from consumer electronics, to politics and legal topics, and I discovered online services such as Compuserve and AOL. In May 1995, I made the first posting to the conspiracy newsgroup, on the subject of "BBCs Hidden Shame".

BBC's Hidden Shame

The internet newsgroup discussion, which has now reached its fourth anniversary, started with an article in alt.conspiracy, which I reproduce here.

Date: Thu May 4 18:27:24 1995
Newsgroups: alt.conspiracy
Subject: BBC's Hidden Shame

Remember the two-way televisions in George Orwell's 1984? The ones which watched you back? Which you could never get rid of, only the sound could be turned down?

Well the country which brought Orwell into the world has made his nightmare follow into the world after him. Since 1990 the British have been waging war against one of their own citizens using surveillance to invade privacy and a campaign of abuse in the transmitted media in their efforts to humiliate their "victim".

And the most remarkable thing about it is that what they do is not even illegal - the UK has no laws to protect the privacy of its citizens, nor does it proscribe harassment

or abuse except in the case of racial abuse.

A lot of people in England know this to be going on, yet so far they have maintained perfect "omerta"; not a sound, not a squeak has escaped into the English press, and for all the covert harassment absolutely nothing has come out into the public domain.

Have the British gone mad? I think we should be told

At this point, I did not name MI5 as my persecutors. I was still unsure that they were the ones responsible for the "psychological terrorism". In followup posts however I did name them; and the persecutors have never denied the claim; so I think my guess is valid. (The Security Service Tribunal in 1997 have said "no determination in your favour was made", but it is a well established fact that MI5 lies routinely to the Tribunal which has never found in favour of a plaintiff, so no conclusions can be drawn from this.)

This first post was made to alt.conspiracy, but further posts were made to the UK-local newsgroups, in particular uk.misc but also uk.legal and uk.politics (which is now called uk.politics.misc). Some time ago I tried to take the battle to the Compuserve forums, UKPOLITICS (which is now called UKCURRENT - current affairs), but my articles were censored by the forum operators. Such censorship is impossible on the internet newsgroups.

Police Refuse to Act

I have complained several times to the Metropolitan Police, who have each time refused to help.

From: Green <Green@guidion.demon.co.uk>
Newsgroups: uk.misc,uk.politics,alt.politics.british,soc.culture.british
Subject: Re: MI5 Persecution: Why Aren't the British Police Doing Their Job?
Reply-To: Green@guidion.demon.co.uk
Date: Sun Apr 7 21:13:30 1996

In article <DpIE0r.736.0.bloor@torfree.net>
bu765@torfree.net "Mike Corley" writes:

>Last Easter (1995) I went into the local police station in London and spoke to
>an officer about the harassment against me. But I couldn't provide tangible
>evidence; what people said, in many cases years ago, is beyond proof, and
>without something to support my statements I cannot expect a police officer to
>take the complaint seriously.

This in itself dos not suggest that the police have it in for you. The old bill operates on extremely tight spending limits forced on them by that pillock Michael Howard, and without evidence, they often have higher priorities than chasing something that cannot go to court.

I doubt that the police are actually being leant on, but they probably realise that if they looked into this, they would be leant on hard. The met always stays away from anything that looks like it has Defence, Security or secret service interest already, because they realise that they are below these government agencies in the general

pecking order.

If I walked into my local nick and complained that MI5 were snooping on me, they would show me the door without even looking at my evidence, because that bored desk seargant with only five years to go before he retires doesn't want to start fucking about with somebody who has incurred the wrath of Stella Rimington. He would rather deal with the lost dogs and driving licence producers, eat his cheese and pickle sandwiches and piss off home at the end of his shift than have some high ranking spook having a go at his boss and getting him a bollocking.

In short, you have earned much sympathy but little surprise. Just remember that saying about the enemy of your enemies.

Most recently, I wrote in March 1999 to Charing Cross Police Station CID. They did not acknowledge or reply to my letter. When I phoned them up, the detective Id written to treated me to a sadly not unusual display of police bigotry, with an uneducated rant about "your paranoid rubbish".

It would be nice to think that such uneducated bigotry is something other than wholly typical of police behaviour, but unfortunately that is an illusion that is rapidly dispelled.

Uncorruptible Jon Snow of Channel Four News

From previous articles the reader will know what I think Jon Snow has recently been watching me while he reads Channel Four News in the evening. Recently I digitized a few moments of one such broadcast, where his face twists into a smile, without there being anything in the news broadcast to cause merriment. Here is a usenet post from some time ago on MI5s "bought and paid for" tools in the so-called "free" press.

Peter Harding (harding@ermine.ox.ac.uk) wrote:
: I was at speakers' corner on Sunday. There was one chap who was bellowing
: about something or other, I don't know what, but one thing he said to
: someone caught my ear:

: "BBC, MI5, same thing."

Can't disagree with that sentiment.

Wasn't it documented that MI5 sometimes "bought" journalists and broadcasters?
I remember reading a report by some jouralist who had been offered an extra
tax-free income by MI5 to become their covert mouthpiece, and had refused.
.....
> : >mouthpiece, and had refused.
> :
> : It was Jon Snow of Channel 4.
>
> Was it reported in any of the papers?

It has been reported several times. The most recent was in Private Eye, a few months back. As I recall they also wanted information from him; journalists would be a natural choice for members of the Security Service and the Secret Intelligence Service for information sources.

> It might be interesting to see what he had to say regarding their
> attempt to recruit him.

He was most concerned that many others would have accepted such an
offer. However, we can probably make an educated guess as to some of
those who accepted: Nigel West (Rupert Allason, MP) and Chapman Pincher
would come near to the top of the list.

Corrupt Security Service agents steal millions from taxpayers

Money is of course a factor in the grand equation which is the MI5
persecution. It costs money for the Security Service to "buy" people in
the media etc. But that is only a small part of their expenditure of
taxpayers resources. Most of the expenditure is directly on the salaries
if the agents involved; and in this post I put forward the theory that MI5
are trying to draw out their involvement for as long as possible, very
cynically, to maximise their income and line their own pockets.

At each stage they have tried to pretend that I am something out of the ordinary.
Either I was very stupid ("he's an idiot") or very clever ("he's like a genius").
Either I was a threat to Western civilization (Levin once referred to me as the next
Hitler) or I was completely defenceless ("a soft toy").

Now, it should be obvious to any person with common-sense that I am not out of the
ordinary in any way. I have an IQ which is average for the Web, I am racially white
European, and there are plenty of other people with schizophrenia or epilepsy out there
who haven't been targeted for MI5 attention, so why me?

I think the answer is that the MI5 agents who harass me have cynically exploited the
situation by painting me as extraordinary in order to assure themselves of well-paid
employment funded by the ordinary British taxpayer. To put it bluntly, they are
stealing millions of pounds from the taxpayer to feed their own pockets.

This assertion is supported by the observation that it's the same agents who are doing
the harassment. Six months ago in a local hospital I was harassed by someone whose face
I had seen (he had stared straight at me aggressively, at the time I just thought it
was some nutter but it turns out he was one of "them") aboard a KLM flight a couple of
years ago. It's presumably been the same people most of the time. I've seen the way
contractors act when they don't want their positions terminated. Would these agents
really want to lose their well-paid employment harassing me? Presumably they are
promising their bosses a "breakthrough" (ie my demise) real-soon-now and have been for
the last seven years, while all the while these MI5 agents skim millions
off the taxpayer.

I wouldn't mind a job like that. Perhaps if I persecute myself a little bit, like standing in front of a mirror and shouting mindless obscenities, do you reckon I'd get a slice of the caky Service Tribunal. This year Nick Brooks, current Tribunal Secretary, confirmed to me that he could not think of a single case where the Tribunal had found in favour of a complainant. Here is my usenet post from two years ago.

Subject: MI5: "It wasn't us"
Newsgroups: uk.misc,uk.legal
Organization: Toronto Free-Net

"The Security Service Tribunal have now investigated your complaint and have asked me to inform you that no determination in your favour has been made on your complaint."

Signed ER Wilson, Tribunal Secretary

Well that's a relief then. All that spamming for nothing eh. Gaw blimey, if they say they're not doing it then it can't be them, can it?

In a recent letter to Mr Brooks I expressed the opinion that the Tribunal were unable to fulfil their responsibilities in the face of MI5 falsehoods. Nevertheless, I do intend to make another complaint to the Tribunal in the near future, despite the Tribunal appearing to be a toothless watchdog.

Discrimination against a Unit Minority

MI5 have been very clear in their instructions as to what I should do. They have openly shouted at me the word "suicide", and also from the other abuse it is clear that they want my existence terminated.

This point is covered in more detail in a previous article. The following post describes the xenophobic nature of MI5s campaign against me. They have refined their bigotry down to a unit minority, yet they make use of the discrimination against the mentally ill which is a feature of current British society.

>Indeed. If you've ever had a 'conversation' with someone suffering
>from florid schizophrenia, you'll know how difficult it can be to
>'argue' with them.

I don't have florid symptoms. But I'm in a difficult situation, because those people who don't know, aren't going to believe, and those who do, they just go along with the crowd. It's never a good idea to go against the grain, and the grain here is defined by interests in the establishment and the media. Even people who could say out loud what was happening won't, because then there's a

risk that they'll be seen as traitors and ostracised.

Usually this type of 'hidden abuse' is racial and targetted at a racial minority within a country. You keep the minorities out of the good jobs, but you don't admit discrimination exists. It happens everywhere, not just in Britain. The persecution that is going on now is in reality a refined form of racism. Instead of "nigger" it's "nutter", and abusing the mentally ill is still socially acceptable today. In 50 years it might not be, but today there isn't any social or legal sanction against it.

So really they've refined racial harassment down to a minority of one. The words may be different, but the methods are the same.

MI5 Persecution: BBC Newscasters Lie & Deny They're Watching Me

Central to the persecution campaign waged against me for some nine years now by the Security Service is their use of the media, and in particular the broadcast media, to make clear to me that I am under surveillance and being watched within my own home, even by BBC newscasters while they read the news. This is really an act of arrogance; MI5 and their tools in the television and radio are so sure that they can never be caught, that they have many times made explicity clear on broadcast programmes that they are as capable of seeing me as I am of seeing the broadcast pictures. Even when they have known I am taping the programmes they still carry on this practice; for examples of TVand radio presenters caught "in action", see the Evidence area of my website.

If you wish to reply to this article......
then please include your name and fax number! I provide the means for recipients to send me their thoughts on the topics discussed, but ask that you provide me with your fax number or email address if you require a response. Also would you please send not more than one or two pages, if by fax. Thank-you!

It started with a Newscaster, and it continues with Newscasters today

The very first incident in the story started with a reaction by an ITN newscaster, Sue Carpenter, in June of 1990, almost nine years ago now. She reacted to what she saw in my living room at home as she read the news. My mother had brought an apple for me into the room, whereupon the newsreader smirked and giggled, apparently finding this funny. I couldn't believe what I was seeing. I carried on watching news and other television programmes to see if presenters would show signs of "interactive watching"; to my surprise, this happened again and again. Unfortunately, I did not have my wits sufficiently about me to videotape these programmes, and it is now almost impossible to obtain recordings dating back to 1990.

However, I have been busy recording everything Ive watched the last couple of years, and the taping has yielded some nuggets, which you will find if you point your Web browser at the "evidence" area of my website, whose URL address is given above. Strangely it is not particularly the BBC who are "after me" at the moment (with the exception of occasional fire from Nicholas Witchell), but that supposed paragon of virtue and decency Jon Snow of Channel Four TV News (he actually works for ITN), who once claimed hed turned down MI5s offer of a tax-free salary. I will cover Snows recent actions in a future article.

BBCs Hidden Shame

The first ever Usenet post (internet newsgroup article) on the subject of the MI5 bugging / BBC watching occurred, as stated in a previous article, in early May 1995. It is reproduced here;

Date: Thu May 4 18:27:24 1995
Newsgroups: alt.conspiracy
Subject: BBC's Hidden Shame

Remember the two-way televisions in George Orwell's 1984? The ones which watched you back? Which you could never get rid of, only the sound could be turned down?

Well the country which brought Orwell into the world has made his nightmare follow into the world after him. Since 1990 the British have been waging war against one of their own citizens using surveillance to invade privacy and a campaign of abuse in the transmitted media in their efforts to humiliate their "victim".

I suppose "BBCs Hidden Shame" is more of a wish than a fact. It may be hidden, but the BBC and other media and security organisations seem to have no shame whatever in their anti-social, not to say criminal, actions. Nor do the general public, who seem quite happy to parrot the vilest obscenities without much hesitation or apparently thought.

Martyn Lewis, Nicholas Witchell and the rest

Most of the harassment occurred in 1990-92, when I wasnt making any recordings, and the BBC wont release copies of current affairs programmes from that period.... so although I can remember there were many incidents in that time, even many specifics, I cant dig up the actual programmes to flesh out the bones.

This year, there has been at least one incident with Nicholas Witchell as newsreader, which I have successfully recorded and digitized, i.e. converted into a computer Quicktime movie file. This has not yet found its way onto my website (Im a busy man, dontcha know) but you can be sure I will let the readership of these articles know when that clip makes it onto the web. The Witchell clip was recorded on Saturday 10 April 1999 at 7pm, and shows Witchell trying to restrain his features from collapsing into a smirk. First his upper lip quivers for several minutes, then with the non-excuse of a non-joke his entire face twists into a grin. It looks as if he finds me so funny, that he allows himself to submerge any pretence at professionalism in a sea of MI5-inspired sarcasm and harassment.

The two BBC newscasters whose reactions to me I can remember most vividly over the years are Martyn Lewis and Nicholas Witchell. I can remember thinking years ago that Michael Buerk was also seeing me at home; and if the other two are watching then there would be no reason why he wouldnt be doing the same; but in all honesty I cannot remember a single clear instance of his reacting through facial or verbal expression to me.

I can remember several instances of Martyn Lewis reacting to what he saw of me, however. In early 1992 I was watching the BBC news with Lewis on a

small black-and-white portable TV at my then home in Oxford. I threw a term of abuse at Lewis; he flinched, then gave a grin and made a comment from which I understood that he had been on my side, but might have changed his mind as a result of what Id just said to him.

And in spring 1991 I remember Martyn Lewis clearly reacting to what he saw of me at my then accommodation in Woking, Surrey, by continuing to stare at some fixed point near the camera after the news had finished - presumably this is where the monitor interactively showing pictures of my room was located.

Why would BBC and other Newscasters Watch and Harass Me, Watching Them?

This is a very difficult question, and I dont actually know the answer. It is a matter of record that the Secret Services are very much part of the Establishment. The recent exposure of the "MI6 Agent List" on the internet, and its coverage in the newspapers, reveals how much MI5 and MI6 are recruited from the ranks of the Establishment. Obviously the relationship is bi-directional; the Establishment influences MI5/MI6, but the secret services (well, perhaps not so secret now we know who works for MI6!!!) also influence the machinery of power and information dissemination i.e. media in this country. So they must have a lot of covert leverage with the BBC and ITN.

Some of this leverage is obviously through bribery. It is a matter of record that MI5 tried some years ago to "buy" Jon Snow of Channel Four TV. He turned them down - obviously they must have approached other media people as well, and from the lack of other reports of people turning them down, it may be presumed that some other journalists will have accepted the sugared carrots put before them. Ironically, Jon Snow has been taking part in the recent "watching" actions against me - but why he has allowed himself to be used by the secret services is something which I do not know.

Perhaps the Security Service uses blackmail to twist arms of journalists into co-operating with them? I have always thought there was something slightly odd about Martyn Lewiss demeanour. At the time of the Ron Davies "rough trade" scandal it was reported that MI5 had known all about Davies predilections and the sham of his pretence to be a happily married man. Perhaps MI5 have been able to dig something up from Martyn Lewiss private life to blackmail him into acting on their behalf? And if there wasnt anything before the "newscaster watching" started then there most certainly is something now.... once theyve started watching, the newscasters will surely wish their activities to remain covered-up, and co-operate with the security service.

"Newscaster Watching" Deliberately Constructed to Mimic Schizophrenia

Presumably this is the first case in history of television journalists actually taking part in acts of real-time, live spying and reacting against one of their viewers. What you have to understand, though, is that I was quite mentally healthy in June 1990, certainly relative to November

1992, when after two and a half years of harassment I was finally admitted to hospital as an out-patient. MI5 decided from the outset that they would make me mad; they constructed the media harassment to resemble what would be reported by a person with mental illness; and then they carried on years of abuse to inflict on me the condition which they wished to use as an excuse to cover up their abuses.

I sold my portable TV in autumn 1990 and stopped watching television regularly. I realise now that this may have been a mistake. What I should have done was to watch TV and listen to the radio, but tape-record everything and make a note of what each excerpt meant to me. I would then be in a much stronger position as regards to evidence that I am now. That is what I am trying to do now, but unsurprisingly the TV/radio presenters have stopped getting at me, now they know they are being recorded.

When I started publicising my case on internet newsgroups in 1995, I was met with the disbelief one might expect to be accorded to a mentally ill person who talks about "newscaster watching" and media persecution. Some newsgroup participants thought I had started a "troll", an invention made to obtain a reaction; one bright spark even suggested a group of psychology students were behind the articles. But most people thought the articles were symptomatic of derangement - and that is exactly what MI5 want people to think. MI5 chose me as a target because I was mildly mentally ill at the outset in 1990, although I stress my illness then was very mild in comparison with November 1992, and because they knew that enough abuse would (a) make me much more seriously ill, and (b) once I was more ill, they would "get away" with a harassment deliberately constructed to look like the symptoms of paranoid schizophrenia.

Martyn Lewis Denies & Lies, But Wont in Writing

In February 1997 I wrote to BBC Viewer & Listener Correspondence and asked them to investigate the claim that their newscasters had engaged in "real-time spying" on me. They replied that they had asked Martyn Lewis and Michael Buerk whether they had engaged in such practices, and that they had both made verbal denials to VLC, but were refusing to put their denials in writing.

To me it looks as if Lewis and Buerk are happy to lie verbally but not in writing, because written falsehoods would place them unambiguously in the wrong, whereas they can try to talk their way out of verbal lies if they are ever caught, or perhaps even deny the verbal lies completely? If they lie without shame, then why would they have any shame about future lies about lying?

BBC-VLC also said that the BBC "would never engage in any form of surveillance activity" such as that described. Clearly Martyn Lewis and the rest have lied to their own organisations personnel about their criminal actions. So much for the "objective", "truthful" BBC, a nest of shabby liars.

Summons against the BBC, for Nuisance caused by Newscaster Spying

In March 1997 I issued a civil summons against the BBC, seeking injunction against further "newscaster spying", and token damages for what the BBC had done to me until that date. The purpose of the summons was to try to "smoke out" the BBC, since obviously I did not have good evidence which would be necessary for either a civil or criminal case to be made against them. My summons was worded as follows;

1. The plaintiff is and was at all material times residing at [home address]. At some time prior to or during June 1990, persons of unknown identity entered Plaintiff's premises and installed concealed television equipment in said premises.

2. A campaign of harassment was launched against the Plaintiff by the persons of unknown identity, which in part took the form of instigating harassment by BBC TV newscasters (including specifically Michael Buerk and Martyn Lewis) as they read news bulletins, by making direct and personal comments to Plaintiff.

3. The campaigns purpose was to subject Plaintiff to great mental stress and induce mental breakdown. As a result of it Plaintiff did indeed suffer from severe mental strain in 1990-97.

4. In order to avoid the mental strain being caused to him the Plaintiff has been compelled to stop watching BBC TV news. Defendant therefore committed the tort of private nuisance, since normal use of home was interfered with.

5. Plaintiff claims a permanent injunction prohibiting further nuisance, and damages for nuisance suffered limited to 5,000.

Naturally, my attempt to smoke-out the BBC and its lying newscasters failed. The BBCs litigation department sought to have my summons struck out; and they succeeded in doing so, on the grounds of my action "disclosing no reasonable cause of action". I was also prevented from issuing further civil claims against the BBC without leave of the Court. Apparently litigants-in-person frequently / usually have their claims struck out with this wording, regardless of the merit of their claims.

BBC Suppresses my Claims of "Watching by Newscasters"

BBCs staff magazine Ariel ran my advert "BBC Newsreaders Spying on my home" for one issue in the Personal category on 8/July/1997 before it was spotted and axed by editor Robin Reynolds; please see webpage; http://www.pair.com/spook/evidence/plaint/ariel.htm
Clearly the BBC will not allow claims of its wrongdoing to be made public in the media channels it controls.

On several occasions people said to my face that harassment from the TV was happening. On the first day I worked in Oxford, I spent the evening in the local pub the Rose and Crown with the company's technical director Ian, and Phil, another employee. Ian made a few references to me and said to Phil, as if in an aside, "Is he the bloke who's been on TV?" to which Phil replied, "Yes, I think so".

The reader might think that mere "watching" by newscasters etc might be a relatively benign happening. But it is not; it is part of MI5s framework of harassment and lies. On many occasions the reactions of the BBCs newscasters to me has been in the nature of sarcasm, implicit contempt and abuse. This is visible in Witchells news programme mentioned above, where he engages in abuse by laughing at me during his newsreading. It was particularly visible in the early period of 1990-92, and as late as Autumn 1993, when during a Newsnight broadcast Jeremy Paxman interviewed a football person about soccer hooliganism, and the interviewee gave vent to an unsubtle rant about "theyre idiots, theyre just idiots, keep up the surveillance". Paxman started grinning, showing he understood and was taking part in the abuse being perpetrated on that programme.

Conclusion

The MI5 Persecution started with harassment by television newscasters, and today harassment by TV and radio presenters still forms a key part of MI5s activities against me. When this business started in June 1990 I was in relatively good health of mind. Years of persecution by the secret police and their mouthpieces in the state-run BBC and other media eroded my health until MI5 achieved their aim of seeing me rendered mentally ill in November 1992. The diagnosis which was forced on me unfortunately and ironically meant that my reports of the harassment are disregarded, because the mentally ill are second-class citizens in todays Britain.

Yet TV and radio harassment continues, albeit in a reduced form, despite my taping all the programmes I watch, resulting in my being able to obtain and demonstrate objectively on the website instances of media presenters attacking me. Unfortunately these recorded instances are quite tenuous; I might understand them, the presenters understand what it is theyre doing, but despite many thousands of people knowing the truth of the "newscaster watching", the omerta continues and they continue to refuse to admit the truth of the matter. It is a terrible indictment of British society that there is not even one decent person willing to speak out. I look forward to the day when the truth does finally emerge, and the mass corruption which has allowed the MI5 persecution to take place is finally purged and the Establishment criminals caught and appropriately punished.

MI5 Persecution: Molestation during Travel

MI5s persecution of me varies in intensity. Since 1990 it has been steady for perhaps 80% of the time; there was a notable quiet period in 1993, and another quiet period in Jan-Feb 1995, as well as a hiatus in the first two months of 1999. It puzzles me that they cease and restart, seemingly without any logic or reason. But one aspect of MI5s activities against me which is relatively predictable is this weeks articles topic, which is Molestation during Travel. Almost every time I cross the Atlantic, go to the Continent or even try to enjoy a holiday in this country, you can bet that MI5 will be there doing their utmost to wreck it all.

This aspect of the harassment is particularly relevant as I will be travelling to Europe again in a months time, with naturally the Minidisc recorder in tow; so it will be interesting to see if I can record the abuse which will almost certainly take place, either on the Tube going to the airport, at the airport, on the flight, in the terminal building - MI5 have previously instituted instances of abuse at each of these locations, so well see how much taxpayers money they waste this time, and whether it will prove possible to capture their abuse on minidisc.

Read about the MI5 Persecution on the Web

June 1992 in Polands mountain resort of Zakopane

The persecution started in June 1990, and for the first two years I stayed in the UK apart from a couple of brief day trips to Calais. By the summer of 1992 Id had enough of being cooped up in England with abusive fellow employees egged on by an abusive secret police service, and decided to spend 10 days in southern Poland, on what was intended to be a holiday at the mountain resort town of Zakopane.

Unfortunately the psychopaths of the Security Service were not willing to allow me to enjoy a holiday in peace and quiet. The journey to Zakopane was by coach from the meeting point at Londons Victoria coach station (National Express) followed by ferry followed by another coach across Europe. As we left Victoria a youth and his girlfriend started a loud tirade of abuse directed at "this bloke", where the "bloke" was never named, but it was very clear that the "bloke" was myself. The youth said "they" had "found somebody from his school, and he was always really stressed at school, a real psycho". Again, the label "they" was not elaborated on, but it was clear that "they" = the persecutors from MI5. The boy also said, "he was in a bed and breakfast for only one night and they got him". By a not unexpected coincidence I had been in a B&B in Oxford a week previously, which had been booked from work; other things

lead me to the conclusion that the company's offices were bugged for most of the 2 1/2 years that I was there, so "they" would have known a room in the B&B had been booked. After a few minutes of this I went back to where they were sitting and asked where they were travelling. The boy named a village in France, and the girl's giggling suddenly ceased; presumably it permeated to her brain cell what the purpose of the boy's abuse was.

It is now very clear to me that MI5 were trying to have me incarcerated, assaulted or killed on this trip across Europe. The degree of verbal violence inescapably leads to this conclusion. When we arrived at our destination, it became clear that many people, both in our tour group and its guide, and among the ordinary residents of the town, knew there was a movement under way to "get" me. MI5 employed many people and significant resources for an action which they knew would only take a maximum of ten days. A commercial operation would never have felt able to waste such resources on such an unproductive and temporary action; only a state-sponsored, taxpayer-funded entity like the Security Service would be able to be so wasteful.

To give some examples of what happened in those ten days; I was walking in some woods outside the town, when a Polish woman, looking at me, said the English "shit" in a strongly Polish-accented voice. For the first three years 1990-92 MI5 had been trying to force this word on me. Another example; I was walking near my "hotel" when a mother said laughing to her child, "a wiesz ze to prawdziwy wariat" which means "you know hes a real madman". And the "TV reacting" happened there too; on Polish TV, a bemused looking journalist said to another, "to jest sprawa Anglikow", which means "its the concern of the English", in other words, none of our business, despite what the English are trying to force down our throats.

Just before we left for home, I went with some others from our group to a nearby bar. There a man shouted at me the same sexual obscenity which MI5 have constantly thrown at me these last three years. I think MI5 try to justify their various terms of abuse by repeating them at me until I say them, either while conscious or while talking in my sleep; and then they seize on my saying those words to "prove" that the obscenities are "my fault", et cetera. This rather stupid reasoning of theirs can actually be seen as indicative of the psychopathic condition attributed to them in a previous article; blaming the victim for the crime you inflict on him is how psychopaths think.

Nor did the persecutors let up during the return trip. Returning on the ferry over the channel, a rather insalubrious-looking guy talked to his mates about "and you know this bloke, hes really mad you know, hes really mad". On the National Express return coach to London, a group of five or six young people started shouting at me. I slumped in my seat and tried to avoid presenting a target, so they got ever more strident - "whats the matter with you, cant you hear us?" One of the other people who had been on the trip to Poland asked them why they were shouting at me, and they said, "hes been to Cambridge", to which the co-holidayer asked them, "have you been to Cambridge?" presumably thinking they were aggrieved fellow

students, but they answered "no". Even after I left the coach at Elephant and Castle abuse continued; in the tube station, two kids started throwing abuse at me; one of them said to the other, "and you know he works?" to which the other answered "yes".

Immediate Aftermath of November 1992

As you will know from previous articles, my manager at OCG - ARIS/Oxford, Mr Mitchell, induced a mental breakdown in me in the months leading up to Nov/92. The diagnosis was regarded by the persecutors as a victory for them, because few if any people give credence to allegations of harassment when they are made by somebody suffering from schizophrenia. There is also a bias against the mentally ill, an "institutionalised bigotry" in society comparable to the institutionalised racism against blacks.

However, MI5 did not let up on persecuting me following Nov/92. In December 1992 I flew by charter jet to Alicante in Spain for two weeks recuperation. MI5 planted one of their people on the flight, a youth who tried to start some noises that "hes a nutter". One of the other passengers replied, "oh hes a nutter is he? oh well!" and the youth shut up and said nothing for the rest of the flight. I think it would be fair to say that the youth on the flight was embarrassed by what he had been asked to do in making the flight "uncomfortable" for me; he sounded defensive rather than aggressive.

My first trip to Canada in June 1993

Ive already covered this in a previous article so Ill just give a brief summary here. On 10 June 1993 I flew British Airways from Heathrow to Torontos Pearson Airport. On de-planing from the aircraft, one of a group of four fellow passengers looked at me and said, laughing, "if he tries to run away well find him". It was quite obvious that these four men were the ones who had been harassing me since 1990.

I did nothing to apprehend them or bring this incident to the attention of the airport authorities, mostly because this was my very first visit to Canada, and the last thing I wanted was to get into a dispute before I had even finished disembarking. In retrospect, I can see this was a terrible mistake; I should have made every effort to detain and identify these people.

Subsequently I have made numerous attempts to obtain the names of these people from British Airways passenger lists, by talking to BA, through a lawyer in Ontario, through a solicitor in England, through the UK police, and also through private detectives in the UK. But all my efforts have come to nothing. BA have told me they keep passenger lists for a period of seven years, so they will still have the list for this 1993 flight. I did not see or hear anything during the rest of my visit to Ontario in 1993 which would have lead me to believe that I was being watched or followed.

Journey across Canada in summer 1994

As I think Ive already said in previous articles I emigrated to Canada in late May 1994. For six weeks between late May 1994 and early July 1994 I travelled across Canada from coast to coast, starting in Toronto, visiting various cities and ending up in British Columbia. I saw this both as something of a holiday, and the chance to get to know a little better my adopted country.

As you can guess, MI5 followed me everywhere I went during these six weeks. In Toronto, where I started this trip in late May, I was spoken about by one youth to another with the words "hes an idiot", to which the other replied, laughing sympathetically, "good luck to him".

A couple of days later I went to Montreal and stayed at the YMCA downtown. As you can guess (this is all so predictable, isnt it?) MI5 followed me there and bugged my room at the YMCA. Not only that, but they managed to set-up an instance of "newscaster reaction" from a local television station; while I was watching a Vermont TV news programme on the set in my room, the woman reporter said, "well theyre just tired and they want to go home", which sounds like a pretty unprofessional thing to say until you realise she was trying to say of me that I was the one that was supposed to be tired, and they (ie MI5) wanted me to go home to the UK.

On the bus journey across the North American continent, it was quite clear that MI5 were following me every step on the way. For the first part of the journey they actually put someone on the bus with me, a youth who said at me "that guys paranoid" and tried to incite other passengers to attack me. I stopped for a couple of days in Winnipeg in central Canada, and on leaving the town heard on the radio a female presenter ranting about "insanity! insanity!". It is very tiring travelling such a long distance by bus; I took the journey in two steps, each of about 36 hours; and it is especially tiring when you know MI5 are watching you and harassing you every step of the way.

When I finally got to Vancouver, MI5 instituted the usual harassment, in very short order. I was surprised how quickly they were able to induce hatred towards me in elements of the general populace; the Security Service must have employed a number of agents and serious resources in a very short period of time; and for no real gain, because I havent been back to BC for almost five years, so all their "work" appears to be for nothing. In downtown Vancouver a street person said in front of me, "theyre all talking about him". For a few days I was staying at Pauls Guest House (345 W.14th Ave); on the day I left, the owner Paul shouted at no-one in particular, "hes going to Victoria" - which was quite accurate, I was indeed going to the provincial capital Victoria on Vancouver Island. But I had not told anyone at the guest house where I was going; I had only mentioned to my parents back in England on the phone that I was going away from Vancouver for a few days. Which leads me to suppose that MI5s bugging of the phone in my parents house yielded the "intelligence" that I intended to visit Victoria, and they had passed the information on to Paul.

When I got to Victoria it was again obvious that the persecutors were "doing their stuff" there as well. On the street I was identified as being English, although I had not said anything so my accent hadnt given me away; and returning by ferry to the mainland, I was abused by a Canadian woman who said, "hes a nutter! you can run but you cant hide". During my years in Canada I have never heard the word "nutter" on any other occasion; I do not think it is part of Canadians vocabulary; so the Canadian woman on the ferry, who was obviously talking about me, must have been supplied with this word by the English persecutors. And once I got back to Vancouver, staying at the Austin Hotel on Granville St, I listened to a conversation in the apartment block directly opposite, and a man saying, "hes paranoid, so thats as bad as it can be, so why are they doing this to him?".

Holiday in the States, August 1995

By 1995 I was living in Canada, and in August I went down the eastern seaboard to Florida and as far as Key West by car. As you can guess (this is all so boring and predictable, isnt it?) MI5 followed me every step of the way. I can see in retrospect that this must have been quite easy for them as they had my car bugged, both on the inside to listen to anything that was said and what radio station I was listening to, as well as what must have been a tracker device installed to track it across long distances.

The first city I visited was Philadelphia. In the old Congress Hall where the first US Congress assembled, the woman guide started referring to my situation, saying that "all these people in Europe were watching it", and they were "a little paranoid" at this 18th-century experiment in democracy. Also I had recently written a newsgroup post where Id described a (female) poster as "wet-nosed" (implying "canine"), and a young girl in Philadelphia remarked, "so he thinks were dogs?" There were two or three more incidents during this holiday in the eastern States, including a radio station down near Miami, showing "they" had tracked me all the way there, and were bugging the inside of my car; but I didnt record the details and Ive forgotten some of it now. Also down in Miami Beach a French tourist in a lift expressed support for me with the words, "cest incroyable" ie. its incredible, meaning that MI5s well-known actions against me were beyond belief.

To go back a bit, in about May/June 1995 Id visited New York, again by car, and was insulted several times by people using the same words that had been used against me in England. In Central Park, and elderly Englishman (not a real gentleman - but then the Engish view of themselves as "gentlemen" etc is quite laughable) looked at me and said "idiot". And while I was eating in a streetside restaurant a New York youth started laughing and said something like, "I cant believe it, hes actually here" - I think that was because I had had an expressed wish to visit New York for some years before this, although after this visit I wont be going there again for a very long time.

Visit to Poland December 1995/January 1996

In December 1995 I flew (BA again, unfortunately - every time Ive flown BA one of these incidents has happened, presumably MI5 is happier setting up harassment on British-domiciled carrier) from Montreal to Berlin and travelled on to Poland to visit family. MI5 naturally harassed me in Poland during my brief stay. They followed me around and got Polish people to take part in the harassment. In one case two Polish youths talked in front of me saying in English (with marked Polish accents), "fucked up men, fuck you". There were also other incidents which I dont remember too clearly since it was some time ago.

The return flight connected through Heathrow, and in the transit lounge MI5 again set-up harassment against me. In Poland they were talking their abuse in English, and in London they set Polish people after me to speak in Polish; they heard me on the phone to my father, and said "a wiesz ze to Polski wariat", in an almost sympathetic, inclusive fashion (translation. "you know hes a Polish nutter"). Once on the flight to Montreal I was again set upon by two English youths, one of whom spoke and the other listened. The aggressive "fat bastard" youth said, "if he wants to be a wanker" (its my fault theyre harassing me, you see), self-justification that "hes a nutter" (so we have to keep on abusing him, because hes ill), as well as talking about the town in Poland where I had been staying. He also said, "he doesnt know who we are", but as already remarked in a previous article, that was at best a half-denial of my guess expressed in internet newsgroups that the people after me were MI5 - if anything its a half-confirmation rather than a half-denial.

These incidents are still going on. You can hear digitised audio files of abuse on a BA flight to Berlin in 1998 on the Web at address

On this flight they were again attacking my mental health; "paranoid, hes paranoid" and "nutter" are discernable. The last "during travel" contact was at Ottawa Airport on 21 July 1998, when "Alan Holdsworth" the psychopath MI5 agent, dressed as a vagrant, was pacing aggressively in the departure area. In three weeks I will again be travelling to Europe; we will see what fresh acts of molestation MI5 perpetrate during this trip.

"one useless man is disgrace 2 become a law firm 3 or more become a congress"
adams

woger you are a Congress all in your own head

http://kb9rqz.bravejournal.com/
altopia is never used by KB9RQZ
nor is Konstans@hotmail.com ever udsed on the usenet from anywhere but google and noow
motezrella

posts from these sorucees are fakes

and get ou the newly recovered KB9RQZ.blogspot.com as well

MI5 are Afraid to Admit They're Behind the Persecution

MI5 have issued a formal denial of any involvement in my life to the Security Service Tribunal, as you might expect them to; but, more importantly, the persecutors have never denied that theyre from the Security Service, despite several years of accusations from my corner on usenet and in faxed articles. I am not surprised that the Security Service Tribunal found "no determination in your favour". I am however a little surprised that the persecutors have refused to confirm my identification of them; by doing so, they implicitly admit that my guess was right.

"No determination in your favour" says the Security Service Tribunal

In 1997, I made a complaint to the Security Service Tribunal, giving only the bare outlines of my case. I do not think it would have made very much difference if Id made a much more detailed complaint, since the Tribunal has no ability to perform investigatory functions. It can only ask MI5 if they have an interest in a subject, to which MI5 are of course free to be "economical with the truth". A couple of months after my complaint the Tribunal replied that;

The Security Service Tribunal have now investigated your complaint and have asked me to inform you that no determination in your favour has been made on your complaint.

Needless to say this reply didnt surprise me in the slightest. It is a well established fact that the secret service are a den of liars and the Tribunal a toothless watchdog, so to see them conforming to these stereotypes might be disappointing but unsurprising.

It is noteworthy that the Tribunal never gives the plaintiff information on whether the "no determination in your favour" is because MI5 claims to have no interest in him, or whether they claim their interest is "justified". In the 1997 report of the Security Service Commissioner he writes that "The ambiguity of the terms in which the notification of the Tribunals decision is expressed is intentional", since a less ambiguous answer would indicate to the plaintiff whether he were indeed under MI5 surveillance. But I note that the ambiguity also allows MI5 to get away with lying to the question of their interest in me; they can claim to the Tribunal that they have no interest, but at a future date, when it becomes clear that they did indeed place me under surveillance and harassment, they can claim their interest was "justified" - and the Tribunal will presumably not admit that in their previous reply MI5 claimed to have no interest.

"He doesnt know who we are"

In early January 1996 I flew on a British Airways jet from London to Montreal; also present on the plane, about three or four rows behind me, were two young men, one of them fat and voluble, the other silent. It was quite clear that these two had been planted on the aircraft to "wind me up". The fat youth described the town in Poland where I had spent Christmas, and made some unpleasant personal slurs against me. Most interestingly, he said the words, "he doesnt know who we are".

Now I find this particular form of words very interesting, because while it is not a clear admission, it is only a half-hearted attempt at denial of my guess that "they" = "MI5". Had my guess been wrong, the fat youth would surely have said so more clearly. What he was trying to do was to half-deny something he knew to be true, and he was limited to making statements which he knew to be not false; so he made a lukewarm denial which on the face of it means nothing, but in fact acts as a confirmation of my guess of who "they" are.

On one of the other occasions when I saw the persecutors in person, on the BA flight to Toronto in June 1993, one of the group of four men said, "if he tries to run away well find him". But the other three stayed totally quiet and avoided eye contact. They did so to avoid being apprehended and identified - since if they were identified, their employers would have been revealed, and it would become known that it was the secret services who were behind the persecution.

Why are MI5 So Afraid to admit their involvement?

If you think about it, what has been going on in Britain for the last nine years is simply beyond belief. The British declare themselves to be "decent" by definition, so when they engage in indecent activities such as the persecution of a mentally ill person, their decency "because were British" is still in the forefront of their minds, and a process of mental doublethink kicks in, where their antisocial and indecent activities are blamed on the victim "because its his fault were persecuting him", and their self-regard and self-image of decency remains untarnished. As remarked in another article some time ago, this process is basically the same as a large number of Germans employed fifty years ago against Slavic "untermenschen" and the Jewish "threat" - the Germans declared, "Germans are known to be decent and the minorities are at fault for what we do to them" - so they were able to retain the view of themselves as being "decent".

Now suppose this entire episode had happened in some other country. The British have a poor view of the French, so lets say it had all happened in France. Suppose there was a Frenchman, of non-French extraction, who was targeted by the French internal security apparatus, for the dubious amusement of French television newscasters, and tortured for 9 years with various sexual and other verbal abuse and taunts of "suicide". Suppose this all came out into the open. Naturally, the French authorities would try hard to place the blame on their victim - and in their own country, through the same state-controlled media which the authorities employ as

instruments of torture, their view might prevail - but what on earth would people overseas make of their actions? Where would their "decency" be then?

This is why MI5 are so afraid to admit theyre behind the persecution. Because if they did admit responsibility, then they would be admitting that there was an action against me - and if the truth came out, then the walls would come tumbling down. And if the persecutors were to admit they were from MI5, then you can be sure I would report the fact; and the persecutors support would fall away, among the mass media as well as among the general public. When I started identifying MI5 as the persecutors in 1995 and 1996 there was a sharp reduction in media harassment, since people read my internet newsgroup posts and knew I was telling the truth. The persecutors cannot deny my claim that theyre MI5, because then I would report their denial and they would be seen as liars - but they cannot admit it either, as that would puncture their campaign against me. So they are forced to maintain a ridiculous silence on the issue of their identity, in the face of vociferous accusations on internet newsgroups and faxed articles.

Have MI5 lied to the Home Secretary?

In order for the Security Services to bug my home, they would either have needed a warrant from the Home Secretary, or they might have instituted the bugging without a warrant. Personally I think it is more likely that they didnt apply for a warrant - I cannot see any Home Secretary giving MI5 authority to bug a residence to allow television newscasters to satisfy their rather voyeuristic needs vis-a-vis one of their audience. But it is possible that the Security Service presented a warrant in some form before a home secretary at some point in the last nine years, for telephone tapping or surveillance of my residence, or interception of postal service.

So the possibility presents itself that a Home Secretary might have signed a warrant presented to him based on MI5 lies. Just as MI5 lie to the Security Service Tribunal, so they might have lied to a Home Secretray himself. MI5 and MI6 are naturally secretive services former home secretary Roy Jenkins said, they have a "secretive atmosphere ... secretive vis-a-vis the government as well as [enemies]". Jenkins also said he "did not form a very high regard for how they discharged their duties".

It was only a few years ago that MI5 was brought into any sot the extraordinary thing is that British media organisations like the state- and taxpayer-funded BBC take such an active part in the MI5-inspired campaign of harassment. We have after all heard of MI5 trying to bribe broadcast journalists; but surely there must be a substantial number who are not bought or blackmailed by the Security Services, and who take part in the "abuse by newscasters" of their own volition? The BBC is supposed to be independent of the government of the day as well as the Establishment in general. While perhaps it is childish to think that the BBC is anything other than effectively state-controlled, the degree of

collusion between the BBC and the British Secret Police MI5 is something you would not find in many countries. Individual tele-journalists in other countries would have enough self-esteem not to allow themselves to be controlled by their secret police - seemingly, BBC broadcasters like Martyn Lewis and Nicholas Witchell have such a low opinion of their employing organisation that they see no wrong in dragging the BBCs no-longer-good name through yet more mud, at the mere request (whether supported by financial or other inducements) of the British secret Police, MI5.

And when challenged, these broadcasters LIE about their involvement, with just as little shame as MI5 themselves. The BBCs Information dept have said that;

"I can assure you that the BBC would never engage in any form of surveillance activity such as you describe"

which is an out-and-out lie. Buerk and Lewis have themselves lied to their colleagues in the BBCs Information department over the "newscaster watching", but unsurprisingly they refuse to put these denials in writing. Doubtless if the "newscaster watching" ever comes to light, Buerk and Lewis will then continue to lie by lying about these denials. So much for the "impartial" BBC, a nest of liars bought and paid for by the Security Services!

It is obvious that the persecution is at the instigation of MI5 themselves - they have read my post, and only they have the surveillance technology and media/political access. Yet they have lied outright to the Security Service Tribunal. Similarly, BBC newscasters Michael Buerk and Martyn Lewis have lied to members of their own organisation. The continuing harassment indicates they are all petrified of this business coming out into the open. I will continue to do everything possible to ensure that their wrongdoing is exposed.

MI5 Persecution Update: Friday 11 June, 1999

Harassment in a pub in Clapham, Tuesday lunchtime

Once a month, or once every other month, I meet a Polish friends of mine who lives in Clapham North, and sometimes we go to a particular pub near where he lives. The last time was some two months ago; I did not have my minidisc-walkman with me, and consequently was seriously harassed by people MI5 had instructed to harass me, in the pub.

This Tuesday, 8 June 1999, we again went to the same pub for a pre-meal drink. This time I did have my minidisc-walkman with me. As you can guess, we were followed into the pub by a couple of young people (Im getting older and older - isnt it funny how the MI5 agents all look young these days?). They started talking about my situation, in particular some travel I had booked the previous day. Unfortunately, they were talking fairly quietly, and my minidisc didnt pick up their speech.

MI5s schizophrenic reasoning is that simultaneously I am very important and worthy of their acts of persecution, and I am also totally unimportant and their abuse of me "doesnt matter". Perhaps they should test their agents and managers for obsessive personalities or psychotic features in the same way as employees are drug-tested. MI5 might lose their "worst cases" employees if some psychological testing were applied to their recruitment procedure.

Toothless Watchdogs. What a Surprise.

Recently I have been engaging in communications with two watchdogs, the Security Service Tribunal which deals with complaints against the security service (and always clears MI5 of any wrongdoing), and the Data Protection Registrar, which is mandated to investigate misuse of personal data held on computer.

In a letter to Nick Brooks, Security Service Tribunal secretary, dated 20 April, I asked him if the Tribunal, as an allegedly independent body, had the means to investigate complaints against MI5 other than asking MI5 to themselves investigate complaints. To my disappointment, his reply two weeks later answered the question only indirectly, in the negative. Whatever the reader might think of the merits of the case I have been putting before you in faxed articles this last year and half, you will surely recognise that it is a significant anomaly for the Tribunal to have no independent means of investigating complaints, particularly given the view expressed even by previous home secretaries that the security services are untrustworthy.

MI5 Persecution: No Justice for the Victims of MI5

In a previous article I detailed the similarities between the current MI5 Persecution in England, and other historical instances of similar persecution, notably that by the Nazi Germans in the thirties and forties. The Germans persecuted first the mentally ill, the epileptics and those suffering from schizophrenia, then moved on to racial groups; in todays Britain the persecution is again directed at those with mental illness, which the British in their cowardice find easier than taking on racial groups as the Germans did. But just as in Thirties Germany there was no recourse against a malign and omnipotent state, so the MI5 Secret Police in the modern British Fascist State allow no justice for their victims.

No Recourse Against the Security Services Illegal Harassment

It has become apparent to me over the last nine years just how loaded the dice are in todays Britain, a fundamentally fascist country which masquerades as a democracy. Britain is a democracy in name only; the Establishment, the defence and MI5 secret police are always there, regardless of which party has been voted into power most recently - and from "New Labours" conduct in office one finds it difficult to tell them apart from Old Tories, in their crackdowns on the sick and vulnerable in society.

In thirties Germany the victims of the Nazi regime had no legal recourse against their State oppressors; and in todays Fascist British state, the victims of the Establishment and its MI5 Secret Police similarly have no recourse against the illegal state-funded and organised oppression. There is supposed to be a mechanism for dealing with MI5 crimes, in the shape of the Security Service Tribunal and Commissioner; yet these have never found favour of a plaintiff. One might as well ask the Nazi SS to investigate crimes against epileptics or Jews as ask the Security Service Tribunal to investigate MI5 crimes against British citizens; it is quite obvious what the answer is going to be, regardless of what you say to them, and what evidence you provide. The Tribunal and Commissioner are a mere formality, a whitewashing body to give the Secret Services a veneer beneath which they hide their shabby criminality.

"Institutional Racism" and Bigotry in the Metropolitan Police

The recent inquiry into the racist murder of Stephen Lawrence found clear evidence of systematic and deliberate racism in the Metropolitan Police, which cannot have surprised anyone. Commissioner Sir Paul Condon accepted a somewhat lukewarm definition of institutional racism as being "unconscious". In truth, and this truth must surely be obvious to anyone who has any familiarity or encountered the great British police, the Met has not just "unconscious" racism, but very clearly "conscious" and deliberate racism, of the kind that would have done Thirties Germans proud. And it is a bastion of such open racism - when many other parts of society are learning to live in a multicultural environment, the Met is still living in the past in its attitude to the minorities.

But in addition to the systematic racism confirmed by the Lawrence inquiry, there is also something much more relevant to this case, which is systematic police bigotry against the physically and mentally disabled, which I personally have experienced in my dealings with the police over the years. You cannot expect equal treatment if you are mentally disabled. I tried to make a complaint to the police in 1995 about the harassment I had been subjected to for several years. As soon as they found out I had mental illness, they refused to even talk to me. I tried again in March 1999; the police made various threats to me, while ranting about "your paranoid rubbish" in reference to the complaints expressed to them.

The police refusal to do the job they are employed and paid to do is extremely serious, particularly as this case is highly important, indeed key to the whole issue of British self-perception at the end of the 20th century and the beginning of the 21st century. Britain has lost much in the last fifty years - it has lost an empire, it has lost its self-respect and its identity as a people. If the MI5 persecution finally makes it into the light and the Security Services are seen for the rather cheap bullies their behaviour indicates, it will have a massive and harmful effect on British self-perception in the new century.

Security Service Tribunal - Blatant Whitewashing

A few weeks ago I spoke on the phone to Nick Brooks, the Secretary of the Security Service Tribunal, which is supposed to deal with cases of MI5 transgression. I asked him if the Tribunal had ever found in favour of a plaintiff and against the Security Service. He answered that as far as he knew, it had not.

I also asked Mr Brooks if the Tribunal had any means of investigating allegations of criminal activity by MI5, other than asking MI5 themselves if they had engaged in such activity. His rather circuitous written reply states that the 1989 Security Service Act provides that "it shall be the duty of every member of the Service to disclose or give to the Tribunal such documents or information as they may require for the purpose of enabling them to carry out their functions under this Act". Which is a very round-about way of saying - "No" - the Tribunal has no way of investigating MI5 crimes - None At All.

Setting up the S.S. Tribunal, and creating a Security Service Commissioner, was really an act of falsehood by the government. It is generally recognised that MI5 are out of reach of the normal criminal justice system - the police, as we have seen, have no intesot answer to the government; in a previous article I quoted Roy Jenkins speaking of "a secretive atmosphere.... secretive vis-a-vis the government as well as [enemies]", and a "lack of frankness" from MI5.

If the government wanted to, it could reform the secret services and ensure they acted in conformance with the laws which have been enacted for them in the last ten years. But apparently the present government does not see any need to ensure security service compliance with the law. As noted above, the regulatory machinery for MI5 is deliberately weak; the Tribunal

has no independent means of investigation, and it is simply a waste of time complaining to the Tribunal or Commissioner.

Every so often, fresh revelations come to light of secret service transgressions. We have heard from Shayler that MI5 bugged Jack Straw and Peter Mandelson; we have heard from Peter Wright that MI5 plotted to see Wilson ejected from office; yet so closed is the system of government that the law is never enforced against MI5 when they "bug and burgle" everyone from politicians to ordinary citizens.

No Justice from the Legal System, either

Britain has a civil and criminal justice system which effectively limits many complaints from being heard. For a civil complaint to be brought before a court, you need a solicitor willing to act on your behalf. Supposedly it is possible to represent yourself as a Litigant-in-Pthe basis of being "frivolous and vexatious" or "disclosing no cause for action in law". This is exactly what happened to me in 1997 when I twice tried to take the BBC to court for spying on me in my living room at home; my case was twice struck out, and on the second occasion an order was made against me that I could not bring further civil litigation against the BBC without leave of the court.

As the reader can guess it is quite impossible for a person with schizophrenia, who complains about the secret services and media interfering in his life, to find a solicitor willing to represent him in legal action against the persecutors. I have quite a lot of evidence of the continuing persecution which I have posted on the website, even if the evidence is quite tentative and perhaps open to varying interpretations. But I have tried several firms of solicitors; some of them have acted unprofessionally and abused me; all of them have refused to represent me. My psychiatrist gave me the name of the firm of Bindman and Partners in central London, and I have approached them twice. On each occasion they refused to accept my instructions. Plainly the problem with Bindmans, which they have admitted, is their bigotry against mentally disabled people; yet this is not just something that is wrong with Bindmans, it is something that is wrong with the legal system as a whole, since the legal system necessitates finding a solicitor willing to represent you in order to bring a case to court, but it does not have a mechanism for providing a lawyer in the case where no solicitor is willing to take on your case. So the British legal system is such as to prevent cases such as mine from ever receiving an airing in a court.

So much for the civil courts. But the criminal justice system is no better. Two years ago the Protection from Harassment Act came into force. But again, while the Act is all very well on paper, in practice it is unenforceable in my case, since it would require Police action to see the law implemented, and if the police cannot even be trusted to conduct a murder investigation competently (in the Lawrence case), then what chance is there of their investigating complaints against the Security Service? Of course, it would be possible for me to personally issue proceedings through a private prosecution either against MI5 themselves,

or against one or more of their media tools; but here we see the same problems as with the civil courts, because first of all I would have to find a lawyer willing to act on my behalf. Litigants-in-person do exist in the criminal courts, but the Attorney General can bring such a prosecution to an end by taking it over and entering a plea of "nolle prossequi"; and I suspect that if I were to bring a private prosecution against either MI5 or one of their media tools, then this is exactly what would happen.

So much for British justice. But if anything the wrongs that have been perpetrated on me by the British justice system are quite mild to what others have suffered. Others have been wrongly convicted based on police evasions and lies, and spent many years in jail based on false charges. I should count myself lucky that despite the best efforts of the MI5 secret police, I have not acquired any criminal charges or convictions; which shows that for all their resources and influence, and the clear imperfections in the British legal system, there are still limits on how much subversion MI5 can achieve.

The latest in a long line of injustices

A comment I heard during the recent scandal of the police mishandling of the Lawrence murder investigation is that "its not as if the police themselves murdered him". This is not a particularly wise statement to make about the case, since it could be argued that the four alleged murderers were aided in their crime by the expectation that the police would deliberately botch the investigation - which of course is exactly what the police did.

But in my case, this would be a completely inaccurate thing to say - since the MI5 secret-police have expressly been trying to nine years now to see an end put to my life, either by having me incarcerated and my liberty ended, or by forcing self-termination on me. It is exactly as if the secret police "themselves murdered [me]", since that is what their aim is in their campaign against me.

The public has heard of instances of police mishandling of cases, of police manufacturing evidence, lying in court, extracting false confessions to clear up crimes, et cetera. Various instances of extra-legal activity by the secret services have also come to light in the last few years. The unhappy truth is that what MI5 have been doing to me for the last nine years is really nothing out of the ordinary for them. To me it seems unbelievable that this sort of systematic campaign of harassment, which thousands and thousands of people in this country and abroad are well aware of, could exist for such a long period of time with the media maintaining "omerta". But my case is not the first such instance of persecution by the "British secret police", and judging by the lack of any real controls on MI5, I very much doubt it will be the last.

MI5 Have Systematically Destroyed My Life

This is getting depressing. From the feedback Ive received, the recipients of these faxes are tired of hearing my complaints, and in truth I am tired of sending them. The reason I havent yet ceased sending faxes is because I cannot think of any other effective means of replying to MI5s actions against me, and I feel I have to do something to try to defend myself. Three/four years ago I got the MI5 harassment out of my system by posting about it on Internet newsgroups, and for a few months this tactic was quite effective - I received (and indeed still do today) support from newsgroup regulars, and felt I could make my voice heard and break the MI5 monopoly on access to the British media. But that was years ago, and today nobody gives a tinkers cuss about my internet posts - so I have sought to escalate matters by communicating directly with the politicians who allegedly say how this country is supposed to be run.

Of course, its quite expensive to keep up a campaign of fax messages for many weeks. Each set of faxes takes approx 50 hours to send over the weekend, and costs perhaps 35. My phone bill for the last quarter was 350. These figures are naturally insignificant compared to what MI5 have been spending against me over a similar period. It also takes a lot of time and energy to create a new article every week, and try and find new and fresh aspects and viewpoints on MI5s persecution of me. I am beginning to run out of both new topics and energy to write these articles.

So I have a suggestion to put before the MI5 persecutors who have been wrecking my life since 1990. In a few days time I will be going on holiday to Poland and Germany, for a couple of weeks. Previously, almost every time I have travelled by plane, or gone anywhere on holiday, the MI5 "wreckers" have been most assiduous in destroying these trips. My suggestion is; if MI5 leave me alone on this next trip, I will cease transmitting these articles. If, however, there are any clear instances of harassment (and I am very capable of recognising MI5 harassment when I see it), then I will make public these instances and publish any recordings I may make of them, and, unwillingly and unhappily, continue the articles.

Read about the MI5 Persecution on the Web

Keith Hill MP (Labour - Streatham), my elected representative, as ever refuses to help.

MI5 Refuse to Allow me to have a Normal Life

Its kind of difficult to contemplate having a normal existence when you know your entire house is bugged from top to bottom, for audio and, very

unpleasantly, video; when your employment is systematically destroyed, over and over again; when every time you leave the country your travel is disrupted by MI5 plants on the plane yelling abuse at you..... you get the idea. I would like to have some semblance of a normal life, like my Polish and English friends do. But MI5 have made this impossible, and they have leached massive resources from the taxpayer to institute a life not worthy of the name on me.

A few years ago MI5 were very open about their aims in persecuting me. They were shouting "suicide" at me, both in Canada where I lived at the time, and during my occasional visits to London. You cant get much clearer than that. There have been instances as recently as a few weeks ago of this intention being voiced by their side; on 15 April 1999, a woman at the next ticket counter at the Royal Festival Hall said;

"it would kill it, you know, it would just be overkill... they can't stop can they"

meaning that "they" were trying to "kill it" i.e. me and they "cant stop". The audio file is at;

I wonder why they "cant stop". Nobody (who doesnt know already) believes my claims - so what difference would it make, if they were to "stop" persecuting me? Perhaps what this persons remarks indicates, is the depth of the obsession MI5 have with this case. They have chosen at random a person from the general population, and done their worst to ruin my life. What is wrong with these people, that they persecute a national of the country whose citizens they are supposed to protect?

No Chance of a Harassment-Free Job

Since the harassment started in 1990 I have had three jobs, the first near Guildford, the second in Oxford, and the third overseas in Canada. All three jobs have been systematically destroyed by MI5. It is so ironic that MI5 employs a team of agents, each well compensated for their efforts, to persecute just one person paid a mere fraction of what they get for their "work". In fact, it is a joke that MI5 is allocated resources for this sort of effort. If this area of government were run along commercial lines then MI5 would be very rapidly closed down, they produce nothing of any value, instead spending their time obsessed with the bugging and surveillance of their former employees like Shayler, dangerous subversives like Straw and Mandelson, and "threats to national security" like yours truly.

Applying for my first post university job

When I was applying for my first post-university job in the closing months of 1990, I found at two or three job interviews that MI5 had got there ahead of me. Interviewers knew what words to repeat from what had been said at my home recently; MI5 had supplied them with words to hurt me, and the "British secret police" were trying to wreck my job search and discourage me from joining the world of work. This and the continuing harassment in the media and by the public meant that the search for a job

took very much longer than it would ordinarily be expected to take for a person with my qualifications.

With my first job near Guildford came the knowledge that MI5 were doing everything possible to make me lose the job. Despite their efforts I managed to stay in work for ten unhappy months, during which they made very clear to me that they were bugging my workplace, my accomodation in Woking, my car, my home..... and they also made clear that they had "got to" my employer in Guildford.

Employment with Oxford

I was able to find a new job, with Oxford Computer Training Services (now ARIS/Oxford), quite quickly. But it became very clear, very quickly, that MI5 were treating this job the same as the first; they tried to get the other employees and in particular the managers to attack me. It was plainly MI5s intention that I be sacked fro this job. But I was not sacked; instead, after almost a year of abuse from OCTS managers, I was forced to seek medical help, and had to take two months off for medical leave. OCTS MD Hugh Simpson-Wells was motivated in keeping me on by the fear that if he sacked me, then I would take him to court for the treatment OCTS managers had meted out to me during 1992.

Emigration to Canada

When I emigrated to Canada in 1994, I did think that perhaps MI5 would leave me alone, given that I had made the effort to leave the UK and try to find a new life overseas. I could not see any reason why they would continue to harass me over in Canada. But clearly the MI5 agents had their salaries to think about, since continue to harass me they most certainly did, at my home in Ottawa, and by getting fellow employees to speak against me, as had happened with previous jobs in the UK.

MI5 are denying me a future in work

Former Chief Constable of Devon and Cornwall John Alderson had this to say regarding MI5's activities;

"MI5 is not under the same restraints as the police. They infiltrate organisations, people's jobs and lives. They operate almost like a cancer."

Currently I am on disability, and I can see that MI5 are denying me a future in work. It would be an insult to logic for me to return to work and find a job, in the knowledge that an entire team of MI5 agents, paid in total many times what I would be earning, would have the objective of seeing me "done down" in the employment, and ejected from the place of work. This situation is completely wrong and nonsensical - I would very much like to have a job, but MI5 are preventing me from even thinking about returning to work. The culture of secrecy in MI5/MI6 means there is no objective oversight of their expenditure, when external oversight and greater transparency might lead to wasteful and illogical operations such as that against me being shelved.

Watched and Harassed at my Home and Accommodation

As you will know if you have been reading these articles, MI5 have watched and harassed me at my home, and at every accommodation Ive had since 1990. Theyve also watched me at neighbours houses in London, and at short-term accommodation such as hotels and bed-and-breakfasts. They have used the "words" gained from these watching activities against me, by passing these words on to other people such as OCTS managers for them to make clear that I am being watched where I live.

Harassed at rented rooms in Oxford in 1992

This was at its worst in 1992 in Oxford, where during the week I lived at rented accommodation in Oxford, and at weekends returned to my parents home in London. I was being severely harassed by managers at my place of work, OCTS; and it was clear from the things they said that they were being supplied by MI5 with details of my home life, that they were being supplied with words to repeat at me.

In 1992 I moved house in Oxford many times, living at a total of five rented accommodations in ten months. In January I started off living in a rented room at Headington near the ring road / A40 intersection; then when it became clear that house was being bugged, moved to a rented room in Botley, some miles away. It was at the house in Botley that I had an "interactive watching" experience with Martyn Lewis while he was reading the news; I threw a term of abuse at him; he first flinched, then gave a gsult of what I had just said, he was no longer "on my side".

So I moved house again. This time to a place in Cowley, near the Rover car works, where I stayed for a few weeks. Because of continuing harassment at work, I soon moved from this accommodation, to yet another rented room on Iffley Road. By this time I was very ill and being abused continuously at work. Again, MI5 followed me to the rented room on Iffley Road, and created new instances of "newscaster watching". There was a television in the room which I watched, and as you can guess the newscasters got at me when I was watching the television. Also once I was assaulted, if thats the word for what happened, on leaving the house; a youth grabbed me by the coat lapels, roughed me up a bit with various terms of abuse. I did not report this assault to the police, because what was happening to me at work was very much worse, and nobody seemed to think that that was worthy of being reported to the police. Later that day at work, Alex G, a fellow employee, said "I heard he was assaulted".... I had not told anyone at work about the incident that morning..... so once again it was made very clear that MI5 were watching my rented accommodation and giving information about what was going on there to managers at work.

So I moved house yet again in late autumn 1992, this time to a rented room in a large house on Woodstock Road. I stayed there for several weeks as the situation at work deteriorated due to OCTS managers abuse, until I was forced to take sick leave from work for two months and attend hospital as an outpatient; at which point I gave notice on the room, and returned to London.

MI5 continued to harass me after the diagnosis of serious illness was made. As reported previously, they harassed me on a flight to Spain in December 1992; and in 1993, when I returned to live and work in Oxford, they again bugged my rooms, as well as my workplace, although the intensity of the harassment was very much less than in 1992.

Watched, followed and harassed in Canada

It dismayed me to find that MI5 would not leave me alone after I had settled in Canada. In January 1995 I rented an apartment at the Bayshore complex in Ottawas west end. For some weeks there was no sign of the "buggers". But then it started all over again. They first bugged my car, which had a car alarm installed - the alarm went off two or three times in a single evening, and the following day gave a signal that the car had been broken into. Then they bugged my apartment, and in particular they installed bugs on the phone line in my apartment.

In September 1995 I moved to a new apartment in Ottawas Bytown Market area, the restaurant and entertainment heart of Canadas capital. This proved a serious mistake. In the west end I had been fairly distant from the centre of town where MI5 concentrated their efforts at turning people against me. In the Market area it was much easier for the persecutors to motivate people to harass me, and over the next couple of years there were frequent instances of harassment by the general public.

From 1995 I had some Polish friends in Ottawa, and as the reader can guess, MI5 have spent much effort trying to break up this friendship. They supplied various things about my home life to these friends, for example where I was living in the Market, directly over the road were the studios of a music radio station, which you had to "look up" to see; and MI5 told these friends that I was "looking up" to see the radio station; so the friends then replayed these words back to me, that I was "looking up". MI5 have also made various sexual slanders against me, and these friends also unwittingly replayed some of the words they had been imprinted with by the MI5 persecutors.

MI5 Will Never Allow Me to have a Normal Life

I have heard many excuses as to why MI5 continuously prevent me from having a normal life. We are told that MI5 are defending the country against a tere to zero.

When I have travelled abroad, they always put their people on the flights, on the journeys I undertake, to continue the harassment, so that I am put off further overseas travel, and chained to my home in London. Yet even this is illogical, because when I lived in Canada, they would still put people on flights back to the UK.... and what possible reason would they have for doing that? Perhaps the truest words to describe the MI5 persecution is that reason has nothing to do with their activities - sane people do not behave in the way the MI5 British Secret Police have been doing.

Summer 1999 - more MI5 harassment?

In only a few days time I will be going to Europe again. This time I have deliberately chosen to travel by a non-UK airline; so we will see if they put their paid agents on this foreign carrier, we will see if they try to harass me on this non-British flight.

If they do harass me on this trip to Europe, or if they resume the harassment in London after I return home, then I will continue to report their activities in these faxes. As I said at the beginning of this article, I would very much like to not have to send these articles any more, but that is not my decision to make - it is entirely up to MI5 to cease their pointless persecution of me, once and for all.

Its currently Monday evening, Dec. 17, and I have received absolutely no postings from my various email discussion groups I am subscribed to in the past 24 hours. Nothing on Yahoo groups indicates there are any problems with my account.

Is anyone else experiencing this?

Ed

Problem: I accidentally set a freq. to Priority. [F]-[DW]

Question: Short of reseting the memory, and having to re-enter ALL those repeaters, how do I turn it off?

Steve Evans

From: KB3DNZ <kb3dnz@p1s.com>
Message-ID: <FeGdnWUvlKHuP_TanZ2dnUVZ_t6onZ2d@ptd.net>
Source record: 3675

My meter doesn't display direction any more and I'm trying to figure out where I should be looking--control box or inside rotator. Everything else works fine; rotator turns; break works; lights light; etc. The fuse inside the control box was blown. I replaced it--still no meter indication. Anyone have any ideas?

tnx

If you mean does it indicate at all: When I turn the contol box on the needle moves to the extreme right position and then falls back slightly. If I turn the calibration adjustment the needle moves. It just won't track with the rotator.

SolderSmoke!
A SHOW FOR ELECTRONICS HOMEBREWERS!

http://www.soldersmoke.com

Listen at: http://www.soldersmoke.com

SolderSmoke #72

December 19, 2007
M0HBR's Bollywood debut.
Alien hams.
Blackboxophobia.
Solar power (in Rome and on Mars).
TechShop.
South Pole IT.
Mixer madness.
The Radio Club of America.
200 Meters Index.
Peter Dahl.
MAILBAG: Al on audio quality,
WB2REW on Yogi Berra,
W9ILF's tube type mp3 amp,
G8SEQ's bad case of "The Knack",
N8XMS's "Curiosity Curse."

Tired of listening to the Alicia Keys or the BBC on your I-Pod?
Wouldn't you like to be able to carry with
you the kinds of ham radio conversations that you
listen to while in your radio shack? Tune in to SolderSmoke!

RSS FEED: You can subscribe to the program, have
them downloaded to your MP-3 player, and listen to
them at your convenience. To subscribe, just cut and
paste this URL into your I-poder (or similar)
software.
http://www.soldersmoke.com/soldersmoke.rss

If you don't have an MP3 player you can just go to the
site below and listen to the latest program (and
earlier editions) using the audio software on your
computer.

http://www.soldersmoke.com

All the programs are available here.

I hope you enjoy the program. Please send us feedback.

73 from Rome

Sometime in the past couple months I saw a small descriptive product article on a Bluetooth interface device designed and marketed for ham radio usage. I saw this writing in either CQ Magazine or QST, but I am unable to find it again.

Does this ring any bells with anyone here? Can someone point out where I saw this?

Thanks.

Ed K7AAT

There was an article in February 2007 QST, pages 66-69, not sure if
this is whaat you are looking for.

Nope, but thanks anyway., The item I saw was more on the lines of
a small "New Products" Ad.... still can't remember if it was CQ or
QST, but it was definitely October or later issue.

Is there a way to enable the two tone encode without having to hold
down the ptt and Aux button the entire time?

2376. Scholarship Program

Newsgroup: rec.radio.amateur.equipment

I just wanted to let everyone know that I just posted some information
about a scholarship program that is open to apply for if you are a
licensed ham radio operator and you want to continue your studies

http://hamming-it-up.blogspot.com/2007/12/scholarship-program-for-amateur-radio.html

2390. Weller WCC100 Soldering Station

Newsgroup: rec.radio.amateur.equipment
Date: 2007-12-29 19:55:42 UTC
From: gb <w9nogbspam@arrlspamno.net>
Message-ID: <5uKdncs757XeO-vanZ2dnUVZ_s-pnZ2d@comcast.com>
Source record: 3614

This is an informational post for owners of the Weller WCC100 soldering station.
Some Elecraft builders have used this soldering station for building their kits.

This is the BLUE colored station that was sold by Weller until 1999, when it was discontinued

The Weller WLC100, which is an ORANGE colored station, is a totally DIFFERENT station.
The WLC100 is NOT temeprature controller uses an OEM light dimemr module) and uses the Weller "ST" series of soldering tips. Information on the WLC100 model, can be found here:
http://www.uoguelph.ca/~antoon/circ/wlc100.html
==========

The Weller WCC100 is a temperature controlled soldering station that Weller sold in 1990s,
until it was discontinued by Weller in 1999. I have found some vendors that still have a few of these stations in stock. The WES51 soldering station, introduced in 2002 replaced the WCC100 model.
The WCC100 station uses the Weller "ET" series soldering tips, which are readily available and used on a number of current Weller soldering stations (WES51, EC series, Silver Series).

I am collecting pertinent documentation for this Weller station (including the Tech Sheet) that will eventually be available electronically (likely through BAMA).

The WCC100 soldering station is a line voltage (120 VAC) station.
This station has NO isolation transformer and the control board is connected directly to line voltage (no fuse, surge protection or safety capacitor).
The control board monitors the thermocouple (temperature sensor) and 120 VAC heater.

Parts numbers for Weller WCC100 solder station

WCC101 - Replacement Iron w/ETA tip
WCC102 - Replacement Heater (120 V)
WCC103 - Temperature Sensor w/Spring
WCC104 - Sponge
WCC105 - Spring and Funnel Assembly
WCC106 - Control Board
WCC108 - Weller Barrel Nut
SW120 - Switch (Carling LRA series illuminated rocker)
ET series tips - widely available and used in Weller WES51, "EC" and Silver

Series stations
====

WCC102 heater has a resistance of about 348 to 350 ohms at room temperature
(27 C)

WCC103 temperature sensor has a resistance of about 1 to 2 ohms at room
temperature (27 C)
This resistance increases (thermocouple) as the temperature rises -- the
control board then compares this to the temperature set by the user
(potentiometer). A "zero-crossing" circuit then turns off the heater
(usually via a Triac or transistor switch) -- when the temperature is
reached and turns the heater back on, when the temperature drops below this
point.

I acquired a WCC100 soldering station, via eBay, that was non-functional in
December 2007.
The temperature sensor (WCC103) had failed (open - infinite resistance) in
this station's iron. Some parts are becoming more difficult to obtain for
this station, since Weller discontinued it over 8 years ago.

IF you have a dead WCC100 station, now is the time to get it repaired,
unless you are scrapping it
(I will accept these donations).

These Distributors have Weller WCC100 parts "in stock", as of December 2007

Allied Electronics

2391. Yeasu Portable Battery Schematics

Newsgroup: rec.radio.amateur.equipment

Does anyone have/know the wiring configuration of the connections on
Yaseu Portable battery packs?

Specifically I would like to connect an external power source to one
of my portables (FT-51r) and would like to look at a schematic before
making connections incorrectly and cooking my radio.

I also have the following Yaesu portable models FT-411, FT-530, and
suspect the batteries have similar wiring configurations.

I have checked the Internet, Yaesu, and after market battery outfits
with little usable response.

Thank you in advance for any assistance you may be able to provide.

****

I am also looking for the following accessories to allow connecting
external power to my Yaesu Ft 51r Ham radio.

EDC-12 Allows connecting to a cigarette plug in a car or power supply.

FBA-14 Allows operating the radio on four AA batteries.

I would also like to buy a dead battery for the same radio to tear
apart and build my own adapter.

Depending on what you have I might also be interested in other
accessories for my radio.

Thank you.

The Weller WCC103 temperature sensor is actually an iron-constantan
thermocouple (possibly Type J), although Weller used Type K thermocouples
for its EC station series .
Sensitivity believed to be about 50 ΅V/΅C
The relationship between temperature and voltage produced is NON-Linear.

What is a thermocouple sensor?
A thermocouple is a sensor for measuring temperature. It consists of two
dissimilar metals, joined together at one end. When the junction of the two
metals is heated or cooled a voltage is produced that can be correlated back
to the temperature. The thermocouple alloys are commonly available as wire.

When replacing the WCC103 sensor the leads MUST be correctly installed or
the iron stays on continuously and eventually overheats.
The Iron (magnetic) lead connects to the RED wire
The Constantan (copper-nickel alloy/non-magnetic) lead connects to the
YELLOW wire

MI5 Persecution: Molestation. during Travel

MI5s persecution of me varies in intensity. Since. 1990 it has been steady for. perhaps 80% of the time; there was a notable quiet period in 1993, and another quiet. period in Jan-Feb 1995, as well as a hiatus in the first two months of 1999. It puzzles me that. they cease and restart, seemingly without any logic or reason. But one aspect. of MI5s activities against me which is relatively predictable is this weeks articles topic,. which is Molestation during Travel. Almost every time I cross the. Atlantic, go to the. Continent or even try to enjoy a holiday in this country, you can bet that MI5 will be there doing their. utmost to wreck it all.

This aspect. of the harassment is particularly relevant as I will be travelling. to Europe again in a months time, with naturally the Minidisc recorder in tow; so it will be interesting to see if I can. record the abuse which will almost certainly take place, either on the Tube going. to the airport, at the airport, on the flight, in the terminal building. - MI5 have previously. instituted instances of abuse at each of these locations, so well see how much taxpayers money they waste. this time, and whether it will prove possible to capture their abuse on. minidisc.

Read about. the MI5 Persecution on the Web

June 1992. in Polands mountain resort of Zakopane

The persecution started. in June 1990, and for the first two years I stayed in the UK apart from a couple of brief day. trips to Calais. By the summer of 1992 Id had enough of being cooped up in England. with abusive fellow employees egged on by an abusive secret police service, and decided. to spend 10 days in southern Poland, on what was intended to be a. holiday at the mountain resort. town of Zakopane.

Unfortunately the psychopaths of the Security Service. were not willing to allow me. to enjoy a holiday in peace and quiet. The journey to Zakopane was. by coach from the meeting point at Londons Victoria coach station (National Express) followed by ferry followed by another. coach across Europe. As we left Victoria. a youth and his girlfriend started a loud tirade. of abuse directed at "this bloke", where the "bloke" was never named, but it was very clear that the "bloke" was myself. The. youth said "they" had "found somebody from his. school, and he was always really stressed at school, a real psycho". Again, the label "they" was. not elaborated on,. but it was clear that "they" = the persecutors from MI5. The boy also said, "he was in. a bed and breakfast for only one night and they got him". By a not unexpected. coincidence I had been in a B&B in

Oxford a. week previously, which had been booked from work; other things lead me to the conclusion that. the company's offices were bugged for most of the 2 1/2 years that I. was there, so "they" would have known a room in the B&B had. been booked. After a few minutes of this I went back to where they. were sitting and asked where they were travelling. The boy named a village in France, and the girl's giggling suddenly ceased; presumably. it permeated to her brain cell what the. purpose of the boy's abuse was.

It is now very clear to me that. MI5 were trying to have me incarcerated, assaulted or killed on this trip across. Europe. The degree of verbal violence inescapably leads to this conclusion. When we arrived at. our destination, it became clear that many people, both in our tour. group and its guide, and among. the ordinary residents of the town, knew there was a movement under. way to "get" me. MI5 employed many people and significant resources for an action. which they knew would only take a maximum of ten days.. A commercial operation would never have felt able to waste such resources on such an unproductive. and temporary action; only a state-sponsored,. taxpayer-funded entity like the Security Service would be able to. be so wasteful.

To give some examples of what happened in those ten days;. I was walking in some. woods outside the town, when a Polish woman, looking at me, said the English "shit" in a strongly Polish-accented voice. For the. first three years 1990-92. MI5 had been trying to force this word on me. Another example; I was. walking near my "hotel" when a mother said laughing to her child,. "a wiesz ze to prawdziwy wariat" which means "you know hes a real madman". And the "TV reacting" happened there too; on. Polish TV, a bemused looking journalist. said to another, "to jest sprawa Anglikow", which means "its the concern of the English", in. other words, none of our business, despite what. the English are trying to force down our throats.

Just before we left for. home, I went with some others from our group to a nearby bar. There a man shouted at me the. same sexual obscenity which MI5 have constantly thrown at. me these last three years. I think MI5 try to justify their various terms of abuse by repeating them at. me until I say them, either while conscious or. while talking in my sleep; and then they seize on my saying those words. to "prove" that the obscenities are "my fault", et cetera. This rather stupid. reasoning of theirs can actually be seen as indicative of the psychopathic condition attributed to them in. a previous. article; blaming the victim for the crime you inflict on him is how psychopaths. think.

Nor did the persecutors let up during the return trip. Returning. on the ferry over the channel, a rather. insalubrious-looking guy talked to his mates about "and you know this bloke, hes really mad you. know, hes really mad". On the National Express return coach to London, a group. of five or six young people started shouting at me. I slumped in my. seat and tried to avoid presenting a target, so they got ever more strident - "whats. the matter with you,. cant you hear us?" One of the other people who had been on the trip to. Poland asked them why they were shouting at me, and they said, "hes been to. Cambridge", to which the co-holidayer asked them, "have

you been to Cambridge?" presumably thinking they. were aggrieved fellow students, but they answered "no". Even after I left. the coach at Elephant and Castle abuse continued; in the tube. station, two kids started throwing abuse at me; one of them said to the other, "and you. know he works?" to which the other answered. "yes".

Immediate. Aftermath of November 1992

As you. will know from previous articles, my manager at OCG - ARIS/Oxford, Mr Mitchell, induced. a mental breakdown in me in the months leading up to Nov/92. The. diagnosis was regarded by the persecutors as a victory for them, because few if any people give credence. to allegations of harassment when they are. made by somebody suffering from schizophrenia. There is also a. bias against the mentally ill, an "institutionalised bigotry" in society comparable to the institutionalised. racism against blacks.

However, MI5. did not let up on persecuting me following Nov/92. In December 1992 I flew by charter jet to Alicante in Spain. for two weeks recuperation. MI5 planted one of their people on the flight, a. youth who tried to start some noises that "hes a nutter". One of the. other passengers replied,. "oh hes a nutter is he? oh well!" and the youth shut up and said nothing for the. rest of the flight. I think it would be fair to say that the youth on the flight was embarrassed by what he. had been asked to do. in making the flight "uncomfortable" for me; he sounded defensive rather. than aggressive.

My first trip to Canada in. June 1993

Ive already covered. this in a previous article so Ill just give a brief summary here. On 10 June 1993 I flew British Airways from Heathrow. to Torontos Pearson Airport. On de-planing. from the aircraft, one of a group of four fellow passengers looked at me and said, laughing,. "if he tries to run away well find him".. It was quite obvious that these four men were the ones who had. been harassing me since 1990.

I did nothing to. apprehend them or bring this incident to the attention of the airport authorities, mostly because this was my very first visit. to Canada, and the last thing I wanted. was to get into a dispute before I had even finished disembarking. In retrospect, I. can see this was a terrible mistake; I should have made every effort to detain. and identify these people.

Subsequently. I have made numerous attempts to obtain the names of these people from British Airways. passenger lists, by talking to BA, through a lawyer in Ontario, through a solicitor in England, through. the UK police, and also through private detectives in the UK. But. all my efforts have come to nothing. BA. have told me they keep passenger lists for a period of seven. years, so they will still have the list for this 1993 flight. I did not see or hear. anything during the rest of my visit to Ontario in 1993 which would have lead me to believe that I. was being watched or followed.

Journey across Canada in. summer 1994

As I think Ive already said in previous articles I. emigrated to Canada in late May 1994. For six weeks between late May 1994 and early. July 1994 I travelled. across Canada from coast to coast, starting in Toronto, visiting various cities and ending up in British Columbia. I saw. this both as something of a holiday, and the chance. to get to know a little better my adopted. country.

As you can guess, MI5. followed me everywhere I went during these six weeks. In Toronto, where I started. this trip in late May, I was spoken about by one youth to another with. the words "hes an idiot", to which the other replied, laughing sympathetically,. "good luck to him".

A couple of days later I went to Montreal and stayed at the. YMCA downtown. As you can guess (this. is all so predictable, isnt it?) MI5 followed me there and bugged my room at the YMCA. Not. only that, but they managed to. set-up an instance of "newscaster reaction" from a local television station; while I was watching. a Vermont TV news programme on the set in my room, the. woman reporter said, "well theyre just tired and they want to. go home", which sounds like a pretty unprofessional thing to say until you realise she was trying to say of me that I was the one. that was supposed to be tired, and they (ie MI5). wanted me to go home to the UK.

On the. bus journey across the North American continent, it was quite clear that MI5 were following me every step on the way. For the first. part of the journey they actually put someone on the bus with me, a youth who. said at me "that guys paranoid". and tried to incite other passengers to attack me. I stopped for a couple of days in Winnipeg in central Canada, and. on leaving the town heard on the radio a female. presenter ranting about "insanity! insanity!". It is. very tiring travelling such a long distance by bus; I took the. journey in two steps, each of about 36 hours; and it is especially tiring when you know MI5 are watching you. and harassing you every step of. the way.

When I finally got to Vancouver, MI5. instituted the usual harassment, in very short order. I was surprised how quickly they. were able to induce hatred towards me in elements of. the general populace; the Security Service must have employed a number of. agents and serious resources in a very short period of time; and for no real gain,. because I havent been back to BC for almost five years, so all their "work" appears to. be for nothing. In downtown Vancouver a street person said in front of. me, "theyre all talking about him". For a few days I. was staying at Pauls Guest House. (345 W.14th Ave); on the day I left, the owner Paul shouted at no-one in particular, "hes. going to Victoria" - which was quite accurate, I was indeed going to the. provincial capital Victoria on Vancouver Island. But I had not told anyone at the guest house. where I was going; I had only. mentioned to my parents back in England on the phone that I was going away from Vancouver. for a few days. Which leads me to suppose that MI5s bugging. of the phone in my parents house yielded the "intelligence" that. I intended to visit Victoria, and they had passed the information. on to Paul.

When I got to Victoria it was again obvious. that the persecutors were "doing their stuff" there as well. On the street I was identified. as being English, although I had not said anything so my accent hadnt. given me away; and. returning by ferry to the mainland, I was abused by a Canadian woman who said, "hes a. nutter! you can run but you cant hide". During my years in Canada I have never. heard the word "nutter" on any other occasion; I do not think it is. part of Canadians vocabulary; so the Canadian woman on the ferry, who was obviously talking about me, must. have been supplied with this word. by the English persecutors. And once I got back to Vancouver, staying at the Austin Hotel on Granville. St, I listened to a conversation in the apartment block directly opposite, and a. man saying, "hes paranoid, so thats as bad as it can be, so why are they. doing this. to him?".

Holiday in the States,. August 1995

By 1995 I was living in Canada, and in. August I went down the eastern seaboard to Florida and as far as Key West by car. As you can guess. (this is all so boring and predictable, isnt it?). MI5 followed me every step of the way. I can see in. retrospect that this must have been quite easy for them as they had my car bugged,. both on the inside to listen to anything that was said and what radio station I. was listening to, as well as what must have. been a tracker device installed to track it across long distances.

The first city I visited was. Philadelphia. In the old Congress Hall where the first US Congress assembled, the woman guide started referring. to my situation, saying that "all these people in Europe were watching. it", and they were "a little paranoid" at this 18th-century experiment. in democracy. Also I. had recently written a newsgroup post where Id described a (female) poster as "wet-nosed" (implying. "canine"), and a young girl in Philadelphia remarked, "so he. thinks were dogs?" There were two or three more incidents during this holiday in the. eastern States, including a radio station down near Miami, showing. "they" had tracked me all the way there, and were bugging. the inside of my car; but I didnt record the details and Ive. forgotten some of it now. Also down in Miami Beach a French tourist in a lift expressed support for me. with the words, "cest incroyable" ie.. its incredible, meaning that MI5s well-known actions against me were. beyond belief.

To go back a bit, in. about May/June 1995 Id visited New York, again by car, and was insulted several. times by people using the same words that had been used against me. in England. In Central Park, and elderly Englishman (not a real gentleman - but. then the Engish view of themselves as "gentlemen" etc is quite laughable) looked at. me and said "idiot". And while I was eating in. a streetside restaurant a New York youth started laughing and. said something like, "I cant believe it, hes actually here" - I think that was because I had. had an expressed wish to visit New York for some years before this,. although after this visit I wont be going there again for a. very long time.

Visit to Poland December. 1995/January 1996

In December 1995 I flew (BA again, unfortunately - every time Ive flown. BA one of these incidents has happened, presumably MI5 is happier. setting up harassment. on British-domiciled carrier) from Montreal to Berlin and travelled on to Poland to visit family. MI5. naturally harassed me in Poland during my brief stay. They followed me around and got. Polish people to. take part in the harassment. In one case two Polish youths talked in front of me saying in English (with. marked Polish accents), "fucked up men, fuck. you". There were also other incidents which I dont remember too clearly since it was some. time ago.

The return. flight connected through Heathrow, and in the transit lounge MI5 again set-up harassment against me. In Poland. they were talking their abuse in English, and in London. they set Polish people after me to speak in Polish; they. heard me on the phone to my father, and said "a wiesz ze to Polski wariat", in an almost sympathetic, inclusive. fashion (translation.. "you know hes a Polish nutter"). Once on the flight to Montreal I was again set upon by two English youths, one of. whom spoke and the other listened. The aggressive "fat bastard" youth said, "if he. wants to be a wanker" (its my fault theyre harassing. me, you see), self-justification that "hes a nutter". (so we have to keep on abusing him, because hes ill), as well as talking about the town in Poland. where I had been staying. He. also said, "he doesnt know who we are", but as already remarked. in a previous article, that was at best a half-denial of my guess expressed in internet newsgroups that the people after me. were MI5 - if anything its. a half-confirmation rather than a half-denial.

These incidents are still going on. You can hear digitised audio. files of abuse on a BA flight to Berlin in. 1998 on the Web at address

On this flight they were again attacking. my mental health; "paranoid, hes paranoid" and "nutter" are discernable. The last "during. travel" contact was at Ottawa Airport on. 21 July 1998, when "Alan Holdsworth" the psychopath MI5 agent, dressed as a vagrant, was. pacing aggressively in the departure. area. In three weeks I will again be travelling to Europe; we will see what. fresh acts of molestation MI5 perpetrate during this trip.

MI5 are Afraid. to Admit They're Behind the Persecution

MI5 have issued a formal denial. of any involvement in my life to the Security Service Tribunal,. as you might expect them to; but, more importantly, the. persecutors have never denied that theyre from the Security Service, despite. several years of accusations from my corner on usenet and in faxed articles. I am not surprised that the Security. Service Tribunal found "no determination in your. favour". I am however a little surprised that the persecutors have refused to. confirm my identification of them; by doing so, they implicitly. admit that my guess was right.

"No determination in your favour" says the. Security Service Tribunal

In. 1997, I made a complaint to the Security Service Tribunal, giving only the bare outlines of my case. I do not think it would have made. very much difference if Id made a much more. detailed complaint, since the Tribunal has no ability to perform investigatory functions. It can only ask MI5. if they have an interest in a subject,. to which MI5 are of course free to be "economical with the truth". A couple of months after my. complaint the Tribunal. replied that;

The. Security Service Tribunal have now investigated your complaint and have asked me to inform you that no determination. in your favour has been made. on your complaint.

Needless. to say this reply didnt surprise me in the slightest. It is a well established fact that the. secret service are a den of liars and the Tribunal. a toothless watchdog, so to see them conforming to these stereotypes might be disappointing. but unsurprising.

It. is noteworthy that the Tribunal never gives the plaintiff information on whether the "no determination in your favour" is because MI5 claims. to have no interest in him, or whether. they claim their interest is "justified". In the 1997 report of the Security. Service Commissioner he writes that "The. ambiguity of the terms in which the notification of the Tribunals decision. is expressed is intentional", since a less ambiguous answer would. indicate to the plaintiff whether he were indeed under MI5 surveillance. But I note that the ambiguity also allows MI5. to get away with lying to the question. of their interest in me; they can claim to the Tribunal that they have no interest, but at a future date, when it. becomes clear that they did indeed. place me under surveillance and harassment, they can claim their interest was "justified". - and the Tribunal will presumably not admit that in their previous reply MI5 claimed to. have no interest.

"He doesnt. know who we are"

In early. January 1996 I flew on a British Airways jet from London to Montreal; also present on the plane, about three or four. rows behind me, were two young men, one. of them fat and voluble, the other silent. It was quite. clear that these two had been planted on the aircraft to "wind me up". The fat youth described the town in Poland. where I had spent Christmas, and made some unpleasant personal. slurs against me. Most interestingly,. he said the words, "he doesnt know who we are".

Now I find this particular form of words very interesting, because. while it is not a clear. admission, it is only a half-hearted attempt at denial of my guess that "they" = "MI5". Had my guess been wrong, the fat. youth would surely have said so more clearly. What he was trying to do. was to half-deny something he knew. to be true, and he was limited to making statements which he. knew to be not false; so he made a lukewarm denial which on the face of it means nothing, but in. fact acts as a confirmation of my guess. of who "they" are.

On one. of the other occasions when I saw the persecutors in person, on the BA flight to Toronto in June 1993, one of the group of four. men said, "if he tries to run away well find him". But the other. three stayed totally quiet and avoided eye contact. They did so to avoid being. apprehended and identified - since if they were. identified, their employers would have been revealed, and it would. become known that it was the secret services who were. behind the persecution.

Why are MI5 So Afraid to admit. their involvement?

If you think about. it, what has been going on in Britain for the last nine years. is simply beyond belief. The British declare themselves to be "decent" by definition, so when they engage in indecent activities such. as the persecution of a mentally ill person, their decency. "because were British" is still in the forefront of their minds, and a process. of mental doublethink. kicks in, where their antisocial and indecent activities are blamed on the victim "because its his fault were. persecuting him", and their self-regard and self-image of decency remains. untarnished. As remarked in. another article some time ago, this process is basically the same as a large number. of Germans employed fifty years ago against Slavic "untermenschen" and the Jewish "threat" - the Germans. declared, "Germans are known to be decent and the minorities are at. fault for what we do to them" - so they were able to. retain the view of themselves as being "decent".

Now suppose this entire episode had. happened in some other country. The British have a poor view. of the French, so lets say it had all happened in France. Suppose there. was a Frenchman, of non-French extraction, who was targeted by the French internal security apparatus, for. the dubious amusement of French television newscasters,. and tortured for 9 years with various sexual. and other verbal abuse and taunts of "suicide". Suppose this all came out into the open. Naturally,. the French authorities would try hard to place the blame. on their victim - and in their own country, through the same state-controlled. media which the authorities employ as

instruments of torture, their view might prevail - but what. on earth would people overseas make of their actions? Where would their. "decency" be then?

This is why. MI5 are so afraid to admit theyre behind the persecution. Because if they did. admit responsibility, then they would be admitting that there was an action against me - and if the. truth came out, then the walls. would come tumbling down. And if the persecutors were to admit. they were from MI5, then you can be sure I would report the fact;. and the persecutors support would fall away, among the mass media as well as among the general public.. When I started identifying MI5 as the persecutors in 1995 and 1996 there was a sharp reduction. in media harassment, since people read my internet newsgroup. posts and knew I was telling the truth. The persecutors. cannot deny my claim that theyre MI5, because then I would report their denial and. they would be seen as liars - but they cannot admit it either, as that would puncture. their campaign against me. So they are forced to maintain a ridiculous silence on. the issue. of their identity, in the face of vociferous accusations on internet newsgroups and faxed. articles.

Have. MI5 lied to the Home Secretary?

In order for. the Security Services to bug my home, they would either have needed a warrant from the Home. Secretary, or they might have instituted the bugging without a warrant. Personally I think it is. more likely that they. didnt apply for a warrant - I cannot see any Home Secretary giving MI5 authority to bug a residence to allow. television newscasters to satisfy. their rather voyeuristic needs vis-a-vis one of their audience. But it is possible that the Security Service presented a. warrant in. some form before a home secretary at some point in the last nine years, for telephone tapping or surveillance of my residence, or interception. of postal. service.

So the possibility presents itself that a Home Secretary. might have signed a warrant presented to him based on. MI5 lies. Just as MI5 lie to the Security. Service Tribunal, so they might have lied to a Home Secretray himself.. MI5 and MI6 are naturally secretive services former home secretary Roy. Jenkins said, they have a "secretive atmosphere ... secretive vis-a-vis the government. as well as [enemies]". Jenkins also said he "did. not form a very high regard for how they discharged their. duties".

It was only a few years ago that MI5 was brought into. any sot the extraordinary thing is that British media. organisations like the state- and taxpayer-funded BBC take. such an active part in the MI5-inspired campaign of harassment. We have. after all heard of MI5 trying to bribe broadcast journalists;. but surely there must be a substantial number who are not bought. or blackmailed by the Security Services, and who take part in the "abuse by. newscasters" of their own volition? The BBC is supposed to be independent of the. government of the day as well as the Establishment in general. While. perhaps it is childish to think that the BBC is. anything other than effectively state-controlled, the degree of

collusion between the BBC and the. British Secret Police MI5 is something you would not find in. many countries. Individual tele-journalists in other countries would have enough self-esteem not to allow themselves to. be controlled by their secret police - seemingly, BBC. broadcasters like Martyn Lewis and Nicholas Witchell have such a low. opinion of their employing organisation that they see. no wrong in dragging the BBCs no-longer-good name through yet more mud, at the mere request. (whether supported by financial. or other inducements) of the British secret Police, MI5.

And when challenged, these broadcasters LIE. about their involvement, with just as little shame as MI5 themselves. The. BBCs Information dept have said. that;

"I can assure you that the BBC would never engage in any. form of surveillance. activity such as you describe"

which is an out-and-out lie. Buerk and Lewis have. themselves lied to their colleagues in the BBCs Information department. over the "newscaster watching", but unsurprisingly they refuse to put these. denials in writing. Doubtless. if the "newscaster watching" ever comes to light, Buerk and. Lewis will then continue to lie by lying about these denials. So much for the "impartial". BBC, a nest of liars bought and paid for by the Security. Services!

It is obvious that the persecution is at. the instigation of MI5 themselves - they have read my. post, and only they have the surveillance technology and media/political access. Yet they have lied outright to the. Security Service Tribunal. Similarly,. BBC newscasters Michael Buerk and Martyn Lewis have lied to members of. their own organisation. The continuing harassment indicates they. are all petrified of this business coming out into the. open. I will continue to do everything possible to ensure that their. wrongdoing is exposed.

MI5 Persecution Update:. Friday 11 June, 1999

Harassment. in a pub in Clapham, Tuesday lunchtime

Once. a month, or once every other month, I meet a Polish friends of mine who lives in Clapham. North, and sometimes we go to a particular pub near where he lives. The last time was some two months. ago; I did not have my minidisc-walkman with. me, and consequently was seriously harassed by people MI5. had instructed to harass me, in the pub.

This Tuesday, 8 June 1999, we again went to the same pub for a. pre-meal drink. This time I did have my minidisc-walkman. with me. As you can guess, we were followed into the pub. by a couple of young people (Im getting older and older - isnt. it funny how the MI5 agents all look young these days?). They started talking. about my situation, in particular some travel I had booked the previous. day. Unfortunately, they were talking fairly quietly, and. my minidisc didnt pick up their speech.

MI5s. schizophrenic reasoning is that simultaneously I am very important and worthy of their acts of persecution, and. I am also totally unimportant and their abuse of me "doesnt. matter". Perhaps they should test their agents and. managers for obsessive personalities or psychotic features in the same way as employees are drug-tested. MI5 might. lose their "worst cases" employees if some psychological testing were applied. to their recruitment. procedure.

Toothless Watchdogs.. What a Surprise.

Recently I have. been engaging in communications with two watchdogs, the Security Service Tribunal which deals with complaints. against the security service (and always clears MI5 of any wrongdoing), and the. Data Protection Registrar, which is mandated to investigate. misuse of personal data held on. computer.

In. a letter to Nick Brooks, Security Service Tribunal secretary, dated 20 April,. I asked him if the Tribunal, as an allegedly independent body, had the means to investigate complaints against MI5 other than asking. MI5 to themselves investigate complaints. To my disappointment, his. reply two weeks later answered the question only indirectly, in. the negative. Whatever the reader might think of the merits of the case. I have been putting before you in faxed. articles this last year and half, you will surely recognise. that it is a significant anomaly for the Tribunal to have no independent means. of investigating complaints, particularly given the view expressed even by previous home secretaries that. the security

services are. untrustworthy.

MI5 Persecution: No Justice for the Victims. of MI5

In a previous article I detailed the similarities between. the current MI5 Persecution in England, and other. historical instances of similar persecution, notably. that by the Nazi Germans in the thirties and forties. The Germans persecuted first the mentally ill, the. epileptics and those suffering from schizophrenia, then moved on to. racial groups; in todays Britain the persecution is again directed. at those with mental illness, which the British in their. cowardice find easier than taking on racial groups as the Germans did. But. just as in Thirties Germany there was no recourse against a malign and omnipotent. state, so the MI5 Secret Police in the modern. British Fascist State allow no justice for their victims.

No Recourse Against the Security Services. Illegal Harassment

It has become apparent to me over the last. nine years just how loaded the dice are. in todays Britain, a fundamentally fascist country which masquerades as a democracy. Britain is a democracy in name. only; the Establishment, the defence and. MI5 secret police are always there, regardless of which party has been voted into power most recently. - and from "New Labours" conduct. in office one finds it difficult to tell them apart from Old Tories, in. their crackdowns on the sick and vulnerable in society.

In thirties Germany the victims of the Nazi regime had. no legal recourse against their State oppressors; and in todays. Fascist British state, the victims of the Establishment and its MI5 Secret Police similarly have. no recourse. against the illegal state-funded and organised oppression. There is supposed. to be a mechanism for dealing with MI5 crimes, in the shape of the. Security Service Tribunal and Commissioner; yet these have never found favour of a. plaintiff. One might as well ask the Nazi SS to investigate crimes against epileptics. or Jews as ask the Security Service Tribunal to investigate MI5 crimes against British citizens;. it is quite obvious what the. answer is going to be, regardless of what you say to them, and what evidence you. provide. The Tribunal and Commissioner are a mere formality, a whitewashing body to give the. Secret Services a veneer beneath which they hide. their shabby criminality.

"Institutional Racism" and. Bigotry in the Metropolitan Police

The. recent inquiry into the racist murder of Stephen Lawrence found clear evidence of systematic and deliberate racism in. the Metropolitan Police, which cannot have surprised anyone. Commissioner. Sir Paul Condon accepted a somewhat lukewarm. definition of institutional racism as being "unconscious". In truth, and this truth must surely. be obvious to anyone who has any familiarity or encountered the great British. police, the Met has not just "unconscious". racism, but very clearly "conscious" and deliberate racism, of. the kind that would have done Thirties Germans proud. And it. is a bastion of such open racism - when many other parts of

society are learning. to live in a multicultural environment, the Met is still living. in the past in its attitude to the minorities.

But in addition. to the systematic racism confirmed by the Lawrence inquiry, there is also. something much more relevant to this case, which is systematic. police bigotry against the physically and mentally disabled, which I personally. have experienced in my dealings with the police over the years. You. cannot expect equal treatment if you are mentally disabled. I tried. to make a complaint to the police in 1995 about the harassment I had been subjected to for several years.. As soon as they found out I had mental illness, they refused. to even talk to me. I tried again in March. 1999; the police made various threats to me, while ranting about "your paranoid rubbish" in reference to the. complaints expressed to them.

The police refusal to do the job they are employed and paid to. do is extremely serious, particularly as this. case is highly important, indeed key to the whole issue of British. self-perception at the end of the 20th century and the beginning of the 21st century.. Britain has lost much in the last fifty years - it has lost an. empire, it has lost its self-respect and. its identity as a people. If the MI5 persecution finally makes it into the light and. the Security Services are seen for the rather cheap bullies their behaviour indicates, it will have a massive and harmful effect. on British self-perception. in the new century.

Security Service. Tribunal - Blatant Whitewashing

A. few weeks ago I spoke on the phone to Nick Brooks, the Secretary of the Security Service Tribunal, which is supposed. to deal with cases of MI5 transgression. I. asked him if the Tribunal had ever found in favour of a plaintiff and against the Security Service. He answered that as. far as he knew, it had. not.

I also asked Mr. Brooks if the Tribunal had any means of investigating allegations. of criminal activity by MI5, other than asking MI5 themselves if they had engaged in such activity. His. rather circuitous written reply states that the 1989 Security Service Act provides that "it shall. be the duty of every member of the Service. to disclose or give to the Tribunal such documents or. information as they may require for the purpose of enabling them to carry out their functions under this Act".. Which is a very round-about way of saying - "No" - the Tribunal has no. way of investigating MI5 crimes -. None At All.

Setting up. the S.S. Tribunal, and creating a Security Service Commissioner, was really an act of falsehood by. the government. It is generally recognised that MI5 are out of reach of the normal. criminal justice system -. the police, as we have seen, have no intesot answer to the. government; in a previous article I quoted Roy Jenkins speaking of "a secretive atmosphere.... secretive vis-a-vis the government. as well as [enemies]", and a "lack of frankness" from. MI5.

If the government wanted to,. it could reform the secret services and ensure they acted in conformance with the laws which. have been enacted for them in the last ten years. But apparently the present. government does not see any need. to ensure security service compliance with the law. As noted above, the. regulatory machinery for MI5 is deliberately weak; the Tribunal has no independent means of. investigation, and it is simply a waste of time complaining to the Tribunal or. Commissioner.

Every. so often, fresh revelations come to light of secret service transgressions. We. have heard from Shayler that MI5 bugged Jack Straw and Peter Mandelson; we have heard. from Peter Wright that MI5 plotted to see Wilson ejected from office; yet so. closed is the system of government that the law is never enforced against MI5 when they "bug and. burgle" everyone from politicians to ordinary. citizens.

No Justice from the Legal. System, either

Britain has a civil and criminal. justice system which effectively limits many complaints from. being heard. For a civil complaint to be brought before a court, you need a solicitor willing to act on. your behalf.. Supposedly it is possible to represent yourself as a Litigant-in-Pthe basis. of being "frivolous and vexatious" or "disclosing no cause for. action in law". This is exactly what happened to me in 1997 when I twice tried to take the BBC to court for spying on me in my. living room at home; my case was twice struck out, and on. the second occasion an order was made against me that. I could not bring further civil litigation against the BBC without leave of. the court.

As the reader can. guess it is quite impossible for a person with schizophrenia,. who complains about the secret services and media interfering in his life, to find a solicitor willing to. represent him in legal action against the persecutors. I have. quite a lot of evidence of the continuing persecution which. I have posted on the website, even if the evidence is quite tentative and. perhaps open to varying interpretations. But I have tried several firms of solicitors; some. of them have acted unprofessionally and abused me; all of them have. refused to represent me. My psychiatrist gave me. the name of the firm of Bindman and. Partners in central London, and I have approached them twice. On each occasion they refused to accept my instructions. Plainly. the problem with Bindmans, which they have admitted, is. their bigotry against mentally disabled people; yet this is not. just something that is wrong with Bindmans, it is. something that is wrong with the legal system as a whole, since the legal system necessitates. finding a solicitor willing to represent you in order to bring a case to court, but it does. not have a mechanism for providing a. lawyer in the case where no solicitor is willing to take on. your case. So the British legal system is such as to prevent cases such as mine from. ever receiving an airing in a court.

So much for the civil courts. But. the criminal justice system is no better. Two years ago the Protection from Harassment Act came. into force. But again,. while the Act is all very well on paper, in practice it is unenforceable in my case, since it would require Police. action to see the law implemented, and if the police. cannot even be trusted to conduct a

murder investigation competently (in the Lawrence case),. then what chance is. there of their investigating complaints against the Security Service? Of course, it would be possible for me. to personally issue proceedings through a private prosecution either against. MI5 themselves, or against one or. more of their media tools; but here we see the same problems as with the civil courts, because first of all I would have. to find a. lawyer willing to act on my behalf. Litigants-in-person do exist in the criminal courts, but the Attorney General can bring such. a prosecution to an end by. taking it over and entering a plea of "nolle prossequi"; and I suspect that. if I were to bring a private prosecution against either MI5 or one of their media tools,. then this is exactly what would happen.

So much for British justice. But if. anything the wrongs that have been perpetrated on me by the British justice system. are quite mild to what others have suffered. Others have been wrongly. convicted based on police evasions and lies, and spent many years in jail based on false charges.. I should count myself lucky that despite the. best efforts of the MI5 secret police, I have not acquired any. criminal charges or convictions; which shows that for all their resources and. influence, and the clear imperfections in the British legal system, there. are still limits on how much subversion MI5. can achieve.

The latest in a long. line of injustices

A comment I heard during. the recent scandal of the police mishandling of the Lawrence murder investigation is. that "its not as if the police themselves murdered him". This is not a. particularly wise statement to make about the case,. since it could be argued that the four alleged murderers were aided. in their crime by the expectation that the police would deliberately. botch the investigation - which of course is exactly what the. police did.

But in. my case, this would be a completely inaccurate thing to say - since the MI5 secret-police have expressly been trying to nine. years now to see an end put to my life, either by having me incarcerated and. my liberty ended, or by forcing self-termination on me.. It is exactly as if the secret police "themselves murdered [me]", since that. is what their aim is in. their campaign against me.

The public. has heard of instances of police mishandling of cases, of police manufacturing evidence, lying in. court, extracting false confessions to clear up crimes, et. cetera. Various instances of extra-legal. activity by the secret services have also come to light in the last few years. The unhappy truth. is that what MI5 have been doing to me for the last nine years is really nothing out of the. ordinary for them. To me it seems unbelievable that this sort of. systematic campaign of harassment, which thousands and thousands of people in this. country and abroad are well aware of, could exist for such a long period of time. with the media maintaining. "omerta". But my case is not the first such instance of persecution by the. "British secret police", and judging by the lack of any real controls on MI5, I. very much doubt it will be the last.

MI5 Have Systematically Destroyed. My Life

This. is getting depressing. From the feedback Ive received, the recipients of these faxes are tired of hearing my complaints, and in truth I am. tired of sending them. The reason I havent. yet ceased sending faxes is because I cannot think of any other effective means. of replying to MI5s actions against me, and I feel. I have to do something to try to defend myself. Three/four years ago. I got the MI5 harassment out of my system by posting about it on Internet. newsgroups, and for a few months this tactic was quite. effective - I received (and indeed still do today) support from newsgroup regulars, and felt I could make my voice heard and break the. MI5 monopoly on access to the British media. But that was years ago, and. today nobody gives a. tinkers cuss about my internet posts - so I have sought to escalate matters. by communicating directly with the politicians who allegedly say how this country is supposed to be. run.

Of course, its quite expensive to keep. up a campaign of fax messages for many weeks. Each set of faxes takes approx 50 hours. to send over the weekend, and costs perhaps 35. My. phone bill for the last quarter was 350.. These figures are naturally insignificant compared to what MI5 have been spending against. me over a similar period. It also takes a lot of time and energy to create a new. article every week, and try and find new and fresh aspects and viewpoints on MI5s persecution of me.. I am beginning to run out. of both new topics and energy to write these articles.

So I have a suggestion to put before the. MI5 persecutors who have been wrecking my life since 1990. In. a few days time I will be going on holiday to Poland. and Germany, for a couple of weeks. Previously, almost every time I have travelled by plane, or gone anywhere on holiday,. the MI5 "wreckers". have been most assiduous in destroying these trips. My suggestion is; if. MI5 leave me alone on this next trip, I will cease transmitting these articles. If, however, there are any. clear instances of harassment (and I. am very capable of recognising MI5 harassment when I see it), then I will make public these instances. and publish any recordings I may. make of them, and, unwillingly and unhappily, continue the articles.

Read about the MI5. Persecution on the Web

Keith Hill MP (Labour - Streatham), my. elected representative, as ever refuses to. help.

MI5 Refuse to Allow me to have a. Normal Life

Its kind of difficult to. contemplate having a normal existence when you know your entire house is bugged from top to. bottom, for audio and, very unpleasantly, video; when your employment. is systematically destroyed, over and over again;. when every time you leave the country your travel is disrupted by MI5 plants on the plane yelling abuse at you..... you. get the idea. I would like to have some. semblance of a normal life, like my Polish and English friends do. But MI5 have made this impossible, and they. have leached massive resources from the. taxpayer to institute a life not worthy of the. name on me.

A few years ago MI5 were very. open about their aims in persecuting me. They were shouting "suicide" at me, both in Canada where I. lived at the time, and during my occasional visits to London.. You cant get much clearer than. that. There have been instances as recently as a few weeks ago of this intention being voiced. by their side; on 15 April 1999, a woman at the next ticket counter at the. Royal Festival Hall said;

"it would kill it, you know, it would. just be overkill... they can't stop can. they"

meaning that "they". were trying to "kill it" i.e. me and they "cant stop". The audio file is. at;

I wonder why. they "cant stop". Nobody (who doesnt know already) believes my claims - so what difference. would it make, if they were to "stop" persecuting me? Perhaps what this persons. remarks indicates, is the depth of the obsession MI5 have with this case. They have. chosen at random a. person from the general population, and done their worst to ruin my life. What. is wrong with these people, that they persecute a national of the country whose citizens they are supposed. to protect?

No Chance of. a Harassment-Free Job

Since the harassment started in 1990 I. have had three jobs, the first near Guildford, the second in Oxford, and the third overseas. in Canada. All three jobs have been systematically destroyed by. MI5. It is so ironic that MI5 employs a team of agents, each well. compensated for their efforts, to persecute just one person paid a mere fraction. of what they get for their "work". In fact,. it is a joke that MI5 is allocated resources for this sort of effort. If this area of. government were run along commercial lines then MI5 would be very rapidly closed down,. they produce nothing of any value, instead spending. their time obsessed with the bugging and surveillance of their former employees like. Shayler, dangerous subversives like Straw and. Mandelson, and "threats to national security" like yours truly.

Applying for. my first post university job

When I was applying for. my first post-university job in the closing months of 1990, I found at two. or three job interviews that MI5 had got there ahead of me. Interviewers knew what words to repeat from what. had been said at my home recently; MI5 had supplied them with. words to hurt me, and the "British secret police" were. trying to wreck my job search and discourage me from joining the world of. work. This and the continuing

harassment in the media and by the public meant. that the search for a job took very much. longer than it would ordinarily be expected to take for a person with. my qualifications.

With my. first job near Guildford came the knowledge that MI5 were doing everything. possible to make me lose the job. Despite their efforts I managed to stay in. work for ten unhappy months, during which they made very. clear to me that they were bugging my workplace, my accomodation in Woking, my car, my home..... and they also. made clear that they had "got to" my employer. in Guildford.

Employment with. Oxford

I was able. to find a new job, with Oxford Computer Training Services (now ARIS/Oxford), quite quickly. But it became. very clear, very quickly, that MI5 were treating this job. the same as the first; they tried to get the other. employees and in particular the managers to attack me. It was plainly MI5s intention that I be sacked fro this job. But I. was not sacked; instead, after almost a year of abuse from OCTS. managers, I was forced to seek medical help, and had to take two months. off for medical leave. OCTS MD Hugh. Simpson-Wells was motivated in keeping me on by the fear that if he sacked me, then. I would take him to court for the treatment OCTS managers had meted. out to me during 1992.

Emigration. to Canada

When I emigrated. to Canada in 1994, I did think that perhaps MI5 would leave me alone, given that I had made the effort. to leave the UK and try to find a new life overseas.. I could not see any reason why they would continue to harass. me over in Canada. But clearly the MI5 agents had their salaries to. think about, since continue to harass me they most certainly did, at my home in. Ottawa, and by getting fellow employees to speak against me, as had happened with. previous jobs in the UK.

MI5 are denying me. a future in work

Former Chief Constable of. Devon and Cornwall John Alderson had this to say regarding. MI5's activities;

"MI5 is not under the same restraints. as the police. They infiltrate organisations, people's. jobs and lives. They operate almost like a cancer."

Currently I am on. disability, and I can see that MI5 are denying me a future in work. It would be an insult to. logic for me to return to work and find a job, in the knowledge that an entire team of. MI5 agents, paid in total many times what I would be earning, would. have the objective of seeing me "done down" in the employment, and. ejected from the place of work. This situation. is completely wrong and nonsensical - I would very much like to have a job, but MI5 are preventing. me from even thinking about returning to. work. The culture of secrecy in MI5/MI6 means there is no objective oversight of their. expenditure, when external oversight and greater transparency might lead to wasteful and illogical operations. such

as that. against me being shelved.

Watched. and Harassed at my Home and Accommodation

As you will know. if you have been reading these articles, MI5 have watched and harassed me at my home, and at every. accommodation Ive had since 1990. Theyve also watched me at neighbours houses. in London, and at short-term accommodation such. as hotels and bed-and-breakfasts. They have used the. "words" gained from these watching activities against me, by passing these words on to other. people such as OCTS managers for them to make clear that I am. being watched where I live.

Harassed at rented rooms in. Oxford in 1992

This was at its worst in 1992 in Oxford, where during the week I. lived at rented accommodation in. Oxford, and at weekends returned to my parents home in. London. I was being severely harassed by managers at my place of work, OCTS; and it was clear from the things they. said that they were being supplied by MI5 with details of my home life, that they were. being supplied with words. to repeat at me.

In 1992 I moved house in Oxford many times, living. at a total of five rented accommodations in ten months. In January. I started off living in a rented room at Headington near the ring road / A40 intersection; then. when it became clear that. house was being bugged, moved to a rented room in Botley, some miles away. It was. at the house in Botley that I had an "interactive watching" experience. with Martyn Lewis while he was reading the news; I. threw a term of abuse at him; he first flinched, then gave a gsult of what I. had just said, he was no longer "on my side".

So I moved house again. This time to a place in Cowley, near. the Rover car works, where I stayed for a few. weeks. Because of continuing harassment at work, I soon moved from this accommodation, to. yet another rented room on Iffley Road. By this time. I was very ill and being abused continuously at work. Again, MI5 followed me to the rented room on. Iffley Road, and created. new instances of "newscaster watching". There was a television in the room. which I watched, and as you can guess the newscasters got at me when I was watching the television. Also once I. was assaulted, if thats the word for what happened, on leaving the house;. a youth grabbed me by the coat lapels, roughed me up a. bit with various terms of abuse. I did not report this assault to the police, because what was happening to me. at work was very much worse, and nobody seemed to. think that that was worthy of being reported to the police. Later that. day at work, Alex G, a fellow employee, said "I heard he was assaulted".... I had not told. anyone at work about the incident that morning..... so once again it was made. very clear that MI5. were watching my rented accommodation and giving information about. what was going on there to managers at work.

So I moved house. yet again in late autumn 1992, this time to a rented room in a. large house on Woodstock Road. I stayed there for several weeks as the. situation at work deteriorated due to OCTS managers abuse, until I was forced to take sick leave from work for. two months and attend hospital as

an outpatient; at which. point I gave notice on the room, and returned to London.

MI5 continued. to harass me after the diagnosis of serious illness was made. As reported previously, they harassed me on a. flight to Spain in December 1992; and in 1993, when I returned to live and work. in Oxford, they again bugged my rooms,. as well as my workplace, although the intensity of the harassment. was very much less than in 1992.

Watched, followed and harassed. in Canada

It dismayed me to find that. MI5 would not leave me alone after I had settled in Canada. In January 1995 I. rented an apartment at the Bayshore complex in Ottawas west end. For some weeks there was no sign. of the "buggers". But then it started. all over again. They first bugged my car, which had. a car alarm installed - the alarm went off two or three times in a single evening, and the following day gave a. signal that the car had been broken into. Then they bugged. my apartment, and in particular they installed bugs on the phone. line in my apartment.

In September. 1995 I moved to a new apartment in Ottawas Bytown Market area,. the restaurant and entertainment heart of Canadas capital. This proved a serious mistake. In the west end. I had been fairly distant from the centre of town where MI5 concentrated their. efforts at turning people against me. In the Market area. it was much easier for the persecutors to motivate people to harass. me, and over the next couple of years there were frequent instances of harassment by the general. public.

From 1995 I had some. Polish friends in Ottawa, and as the reader can guess, MI5 have spent much effort. trying to break up this friendship. They supplied. various things about my home life to these friends, for example where I was living. in the Market, directly over the road were the studios of a music radio station, which you had to "look up" to see; and MI5. told these friends that I was "looking. up" to see the radio station; so the friends then. replayed these words back to me, that I was "looking up". MI5 have. also made various sexual slanders against me, and these friends also unwittingly. replayed some of the words they had been imprinted with by the MI5. persecutors.

MI5 Will. Never Allow Me to have a Normal Life

I have heard many. excuses as to why MI5 continuously prevent me from having. a normal life. We are told that MI5 are defending the country against a. tere to zero.

When I have. travelled abroad, they always put their people on the flights, on the journeys I undertake, to continue the harassment, so that I am. put off further overseas travel, and chained to my home. in London. Yet even this is illogical, because when I lived in Canada, they. would still put people on flights. back to the UK.... and what possible reason would they have for doing that? Perhaps the truest words to describe. the MI5 persecution. is that reason has nothing to do with their activities - sane people do not behave in the. way the MI5 British Secret Police have been

doing.

Summer 1999 - more. MI5 harassment?

In only a few days time I will be going to Europe again. This time I. have deliberately chosen to travel by a non-UK. airline; so we will see if they put their paid agents on this foreign carrier, we will see if. they try to harass. me on this non-British flight.

If they do harass me on. this trip to Europe, or if they resume the harassment. in London after I return home, then I will continue to report their activities in these faxes. As I said at the. beginning of this article,. I would very much like to not have to send these articles any more, but that is not my decision to. make - it is entirely up to MI5 to cease their. pointless persecution of me, once and for all.

MI5. Persecution Update: Friday 9 July, 1999

Harassment in. Poland, July 1999

And still it continues.... in my last fax I said that. provided MI5 made no attempts at harassment. during my two-week holiday this summer, or after I returned to England,. then I would discontinue these faxes. Unfortunately MI5 have. continued to harass me, both during the holiday and after my return to London. I really dont want. to continue these articles, since they take up so much time and effort,. not to mention expense; but the Security Service wont even let me have a holiday in peace. and quiet, so I have to. make further efforts to bring their activities out into the open.

In. early July I visited my aunt and her family in Poland. On Saturday 3 July 1999, I went. to a family barbecue at an allotment outside the city. One of my aunts family has. previously shown himself to be in the "enemy" camp, by saying the Polish equivalent of "something wrong. with him", and various other unprovoked insults. It. is disappointing that one of my family could forsake the. usual ties of blood and take part in the actions against me,. but thats the way it is. This guy turned up at the barbecue, and started making insults against me. In. particular, he started to say something about the video camera which I. had brought along on the trip, and the relevance of the video-camera to my fight against. the persecution.. It seemed pretty obvious to me that my enemies had told him to turn up to this occasion,. and most likely schooled him in precisely what words to say; since hes an unintelligent person. and would not be able to think for himself what insults to make against. me.

Harassment in London, week ending. Friday 9 July 1999

Got back. to London Wednesay afternoon. Two incidents on the Underground returning from the airport. Unfortunately I wasnt recording because. I wasnt expecting trouble, so these slipped through the net. One of. these was verbal sexual abuse, of the type Ive heard. many, many times before these last three-and-a-half. years.

Yesterday, Thursday 8/July/1999, I switched. on Heart FM which had never "got at" me before.... and the presenter started. making jokes about "mad, crazy" etc.. Again, wasnt recording this because Id never had any trouble from this radio station. and wasnt expecting any.

Also. yesterday, on a bus (155?) from Balham to Clapham, a couple of girls started harassing me with taunts of. "crazy". By now I was expecting trouble and recorded an audio file of this instance. of abuse, at web URL;

The cynical. reader might think my demeanour or behaviour had given rise to the taunts of "crazy" recorded above.. But I assure you my behaviour on the bus would not have. made anyone think I was ill; and the taunts the previous day were the same. sexual words as previously; so I'm quite sure that these incidents are either deliberately. staged, or indicative of an overall. high level of awareness among the London public, particularly in the part. of London where I live.

Keith Hill MP (Labour - Streatham), my elected representative,. as ever refuses to. help.

MI5 Persecution: Harassment through the. Radio

One of the aspects. of the MI5 persecution has been harassment through the broadcast and print media;. and one of the aspects of harassment through the broadcast. media is being "got at" by radio presenters. This being "got at" from the radio takes various forms, the. most obvious form being through. overt or hidden words and insults. But there are other, subtler forms. In Canada. a couple of years ago, I used to listen to the local radio stations every. morning driving to work, and listened to the music only,. switching between radio station presets rapidly as soon as a presenters voice came on, so that. I would not be subjected to any verbal harassment. by the D.J.s. But they found a way around this; they kept on playing the same song, every bl**dy morning at the same. time, which had the words "all coming back to me"; the perceptive reader. will remember that the words "coming. back" have special meaning (see the Private Eye cover at. web URL; for the
hidden. meaning).

And thats not the only time theyve allowed the. songs themselves to be used as abuse against. me; many years ago Radio-1 in the UK did exactly the same,. and the DJ even made it explicitly clear by saying, "dont you sometimes feel as if the songs. were made just for you".

"We should be done for. attempted manslaughter" says Chris Tarrant

Capital Radio DJs have been "in on it" from the start. One. of the first things I heard in the summer of. 1990 was from a Capital DJ who said, "If he. listens to Capital then he can't be all bad" (supportive, you see. We're not bastards). Much of what came over the radio in 1990. is now so far away the precise details have been. obliterated by time. No diary was kept of the details,. and although archives if they exist may give pointers, the ambiguity of what broadcasters said. would leave that open to re-interpretation.

In spring. 1994, Chris Tarrant on his Capital morning show made an aside to someone else in the. studio, about a person he didn't identify. He said, "You. know this bloke? He says we're trying to kill him. We should be done for attempted. manslaughter".

That mirrored something I. had said a day or two before. What Tarrant said was understood by the staff member in the studio he. was saying it to; they said, "Oh no, don't say that". to Tarrant. If any archives exist of the morning show (probably unlikely) then it could be found there; what. he

said was so out of context that he would be very. hard put to find an explanation. A couple of days later, someone at. the site where I was working repeated the. remark although in a different way; they said there had been people in a computer room when. automatic fire extinguishers went off and those people were "thinking of. suing for attempted manslaughter".

Pirate Radio "gets at". me

In another incident in 1990/91, Id been listening to a. pirate radio station in South London for half an hour, when there was an. audible phone call in the background, then total silence. for a few moments, followed by shrieks of laughter. "So. what are we supposed to say now? Deadly torture? Hes going to talk to us now, isnt he?" which meant that. they could hear what I. would say in my room. Note the word "deadly" - they give away. their purpose.

It constantly surprised me that MI5 are. so easily able to subvert broadcasters,. and, in this case of the pirate station, to do so, so quickly. I think. the answer to this question is that they must have very wide contacts in the broadcast media; presumably some or in fact. many of those contacts are literally. "bought". In the same way as they tried to buy Jon Snow of Channel Four news, they must. have bought many broadcasters and use them both directly to make insults against me, and. promulgate their points of view; but also, they must use these "bought". broadcasters to influence other television and radio presenters, who might not. even be aware. that it was on MI5s behalf that they were being influenced to "get at". me.

BBC-Radio-1 D.J.s celebrate. my job termination in November 1991

This is another one. from the "early years". At the beginning of November 1991 my employment in Woking, Surrey was. terminated. Chris Tarrant of Capital-FM had already made nasty remarks about both my. work for the company, and the. managers of the company themselves - "so theyre not really a serious company, well theyd have to. be to employ you wouldnt they".

So. when I was terminated, as you can expect, BBC Radio 1 D.J.s celebrated. On the Saturday. afternoon (either 9/Nov/1991 or 16/Nov/1991 - I cannot remember precisely) I briefly listened to Radio-1. and heard the disc jockeys loudly proclaiming "youre useless,. you should be sacked". On the same day, I went down to the Kwik-Fit in Tooting to get. my cars tyres replaced, and in the office ran into a couple of. their staff, one of them with an Australian accent, who said "what do you think about it then?. Its getting killed on the. radio."

Plainly,. if a random car-repair shop in Tooting knew about the persecution, then many thousands of other people across. the capital and all over the country must have known.. And the phrase "getting killed" shows very clear awareness of what the. MI5 Persecutors intentions towards me were in 1991,. and judging by the continuing harassment, still remain. today.

Recent. Feedback from Virgin-Radio

As readers will know, from mid-March 1999 for. some four months, every weekend, I have. bombarded Westminster MPs with faxes about the terrible, all-encompassing MI5 Persecution. (Jesting aside, it. really is terrible and all-encompassing, in the UK anyway.) In June 1999, after I'd. been at it some three months,. I started getting "covert" feedback from Virgin Radio.

The first feedback I got was. from Danny Baker, on Sunday 13th June. That weekend. I was sending an article which contained biting criticism of the police inaction in this case. Danny Baker on his Virgin radio. show started an angry. rant that "he knows it's rubbish", ie. he was rubbishing what I'd said in that weekend's faxed article. Unfortunately I. wasn't recording this. programme.

The next possible Virgin-Radio feedback was a. week later on 19th June 1999. This is contained in the. audio file above, in which Johnny Boy on his "Wheels of Steel". programme says;

"and if you would like to put a triple play. together, ahhh.... because quite. frankly Hipster and me are running out of ideas...."

He goes on to counter Hipster's "how. dare you" with a protestation that he is "only joking". You can listen to this. incident on my website at URL;

What I reckon is that my article faxed to MPs. that weekend was forwarded by one of the recipients to Virgin Radio. My article had. included the words;

"I am beginning to. run out of both new topics and energy to write these articles."

So what I reckon is that Johnny Boy read the article.... and rephrased. the above line "run out of ... new topics" to "running out of ideas".. I recognise that this is a pretty. tenuous inference to make.... but do listen to the audio file, from. the "ahhh...." pause in JB's speech you can guess he is. about to say something "risky" and at someone's expense. Anyway, I listen. to the Wheels of Steel regularly and will continue to do so, recording it as I always do - so any. future funny remarks will get immortalised on my website! (There was a. previous incident from August 1998. which is preserved at web URL;

but I am sufficiently uncertain about it that I have. not included it in this. article.)

First Ever Radio Reference - Alan Freeman of. BBC-Radio-1

The first time I was ever. referred to on the radio was sometime in May or June of 1990, by Alan Freeman. of BBC-Radio-1. Note that this isnt an "interactive listening" episode,. its different, this was Freeman reading out a letter from one of my. "real life" enemies.

Id acrimoniously broken. up with some former friends in January of 1990, and I. think they were still trying to cause me trouble in June of that

year. Freeman on his rock show read. out a letter from an "Andrew Turner"; one of my acquaintances from January 1990 had. been called Andy Turner, so I think its the same guy. Freeman. quoted Turner as saying various things about me, in particular Freeman said "thats a. hell of a letter you wrote. there Andy", "with a schizophrenic you're never alone", and something about the "one who wore. out his welcome with random precision". (from the words of the Pink Floyd song).

When I. was looking for primary causes of the MI5 persecution, this letter which Freeman had read out on his. programme struck me as being potentially one of the sources of the persecution. I. know Turner and various others in that group were very bitter at what they saw as. their failure and my undeserved success, and they were quite determined to upset. the applecart. Of course several. other primary causes are possible; I do not know why MI5 chose me as opposed to someone else, and MI5. are hardly likely. to tell me.

"Absolute Obscene". David Hepworth of GLR

This one Ive assigned a 100% rating on the website.. There are actually two separate incidents, which are linked. through the D.J.s choice of words.. The first incident can be heard in computer audio at web URL;

On 21/Feb/1997, I was listening to BBC GLR, by stealth. Back in 1990. I used to have Capital blaring out of the speakers all over. the garden ("if he listens to Capital. then he can't be all bad", thanks ever so much). But now. I listen on my walkman on headphones with the volume turned right down. It could not. possibly be overheard by any listening device, no matter how sensitive,. because sound does not carry from the phones.

Yet somehow they are still able to tell which station. I am listening to on the. walkman. And last night, I bravely tuned to GLR 94.9FM at around 8.45pm. Everything went well for the. first half hour or so. Around 9.10pm, Hepworth. said the following after the song "Come Around" by the Muttonbirds.

"coming up after this, we got the rock-and-roll. A-level, we have, I assume, Brian do. we have an embarrassment of prizes in there, we do, don't we, absolute obscene amounts of prizes, there. will no doubt be a riot at the back door, and that's, er, A-level. coming up after this"

The key phrases in. what he said are, "EMBARRASSMENT of prizes", and what he himself emphasized. verbally, "ABSOLUTE OBSCENE amount of prizes". It is my belief (based on content and tone of. voice) that when he spoke these phrases he knew I was listening, and. that the phrases refer directly to my situation. The "EMBARRASSMENT" is the embarrassment. he and other media people would feel at having their wrongdoing exposed; the. "ABSOLUTE OBSCENE" (which. he verbally emphasized) described the disgusting sexual abuse which the harassers have been throwing. at me.

There was a second. incident, on 9/May/1997, which may be found on the web (with. computer audio) at URL;

This incident again contains the. words "absolute embarrassment of prizes", with the same emphasis as the first. instance, and laughter following the phrase. So theyre aware of the complaint. I made on Usenet after the first incident; and they are. so arrogant that they do exactly the same again. They. are so arrogant, they know they are being recorded and that what they say will be published on the web, but. they dont care. What corrupt media, and what a corrupt country to. have such corruption in its media.

Three Years of "MI5. Persecution" Faxes

Ten Thousand. Faxes, and Still No Breakthrough

In. the last three years I have sent at least 5,301 faxes directly from my computer, and 4,478 faxes through Demons. extremely useful TPC.INT service, to politicians and. the media, in the subject of the "MI5 Persecution". This has obviously cost me quite a lot of money, not. to mention. time and effort. The aim of all this communication has been to try to put discussion of the "MI5 persecution". into the public arena; unfortunately, this. aim has not been achieved, yet.

This fax will be my last transmission. for the time being, since the summer recess. is almost upon us. Depending on what the persecutors do between now and the autumn, I. may or may not resume faxing later this year. In the article dated 18/6/99. I said Id stop the articles if MI5 left me alone; but they seem to have no fear of these articles, since. they kept pursuing me in Poland and after my return to. the UK. Again, if they leave me alone this summer. then I wont have to resume the articles in the autumn; but I think its fairly. obvious that MI5 have nothing better to do with their time than. to go after me, and its almost pointless to make this offer. when I know they wont cease harassing me.

TPC.INT 1996, 1997,. 1998.....

Three years ago I was living in Canada, and. the only economic way of sending faxes to the UK was. through the international email-to-fax gateway TPC.INT. This highly useful and. totally free service converts emails (which may have Postscript-formatted attachments) into. faxes which it delivers. to any number within the UK. Using the telephone book, I constructed a computer database. of M.P.s fax numbers, and used this database to deliver copies of. the "FAQ - frequently asked questions" article which Id. written some time earlier.

This service is still operational, but given that I have resided. in London for the last year, I do not need to use Demons. service when I can send articles directly from my own computer using. its fax/modem, which is what I have. been doing since 1998. However, instead of just sending the FAQ article, Ive been composing articles. on various aspects of MI5s treatment of me. Since. their activities have been going on for nine years now, and there have been various aspects to their actions; they. have harassed me at work, at home, through the media, etc; I have so far not run out. of things to say, particularly since their harassment of. me is still ongoing, and I have been able to record the actual words. used by their paid agents on my

minidisc-walkman. Since mid-March 1999 I. have been sending these articles pretty much every. weekend.

Anyway, as. mentioned above, I intend this to be the final transmission before the summer recess, and it would be. nice not to have to continue these articles in. the autumn. But thats something that depends on them, not. me, and their attitude is unfortunately clear.

Why am I. sending these articles?

Because I want the harassment to stop. The cynical reader might think. from these. articles that I "thrive on adversity" and would be lost without the harassment to complain about; but that is not the case.. In a perfect world I. would like to return to work, in a job unsullied by MI5s attempts to ruin it; I would like to live in a house which. wasnt bugged, with my words being repeated at me wherever. I go; I would like a normal life. I do not particularly thrive on adversity;. I am beaten down by adversity; the purpose of these. faxes is to try to bring the whole matter out into the public arena, where the. rights and wrongs would be visible to all, and once that were to happen,. the adversity might cease. I have had something approaching a normal life a couple of. times in the last nine years, but always, in the end, MI5 turn up and ruin it. I just want these people. out of my life, permanently, and the only way of doing. that is to kick this business into the public arena,. and shame MI5 so that they are incapable of doing. me further damage.

Having said that, unfortunately it seems. fairly obvious by now that these faxed articles are not going to achieve that aim. Some of the. recipients know what I am saying is true; but they. choose to stay quiet - wisely, because if they. were to admit the truth of these articles, then they would bring the wrath of MI5 down on their heads. Presumably most. recipients do not know these articles are true; their reaction. to me is the same as my reaction. to the other apparently deluded people who have sent me email after reading my webpage to tell me it happened to them too; the. reaction being, "leave me alone, I dont want to know". Its sad that many. M.P.s have given me this reaction,. because my case genuinely is different; I genuinely am telling the truth, and the. harassment genuinely is happening to me, and some recipients of this fax know this. to be true.

"Write to your. own M.P."

My local M.P. is Mr Keith. Hill, Labour-Streatham. He refuses to have anything to do with me. He refuses. to represent me, he refuses to talk to me, he has told me not to. communicate with him. He has done absolutely nothing to help me, and he has told me he will do absolutely. nothing to help. me.

Other. M.P.s, recipients of these faxes, have for quite some time been telling me, "write to your own M.P.". On 23 March. 1998, Paul Burstow M.P. wrote to me; "Whilst I take. the issues that you raise seriously, there is a strict Parliamentary convention. that one Member of Parliament does not take up anothers casework. Can I. suggest that you write to your

own M.P. at the House of Commons?" Hopefully the. above paragraph will make clear that I have written to. my own M.P. and he has proved unhelpful.

Other M.P.s have told me the same thing. On 21. May 1998, John McFall M.P. told me, "... there. is a parliamentary convention that M.P.s do not take. up cases of people not in their constituency..... therefore can I suggest that you write to your. local M.P. who will be better able to assist you." And on 8 June 1998, Michael Foster M.P. wrote to me. that "M.P.s are inundated with unsolicited faxes .... M.P.s have. a considerable amount of constituent work to deal with, thus. other M.P.s constituents cease to be. of concern in so far as they should have a voice and representation".

Simon Hughes M.P. wrote to me on 5 November 1998,. "There is a strict parliamentary convention which states that. I am not able to represent individuals who are not constituents of mine. My advice is. that you find out who your own Member of Parliament. is rather than circulating your story to all M.P.s.". To my suggestion that Keith Hill M.P. was. doing nothing to help me, George. Foulkes M.P. sent the following faxed response; "If Keith Hill your own. M.P. cannot help no-one else in the House of Commons can." But it is clearly not. a case of "cannot" help, but "will not" help. I have. detailed in letters to Mr Hill specific ways in which he could help me, first of all. by finding a lawyer to represent me. It is Mr. Hills job as a Member of Parliament to represent his constituents; if he chooses not to do so, then it reflects badly. on him.

Kate Hoey Sympathises, but. says, "Write to your own M.P."

Here is part of a. letter Ms Hoey sent to me on 15 June 1999.

I appreciate that you have concerns about the persecution and. harassment that. you feel you are experiencing but I note that your MP is in fact Keith Hill. There is a very. strict Parliamentary code which means that M.P.s can only take action on matters that. relate to their own constituents. I. am aware that you are not happy with the fact that you do not feel Mr Hill will assist you but. I am afraid that I cannot take any action on. your behalf.

Ms Hoey plainly belongs in the camp of people who do not know. about the reality of the "MI5. Persecution". She doubts its existence; "the harassment you feel you are experiencing". She. urges me to see Mr Hills assistance, as have other. M.P.s detailed above.

Really, the fact that I. am unable to obtain assistance from any other M.P., if my own. alleged "representative" Mr Hill chooses not to represent me, is a very basic. weakness in the Parliamentary system. Beinggmainly events at my former. employers in Oxford during 1992, when I was harassed constantly. by manager Steve Mitchell for most of 1992, and was forced to begin attending hospital as an outpatient. as a result. This harassment was obviously of Mitchells own volition,. since I observed him harass similarly another new worker two. years later; but it was also at MI5s instigation, since they kept providing. him with words from my home life which he then

proceeded to abuse me with. Yet this is not the only. employment that MI5 have destroyed; the MI5 persecution has lasted. from the end of my student days until the present time, during. which I have had three jobs, all of which have been in various. ways destroyed by MI5s deliberate actions.

In. March 1999 I decided to try to force the issue once and for all. Ever weekend for the. last four months, apart from two weeks when I was on holiday, I have sent original articles by fax directly from my computer. to Westminster politicians. Here is a summary. of the articles of the last four. months;

How to Identify. the Persecutors

Their use of Schizophrenia to discredit. my claims
Comparing the MI5. Persecution with German "Final Solution"
MI5 are. Plainly Trying to Kill Me
MI5 Waste Taxpayer Millions on. Pointless Hate-Campaign
Four Years of "MI5 Persecution" Posts on Internet. Newsgroups
MI5. Agents are Clinical Psychopaths
BBC Newscasters. Lior the Victims of MI5
MI5 Have Systematically Destroyed. My Life
Harassment through. the Radio

To my deep worry these fourteen faxed articles have. still not achieved the objective of kicking the matter out into the public arena. and forcing an admission either from the persecutors, or from those. "in the know", which includes some. M.P.s.

I dont really know what else to do to try. to bring the "MI5 persecution" out into the open. I would have expected that. these weekly faxed articles would. have had some effect, but the only result has been M.P.s telling me to contact my own representative Mr Hill who refuses. to talk to me. I understand the convention that M.P.s. deal with their own constituents and not those of other M.P.s, but there seems to be a gap. in the process since it allows your own M.P. to. refuse to deal with you, and then you are totally denied any representation at. all.

Conclusion

The. only conclusion I can inform the readership of these articles of, is that there is no conclusion to this matter, yet! Three years. of intermittent. articles, and four months of faxes every weekend, have been absorbed by some of the most powerful. people in the country, to no effect.

Whether these articles continue in the Autumn. is entirely up to the "opposition". I. offered them a cessation of complaints if they would leave me alone on holiday in June/July, and. they went right ahead and harassed me anyway, on holiday and after I returned to London. If. MI5 cease their activities now, then I wont have. to continue these faxes in the autumn; but. I suspect they wont cease, which means youre in for more articles later this. year. "There will be no conclusion."

MI5 Want. Me to Send You these Faxes

MI5. seem to Want to Spin this Business out for as Long as Possible

The. MI5 persecution has now been going on, starting from June 1990, for well over nine years. If I knew. how to put an end to it then I would do so. Of course MI5 have indicated how they wish to finish the matter,. by finishing me off; they indicated this very. clearly years ago when they were. shouting "suicide" at me.

But a deeper truth is that. the MI5 agents carrying out the persecution rely on it. for their income and their livelihood. They have absolutely no interest in anything other than spinning out the. whole business, because that is how they will. maximise their earnings from their employer for the "work" they. do against me.

A vital part of the fantasy structure MI5 have created about me is. that I am somehow a worthwhile. target. If you bother to read these faxes, if you browse my website, or perhaps read my posts on. the uk.misc newsgroup, you will have by now. twigged that I am a totally insignificant person who in a proper dictatorship like East Germany. would not merit five minutes of Stasi time. But Britain is improper in the. methods of its corruption, and the Security Service seeks to present me as being a an evil fascist,. an evil communist, an evil something-else, and. even a "national institution".

It. occurs to me that to some extent I am playing into their hands, into their scheme of things, by writing. these articles and sending these faxes. By doing these things,. I elevate my profile, and fuel MI5s paranoid obsession with me. But to stop sending faxes would be to give up the. only hope. I have of seeing their campaign "outed" and justice done. Certainly there is no point going to the police. again; and as remarked in a previous article, the Security Service Tribunal routinely. whitewashes every complaint that is placed. before it.

So although MI5. seems to want me to continue sending these faxes, doing this is the only. real chance of getting this business out into the open. And so Ill continue trying. to kick down their house of cards. At least my situation is less serious than that of some other. victims of the secret services; unlike Shayler I am not broke and exiled; unlike. Fayed I have not. lost a son to the posited activities of the secret services. All I. have lost is some of my health, some of my life, and some of my possible career.

MI5s Abuse. of me is without Cause or Reason

It constantly puzzles me that MI5 refuse. to leave me alone, wherever I go and whatever I do, or rather, whatever I dont do, since Im not a. very socially or otherwise active person.. When I am in England, they chase me all over the place, and once theyve found me, they pay people to. shout rude words at me. When I am in. Europe, they again chase me all over the place, and as usual pay people to shout. obscenities at me. When I am in Canada. or visiting the States, they faithfully chase me all over the place, and when they find me,. pay people to shout obscenities at me.

It is. hard to avoid the conclusion that these MI5 operatives who chase me are total. lunatics. You will remember from a previous articles the assessment "MI5 Agents are Clinical Psychopaths". They have tried. to blame me for what they do and. what they say; yet their lies have been wafer-thin, and are. clearly seen to be oiled by the money which they acquire from the Government,. and ultimately from the taxpayer.

They have tried various lies to put the. blame on me; "we have to abuse him because hes. a nutter", as if there werent many tens of thousands of other people with schizophrenia. in the United Kingdom. Their choice of abuse words is telling; subconsciously perhaps they. realise that it is they who are. the "nutters", and they try to project their own illness onto their target.

MI5 Operatives have Nothing Else to Do With. Their Time

Ive seen the. same "Alan Holdsworth" person three or four times over a period of several years. I saw him at the Civic Hospital in. Ottawa in the Emergency Ward, where he falsely declared his name to. be "Tad"; at Ottawa airport in summer 1998; and on board another flight in. 1995.

So what we see. from the above paragraph is, the same people are delegated to watch me. for many years. Without me, they wouldnt have a job. They literally have. nothing else to do with their time, except indulge their voyeurism against me. With this observation,. we come to the core of MI5s campaign. against me; these people are not fit for any job other than the exercise of voyeurism against me, and if sanity were to land on. MI5 then they would be out of a job.. If sanity were truly to land then these people and their employers would be prosecuted. for offences under the Protection from Harassment legislation, which they are clearly. breaking.

It is. one of the ironies of their campaign that MI5 have been trying to make. me an object of ridicule for completely trivial things I have done, while. MI5 themselves have simply not mentioned how ridiculous is their own behaviour and that of broadcast media. journalists, in spying on me while they read the news. for example. If the whole truth of this business is ever exposed, and despite all my efforts it still. seems there is a block on its exposure in Britain, then the rights and wrongs will. be clear to all, and no amount of MI5 lies will be able to. change that. MI5 presumably do. realise just how damaging such a revelation would be both to themselves, and to broadcast media such as the BBC. and ITN, because there has not been even the slightest chink in. the armour, despite four and a half. years of my complaints on internet newsgroups and by fax to politicians. and the media.

MI5s Final Kick. in the Teeth to the British State

For someone like myself born in the late sixties it. seems peculiar to think that Great Britain once. used to have a say in the destiny of foreign peoples in far-off sections of the globe. Modern. Britons tacitly accept the lowering of their country to a third-rate power. reliant on the United States for what. little say it has in the world. A third-rate power, now "reverse-colonised" by third world peoples it once. ruled and riven with internal. problems so severe the government hardly dares acknowledge them.

To this third-rate power the MI5. secret police are delivering the final kick in the teeth through a campaign of persecution which. is guaranteed to hold the state up to ridicule throughout the world when it. is finally exposed. As a "thought experiment" suppose the French or the. Spanish security service. had done to one of their own born citizens what MI5 has done in. this country. Suppose say the Spanish had planted hidden cameras in his home,. for the perverted pleasure of their state television newscasters, just as hidden cameras have been placed in my home for. the perverted pleasure of Martyn Lewis,. Nicholas Witchell et al. Suppose the Spanish service. had for nine years been trying to force suicide on their target; at times, so blatantly. that they shouted the word "suicide".

Now suppose they were. caught.

Of course, as long as MI5 arent caught, theyre laughing.. The psychopathic security service agents gets their kicks from shouting. abuse at me; the newscasters, Lewis, Witchell etc get their jollies, "it was so. funny", we were watching this bloke and he couldnt do anything about. it.

But once theyre caught, the sky falls. in. Of course, the "patriotic" MI5-funded media in Britain will. try to put the best spin on the MI5/media activities; it was the targets fault, of course. But. most of the world bears no allegiance to Britain. If this business is ever. exposed then a weakened Britain will. become the laughing-stock of the world. And I promise. you, the security services persecution of me will be exposed. MI5 has delivered a final kick in the. teeth to the British state, and I will do everything I can to ensure. the world hears about what they have done.

Metropolitan Police Refuse. to Investigate the MI5 persecution

I have on a couple of. occasions tried to motivate the police to investigate MI5s. actions against me. On each occasion they have refused to do so. In 1995 I went to my local police station and spoke to. an officer there;. he refused to accept my complaint, and seemed interested only in seeing me leave the station as. quickly as possible.

Earlier this year I had some communications. with Det.Sgt.Richards of Charing Cross police. Again I asked him to. deal with MI5s actions against me. Unfortunately DS. Richards conformed to the negative stereotype of the bigoted, ignorant "copper"; he said, "I have read your various. bits on the internet. I'm afraid there is no substance or credence to it.. It's an absolute load of. rubbish. I don't investigate rubbish. I can't be more blunt. or to the point than that."

You have. to wonder at the state of law enforcement in Britain. If the victim of a murder is. black, as happened in the Lawrence case, the police deliberately botch the investigation. If. the victim of a crime is mentally ill, and the perpetrators are the. secret services, as in my case, then the police refuse. to even begin to investigate the crimes committed.. Politically Britain is a third-rate country, but from the point of view. of obtaining justice, Britain ranks down there with third-world countries. You almost feel that. MI5 and their media buddies would not even have any shame if their activities. against me were exposed; after all, why should they? they. have the money, they have the control, OK so perhaps theyve broken. a few dozen laws, but doesnt the fact that the police are too. corrupt to investigate these crimes, doesnt that prove that in fact no crimes have been. committed?

I should say again what I have said earlier in this article.. My losses over the. last nine years have not been as great as those of other victims of British Secret Police malefaction. Fayed lost. his son to their murderous activities; in my occasional communications. with former MI5/MI6 employees. I have been informed that a "permanent solution" is not uncommon for. opponents of the British secret police. I have lost health and financially, but am obviously well enough to. keep fighting my case. Others have lost much more than I. If the joke which. is British "law enforcement" refuses to enforce laws against the. security services then that is something that is recognised in other countries and Britains. stock correspondingly falls. Not that it has very far to. fall; the days when England had any say in the. world are long gone.

MI5 Want These Faxes to. Continue

Before the. holiday, I said that if MI5s harassment of me stopped, then I would. cease my complaints. They have known very well that if they continued to. harass me then I would resume the fax campaign in the autumn.. Yet they have not stopped persecuting me. Recently a woman outside my domicile screamed her head off with abuse. in the direction of my window; and on Saturday 2 October, when I was. shopping at a nearby supermarket, a man shouted the particularly vile. sexual swear word which I have heard many times before over the last few. years.

MI5s attitude shows complete arrogance. Yet it also. shows that they want the faxes to continue and deliberately. try to provoke me into sending further faxes. The reasons for this. are given in the first paragraphs of this article; the MI5 operatives who persecute. me have nothing else to do with their time; to make their campaign, against an apparently. unreacting target,. have some value, they have to force me to react in some way against their actions; and by. reacting in this way, by bringing their campaign to. the attention of British politicians, I play into their hands, by giving their campaign the attention. and importance which they feel it deserves.

In. the short term, by sending these faxes, perhaps I am doing something they want me to do, but in the. longer term it is undoubtedly more in my interest than theirs for their activities to be exposed.. If their operatives truly do wish to see these faxes continued. then they are

committing a serious mistake, because it. significantly increases the risk if M.P.s (some of whom already. know about MI5s activities against me) are advised of my. side of the story.

I will continue to monitor and record the. secret services activities against me over the next few weeks. If they diminish and cease, as. I hope they will, then I may be able to call a. halt to these faxes; but that it something which. is entirely up to them; recently their continued harassment makes clear that they do wish. the faxes to continue, and in all sincerity I do think they will continue their. activities and make it impossible for me to cease these. faxes. It may trouble you to receive these articles, but it troubles. me much more to be on the receiving end of a national persecution campaign; and while. Britain does not have free speech provisions as does Canada in the. Charter of Rights and Freedoms, and the US in the first amendment. to the constitution, in practice I do not think anyone is going. to try to have me locked up for speaking the truth. I still cherish. the hope that the veracity I express will be shown for what it is, and that the truth. will prevail and make me free.

Removing the Mask of Anonymity from. the MI5 Operatives

Undoubtedly one factor. encouraging the MI5 agents actions against me has been the fact that they can shelter behind a. mask of anonymity while they carry out their abuse. This. is both a sign of their realisation that their actions are. criminal; for crimes are harder to pin down and make a coherent complaint. about when their perpetrators are unknown; and it is a sign of. their cowardice, since they lack the backbone to say things to my face themselves; instead they almost always. rely on third parties to carry out the. actual acts of abuse.

On a. few occasions I have seen the perpetrators, but on each occasion they have managed. to preserve their anonymity. They travelled on the same British Airways flight as me in 1994; but BA have ever. since refused to give up the passenger list for the flight, and the. police and lawyers have proved useless in obtaining their identities from the. list. Also one of them followed me into A&E department of Ottawas. Civic Hospital a couple of years ago, and gave his name as (if I heard. correctly) "Alan Holdsworth"; but the doctor refused to. give out his identity when I later tried to speak. to him.

If only we knew the identities of the individual operatives, then it. would be possible to find. out the identity of their employing organisation. But I think we know the latter. already, since I have been accusing them on internet newsgroups for. four and a half years now, and they have never denied my guess. Indeed, when I was travelling in January 1996 back. to Ottawa, two youths on the (British Airways. again, unfortunately) flight made a lot of noise at. me, one of them saying to the other that I "didnt know who we. are". That is a wafer-thin denial; I had been saying for a year that they were MI5, so a stronger denial. would be necessary if my guess were truly mistaken. I think the lukewarm denial. was worse than no denial at all, since it confirmed. my guess that the employing agency was indeed. MI5.

Conclusion

It has. been suggested to me that by sending these faxes I could be making trouble for myself; but I dont think. so. My psychiatrist knows what I am doing; indeed I have given him a couple of these articles for. him to cast an. eye over.

I dont want to have to send faxes for the next year, or. the year after that. But that is entirely up to MI5.. If they continue to persecute me then I am forced into defending. myself. The ball is in their court, and it is entirely up to them what they do. If as. I suspect it is their intention that these faxes continue,. if that is what they insist will happen then so be. it.

MI5 Persecution. Update: Friday 31 March, 2000

22,544 Faxes Delivered in Three Years, and. Still No Breakthrough

In the. last three years I have sent at least 22,544 faxes to recipients in the. UK, of which at least 13,974 have gone to Westminster. Last weekend alone I sent 832 completed faxes. to politicians, the media and various others, on the subject of MI5s mistreatment. of me these last ten years.

I believe some of. the recipients know of MI5s actions against me in the last decade; yet they maintain strict "omerta". in fear of the security services persecution. actions being made public.

MI5 Insist that these Faxes. must Continue

Between. September 1999 and mid-January 2000, the persecutors, whoever they might be, mostly left me. alone. I counted only three incidents in almost five months - which is a lower rate than. at any time since June 1990, when this. business started.

By leaving me alone for several months, the "oppressors". were making an implicit assurance that they would continue to leave. me alone in the future. On. 11 January I posted to an internet newsgroup accepting what I saw as their assurance of no further harassment, stating that I. would cease sending these faxes - which is the only. thing I do in my defence - if they continued to. leave me alone. And for two weeks I did indeed refrain from. distributing these articles.

But MI5 acted. in bad faith. From the last week of January until the beginning of. March, they resumed their hate campaign against me with a vengeance. They even put people in my road three. times in February, one instance of which I. recorded. They resumed their normal behaviour of bugging my phone and house, listening to where I would go,. and then placing. people in that location to "aggravate and annoy" me.

What MI5 did in February is plainly a contravention. of the Protection from Harassment Act 1997, since it has caused. me "alarm and distress" as specified in the. Act. But it is a waste of time going to the police with a complaint, since the police have. done, and will do, absolutely nothing. I complained. to the Metropolitan Police in 1995, and they refused to take my complaint. When I complained. again in 1999, the detective sergeant laughed at my complaint, with the words, "It's an absolute load of. rubbish. I don't investigate rubbish. I can't be more blunt or to the point. than that." It is useful to remember that the. Met also treated Stephen Lawrences parents with similar discourtesy; police. prejudices are similar

in my case, so I can take some comfort from. that case and hope that one day I will get a fair. hearing.

MI5 acted in bad. faith, but they also acted with arrogance. They do not care if I send 800 faxes every weekend,. since they know I cannot prove my claims, and the recent Shayler case. shows how weak external oversight is of the secret services. But they. acted with more than arrogance - the MI5 agents actually want my faxes. to continue, they insist that these faxes continue, since my communications give them an excuse. to continue their activities, and continue in the. paid employ of the secret service. Despite their use of diverse proxies over. the last ten years, it is the same MI5 officers. behind the campaign all the time - I have seen one of them on three occasions. in Canada over a period of years, and it is a safe belief that that same. person continues to be paid for his "work" in harassing me in London now. The average cost of an MI5 employee is some 75,000. per annum, so one may infer that their. officers are amply compensated; their insistence that "hostilities" are maintained is. understandable when placed in. this light.

MI5 Persecution. Update: Friday 7 April, 2000

22,544 + 837. = 23,381

Last weekend I delivered another 837 faxes to. politicians and the media on the. subject of the security service conspiracy which has destroyed my life. This brings the total in. the last three years to at least 23,381. These totals. do not include partially delivered faxes.

Some of. the recipients of these faxes must know that what I say is true;. and I hope to motivate those people to acknowledge the reality of the harassment which has followed me for. ten years. It takes much time to transmit these articles, but as OCG MD. Simpson-Wells said to me in 1992, you have to be a good. communicator if you are to succeeed.

Harassment. in February 2000

Following a quiet period of almost five months,. the persecution resumed with a vengeance in late January/February 2000. At this time I was. at home in Clapham, London and was a relatively easy. target for the persecutors.. They have my house bugged, for audio and I believe video in some rooms as well; so they can find out easily. where I will be going on a particular day, and place people in that location to mouth words. of abuse at me. (I know the last sentence sounds like classic paranoia, but. it happens to be true, and. some of the people reading this know it to be true.)

On Friday 11 February 2000 I went shopping in Croydon,. to buy a watch at H. Samuels jewellers in the Whitgift Centre.. While I was there two youths came into the. shop, one of them quietly uttered an obscenity at me, and they immediately walked. out. They showed no interest in the shop.

That Sunday I met with a. friend in Clapham, who started needling me about "do you know anything. about the CIA and FBI?". Rather unsubtle, and worrying considering Ive known this guy for 20. years. From the words and demeanour of. this "friend" and others in February, I saw that the persecutors have again been trying to. separate from me what remains of my social. life.

Incidents. in my Road in February

MI5 very rarely place people in my. home road to harass me, but such was their persecutory fervour in February that. they did so on three separate occasions. On the first such occasion, I. was met my two youths who, grinning, said a deeply offensive sexual obscenity at. me - at which I

coughed. at them, so they called me a "wanker". This incident is safely recorded on minidisc-walkman, but because of. the offensive nature of their abuse the recording. will not be made public.

Another incident very early in the morning of Sunday 20/Feb/2000. occurred outside. my home, following an evening in Croydon with some schoolfriends. Again there were. two youths - for some reason the persecutors always travel in twos or threes, very rarely is there. just one of them - perhaps they need a group. to bolster their courage, perhaps just one of. them wouldnt have the guts to say something unpleasant. One of the youths said quietly, and. bitterly, "shitty, very shitty".

Anyway, in March. there were no further incidents near my house in in my road, and our. neighbours are very well disposed towards us, so let us hope that. the current quiet continues.
